The heating and air conditioning systems in your Honda provide a comfortable driving environment in all weather conditions.

The standard audio system has many features. This section describes those features and how to use them. (If you selected an optional audio system, refer to the operating instructions that came with it.)

On EX and EX-V6 models
Your Honda has an anti-theft audio system that requires a code number to enable it.

The security system helps to discourage vandalism and theft of your Honda.
