California Proposition 65 Warning

**WARNING:** This product contains or emits chemicals known to the state of California to cause cancer and birth defects or other reproductive harm.

Event Data Recorders

This vehicle is equipped with an event data recorder (EDR).

The main purpose of an EDR is to record, in certain crash or near crash-like situations, such as an air bag deployment or hitting a road obstacle, data that will assist in understanding how a vehicle’s systems performed. The EDR is designed to record data related to vehicle dynamics and safety systems for a short period of time, typically 30 seconds or less. The EDR in this vehicle is designed to record such data as:

- How various systems in your vehicle were operating;
- Whether or not the driver and passenger safety belts were buckled/fastened;
- How far (if at all) the driver was depressing the accelerator and/or brake pedal; and,
- How fast the vehicle was traveling.

These data can help provide a better understanding of the circumstances in which crashes and injuries occur. NOTE: EDR data are recorded by your vehicle only if a non-trivial crash situation occurs; no data are recorded by the EDR under normal driving conditions and no personal data (e.g., name, gender, age, and crash location) are recorded. However, other parties, such as law enforcement, could combine the EDR data with the type of personally identifying data routinely acquired during a crash investigation.

To read data recorded by an EDR, special equipment is required, and access to the vehicle or the EDR is needed. In addition to the vehicle manufacturer, other parties, such as law enforcement, that have the special equipment, can read the information if they have access to the vehicle or the EDR.

The data belongs to the vehicle owner and may not be accessed by anyone else except as legally required or with the permission of the vehicle owner.

Service Diagnostic Recorders

This vehicle is equipped with service-related devices that record information about powertrain performance. The data can be used to verify emissions law requirements and/or help technicians diagnose and solve service problems. It may also be combined with data from other sources for research purposes, but it remains confidential.

California Perchlorate Contamination Prevention Act

The airbags, seat belt tensioners, and CR type batteries in this vehicle may contain perchlorate materials - special handling may apply. See [www.dtsc.ca.gov/hazardouswaste/perchlorate/](http://www.dtsc.ca.gov/hazardouswaste/perchlorate/)

As you read this manual, you will find information that is preceded by a **NOTICE** symbol. This information is intended to help you avoid damage to your vehicle, other property, or the environment.
A Few Words About Safety

Your safety, and the safety of others, is very important. And operating this vehicle safely is an important responsibility.

To help you make informed decisions about safety, we have provided operating procedures and other information on labels and in this manual. This information alerts you to potential hazards that could hurt you or others.

Of course, it is not practical or possible to warn you about all the hazards associated with operating or maintaining your vehicle. You must use your own good judgment.

You will find this important safety information in a variety of forms, including:

- **Safety Labels** - on the vehicle.
- **Safety Messages** - preceded by a safety alert symbol △ and one of three signal words: **DANGER**, **WARNING**, or **CAUTION**. These signal words mean:
  - **DANGER** You WILL be KILLED or SERIOUSLY HURT if you don't follow instructions.
  - **WARNING** You CAN be KILLED or SERIOUSLY HURT if you don't follow instructions.
  - **CAUTION** You CAN be HURT if you don't follow instructions.
- **Safety Headings** - such as Important Safety Precautions.
- **Safety Section** - such as Safe Driving.
- **Instructions** - how to use this vehicle correctly and safely.

This entire book is filled with important safety information - please read it carefully.
This owner's manual should be considered a permanent part of the vehicle and should remain with the vehicle when it is sold.

This owner's manual covers all models of your vehicle. You may find descriptions of equipment and features that are not on your particular model.

Images throughout this owner's manual (including the front cover) represent features and equipment that are available on some, but not all, models. Your particular model may not have some of these features.

This owner's manual is for vehicles sold in the United States and Canada.

The information and specifications included in this publication were in effect at the time of approval for printing. Honda Motor Co., Ltd. reserves the right, however, to discontinue or change specifications or design at any time without notice and without incurring any obligation.

Safe Driving  (P 27)

Airbags  (P 41)
- Your vehicle is fitted with airbags to help protect you and
  your passengers during a moderate-to-severe collision.

Child Safety  (P 54)
- All children 12 and younger should be seated in the rear seat.
- Smaller children should be properly restrained in a forward-facing child seat.
- Infants must be properly restrained in a rear-facing child seat.

Exhaust Gas Hazard  (P 67)
- Your vehicle emits dangerous exhaust gases that contain carbon
  monoxide. Do not run the engine in confined spaces where carbon
  monoxide gas can accumulate.

Seat Belts  (P 33)
- Fasten your seat belt and sit upright well
  back in the seat.
- Check that your passengers are wearing
  their seat belts correctly.

Before Driving Checklist  (P 32)
- Before driving, check that the front seats, head restraints,
  steering wheel, and mirrors have been properly adjusted.

Clock P.128

Models with navigation system
The navigation system receives signals from GPS satellites, updating the clock automatically.

Models without navigation system
Models with two displays
The clock in the i-MID is automatically updated along with the audio system's clock display.

Models with one display

1. Press the CLOCK (AUX) button until the displayed time begins flashing.

2. Press the 4 (Hour) or 5 (Minute) button to set the time. Press the 6 (Reset) button to set the time to the nearest hour.

3. Press the CLOCK button again to set the time.

To set the time to the nearest hour:
Press and hold the CLOCK button until the clock display begins to blink, then press the 6 (Reset) button.

Depending on the displayed time, the clock sets forward or backward.
Example:
1:06 will reset to 1:00
1:53 will reset to 2:00

Models with two displays

1. Press the (Home) button, then select Settings.

2. Select Clock/Info, then Clock Adjustment.

3. Touch the ▲▼ icon to adjust the numbers up or down.

4. Select OK.
ENGINE START/STOP
Button*  P.154
Press the button to change the vehicle's power mode.

* Not available on all models
Steering Wheel  \(\text{P.172}\)
- To adjust, pull the adjustment lever towards you, adjust to the desired position, then lock the lever back in place.

Unlocking the Front Doors from the Inside  \(\text{P.137}\)
- Pull either front door inner handle to unlock and open it at the same time.

Tailgate  \(\text{P.140}\)

Models without smart entry system
- With all the doors unlocked, press the tailgate release button and lift open the tailgate.

Models with smart entry system
- Press the tailgate release button to unlock and open the tailgate when you carry the smart entry remote.

Models with power tailgate
- Press the power tailgate button on the driver side control panel or the remote transmitter to open and close the power tailgate.

Power Door Mirrors  \(\text{P.174}\)
- With the ignition switch in ON  II \(\hat{\text{II}}\)\("\), move the selector switch to L or R.
- Push the appropriate edge of the adjustment switch to adjust the mirror.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
**Power Windows**

- With the ignition switch in ON [ii]*, open and close the power windows.
- If the power window lock button is in the off position, each passenger’s window can be opened and closed with its own switch.
- If the power window lock button is in the on position (indicator on), each passenger’s window switch is disabled.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

**Heating and Cooling System**

- Rotate the fan control dial to adjust the fan speed.
- Press the Mode buttons ( / / / ) to select the vents air flows from.
- Rotate the temperature control dial to adjust the temperature.
- Use the button for maximum cool setting.
- Rotate the fan control dial to OFF to turn the system off.
- Press the button to defrost the windshield.

* Not available on all models
Climate Control System*  

- Press the AUTO button to activate the climate control system.
- Press the ON/OFF button to turn the system on or off.
- Press the button to defrost the windshield.

**Models with navigation system**

The climate control system is voice operable. See the Navigation System Manual for complete details.

- **SYNC (Synchronized) Button**
- **(Windshield Defroster) Button**
- **Driver’s Side Temperature Control Dial**
- **Passenger’s Side Temperature Control Dial**
- **AUTO Button**
- **(Recirculation) Button**
- **A/C (Air Conditioning) Button**
- **MODE Control Button**

Air flows from dashboard vents and back of the center console.

Air flows from floor and dashboard vents and back of the center console.

Air flows from floor vents.

Air flows from floor and windshield defroster vents.
Features (P 205)
Audio Remote Controls (P 211)

● + / - Button
Press to adjust the volume up/down.

● SOURCE Button
Models with one display
Press to change the audio mode: FM1/ FM2/AM/CD/AUX.
Models with two displays
Press to change the audio mode: FM/AM/ SiriusXM®/CD/USB/iPod/Pandora®/Aha™/ Apps/Bluetooth® Audio/AUX HDMI.

● / Button
Radio: Press to change the preset station. Press and hold to select the next or previous strong station.
CD/USB device:
Press to skip to the beginning of the next song or return to the beginning of the current song. Press and hold to change a folder.

Audio System (P 206)
For navigation system operation (See the Navigation System Manual

Models with one display

* Not available on all models
Models with two displays

Press the (Eject/CLOSE) button to open the screen.

- Press the (Eject/CLOSE) button to return the screen to the upright position.

Audio/Information Screen

- Press the (Eject/CLOSE) button to open the screen.
Driving  ➤P. 347

Continuously Variable Transmission  ➤P. 368

● Shift to P and depress the brake pedal when starting the engine.

● Shifting

P  
Park  
Turn off or start the engine. Transmission is locked.

R  
Reverse  
Used when reversing

N  
Neutral  
Transmission is not locked.

D  
Drive  
Normal driving.

S  
Drive (S)  
• Better acceleration  
• Used to increase engine braking  
• Used when going up or down hills

L  
Low  
• Used to further increase engine braking  
• Used when going up or down hills

Release Button  
Shift Lever

Depress the brake pedal and press the release button to move out of P.

Press the release button to move the shift lever.

Move the shift lever without pressing the release button.
**VSA® OFF Button [P 397]**
- The vehicle stability assist (VSA®) system helps stabilize the vehicle during cornering, and helps maintain traction while accelerating on loose or slippery road surfaces.
- VSA® comes on automatically every time you start the engine.
- To turn VSA® on or off, press and hold the button until you hear a beep.

**Collision Mitigation Braking System™ (CMBS™) OFF Button***
- When a possible collision is likely unavoidable, the CMBS™ can help you to reduce the vehicle speed and the severity of the collision.
- To turn the CMBS™ on or off, press and hold the button until you hear a beep.

**Cruise Control* [P 371]**
- Cruise control allows you to maintain a set speed without keeping your foot on the accelerator pedal.
- To use cruise control, press the CRUISE button, then press –/SET once you have achieved the desired speed (above 25 mph or 40 km/h).

**Tire Pressure Monitoring System (TPMS) [P 401]**
- Detects a change in tire conditions and overall dimensions due to decrease in tire pressures.
- The TPMS is turned on automatically every time you start the engine.
- A calibration procedure must be performed when certain conditions arise.
**Refueling**

**Fuel recommendation:** Unleaded gasoline with a pump octane number 87 or higher required

**Fuel tank capacity:** 15.3 US gal (58 L)

1. Pull the fuel fill door release handle.

2. Turn the fuel fill cap slowly to remove the cap.

3. Place the cap in the holder on the fuel fill door.

4. After refueling, screw the cap back on until it clicks at least once.

*Not available on all models*
Maintenance  

Under the Hood  
- Check engine oil, engine coolant, and windshield washer fluid. Add when necessary.  
- Check brake fluid. 
- Check the battery condition monthly. 

1 Pull the hood release handle under the corner of the dashboard. 

2 Locate the hood latch lever, pull the lever up, and lift up the hood. 

3 When finished, close the hood and make sure it is firmly locked in place. 

Wiper Blades  
- Replace blades if they leave streaks across the windshield. 

Tires  
- Inspect tires and wheels regularly. 
- Check tire pressures regularly. 
- Install snow tires for winter driving. 

Lights  
- Inspect all lights regularly.
Handling the Unexpected

Flat Tire  
- Park in a safe location and replace the flat tire with the compact spare tire in the cargo area.

Engine Won't Start  
- If the battery is dead, jump start using a booster battery.

Overheating  
- Park in a safe location. If you do not see steam under the hood, open the hood, and let the engine cool down.

Indicators Come On  
- Identify the indicator and consult the owner's manual.

Blown Fuse  
- Check for a blown fuse if an electrical device does not operate.

Emergency Towing  
- Call a professional towing service if you need to tow your vehicle.
What to Do If

Q The ignition switch does not turn from 0 to 1*1. Why?

A • The steering wheel may be locked. Models without smart entry system
• Try to turn the steering wheel left and right while turning the ignition key. Models with smart entry system*2
• Move the steering wheel left and right while pressing the ENGINE START/STOP button at the same time.

Q The ignition switch does not turn from 1 to 0*1 and I cannot remove the key. Why?

A The shift lever should be moved to P.

Q Why does the brake pedal pulsate slightly when applying the brakes?

A This can occur when the ABS activates, and does not indicate a problem. Apply firm, steady pressure on the brake pedal. Never pump the brake pedal.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
*2: Canadian models
The rear door cannot be opened from inside the vehicle. Why?

Check if the childproof lock is in the lock position. If so, open the rear door with the outside door handle. To cancel this function, push the lever to the unlock position.

Why do the doors lock after I unlocked the doors using a remote transmitter?

If you do not open the doors within 30 seconds, the doors are relocked automatically for security.

Why does the beeper sound when I open the driver's door?

The beeper sounds when:
- The key is left in the ignition switch.*
- The power mode* is in ACCESSORY.
- The exterior lights are left on.

* Not available on all models
**Why does the beeper sound when I start driving?**

**A** The beeper sounds when:
- Driver and/or front passenger are not wearing their seat belts.
- The parking brake lever is not fully released.

**Why do I hear a screeching sound when I apply the brake pedal?**

**A** The brake pads may need to be replaced. Have your vehicle inspected by a dealer.

Safe Driving

The following pages explain your vehicle’s safety features and how to use them properly. The safety precautions below are ones that we consider to be among the most important.

**Important Safety Precautions**

■ **Always wear your seat belt**
A seat belt is your best protection in all types of collisions. Airbags are designed to supplement seat belts, not replace them. So even though your vehicle is equipped with airbags, make sure you and your passengers always wear your seat belts, and wear them properly.

■ **Restrain all children**
Children ages 12 and under should ride properly restrained in a back seat, not the front seat. Infants and small children should be restrained in a child seat. Larger children should use a booster seat and a lap/shoulder seat belt until they can use the belt properly without a booster seat.

■ **Be aware of airbag hazards**
While airbags can save lives, they can cause serious or fatal injuries to occupants who sit too close to them, or are not properly restrained. Infants, young children, and short adults are at the greatest risk. Be sure to follow all instructions and warnings in this manual.

■ **Don’t drink and drive**
Alcohol and driving don’t mix. Even one drink can reduce your ability to respond to changing conditions, and your reaction time gets worse with every additional drink. So don’t drink and drive, and don’t let your friends drink and drive, either.
Pay appropriate attention to the task of driving safely
Engaging in cell phone conversation or other activities that keep you from paying close attention to the road, other vehicles, and pedestrians could lead to a crash. Remember, situations can change quickly, and only you can decide when it is safe to divert some attention away from driving.

Control your speed
Excessive speed is a major factor in crash injuries and deaths. Generally, the higher the speed, the greater the risk, but serious injuries can also occur at lower speeds. Never drive faster than is safe for current conditions, regardless of the maximum speed posted.

Keep your vehicle in safe condition
Having a tire blowout or a mechanical failure can be extremely hazardous. To reduce the possibility of such problems, check your tire pressures and condition frequently, and perform all regularly scheduled maintenance.
For Safe Driving

Important Handling Information

Your vehicle has higher ground clearance than a passenger vehicle designed for use only on pavement. Higher ground clearance has many advantages for off-highway driving. It allows you to travel over bumps, obstacles, and rough terrain. It also provides good visibility so you can anticipate problems earlier.

These advantages come at some cost. Because your vehicle is taller and rides higher off the ground, it has a higher center gravity making it more susceptible to tripping or roll over if you make abrupt turns. Utility vehicles have a significantly higher rollover rate than other types of vehicles. In a rollover crash, an unbelted person is significantly more likely to die than a person wearing a seat belt. As a reminder, make sure you and your passengers always wear seat belts.

For information on how to reduce the risk of rollover, read:
- Precautions While Driving P. 366
- Off-Highway Driving Guidelines P. 358

Failure to operate your vehicle correctly might result in a crash or a rollover.
Your Vehicle's Safety Features

Your vehicle is equipped with many features that work together to help protect you and your passengers during a crash.

Some features do not require any action on your part. These include a strong steel framework that forms a safety cage around the passenger compartment, front and rear crush zones, a collapsible steering column, and tensioners that tighten the front seat belts in a sufficient crash.

However, you and your passengers cannot take full advantage of these features unless you remain seated in the correct position and always wear your seat belts. In fact, some safety features can contribute to injuries if they are not used properly.

The following checklist will help you take an active role in protecting yourself and your passengers.
For Safe Driving

For the safety of you and your passengers, make a habit of checking these items each time before you drive.

- After everyone has entered the vehicle, be sure all doors and the tailgate are closed and locked. Locking the doors and the tailgate helps prevent an occupant from being ejected and an outsider from unexpectedly opening a door or the tailgate.
  
  **Locking/Unlocking the Doors from the Inside** P. 137

- Adjust your seat to a position suitable for driving. Be sure the front seats are adjusted as far to the rear as possible while allowing the driver to control the vehicle. Sitting too close to a front airbag can result in serious or fatal injury in a crash.
  
  **Adjusting the Seats** P. 175

- Adjust head restraints to the proper position. Head restraints are most effective when the center of the head restraint aligns with the center of your head. Taller persons should adjust their head restraint to the highest position.
  
  **Adjusting the Head Restraints** P. 178

- Always wear your seat belt, and make sure you wear it properly. Confirm that any passengers are properly belted as well.
  
  **Fastening a Seat Belt** P. 36

- Protect children by using seat belts or child seats according to a child’s age, height and weight.
  
  **Child Safety** P. 54

### Safety Checklist

For the safety of you and your passengers, make a habit of checking these items each time before you drive.

- After everyone has entered the vehicle, be sure all doors and the tailgate are closed and locked. Locking the doors and the tailgate helps prevent an occupant from being ejected and an outsider from unexpectedly opening a door or the tailgate.

  **Locking/Unlocking the Doors from the Inside** P. 137

- Adjust your seat to a position suitable for driving. Be sure the front seats are adjusted as far to the rear as possible while allowing the driver to control the vehicle. Sitting too close to a front airbag can result in serious or fatal injury in a crash.

  **Adjusting the Seats** P. 175

- Adjust head restraints to the proper position. Head restraints are most effective when the center of the head restraint aligns with the center of your head. Taller persons should adjust their head restraint to the highest position.

Safe Driving

Seat Belts

About Your Seat Belts

Seat belts are the single most effective safety device because they keep you connected to the vehicle so that you can take advantage of many built-in safety features. They also help keep you from being thrown against the inside of the vehicle, against other passengers, or out of the vehicle. When worn properly, seat belts also keep your body properly positioned in a crash so that you can take full advantage of the additional protection provided by the airbags.

In addition, seat belts help protect you in almost every type of crash, including:
- frontal impacts
- side impacts
- rear impacts
- rollovers

Lap/shoulder seat belts
All five seating positions are equipped with lap/shoulder seat belts with emergency locking retractors. In normal driving the retractor lets you move freely while keeping some tension on the belt. During a collision or sudden stop the retractor locks to restrain your body. The rear seat belts also have a lockable retractor for use with child seats.

Installing a Child Seat with a Lap/Shoulder Seat Belt P. 62

WARNING
Not wearing a seat belt properly increases the chance of serious injury or death in a crash, even though your vehicle has airbags.

Be sure you and your passengers always wear seat belts and wear them properly.

Seat belts cannot completely protect you in every crash. But in most cases, seat belts can reduce your risk of serious injury.

Most states and all Canadian provinces and territories require you to wear seat belts.

The emergency locking retractor may lock if you lean forward too quickly. Slower movements will allow the belt to extend fully without locking.
Proper use of seat belts
Follow these guidelines for proper use:
• All occupants should sit upright, well back in the seat, and remain in that position for the duration of the trip. Slouching and leaning reduce the effectiveness of the belt and can increase the chance of serious injury in a crash.
• Never place the shoulder part of a lap/shoulder seat belt under your arm or behind your back. This could cause very serious injuries in a crash.
• Two people should never use the same seat belt. If they do, they could be very seriously injured in a crash.
• Do not put any accessories on the seat belts. Devices intended to improve comfort or reposition the shoulder part of a seat belt can reduce the protective capability and increase the chance of serious injury in a crash.

Seat Belt Reminder
Your vehicle monitors front seat belt use. If the ignition switch is turned to ON before the driver’s seat belt is fastened, the beeper will sound and the indicator will blink. If the driver does not fasten the belt before the beeper stops, the indicator will remain on.

The beeper will also periodically sound and the indicator will blink while driving until the driver’s and front passenger’s seat belts are fastened.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

About Your Seat Belts
If a rear seat passenger moves around and extends the seat belt, the lockable retractor may activate. If this happens, release the retractor by unfastening the seat belt and allow the belt to retract completely. Then refasten the belt.

Seat Belt Reminder
The indicator will also come on if a front passenger does not fasten their seat belt within six seconds after the ignition switch is turned to ON.

When no one is sitting in the front passenger’s seat, the indicator will not come on and the beeper will not sound.
The indicator also may not come on and the beeper may not sound when the occupant is not heavy enough to trigger the weight sensor. Such occupants (e.g., infants and smaller children) should be moved to the rear seat as a deploying front airbag likely will injure or kill them.

Protecting Child Passengers P. 54
### Automatic Seat Belt Tensioners

The front seats are equipped with automatic seat belt tensioners to enhance safety.

The tensioners automatically tighten the front seat belts during a moderate-to-severe frontal collision, sometimes even if the collision is not severe enough to inflate the front airbags.

---

**Automatic Seat Belt Tensioners**

The seat belt tensioners can only operate once. If a tensioner is activated, the SRS indicator will come on. Have a dealer replace the tensioner and thoroughly inspect the seat belt system as it may not offer protection in a subsequent crash.

During a moderate-to-severe side impact, the tensioner on that side of the vehicle also activates.
Fastening a Seat Belt

After adjusting a front seat to the proper position, and while sitting upright and well back in the seat:

1. Pull the seat belt out slowly.

2. Insert the latch plate into the buckle, then tug on the belt to make sure the buckle is secure.

- Make sure that the belt is not twisted or caught on anything.

No one should sit in a seat with an inoperative seat belt or one that does not appear to be working correctly. Using a seat belt that is not working properly may not protect the occupant in a crash. Have a dealer check the belt as soon as possible.

Never insert any foreign objects into the buckle or retractor mechanism.
3. Position the lap part of the belt as low as possible across your hips, then pull up on the shoulder part of the belt so the lap part fits snugly. This lets your strong pelvic bones take the force of a crash and reduces the chance of internal injuries.

4. If necessary, pull up on the belt again to remove any slack, then check that the belt rests across the center of your chest and over your shoulder. This spreads the forces of a crash over the strongest bones in your upper body.

**Adjusting the Shoulder Anchor**

The front seats have adjustable shoulder anchors to accommodate taller and shorter occupants.

1. Move the anchor up and down while holding the release buttons.
2. Position the anchor so that the belt rests across the center of your chest and over your shoulder.

**WARNING**

Improperly positioning the seat belts can cause serious injury or death in a crash.

Make sure all seat belts are properly positioned before driving.

To release the belt, push the red PRESS button then guide the belt by hand until it has retracted completely.

When exiting the vehicle, be sure the belt is out of the way and will not get caught by closing the door.

Adjusting the Shoulder Anchor

The shoulder anchor height can be adjusted to four levels. If the belt contacts your neck, lower the height one level at a time.

After an adjustment, make sure that the shoulder anchor position is secure.
Seat Belts

Fastening a Seat Belt

1. Pull out the seat belt’s small latch plate and the latch plate from each holding slot in the ceiling.

2. Line up the triangle marks on the small latch plate and anchor buckle. Make sure the seat belt is not twisted. Attach the belt to the anchor buckle.

3. Insert the latch plate into the buckle. Properly fasten the seat belt the same way you fasten the lap/shoulder seat belt.

Seat Belt with Detachable Anchor

1. Using the seat belt with the detachable anchor unlatched increases the chance of serious injury or death in a crash.

2. Before using the seat belt, make sure the detachable anchor is correctly latched.

To unlatch the detachable anchor, insert the latch plate into the slot on the side of the anchor buckle.

WARNING
If you are pregnant, the best way to protect yourself and your unborn child when driving or riding in a vehicle is to always wear a seat belt and keep the lap part of the belt as low as possible across the hips.

Advice for Pregnant Women

Each time you have a checkup, ask your doctor if it is okay for you to drive.

To reduce the risk of injuries to both you and your unborn child that can be caused by an inflating front airbag:

- When driving, sit upright and adjust the seat as far back as possible while allowing full control of the vehicle.
- When sitting in the front passenger’s seat, adjust the seat as far back as possible.

Wear the shoulder belt across the chest avoiding the abdomen.

Wear the lap part of the belt as low as possible across the hips.
Seat Belt Inspection

Regularly check the condition of your seat belts as follows:

- Pull each belt out fully, and look for frays, cuts, burns, and wear.
- Check that the latches work smoothly and the belts retract easily.
- If a belt does not retract easily, cleaning the belt may correct the problem. Only use a mild soap and warm water. Do not use bleach or cleaning solvents. Make sure the belt is completely dry before allowing it to retract.

Any belt that is not in good condition or working properly will not provide proper protection and should be replaced as soon as possible.

A belt that has been worn during a crash may not provide the same level of protection in a subsequent crash. Have your seat belts inspected by a dealer after any collision.

WARNING

Not checking or maintaining seat belts can result in serious injury or death if the seat belts do not work properly when needed.

Check your seat belts regularly and have any problem corrected as soon as possible.
Airbags

Airbag System Components

Continued
The front, front side, and side curtain airbags are deployed according to the direction and severity of impact. Both side curtain airbags are deployed in a rollover. The airbag system includes:

1. Two SRS (Supplemental Restraint System) front airbags. The driver’s airbag is stored in the center of the steering wheel; the front passenger’s airbag is stored in the dashboard. Both are marked SRS AIRBAG.

2. Two side airbags, one for the driver and one for a front passenger. The airbags are stored in the outer edges of the seatbacks. Both are marked SIDE AIRBAG.

3. Two side curtain airbags, one for each side of the vehicle. The airbags are stored in the ceiling, above the side windows. The front and rear pillars are marked SIDE CURTAIN AIRBAG.

4. An electronic control unit that continually monitors and can record information about the sensors, the airbag activators, the seat belt tensioners, and driver and front passenger seat belt use when the ignition switch is in ON [11].

5. Automatic front seat belt tensioners. The driver’s and front passenger’s seat belts incorporate sensors that detect whether or not they are fastened.

6. A driver’s seat position sensor. If the seat is too far forward, the airbag will inflate with less force.

7. Weight sensors in the front passenger’s seat. The front passenger’s airbag will be turned off if the weight on the seat is 65 lbs (29 kg) or less (the weight of an infant or small child).

8. Impact sensors that can detect a moderate-to-severe front or side impact.

9. An indicator on the dashboard that alerts you that the front passenger’s front airbag has been turned off.

10. An indicator on the instrument panel that alerts you to a possible problem with your airbag system or seat belt tensioners.

11. Safing Sensor

12. A rollover sensor that detects whether the vehicle is about to roll over.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Important Facts About Your Airbags

Airbags can pose serious hazards. To do their job, airbags must inflate with tremendous force. So, while airbags help save lives, they can cause burns, bruises, and other minor injuries, sometimes even fatal ones if occupants are not wearing their seat belts properly and sitting correctly.

**What you should do:** Always wear your seat belt properly, and sit upright and as far back from the steering wheel as possible while allowing full control of the vehicle. A front passenger should move their seat as far back from the dashboard as possible.

Remember, however, that no safety system can prevent all injuries or deaths that can occur in a severe crash, even when seat belts are properly worn and the airbags deploy.

**Do not place hard or sharp objects between yourself and a front airbag.** Carrying hard or sharp objects on your lap, or driving with a pipe or other sharp object in your mouth, can result in injuries if your front airbag inflates.

**Do not attach or place objects on the front airbag covers.** Objects on the covers marked SRS AIRBAG could interfere with the proper operation of the airbags or be propelled inside the vehicle and hurt someone if the airbags inflate.

**Do not attempt to deactivate your airbags.** Together, airbags and seat belts provide the best protection. When driving, keep hands and arms out of the deployment path of the front airbag by holding each side of the steering wheel. Do not cross an arm over the airbag cover.
Types of Airbags

Your vehicle is equipped with three types of airbags:
• **Front airbags**: Airbags in front of the driver's and front passenger's seats.
• **Side airbags**: Airbags in the driver's and front passenger's seat-backs.
• **Side curtain airbags**: Airbags above the side windows.

Each is discussed in the following pages.

Front Airbags (SRS)
The front SRS airbags inflate in a moderate-to-severe frontal collision to help protect the head and chest of the driver and/or front passenger.

**SRS** (Supplemental Restraint System) indicates that the airbags are designed to supplement seat belts, not replace them. Seat belts are the occupant's primary restraint system.

**Housing Locations**
The front airbags are housed in the center of the steering wheel for the driver, and in the dashboard for the front passenger. Both airbags are marked **SRS AIRBAG**.
**Operation**

Front airbags are designed to inflate during moderate-to-severe frontal collisions. When the vehicle decelerates suddenly, the sensors send information to the control unit which signals one or both front airbags to inflate.

A frontal collision can be either head-on or angled between two vehicles, or when a vehicle crashes into a stationary object, such as a concrete wall.

**How the Front Airbags Work**

While your seat belt restrains your torso, the front airbag provides supplemental protection for your head and chest.

The front airbags deflate immediately so that they won’t interfere with the driver’s visibility or the ability to steer or operate other controls.

The total time for inflation and deflation is so fast that most occupants are not aware that the airbags deployed until they see them lying in front of them.
Airbags

Front Airbags (SRS)

- **When front airbags should not deploy**

  **Minor frontal crashes**: Front airbags were designed to supplement seat belts and help save lives, not to prevent minor scrapes, or even broken bones that might occur during a less than moderate-to-severe frontal crash.

  **Side impacts**: Front airbags can provide protection when a sudden deceleration causes a driver or front passenger to move toward the front of the vehicle. Side airbags and side curtain airbags have been specifically designed to help reduce the severity of injuries that can occur during a moderate-to-severe side impact which can cause the driver or passenger to move toward the side of the vehicle.

  **Rear impacts**: Head restraints and seat belts are your best protection during a rear impact. Front airbags cannot provide any significant protection and are not designed to deploy in such collisions.

  **Rollovers**: Seat belts and, in vehicles equipped with a rollover sensor, side airbags and side curtain airbags offer the best protection in a rollover. Because front airbags could provide little if any protection, they are not designed to deploy during a rollover.

- **When front airbags deploy with little or no visible damage**

  Because the airbag system senses sudden deceleration, a strong impact to the vehicle framework or suspension might cause one or more of the airbags to deploy. Examples include running into a curb, the edge of a hole, or other low fixed object that causes a sudden deceleration in the vehicle chassis. Since the impact is underneath the vehicle, damage may not be readily apparent.

- **When front airbags may not deploy, even though exterior damage appears severe**

  Since crushable body parts absorb crash energy during an impact, the amount of visible damage does not always indicate proper airbag operation. In fact, some collisions can result in severe damage but no airbag deployment because the airbags would not have been needed or would not have provided protection even if they had deployed.
Advanced Airbags

Your front airbags have advanced features to help reduce the likelihood of airbag related injuries to smaller occupants.

The driver’s advanced front airbag system includes a seat position sensor.

If the seat is too far forward, the airbag inflates with less force, regardless of the severity of the impact.

The passenger’s advanced front airbag system has weight sensors.

Although we recommend against carrying an infant or small child in front, if the sensors detect the weight of a child (up to about 65 lbs or 29 kg), the system will automatically turn off the passenger’s front airbag.

Advanced Airbags

If there is a problem with the driver’s seat position sensor, the SRS indicator will come on and the airbag will inflate with full (normal) force, regardless of the driver’s seating position.

For both advanced front airbags to work properly:
• Do not spill any liquid on or under the seats.
• Do not put any object under the passenger’s seat.
• Make sure any objects are positioned properly on the floor. Improperly positioned objects can interfere with the advanced airbag sensors.
• All occupants should sit upright and wear their seat belts properly.
• Do not place any cover over the passenger side dashboard.
Side Airbags

The side airbags help protect the torso and pelvis of the driver or a front passenger during a moderate-to-severe side impact.

**Housing Locations**

The side airbags are housed in the outside edge of the driver's and passenger's seatbacks.

Both are marked **SIDE AIRBAG**.

**Operation**

When the sensors detect a moderate-to-severe side impact, the control unit signals the side airbag on the impact side to immediately inflate.

Do not let the front passenger lean sideways with their head in the deployment path of the side airbag. An inflating side airbag can strike with strong force and seriously injure the passenger.

Do not attach accessories on or near the side airbags. They can interfere with the proper operation of the airbags, or hurt someone if an airbag inflates.

If the impact is on the passenger's side, the airbag may not deploy when there is no passenger in the front passenger seat.

Do not cover or replace the front seat-back covers without consulting a dealer. Improperly replacing or covering front seat-back covers can prevent your side airbags from properly deploying during a side impact.
■ When a side airbag deploys with little or no visible damage
Because the airbag system senses sudden acceleration, a strong impact to the side
of the vehicle’s framework can cause a side airbag to deploy. In such cases, there
may be little or no damage, but the side impact sensors detected a severe enough
impact to deploy the airbag.

■ When a side airbag may not deploy, even though visible damage appears
severe
It is possible for a side airbag to not deploy during an impact that results in
apparently severe damage. This can occur when the point of impact was toward the
far front or rear of the vehicle, or when the vehicle’s crushable body parts absorbed
most of the crash energy. In either case, the side airbag would not have been
needed nor provided protection even if it had deployed.
Side Curtain Airbags

The side curtain airbags help protect the heads of the driver and passengers in outer seating positions during a moderate-to-severe side impact. The side curtain airbags equipped in this vehicle are also designed to help reduce the likelihood of partial and complete ejection of vehicle occupants through side windows in crashes, particularly rollover crashes.

**Housing Locations**

The side curtain airbags are located in the ceiling above the side windows on both sides of the vehicle.

**Operation**

The side curtain airbag is designed to deploy in a rollover or a moderate-to-severe side impact.
Continued

When side curtain airbags deploy in a frontal collision
One or both side curtain airbags may inflate in a moderate-to-severe angled frontal collision.
In this case, the side curtain airbags will deploy slightly after the front airbags.

Airbag System Indicators
If a problem occurs in the airbag system, the SRS indicator will come on.

Supplemental Restraint System (SRS) Indicator
When the ignition switch is turned to ON [1]*
The indicator comes on for a few seconds, then goes off. This tells you the system is working properly.

If the indicator comes on at any other time, or does not come on at all, have the system checked by a dealer as soon as possible. If you don’t, your airbags and seat belt tensioners may not work properly when they are needed.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
* Not available on all models

---

WARNING
Ignoring the SRS indicator can result in serious injury or death if the airbag systems or tensioners do not work properly.

Have your vehicle checked by a dealer as soon as possible if the SRS indicator alerts you to a possible problem.
Airbag System Indicators

When the passenger airbag off indicator comes on
The indicator comes on to alert you that the passenger’s front airbag has been turned off. This occurs when the weight sensors detect 65 lbs (29 kg) or less, the weight of an infant or small child, on the seat.

Infants and small children should always ride properly restrained in a back seat. Child Safety P. 54

Objects placed on the seat can also cause the indicator to come on.

If the front passenger seat is empty, the passenger’s front airbag will not deploy and the indicator will not come on.

If none of these conditions exist, have your vehicle checked by a dealer as soon as possible.

The passenger airbag off indicator may come on and goes off repeatedly if the total weight on the seat is near the airbag cutoff threshold.
Airbag Care

You do not need to, and should not, perform any maintenance on or replace any airbag system components yourself. However, you should have your vehicle inspected by a dealer in the following situations:

■ When the airbags have deployed
If an airbag has inflated, the control unit and other related parts must be replaced. Similarly, once an automatic seat belt tensioner has been activated, it must be replaced.

■ When the vehicle has been in a moderate-to-severe collision
Even if the airbags did not inflate, have your dealer inspect the following: the driver’s seat position sensor, weight sensors in the passenger’s seat, front seat belt tensioners, and each seat belt that was worn during the crash.

■ Do not remove or modify a front seat without consulting a dealer
This would likely disable the driver’s seat position sensor or the weight sensors in the passenger’s seat. If it is necessary to remove or modify a front seat to accommodate a person with disabilities, contact a Honda dealer, or for U.S. vehicles, American Honda Automobile Customer Service at 800-999-1009 and for Canadian vehicles, Honda Canada Customer Relations at 888-9-HONDA-9.

We recommend against the use of salvaged airbag system components, including the airbag, tensioners, sensors, and control unit.
Child Safety

Protecting Child Passengers

Each year, many children are injured or killed in vehicle crashes because they are either unrestrained or not properly restrained. In fact, vehicle accidents are the number one cause of death of children ages 12 and under.

To reduce the number of child deaths and injuries, every state, Canadian province and territory requires that infants and children be properly restrained when they ride in a vehicle.

Children should sit properly restrained in a rear seat. This is because:

- An inflating front or side airbag can injure or kill a child sitting in the front seat.
- A child in the front seat is more likely to interfere with the driver's ability to safely control the vehicle.
- Statistics show that children of all sizes and ages are safer when they are properly restrained in a rear seat.

WARNING

Children who are unrestrained or improperly restrained can be seriously injured or killed in a crash.

Any child too small for a seat belt should be properly restrained in a child seat. A larger child should be properly restrained with a seat belt, using a booster seat if necessary.

The National Highway Traffic Safety Administration and Transport Canada recommend that all children ages 12 and under be properly restrained in a rear seat. Some states or provinces/territories have laws restricting where children may ride.
Any child who is too small to wear a seat belt correctly must be restrained in an approved child seat that is properly secured to the vehicle using either the lap belt portion of the lap/shoulder belt or the lower anchors of the LATCH system.

Never hold a child on your lap because it is impossible to protect them in the event of a collision.

Never put a seat belt over yourself and a child. During a crash, the belt would likely press deep into the child and cause serious or fatal injuries.

Never let two children use the same seat belt. Both children could be very seriously injured in a crash.

Do not allow children to operate the doors, windows or seat adjustments.

Do not leave children in the vehicle unattended, especially in hot weather when the inside of the vehicle can get hot enough to kill them. They could also activate vehicle controls causing it to move unexpectedly.

WARNING
Allowing a child to play with a seat belt or wrap one around their neck can result in serious injury or death.

Instruct children not to play with any seat belt and make sure any unused seat belt a child can reach is buckled, fully retracted, and locked.

To deactivate a lockable retractor, release the buckle and allow the seat belt to wind up all the way.

To remind you of the passenger’s front airbag hazards and child safety, your vehicle warning came with a label on the dashboard (U.S. models) and has labels on the front visors. Please read and follow the instructions on these labels.

Safety Labels P. 68
Safety of Infants and Small Children

Protecting Infants

An infant must be properly restrained in a rear-facing, reclining child seat until the infant reaches the seat manufacturer’s weight or height limit for the seat, and the infant is at least one year old.

Positioning a rear-facing child seat
Child seats must be placed and secured in a rear seating position.

When properly installed, a rear-facing child seat may prevent the driver or a front passenger from moving their seat all the way back, or from locking their seat-back in the desired position.

It can also interfere with proper operation of the passenger’s advanced front airbag system.

**WARNING**

Placing a rear-facing child seat in the front seat can result in serious injury or death during a crash.

Always place a rear-facing child seat in the rear seat, not the front.

Rear-facing child seats should never be installed in a forward facing position.

Always refer to the child seat manufacturer’s instructions before installation.

If this occurs, we recommend that you install the child seat directly behind the front passenger’s seat, move the seat as far forward as needed, and leave it unoccupied. Or, you may wish to get a smaller rear-facing child seat.
If a child is at least one year old and within the weight range indicated by the child seat manufacturer, the child should be properly restrained in a firmly secured forward-facing child seat.

**Forward-facing child seat placement**
We strongly recommend placing a forward-facing child seat in a rear seating position.

Placing a forward-facing child seat in the front seat can be hazardous, even with advanced front airbags that automatically turn the passenger’s front airbag off. A rear seat is the safest place for a child.

**WARNING**
Placing a forward-facing child seat in the front seat can result in serious injury or death if the front airbag inflates.

If you must place a forward-facing child seat in front, move the vehicle seat as far back as possible, and properly restrain the child.

Educate yourself about the laws and regulations regarding child seat use where you are driving, and follow the child seat manufacturer’s instructions.

Many experts recommend use of a rear-facing seat for a child up to two years old if the child’s height and weight are appropriate for a rear-facing seat.

---

Continued
Selecting a Child Seat

Most child seats are LATCH-compatible (Lower Anchors and Tethers for CHildren). Some have a rigid-type connector while others have a flexible-type connector. Both are equally easy to use. Some existing and previously owned child seats can only be installed using the seat belt. Whichever type you choose, follow the child seat manufacturer’s use and care instructions as well as the instructions in this manual. Proper installation is key to maximizing your child’s safety.

In seating positions and vehicles not equipped with LATCH, a LATCH-compatible child seat can be installed using the seat belt and a top tether for added security. This is because all child seats are required to be designed so that they can be secured with a lap belt or the lap part of a lap/shoulder belt. In addition, the child seat manufacturer may advise that a seat belt be used to attach a LATCH-compatible seat once a child reaches a specified weight. Please read the child seat owner’s manual for proper installation instructions.

Important consideration when selecting a child seat

Make sure the child seat meets the following three requirements:

- The child seat is the correct type and size for the child.
- The child seat is the correct type for the seating position.

Installation of a LATCH-compatible child seat is simple.

LATCH-compatible child seats have been developed to simplify the installation process and reduce the likelihood of injuries caused by incorrect installation.
Installing a LATCH-Compatible Child Seat

A LATCH-compatible child seat can be installed in rear seats. A child seat is attached to the lower anchors with either the rigid or flexible type of connectors.

1. Locate the lower anchors under the marks.

2. Place the child seat on the vehicle seat then attach the child seat to the lower anchors according to the instructions that came with the child seat.

When installing the child seat, make sure that the lower anchors are not obstructed by the seat belt or any other object.

Continued
Installing a LATCH-Compatible Child Seat

For your child's safety, when using a child seat installed using the LATCH system, make sure that the child seat is properly secured to the vehicle. A child seat that is not properly secured will not adequately protect a child in a crash and may cause injury to the child or other vehicle occupants.

1. Put the head restraint to its upper-most position, then route the tether strap between the head restraint legs, and secure the tether strap hook onto the anchor.
2. Go to step 7.

3. Lower the head restraint to its lowest position.
4. Open the anchor cover.
5. Route the tether strap over the head restraint. Make sure the strap is not twisted.
6. Secure the tether strap hook onto the anchor.

**All models**
7. Tighten the tether strap as instructed by the child seat manufacturer.
8. Make sure the child seat is firmly secured by rocking it forward and back and side to side; little movement should be felt.
9. Make sure any unused seat belt that a child can reach is buckled, the lockable retractor is activated, and the belt is fully retracted and locked.
### Installing a Child Seat with a Lap/Shoulder Seat Belt

1. Place the child seat on the vehicle seat.
2. Route the seat belt through the child seat according to the seat manufacturer’s instructions, and insert the latch plate into the buckle.
   - Insert the latch plate fully until it clicks.
3. Slowly pull the shoulder part of the belt all the way out until it stops. This activates the lockable retractor.
4. Let the seat belt completely wind up into the retractor, then try to pull it out to make sure the retractor is locked.
   - If you are able to pull the shoulder belt out, the lockable retractor is not activated. Pull the seat belt all the way out, and repeat steps 3 – 4.
5. Grab the shoulder part of the seat belt near the buckle, and pull up to remove any slack from the lap part of the belt.
   - When doing this, place your weight on the child seat and push it into the vehicle seat.

A child seat that is not properly secured will not adequately protect a child in a crash and may cause injury to the child or other vehicle occupants.
6. Make sure the child seat is firmly secured by rocking it forward and back and side to side; little movement should be felt.

7. Make sure any unused seat belt that a child can reach is buckled, the lockable retractor is activated, and the belt is fully retracted and locked.

---

**Adding Security with a Tether**

Two tether anchorage points are provided behind the rear outer seating positions and one in the ceiling for the rear center. A child seat that is installed with a seat belt and comes with a tether can use the tether for additional security.

---

**Installing a Child Seat with a Lap/Shoulder Seat Belt**

To deactivate a lockable retractor, release the buckle and allow the seat belt to wind up all the way.

---

**Adding Security with a Tether**

Since a tether can provide additional security to the lap/shoulder seat belt installation, we recommend using a tether whenever one is available.
Child Safety  Safety of Infants and Small Children

Safe Driving

■ Using an outer anchor
1. Put the head restraint to its upper-most position, then route the tether strap through the head restraint legs. Make sure the strap is not twisted.
2. Secure the tether strap hook onto the anchor.
3. Tighten the tether strap as instructed by the child seat manufacturer.

■ Using the center anchor
1. Lower the head restraint to its lowest position.
2. Open the anchor cover.
3. Route the tether strap over the head restraint. Make sure the strap is not twisted.
4. Secure the tether strap hook onto the anchor.
5. Tighten the tether strap as instructed by the child seat manufacturer.
Safety of Larger Children

Protecting Larger Children

The following pages give instructions on how to check proper seat belt fit, what kind of booster seat to use if one is needed, and important precautions for a child who must sit in front.

Checking Seat Belt Fit

When a child is too big for a child seat, secure the child in a rear seat using the lap/shoulder seat belt. Have the child sit upright and all the way back, then answer the following questions.

Checklist

- Do the child's knees bend comfortably over the edge of the seat?
- Does the shoulder belt cross between the child's neck and arm?
- Is the lap part of the seat belt as low as possible, touching the child's thighs?
- Will the child be able to stay seated like this for the whole trip?

If you answer yes to all these questions, the child is ready to wear the lap/shoulder seat belt correctly. If you answer no to any question, the child needs to ride on a booster seat until the seat belt fits properly without a booster seat.

WARNING

Allowing a child age 12 or under to sit in front can result in injury or death if the passenger's front airbag inflates.

If a larger child must ride in front, move the vehicle seat as far to the rear as possible, have the child sit up properly and wear the seat belt properly, using a booster seat if needed.
Safe Driving

Child Safety

Safety of Larger Children

Booster Seats

If a lap/shoulder seat belt cannot be used properly, position the child in a booster seat in a rear seating position. For the child's safety, check that the child meets the booster seat manufacturer's recommendations.

Protecting Larger Children-Final Checks

Your vehicle has a rear seat where children can be properly restrained. If you ever have to carry a group of children, and a child must ride in front:

- Make sure you read and fully understand the instructions and safety information in this manual.
- Move the front passenger seat as far back as possible.
- Have the child sit upright and well back in the seat.
- Check that the seat belt is properly positioned so that the child is secure in the seat.

Monitoring child passengers

We strongly recommend that you keep an eye on child passengers. Even older, more mature children sometimes need to be reminded to fasten their seat belts and sit up properly.

Booster Seats

When installing a booster seat, make sure to read the instructions that came with it, and install the seat accordingly. There are high- and low-type booster seats. Choose a booster seat that allows the child to wear the seat belt correctly.

Some U.S. states and Canadian provinces and territories require children to use a booster seat until they reach a given age or weight (e.g. 6 years or 60 lbs). Be sure to check current laws in the state or province, or territory where you intend to drive.
Exhaust Gas Hazard

Carbon Monoxide Gas

The engine exhaust from this vehicle contains carbon monoxide, a colorless, odorless, and highly toxic gas. As long as you properly maintain your vehicle, carbon monoxide gas will not get into the interior.

■ Have the exhaust system inspected for leaks whenever
  - The exhaust system is making an unusual noise.
  - The exhaust system may have been damaged.
  - The vehicle is raised for an oil change.

When you operate a vehicle with the tailgate open, airflow can pull exhaust gas into the interior and create a hazardous condition. If you must drive with the tailgate open, open all the windows and set the heating and cooling system/ climate control system as shown below.

1. Select the fresh air mode.
2. Select the mode.
3. Set the fan speed to high.
4. Set the temperature control to a comfortable setting.

Adjust the heating and cooling system/ climate control system in the same manner if you sit in your parked vehicle with the engine running.

* Not available on all models
Safety Labels

Label Locations
These labels are in the locations shown. They warn you of potential hazards that can cause serious injury or death. Read these labels carefully.

If a label comes off or becomes hard to read (except for the U.S. dashboard label which may be removed by the owner), contact a dealer for a replacement.
Instrument Panel

This chapter describes the buttons, indicators, and gauges that are used while driving.

Gauges and Displays

Gauges

Gauges include the speedometer, tachometer, fuel gauge, and related indicators. They are displayed when the ignition switch is in ON *1.

■ Speedometer
Displays your driving speed in mph (U.S.) or km/h (Canada).

■ Tachometer
Shows the number of engine revolutions per minute.

■ Fuel Gauge
Displays the amount of fuel left in the fuel tank.

■ Temperature Gauge
Displays the temperature of the engine coolant.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

NOTICE
You should refuel when the reading approaches ภาพ. Running out of fuel can cause the engine to misfire, damaging the catalytic converter.

The actual amount of remaining fuel may differ from the fuel gauge reading.

NOTICE
Driving with the temperature gauge pointer in the upper zone can cause serious engine damage. Pull safely to the side of the road and allow engine temperature to return to normal.

Overheating P. 497
Information Display*

The information display shows the odometer, trip meter, engine oil life and maintenance service item codes, and other gauges.

### Switching the Display

Press the [ ] (Select/Reset) knob to change the display.

#### Odometer

Shows the total number of miles or kilometers that your vehicle has accumulated.

* Not available on all models

---

Switching the Display

Each time you press the [ ] knob, the information display changes as follows:

1. Instant Fuel Economy, Odometer, Trip Meter A, Outside Temperature
2. Instant Fuel Economy, Range, Trip Meter A, Outside Temperature
3. Instant Fuel Economy, Average Fuel A, Trip Meter A, Outside Temperature
4. Instant Fuel Economy, Average Fuel B, Trip Meter B, Outside Temperature
5. Engine Oil Life

Some of the items on the information display also appear on the i-MID. They also change along with the information display changes while the fuel consumption is shown.

Continued
**Gauges and Displays**

**Information Display**

- **Trip Meter**
  Shows the total number of miles or kilometers driven since the last reset. Meters A and B can be used to measure two separate trips.

- **Resetting a trip meter**
  To reset a trip meter, display it, then press and hold the knob. The trip meter is reset to 0.0.

- **Average Fuel Economy**
  Shows the estimated average fuel economy of each trip meter in mpg (U.S.) or l/100 km (Canada). The display is updated at set intervals. When a trip meter is reset, the average fuel economy is also reset.

- **Engine Oil Life**
  Shows the remaining oil life and Maintenance Minder™.
  - Maintenance Minder™ P. 429

- **Range**
  Shows the estimated distance you can travel on the remaining fuel. This distance is estimated from the fuel economy of your previous trips.

- **Check Fuel Cap**
  Appears when the fuel fill cap is loose or is not installed.
  - Check/Tighten Fuel Cap Message P. 500
### Outside Temperature

Shows the outside temperature in Fahrenheit (U.S.) or Celsius (Canada).

■ Adjusting the outside temperature display

Adjust the temperature reading up to ±5°F or ±3°C if the temperature reading seems incorrect.

---

Outside Temperature

The temperature sensor is in the front bumper. Road heat and exhaust from another vehicle can affect the temperature reading when your vehicle speed is less than 19 mph (30 km/h).

It may take several minutes for the display to be updated after the temperature reading has stabilized.

Use the i-MID’s customized features to correct the temperature.

- **Customized Features** P. 114
Multi-Information Display*

The multi-information display shows the odometer, trip meter, outside temperature indicator, and other gauges. It also displays important messages such as warnings and other helpful information.

Switching the Display

Press the (information) button or the SEL/RESET button to change the display.

Example of customizing wallpapers*
You can customize the display from clock to wallpaper.

Importing wallpapers from USB
You can import up to three images, one at a time for wallpaper from a USB flash drive.
Select Import Wallpaper from Customize Settings and properly connect a USB flash drive to store an image.
1. Connect the USB flash drive to the adapter cable.
2. Press the MENU button.
3. Select Customize Settings with the + / - button, then press the SOURCE button.

* Not available on all models
4. Select **Display Setup** with the \(+/-\) button, then press the **SOURCE** button.

5. Select **Import Wallpaper** with the \(+/-\) button, then press the **SOURCE** button.
   - The file names are displayed on the screen.

6. Press the \(-\) button until the file name you want to store appears on the center of the display, then press the **SOURCE** button.
7. The preview of the imported data is displayed. Press the **SOURCE** button if it is OK.

8. Press the **SOURCE** button to save the image file.

9. Select the location you want to store the image file in with the [+] / [-] button, then press the **SOURCE** button.

10. Press the **MENU** button to exit the customizing screen.
Selecting a wallpaper

1. Press the MENU button.
2. Select Customize Settings with the (+) / (-) button, then press the SOURCE button.
3. Select Display Setup with the (+) / (-) button, then press the SOURCE button.
4. Select Select Wallpaper with the (+) / (-) button, then press the SOURCE button.
5. Select the image file you want with the (+) / (-) button, then press the SOURCE button.
   ▶ When the scroll is stopped, the thumbnail is displayed.
6. Press the MENU button to exit the customizing screen.

Clock

Adjusting the Clock

Models with two displays
The audio and navigation system receives signals from GPS satellites, updating the clock automatically.

All models
You can adjust the time in the clock display with the ignition switch in ON [II]^1.

Models with one display
Using the MENU button
1. Press the MENU button.
2. Select Adjust Clock with the (+) / (−) button, then press the SOURCE button.
3. Press the (+) / (−) button to change the setting between 12h and 24h.
4. Select hour or minute with the (−) / (+) button.
5. Press the (+) / (−) button to adjust the numbers up or down.
6. Select Set with the (−) / (+) button, then press the SOURCE button to enter your selection.

The display will return to the Adjust Clock display.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Clock
Adjusting the Clock

Using the SETUP button
1. Press the SETUP button.
2. Rotate to select Adjust Clock, then press .
3. Rotate to select the item you want to change (12/24 hour mode, hour, minute). Then press .
4. Rotate to make the adjustment.
5. Press to enter your selection. The display returns to Adjust Clock. Repeat steps 4 to 6 to adjust other items.
6. To enter the selection, Rotate and select Set, then press .
7. Press the SETUP button to go back to the normal display.

Using the audio with touch screen
1. Press the (Home) button, then select Settings.
2. Select Clock/Info, then Clock Adjustment.
3. Adjust the hours and minutes by selecting .
4. Select OK to set the time.

These indications are used to show how to operate the selector knob.
Rotate to select.
Press to enter.

To set the time to the nearest hour:
Press and hold the CLOCK button until the clock display begins to blink, then press the (Reset) button.

Depending on the displayed time, the clock sets forward or backward.
Example:
1:06 will reset to 1:00
1:53 will reset to 2:00

You can customize the clock display to show the 12 hour clock or 24 hour clock.

Customized Features P. 271
Locking and Unlocking the Doors

Key Types and Functions

This vehicle comes with the following key:

Use the key to start and stop the engine, and to lock and unlock the doors and tailgate. You can also lock and unlock the doors and tailgate pressing the buttons on remote transmitter.
Locking and Unlocking the Doors

Key Types and Functions

■ Smart entry remote*

The built-in key can be used to lock/unlock the doors when the smart entry remote battery becomes weak and the power door lock/unlock operation is disabled. To remove the built-in key, pull it out while sliding the release knob. To reinstall the built-in key, push the built-in key into the smart entry remote until it clicks.

■ Valet Key*

Can be used to start and stop the engine, and lock and unlock driver’s door.

* Not available on all models

Valet Key*

When you need to leave a key with a third party, leave the valet key.
Locking and Unlocking the Doors

Low Smart Entry Remote Signal Strength *

The vehicle transmits radio waves to locate the smart entry remote when locking/unlocking the doors, opening the tailgate, or to start the engine.

In the following cases, locking/unlocking the doors, opening the tailgate, or starting the engine may be inhibited or operation may be unstable:

- Strong radio waves are being transmitted by nearby equipment.
- You are carrying the smart entry remote together with telecommunications equipment, laptop computers, cell phones, or wireless devices.
- A metallic object is touching or covering the smart entry remote.

Key Number Tag

Contains a number that you will need if you purchase a replacement key.

Keep the key number tag separate from the key in a safe place outside of your vehicle. If you wish to purchase an additional key, contact a dealer.

If you lose your key and you cannot start the engine, contact a dealer.

Communication between the smart entry remote and the vehicle consumes the smart entry remote’s battery. Battery life is about two years, but this varies depending on regularity of use. The battery is consumed whenever the smart entry remote is receiving strong radio waves. Avoid placing it near electrical appliances such as televisions and personal computers.

* Not available on all models
Locking/Unlocking the Doors from the Outside

Using the Remote Transmitter

Locking the doors
Press the lock button.
Once:
► Some exterior lights flash, all the doors and tailgate lock, and the security system sets.

Twice (within five seconds after the first push):
► The beeper sounds and verifies the security system is set.

Unlocking the doors
Press the unlock button.
Once:
► Some exterior lights flash twice, and the driver’s door unlocks.

Twice:
► The remaining doors and tailgate unlock.

Using the Remote Transmitter
If you do not open a door or the tailgate within 30 seconds of unlocking the vehicle, the doors will automatically relock. You can change the relock timer setting.

Customized Features P. 114

If the interior light switch is in the door activated position, the interior lights come on when you press the unlock button.

No doors opened: The lights fade out after 30 seconds.

Doors relocked with the remote: The lights go off immediately.

Interior Lights P. 185

The remote transmitter uses low-power signals, so the operating range may vary depending on the surroundings.

The remote will not lock the vehicle when a door is open.

If the distance at which the remote transmitter works varies, the battery is probably low.
If the LED does not come on when you press a button, the battery is dead.

Replacing the Button Battery P. 475

You can customize the door unlock mode setting.

Customized Features P. 114
Locking and Unlocking the Doors

Locking/Unlocking the Doors from the Outside

Controls

When you carry the smart entry remote, you can lock/unlock the doors and open the tailgate.
You can lock/unlock the doors within a radius of about 32 inches (80 cm) of the outside door handle. You can open the tailgate within about 32 inches (80 cm) radius from the tailgate release button.

■ Locking the doors and tailgate
Press the door lock button on the front door or the tailgate.
Some exterior lights flash; the beeper sounds; all the doors and tailgate lock; and the security system sets.

■ Using the Smart Entry with Push Button Start System*

When you carry the smart entry remote, you can lock/unlock the doors and open the tailgate.

Do not leave the smart entry remote in the vehicle when you get out. Carry it with you.
Even if you are not carrying the smart entry remote, you can lock/unlock the doors while someone else with the remote is within range.
The door may be unlocked if the door handle is covered with water in heavy rain or in a car wash if the smart entry remote is within range.
If you grip a front door handle wearing gloves, the door sensor may be slow to respond or may not respond by unlocking the doors.
You cannot unlock the door by gripping the handle after two seconds of unlocking it.
The door might not open if you pull it immediately after gripping the door handle. Grip the handle again and confirm that the door is unlocked before pulling the handle.
Even within the 32 inches (80 cm) radius, you may not be able to lock/unlock the doors with the smart entry remote if it is above or below the outside handle.
The smart entry remote may not operate if it is too close to the door and door glass.

* Not available on all models
Unlocking the doors and tailgate

Grab the driver’s door handle:

- The driver’s door unlocks.
- Some exterior lights flash twice and the beeper sounds twice.

Grab the front passenger’s door handle:

- All the doors and tailgate unlock.
- Some exterior lights flash twice and the beeper sounds twice.

Press the tailgate release button:

- The tailgate unlocks.
- Some exterior lights flash twice and the beeper sounds twice.

Using the Tailgate Release Button

P. 141

Continued

Continued
Locking and Unlocking the Doors

Locking/Unlocking the Doors from the Outside

Controls

Fully insert the key and turn it.

Locking the driver's door
Push the lock tab forward or push the master door lock switch in the lock direction, and close the door.

Locking the passenger's doors
Push the lock tab forward and close the door.

Lockout prevention system

- Ignition Keys with Remote Transmitter
  The doors and tailgate cannot be locked when the key is in the ignition switch.

- Models with smart entry remote
  The doors and tailgate cannot be locked when the smart entry remote is inside the vehicle.

Locking/Unlocking the Doors Using a Key

When you lock the driver's door with a key, all the other doors and tailgate lock at the same time. When unlocking, the driver's door unlocks first. Turn the key a second time within a few seconds to unlock the remaining doors and the tailgate.

You can customize the door unlock mode setting.

Customized Features P. 114

Locking a Door Without Using a Key

When you lock the driver's door, all the other doors and tailgate lock at the same time. Make sure you have the key in your hand before locking the door to prevent it from being locked in the vehicle.
Locking/Unlocking the Doors from the Inside

- **Locking a door**
  Push the lock tab forward.

- **Unlocking a door**
  Pull the lock tab rearward.

**Unlocking Using the Front Door Inner Handle**

Pull the front door inner handle. The door unlocks and opens in one motion.

---

**Using the Lock Tab**

- When you lock the door using the lock tab on the driver’s door, all the other doors and tailgate lock at the same time.
- When you unlock the door using the lock tab on the driver’s door, only the driver’s door will unlock.

**Unlocking Using the Front Door Inner Handle**

The front door inner handles are designed to allow front seat occupants to open the door in one motion. However, this feature requires that front seat occupants never pull a front door inner handle while the vehicle is in motion.

Children should always ride in a rear seat where childproof door locks are provided.

- [Childproof Door Locks](#) P. 138
Using the Master Door Lock Switch

Press the master door lock switch in as shown to lock or unlock all doors and the tailgate.

Childproof Door Locks

The childproof door locks prevent the rear doors from being opened from the inside regardless of the position of the lock tab.

Setting the Childproof Door Locks

Slide the lever in the rear door to the lock position, and close the door.

- When opening the door

Open the door using the outside door handle.
Auto Door Locking/Unlocking

Your vehicle locks all doors and unlocks the driver’s door automatically when a certain condition is met.

■ Auto Door Locking

■ Drive lock mode
All doors and tailgate lock when the vehicle’s speed reaches about 10 mph (15 km/h).

■ Auto Door Unlocking

■ Driver’s door open mode
All doors unlock when the driver’s door is opened.

You can turn off or change to another auto door locking/unlocking setting using the i-MID.

Customized Features P. 114
Opening and Closing the Tailgate

Precautions for Opening/Closing the Tailgate

Always make sure individuals and objects are clear of the tailgate before opening or closing it.

■ Opening the tailgate
  • Open the tailgate all the way.
    ▶ If it is not fully opened, the tailgate may begin to close under its own weight.
  • Be careful when it is windy. The wind may cause the tailgate to close.

■ Closing the tailgate
  Keep the tailgate closed while driving to:
  ▶ Avoid possible damage.
  ▶ Prevent exhaust gas from leaking into the vehicle.
  ▶ Carbon Monoxide Gas P. 67

Be careful not to hit your head on the tailgate or to put your hands between the tailgate and the cargo area when closing the tailgate.

When you are storing or picking up luggage from the cargo area while the engine is idling, do not stand in front of the exhaust pipe. You may get burned.

Do not allow any passenger in the cargo space. They may get hurt during hard braking, a sudden acceleration, or a crash.
### Opening and Closing the Tailgate

**Precautions for Opening/Closing the Tailgate**

**Controls**

When all the doors are unlocked or press the tailgate unlock button on the remote transmitter, the tailgate is unlocked.

- **Models without power tailgate**
  - Press the tailgate release button and lift open the tailgate.

- **Models with power tailgate**
  - Press the tailgate release button for more than one second, and wait until you hear two beeps before you lift open the tailgate.

  - Releasing the release button within one second with one beep enables the power tailgate operations.

- **Opening/Closing the Power Tailgate**
  - P. 143

- **Using the Tailgate Release Button**

  Do not leave the key, remote transmitter*, or smart entry remote* in the luggage area before closing the tailgate.

- **Models with smart entry system**
  - Even if you are not carrying the smart entry remote, you can lock/unlock the tailgate while someone else with the remote is within range.

- **Models with power tailgate**
  - You can change the power tailgate operation setting on and off.

- **Customized Features** P. 114

---

* Not available on all models
Opening and Closing the Tailgate

Precautions for Opening/Closing the Tailgate

To close the tailgate, grab the inner handle, pull the tailgate down, and push it closed from outside.

Using the Remote Transmitter*

Press the tailgate unlock button to unlock the tailgate.

* Not available on all models

Using the Remote Transmitter*

If you have unlocked and opened the tailgate using the remote transmitter* or smart entry remote*, when closing, the tailgate locks automatically.

* Not available on all models
Opening/Closing the Power Tailgate *

The power tailgate can be operated by pressing the power tailgate button on the remote transmitter, pressing the power tailgate button in the driver side control panel, or pressing the button on the tailgate.

The power tailgate can be opened when:
- The tailgate is fully closed.
- The shift lever is in P.

The power tailgate can be closed when:
- The tailgate is fully open.
- The shift lever is in P.

* The power tailgate can be opened when:

- The tailgate is fully closed.
- The shift lever is in P.

* The power tailgate can be closed when:

- The tailgate is fully open.
- The shift lever is in P.

WARNING

Closing a power tailgate while anyone is in the path of the tailgate can cause serious injury.

Make sure everyone is clear before closing the power tailgate.

NOTICE

Do not push or pull on the power tailgate when it is being automatically opened or closed. Forcibly opening or closing the power tailgate while in operation can deform the tailgate frame.

When operating the power tailgate, make sure there is enough space around your vehicle. People near the tailgate may be seriously hurt if the tailgate hits or closes on their heads. Be especially cautious if children are around.

The power tailgate may not open or close under the following conditions:
- You start the engine while the tailgate is automatically opening or closing.
- The vehicle is parked on a steep hill.
- The vehicle is swayed in a strong wind.
- The tailgate or the roof is covered with snow or ice.

If you close the power tailgate with all the doors locked, the power tailgate locks automatically.

* Not available on all models

Continued
Opening and Closing the Tailgate

Opening/Closing the Power Tailgate

Press the power tailgate button for more than one second to operate when the power mode is in VEHICLE OFF (LOCK).

To reverse direction while the power tailgate is in operation, press the button again. The beeper sounds three times and the tailgate reverses direction.

Customizing when to open the tailgate

ANYTIME: The power tailgate unlocks and opens at the same time. This is the default setting.
WHEN UNLOCKED: The tailgate opens when all doors are unlocked.

Remote Transmitter

Press the power tailgate button for more than one second to operate when the power mode is in VEHICLE OFF (LOCK).

To reverse direction while the power tailgate is in operation, press the button again. The beeper sounds three times and the tailgate reverses direction.

If you close the power tailgate when all the doors are locked, the power tailgate locks automatically.

If you replace the battery or the power tailgate fuse while the tailgate is open, the power tailgate may be disabled. The power tailgate resumes once you manually close the tailgate.

Installing aftermarket components other than genuine Honda accessories on the power tailgate may prevent it from fully opening or closing.

Make sure the power tailgate is fully open before you get your luggage in and out.

Make sure the power tailgate is fully closed before you start the vehicle.

The beeper sounds when you start driving while the power tailgate is still open, or closing.

* Not available on all models
### Opening and Closing the Tailgate

#### Opening/Closing the Power Tailgate

To open: Press and hold the tailgate button in the driver side control panel for about one second.
- Some exterior lights flash and the beeper sounds.

To close: Press and hold the tailgate button in the driver side control panel for about one second.
- Some exterior lights flash and the beeper sounds.

To reverse direction while the power tailgate is in operation, press the button again.

* Not available on all models

---

### Power Tailgate Button

To open: Press and hold the tailgate button in the driver side control panel for about one second.

- Some exterior lights flash and the beeper sounds.

To close: Press and hold the tailgate button in the driver side control panel for about one second.

- Some exterior lights flash and the beeper sounds.

To reverse direction while the power tailgate is in operation, press the button again.

* Not available on all models

---

### Power Tailgate Close Button

Press the button on the tailgate to close the power tailgate.

If you press the button again while the power tailgate is closing, it stops and reverses direction.

---

### Opening/Closing the Power Tailgate

If the power tailgate meets resistance while opening or closing, the auto reverse feature reverses the direction. The beeper sounds three times.

The auto reverse function stops sensing when the tailgate is almost closed to make sure that it fully closes.

Do not touch the sensors located on both sides of the tailgate. The power tailgate does not close if you touch either sensor when you are trying to close the tailgate.

Be careful not to scratch the sensors with a sharp object. If scratched, they can be damaged, and the power tailgate closing feature malfunctions.

---

### Power Tailgate Close Button

If you press the tailgate release button inside the handle while the tailgate is automatically opening or closing, the power tailgate operation stops. Use caution if the tailgate stops in the middle of either operation. It may suddenly swing up or down.
Opening and Closing the Tailgate

**Auto-Closer**

If you manually close the power tailgate, it latches automatically.

---

**Power Tailgate Fall Detection**

Automatically lowers the power tailgate when there is a possibility that the fully opened power tailgate can fall down by its own weight (for example, by snow on the tailgate). The beeper sounds while the power tailgate lowers.

---

**Auto-Closer**

The auto-closer feature does not activate if you push the tailgate open button while the power tailgate is closing.

Do not put any force on the tailgate while the power tailgate is latching.

Keep your hands away from the tailgate when you manually close the tailgate and let it latch automatically. It is dangerous to put your hands around the tailgate as it starts to latch itself.

---

**Power Tailgate Fall Detection**

If you try to manually close the power tailgate immediately after it fully opens, the power tailgate fall detection may activate.

Once the power tailgate fall detection activates, wait until the power tailgate fully closes. Keep away from the power tailgate when it is in motion.

If the power tailgate fall detection constantly activates, consult at a dealer.
Security System

Immobilizer System

The immobilizer system prevents a key that has not been pre-registered from starting the engine. Each key contains electronic transmitters that use electronic signals to verify the key.

Pay attention to the following when inserting the key into the ignition switch or pressing the ENGINE START/STOP button*:
• Do not allow objects that emit strong radio waves near the ignition switch*1.
• Make sure the key is not covered by or touching a metal object.
• Do not bring a key from another vehicle's immobilizer system near the ignition switch.

Security System Alarm*

The security system alarm activates when the tailgate, hood or doors are forcibly opened. The alarm does not go off if the tailgate or doors are opened with the key, remote transmitter or smart entry system.

However, the alarm goes off when a door is opened with the key, then the shift lever is moved out of [P] or the hood is opened before the power mode is set to ON.

When the security system alarm activates
The horn sounds intermittently and all the exterior lights flash.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
* Not available on all models

NOTICE

Leaving the ignition key in the vehicle can result in theft or accidental movement of the vehicle. Always take the ignition key with you whenever you leave the vehicle unattended.

Do not alter the system or add other devices to it. Doing so may damage the system and make your vehicle inoperable.

The security alarm continues for a maximum of two minutes until the security system deactivates.
To deactivate the security system alarm
Unlock the vehicle using the remote transmitter or smart entry system. The system, along with the horn and flashing lights, is deactivated.

Setting the security system alarm
The security system alarm automatically sets when the following conditions have been met:
• The power mode is set to VEHICLE OFF (LOCK).
• The hood and tailgate are closed.
• All doors and tailgate are locked with the key or the remote transmitter.

When the security system alarm sets
The security system alarm indicator in the instrument panel blinks. When the blinking interval changes after about 15 seconds, the security system alarm is set.

To cancel the security system alarm
The security system is canceled when the vehicle is unlocked using the remote transmitter, or smart entry system, or the power mode is set to ON. The security system indicator goes off at the same time.

Do not set the security system alarm when someone is in the vehicle or a window is open. The system can accidentally activate when:
• Unlocking the door with the lock tab.
• Opening the hood with the hood release handle.
• Moving the shift lever out of (P).

If the battery goes dead after you have set the security system alarm, the security alarm may go off once the battery is recharged or replaced. If this occurs, deactivate the security system alarm by unlocking a door using the key or remote transmitter.

Do not attempt to alter this system or add another device to it.

* Not available on all models
■ Panic Mode

- **The panic button on the remote transmitter**
  If you press the panic button for approximately one second, the following will occur for about 30 seconds:
  - The horn sounds.
  - Some exterior lights flash.

- **Canceling panic mode**
  Press any button on the remote transmitter, or turn the ignition switch to ON *1*.

---

*1: Models with the smart entry system have an **ENGINE START/STOP** button instead of an ignition switch.
Opening and Closing the Windows

Opening/Closing the Power Windows

The power windows can be opened and closed when the ignition switch is in ON, using the switches on the doors. The driver side switches can be used to open and close all the windows.

The power window lock button on the driver side must be switched off (not pushed in, indicator off) to open and close the windows from anywhere other than the driver’s seat.

When the power window lock button is switched on (pushed in, indicator on), you can only operate the driver’s window. Turn the power window lock button on if a child is in the vehicle.

Opening/Closing Windows with Auto-Open/Close Function

- **Automatic operation**
  **To open:** Push the switch down firmly.
  **To close:** Pull the switch up firmly.

  The window opens or closes completely. To stop the window at any time, push or pull the switch briefly.

- **Manual operation**
  **To open:** Push the switch down lightly, and hold it until the desired position is reached.
  **To close:** Pull the switch up lightly, and hold it until the desired position is reached.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

**WARNING**

Closing a power window on someone’s hands or fingers can cause serious injury.

Make sure your passengers are away from the windows before closing them.

The power windows can be operated for up to 10 minutes after you turn the ignition switch off. Opening either front door cancels this function.

**Auto Reverse**

If a power window senses resistance when closing automatically, it stops closing and reverse direction.

The driver’s window auto reverse function is disabled when you continuously pull up the switch.

The auto reverse function stops sensing when the window is almost closed to ensure that it fully closes.
Opening and Closing the Power Windows

To open: Push the switch down.
To close: Pull the switch up.

Release the switch when the window reaches the desired position.

Opening/Closing Without Auto-Open/Close Function
Opening and Closing the Moonroof*

■ Opening/Closing the Moonroof

You can operate the moonroof when the ignition switch is in ON [II]¹. Use the switch in the front of the ceiling to open and close the moonroof.

■ Automatic operation

To open: Pull the switch back firmly.
To close: Push the switch forward firmly.

The moonroof automatically opens or closes all the way. To stop the moonroof midway, touch the switch briefly.

■ Manual operation

To open: Pull the switch back lightly, and hold it until the desired position is reached.
To close: Push the switch forward lightly, and hold it until the desired position is reached.

■ Tilting the moonroof up

To tilt: Push on the center of the moonroof switch.
To close: Push the switch forward firmly, then release.

*¹: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

---

**WARNING**

Opening or closing the moonroof on someone's hands or fingers can cause serious injury.

Make sure all hands and fingers are clear of the moonroof before opening or closing it.

**NOTICE**

Opening the moonroof in below freezing temperature or when it is covered with snow or ice can damage the moonroof panel or motor.

The power moonroof can be operated for up to 10 minutes after you turn the ignition switch off. Opening either front door cancels this function.

When resistance is detected, the auto reverse function causes the moonroof to change directions, then stop. Auto reverse stops sensing when the moonroof is almost closed to ensure that it fully closes.

---

* Not available on all models
Models with ignition Keys with remote transmitter

Ignition Switch

LOCK: Insert and remove the key in this position.

ACCESSORY: Operate the audio system and other accessories in this position.

ON: This is the position when driving.

START: This position is for starting the engine.
The switch returns to ON when you let go of the key.

You cannot take the key out unless the shift lever is in P.

If you open the driver’s door when the key is in LOCK or ACCESSORY, a warning buzzer will sound to remind you to take the key out.

If the key won’t turn from LOCK to ACCESSORY, turn the key while moving the steering wheel left and right. The steering wheel will unlock, allowing the key to turn.
Models with smart entry remote

**ENGINE START/STOP Button**

### Changing the Power Mode

**VEHICLE OFF (LOCK)**
- Indicator in the button is off.
- The steering wheel is locked*1.
- The power to all electrical components is turned off.

**ACCESSORY**
- Indicator in the button is on.
- Indicator in the button blinks (from ON to ACCESSORY).
- Operate the audio system and other accessories in this position.

**ON**
- Indicator in the button is on.
- All electrical components can be used.

Without pressing the brake pedal:
- Press the button without the shift lever in **P**.
- Shift to **P** then press the button.
- Shift to **P** then press the button.
- Press the button without the shift lever in **P**.
- Press the button.

*1: Canadian models

---

**ENGINE START/STOP Button Operating Range**

Operating Range

You can start the engine when the smart entry remote is inside the vehicle.
The engine may also run if the smart entry remote is close to the door or window, even if it is outside the vehicle.

**ON mode:**
- Indicator in the button is off, if the engine is running.

If the smart entry remote battery is weak, beeper sounds and the **TO START, HOLD REMOTE NEAR START BUTTON** message appears on the i-MID.

If the Smart Entry Remote Battery is Weak

P. 492

Do not leave the power mode in ACCESSORY or ON when you get out.
If you leave the vehicle for 30 to 60 minutes with the shift lever in P and the power mode in ACCESSORY, the vehicle automatically goes into the mode similar to VEHICLE OFF (LOCK) to avoid the battery drain.

**Canadian models**

When in this mode:
- The steering wheel does not lock.
- You cannot lock or unlock doors with the remote transmitter or the smart entry system.
- Press the ENGINE START/STOP button three times to switch the mode to VEHICLE OFF (LOCK).

If the power mode does not change from VEHICLE OFF to ACCESSORY, press the ENGINE START/STOP button while moving the steering wheel left and right. The steering wheel will unlock, allowing the mode to change.
## Power Mode Reminder

If you open the driver’s door when the power mode is set to ACCESSORY, a warning buzzer sounds.

## Smart Entry Remote Reminder

<table>
<thead>
<tr>
<th>Models without multi-information display</th>
<th>Warning buzzers may sound from inside or/and outside the vehicle to remind you that the smart entry remote is out of the vehicle. If the buzzer continues even after the remote is put back inside, place it within its operational range.</th>
</tr>
</thead>
</table>
| Models with multi-information display   | **When the power mode is in ON**  
If the smart entry remote is taken out of the vehicle, and the driver’s door is closed, warning buzzers sound from both inside and outside the vehicle. A warning message on the information display/multi-information display notifies the driver inside that the remote is out. |
|                                         | **When the power mode is in ACCESSORY**  
If the smart entry remote is taken out of the vehicle, and all the doors are closed, a warning buzzer sounds from outside the vehicle. |

**Smart Entry Remote Reminder**

When the smart entry remote is within the system’s operational range, and the driver’s door is closed, the warning function cancels.

If the smart entry remote is taken out of the vehicle after the engine has been started, you can no longer change the ENGINE START/STOP button mode or restart the engine. Always make sure if the remote is in your vehicle when you operate the ENGINE START/STOP button.

Removing the smart entry remote from the vehicle through a window does not activate the warning buzzer.

Do not put the smart entry remote on the dashboard or in the glove box. It may cause the warning buzzer to go off. Under some other conditions that can prevent the vehicle from locating the remote, the warning buzzer may also go off even if the remote is within the system’s operational range.

*1: Canadian models
Turn Signals

The turn signals can be used when the ignition switch is in ON *1.

■ One-touch turn signal
When you lightly push up or down and release the turn signal lever, the exterior turn signals and turn signal indicator blink three times.

This feature can be used when signaling for a lane change.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Light Switches

Manual Operation

Rotating the light switch turns the lights on and off, regardless of the position of the ignition switch.

- **High beams**
  Push the lever forward until you hear a click.

- **Low beams**
  When in high beams, pull the lever back to return to low beams.

- **Flashing the high beams**
  Pull the lever back, and release it.

If you remove the key from the ignition switch with the lights on, a light on reminder chime sounds when you open the driver’s door.

If you leave the power mode in VEHICLE OFF (LOCK) while the lights are on, a chime sounds when the driver’s door is opened.

Do not leave the lights on when the engine is off because it will cause the battery to discharge.
Operating the Switches Around the Steering Wheel

Light Switches

Automatic Lighting Control*

Automatic lighting control can be used when the power mode is in ON.

When you turn the light switch to AUTO, the headlights and other exterior lights will switch on and off automatically depending on the ambient brightness.

▶ You can change the auto light sensitivity setting.

Customized Features P. 114

Headlight Integration with Wipers*

The headlights automatically come on when the wipers are used several times within a certain interval with the headlight switch in AUTO.

The headlights automatically go off a few minutes later if the wipers are stopped.

Automatic Lighting Control *

We recommend that you turn on the lights manually when driving at night, in a dense fog, or in dark areas such as long tunnels or parking facilities.

The light sensor is in the location shown below. Do not cover this light sensor with anything; otherwise, the automatic lighting system may not work properly.

Customized Features P. 114

* Not available on all models
Automatic Lighting Off Feature

The headlights, all other exterior lights, and the instrument panel lights turn off 15 seconds after you remove the key or set the power mode to VEHICLE OFF (LOCK), take the remote with you, and close the driver’s door.

- You can change the headlight auto off timer setting.  
- Customized Features P. 114

If you turn the ignition switch to LOCK [0]*1 with the headlight switch on, but do not open the door, the lights turn off after 10 minutes (three minutes, if the switch is in the AUTO position).

The lights turn on again when you unlock or open the driver’s door. If you unlock the door, but do not open it within 15 seconds, the lights go off. If you open the driver’s door, you will hear a lights on reminder chime.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
Controls

Fog Lights*

Can be used when the low beam headlights are on.

Rotate the switch up from the OFF position to the position.

Fog Light Switch

* Not available on all models
Daytime Running Lights

**Models without smart entry system**

The high beam headlights come on slightly dimmer than normal when the following conditions have been met:

- The ignition switch is in ON [I].
- The headlight switch is off.
- The parking brake is released.

The lights remain on even if you set the parking brake. Turning off the ignition switch will turn off the daytime running lights.

The high beam headlights return to the original brightness once the headlight switch is turned on.

**Models with smart entry system**

The daytime running lights come on when the following conditions have been met:

- The power mode is set to ON.
- The headlight switch is off.
- The parking brake is released.

The lights remain on even if you set the parking brake. Setting the power mode to VEHICLE OFF turns off the daytime running lights.

The daytime running lights are off the headlight switch is turned on, or when the headlight switch is in AUTO and it is getting darker outside.
Wipers and Washers

Windshield Wipers/Washers

The windshield wipers and washers can be used when the ignition switch is in ON.

- **MIST**
The wipers run at high speed until you release the lever.

- **Wiper switch (OFF, INT*, LO, HI)**
  Change the wiper switch setting according to the amount of rain.

- **AUTO***

  - Automatic Intermittent Wipers* P. 165

- **Adjusting the delay***
  Turn the adjustment ring to adjust the wiper delay.
  
  - Long delay
  - Short delay

- **Washer**
  Sprays while you pull the lever toward you.
  When you release the lever, the wipers make two or three more sweeps before stopping.

---

NOTICE
Do not use the wipers when the windshield is dry. The windshield will get scratched, or the rubber blades will get damaged.

NOTICE
In cold weather, the blades may freeze to the windshield, becoming stuck. Operating the wipers in this condition may damage the wipers. Use the defroster to warm the windshield, then turn the wipers on.

Turn the washers off if no washer fluid comes out. The pump may get damaged.

Models with intermittent time adjustment ring
If the vehicle speeds up while the wipers are operating intermittently, the length of the wipe interval shortens. When the vehicle starts moving, the wipers make a single sweep.

When the vehicle speeds up, the wiper operation’s shortest delay setting (LO) and the HI setting become the same.

If the wiper stops operating due to any obstacle such as the build-up of snow, park the vehicle in a safe place. Rotate the wiper switch to OFF, and turn the ignition switch to ACCESSORY or LOCK.*

---

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
Wipers and Washers

The wiper motor may stop motor operation temporarily to prevent an overload. Wiper operation will return to normal within a few minutes, once the circuit has returned to normal.

Automatic Intermittent Wipers*

When you push the lever down to AUTO, the windshield wipers sweep once, and go into the automatic mode.

The wipers operate intermittently, at low speed, or at high speed and stops in accordance with the amount of rainfall the rainfall sensor detects.

■ AUTO sensitivity adjustment
When in AUTO, you can also adjust the rainfall sensor sensitivity using the adjustment ring.

Sensor sensitivity

Low: The wipers start to react to a larger amount of rainfall.

High: The wipers start to react to a smaller amount of rainfall.

Do not put the wiper lever in AUTO when cleaning the windshield or driving through a car wash. If the wiper lever is in AUTO, and the power mode is in ON, the rainfall sensor may respond to your hand or car wash liquids, and the wipers may operate automatically.

* Not available on all models
Operating the Switches Around the Steering Wheel

Wipers and Washers

The rear wiper and washer can be used when the ignition switch is in ON [II]*1.

- **Wiper switch (OFF, INT, ON)**
  Change the wiper switch setting according to the amount of rain.

- **Washer ( )**
  Sprays while you rotate the switch to this position.
  Hold it to activate the wiper and to spray the washer. Once released, it stops operating after a few more sweeps.

Operating in reverse
When you shift the transmission to [R] with the windshield wipers activated, the rear wiper operates automatically as follows even if its switch is off.

<table>
<thead>
<tr>
<th>Front Wiper Position</th>
<th>Rear Wiper Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>INT (Intermittent)</td>
<td>Intermittent</td>
</tr>
<tr>
<td>LO (Low speed wipe)</td>
<td>Continuous</td>
</tr>
<tr>
<td>HI (High speed wipe)</td>
<td></td>
</tr>
</tbody>
</table>

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Brightness Control

When the parking lights are turned on and the ignition switch is in ON [II]*1, you can use the brightness control knob to adjust instrument panel brightness.

**Brighten:** Turn the knob to the right.
**Dim:** Turn the knob to the left.

You will hear a beep when the brightness reaches minimum or maximum. The information display will return to its original state several seconds after you adjust the brightness.

**Brightness level indicator**
The brightness level is shown on the information display while you are adjusting it.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Defogger/Heated Door Mirror*

Rear Defogger/Heated Door Mirror * Button

Press the rear defogger and heated door mirror button to defog the rear window and mirrors when the ignition switch is in ON II.*

Models with heating and cooling system
The rear defogger and heated door mirrors automatically switch off after 20 minutes. However, if the outside temperature is 18°F (−8°C) or below, they do not automatically switch off.

Models with climate control system
The rear defogger and heated door mirrors automatically switch off after 10-30 minutes depending on the outside temperature. However, if the outside temperature is 32°F (0°C) or below, they do not automatically switch off.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
Press the heated windshield button to deice the windshield when the power mode is in ON.

The front defogger automatically switches off after 15 minutes.

* Not available on all models

This system consumes a lot of power, and may weaken the battery, making it difficult to start the engine. Turn it off when the window has been defogged. Also, do not use the system for a long period even if the engine is idling.
Driving Position Memory System*

You can store two driver’s seat positions (except for power lumbar) with the driving position memory system.

When you unlock and open the driver’s door with a remote transmitter or the smart entry system, the seat adjusts automatically to one of the two preset positions.

- **DRIVER 1** transmitter is linked to memory button 1.
- **DRIVER 2** transmitter is linked to memory button 2.

* Not available on all models
### Storing a Position in Memory

1. Set the power mode to ON. Adjust the driver’s seat to the desired position.  
2. Press the **SET** button.  
   - You will hear a beep, and the memory button indicator light will blink.  
3. Press and hold memory button **1** or **2** within five seconds of pressing the **SET** button.  
   - Once the seat position has been memorized, the indicator light on the button you pressed stays on.

### Recalling the Stored Position

1. Move the shift lever to **P**.  
2. Apply the parking brake.  
3. Press a memory button (**1** or **2**).  
   - You will hear a beep, and the indicator light will blink.  

The seat will automatically move to the memorized position. When it has finished moving, you will hear a beep, and the indicator light stays on.

### Storing a Position in Memory

After you press the **SET** button, the storing operation will be canceled when:  
- You do not press the memory button within five seconds.  
- You readjust the seat position before the double-beep.  
- You set the power mode to any position except **ON**.

### Recalling the Stored Position

The seat will stop moving if you:  
- Press the **SET** button, or a memory button (**1** or **2**).  
- Adjust the seat position.  
- Shift into any position except **P**.
Adjusting the Steering Wheel

The steering wheel height and distance from your body can be adjusted so that you can comfortably grip the steering wheel in an appropriate driving posture.

1. Pull the steering wheel adjustment lever up.
   - The steering wheel adjustment lever is under the steering column.
2. Move the steering wheel up or down, and in or out.
   - Make sure you can see the instrument panel gauges and indicators.
3. Push the steering wheel adjustment lever down to lock the steering wheel in position.
   - After adjusting the position, make sure you have securely locked the steering wheel in place by trying to move it up, down, in, and out.

WARNING

Adjusting the steering wheel position while driving may cause you to lose control of the vehicle and be seriously injured in a crash.

Adjust the steering wheel only when the vehicle is stopped.

Make any steering wheel adjustments before you start driving.
Adjusting the Mirrors

Interior Rearview Mirror
Adjust the angle of the rearview mirror when you are sitting in the correct driving position.

- **Rearview Mirror with Day and Night Positions**
  Flip the tab to switch the position. The night position will help reduce the glare from headlights behind you when driving after dark.

- **Automatic Dimming Rearview Mirror**
  When driving after dark, the automatic dimming rearview mirror reduces the glare from headlights behind you. This feature is always active.

* Not available on all models

---

Automatic Dimming Rearview Mirror*
The auto dimming function cancels when the shift position is in **R**.

Adjust the mirrors before you start driving. **Adjusting the Seat Positions** P. 175

---

Controls

Keep the inside and outside mirrors clean and adjusted for best visibility.
Adjusting the Mirrors

Power Door Mirrors

You can adjust the door mirrors when the ignition switch is in ON "*1."

- **Mirror position adjustment**

  **L/R selector switch:** Select the left or right mirror. After adjusting the mirror, return the switch to the center position.

  **Mirror position adjustment switch:** Press the switch left, right, up, or down to move the mirror.

**Expanded View Driver's Mirror**

The driver side door mirror has outer and inner segments. The outer segment is slightly curved to provide a wider angle view than a standard flat mirror. This wider view may help you check areas that are not visible using a standard door mirror.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Adjusting the Seats

Adjusting the Seat Positions

Adjust the driver's seat as far back as possible while allowing you to maintain full control of the vehicle. You should be able to sit upright, well back in the seat and be able to adequately press the pedals without leaning forward, and grip the steering wheel comfortably. The passenger's seat should be adjusted in a similar manner, so that it is as far back from the front airbag in the dashboard as possible.

**WARNING**
Sitting too close to a front airbag can result in serious injury or death if the front airbags inflate.

Always sit as far back from the front airbags as possible while maintaining control of the vehicle.

The National Highway Traffic Safety Administration and Transport Canada recommend that drivers allow at least 10 inches (25 cm) between the center of the steering wheel and the chest.

Always make seat adjustments before driving.

* Not available on all models
Adjusting the front manual seat(s)

Height Adjustment
(Driver’s seat only)
Pull up or push down the lever to raise or lower the seat.

Horizontal Position Adjustment
Pull up on the bar to move the seat, then release the bar.

Seat-back Angle Adjustment
Pull up the lever to change the angle.

►► Adjusting the Seats ►► Adjusting the Seat Positions

Once a seat is adjusted correctly, rock it back and forth to make sure it is locked in position.
Adjusting the Seats

Adjusting the Seat Positions

Controls

Adjust the driver’s seat-back to a comfortable, upright position, leaving ample space between your chest and the airbag cover in the center of the steering wheel.

The front seat passenger should also adjust their seat-back to a comfortable, upright position.

Adjusting the Seat-Backs

Reclining a seat-back so that the shoulder part of the belt no longer rests against the occupant’s chest reduces the protective capability of the belt. It also increases the chance of sliding under the belt in a crash and being seriously injured. The farther a seat-back is reclined, the greater the risk of injury.

WARNING

Reclining the seat-back too far can result in serious injury or death in a crash.

Adjust the seat-back to an upright position, and sit well back in the seat.

Do not put a cushion, or other object, between the seat-back and your back.

Doing so may interfere with proper seat belt or airbag operation.

If you cannot get far enough away from the steering wheel and still reach the controls, we recommend that you investigate whether some type of adaptive equipment may help.
Adjusting the Seats
Adjusting the Seat Positions

Controls

Your vehicle is equipped with head restraints in all seating positions.

Head restraints are most effective for protection against whiplash and other rear-impact crash injuries when the center of the back of the occupant’s head rests against the center of the restraint. The tops of the occupant’s ears should be level with the center height of the restraint.

Adjusting the Head Restraints

Position head in the center of the head restraint.

Adjusting the front head restraint positions

To raise the head restraint: Pull it upward.
To lower the head restraint: Push it down while pressing the release button.

WARNING

Improperly positioning head restraints reduces their effectiveness and increases the likelihood of serious injury in a crash.

Make sure head restraints are in place and positioned properly before driving.

In order for the head restraint system to work properly:
• Do not hang any items on the head restraints, or from the restraint legs.
• Do not place any objects between an occupant and the seat-back.
• Install each restraint in its proper location.
Adjusting the Seats

Adjusting the Seat Positions

Controls

A passenger sitting in the center back seating position should adjust the height of their head restraint to an appropriate position before the vehicle begins moving.

To raise the head restraint:
Pull it upward.

To lower the head restraint:
Push it down while pressing the release button.

Head restraints can be removed for cleaning or repair.

To remove a head restraint:
Pull the restraint up as far as it will go. Then push the release button, and pull the restraint up and out.

To reinstall a head restraint:
Insert the legs back in place, then adjust the head restraint to an appropriate height while pressing the release button. Pull up on the restraint to make sure it is locked in position.

Changing the Rear Center Seat Head Restraint Position

Removing and Reinstalling the Head Restraints

Front and rear center head restraints
Head restraints can be removed for cleaning or repair.

To remove a head restraint:
Pull the restraint up as far as it will go. Then push the release button, and pull the restraint up and out.

To reinstall a head restraint:
Insert the legs back in place, then adjust the head restraint to an appropriate height while pressing the release button. Pull up on the restraint to make sure it is locked in position.

WARNING
Failure to reinstall, or correctly reinstall, the head restraints can result in severe injury during a crash.

Always replace the head restraints before driving.
Adjusting the Seat Positions

Folding Down the Rear Outer Head Restraint

A passenger in an outer back seating position should put the head restraint in the upright position before the vehicle begins moving.

To fold down the head restraint:
Pull the strap.

To put the head restraint back in the upright position:
Pull up the head restraint and push rearward until it latches.
After all occupants have adjusted their seats and head restraints, and put on their seat belts, it is very important that they continue to sit upright, well back in their seats, with their feet on the floor until the vehicle is safely parked and the engine is off.

Sitting improperly can increase the chance of injury during a crash. For example, if an occupant slouches, lies down, turns sideways, sits forward, leans forward or sideways, or puts one or both feet up, the chance of injury during a crash is greatly increased.

In addition, an occupant who is out of position in the front seat can be seriously or fatally injured in a crash by striking interior parts of the vehicle or being struck by an inflating front airbag.

**Maintain a Proper Sitting Position**

**WARNING**

Sitting improperly or out of position can result in serious injury or death in a crash.

Always sit upright, well back in the seat, with your feet on the floor.
Rear Seats

Folding Down the Rear Seats

The rear seats can be folded down separately to allow for additional storage space.

To fold down the seat
1. Store the center seat belt first. Insert the latch plate into the slot on the side of the anchor buckle.
2. Retract the seat belt into the holder on the ceiling.
3. Lower the center head restraint to its lowest position. Put the armrest back into the seat-back.
4. Pull the release strap.
   - The seat cushion flips forward, the head restraints tilt downward, and the seat-back then folds flat.

Folding Down the Rear Seats

Make sure all items in the cargo area or items extending to the rear seats are properly secured. Loose items can fly forward if you have to brake hard.

Remove any items from the rear seat cushion and floor before you fold down the rear seat.

Make sure the seat-back completely lowers (a click sounds). Otherwise it will not re-latch when returned to the upright position.

The front seat(s) must be far enough forward so they do not interfere with the rear seats as they fold down.
- To return the seat to the original position
  1. Pull the seat-back up and push back into place until a click is heard.
  2. Push the head restraint up to its original position.
  3. Pull the seat cushion up and push it down into its original position.

- Rear Seat-back Adjusting

Pull the lever on the right to change the angle of the right half of the seat-back, and left for the left half.

- To return the seat to the original position

Make sure the seat-back, head restraints and seat cushion are securely latched back into place before driving.
Armrest

■ Using the Front Seat Armrest

The console lid can be used as an armrest.

To adjust:
Slide the armrest to a desired position.

■ Using the Rear Seat Armrest

Pull down the armrest in the center seat-back.
Interior Lights/Interior Convenience Items

Interior Lights

■ Interior Light Switches

The interior lights come on regardless of whether the doors are open or closed.

■ Door activated

The interior lights come on in the following situations:
- When any doors are opened.
- You unlock the driver's door.
- You remove the key from the ignition switch.
- When the power mode is set to VEHICLE OFF (LOCK).

Only the cargo area light comes on when the tailgate is opened.

■ OFF

The interior lights remain off regardless of whether the doors are open or closed.

In the door activated position, the interior lights fade out and go off about 30 seconds after the doors are closed. The lights go off after 30 seconds in the following situations:
- When you unlock the driver’s door but do not open it.
- When you remove the key from the ignition switch but do not open a door.
- When you set the power mode to VEHICLE OFF (LOCK) but do not open a door.

You can change the interior lights dimming time.

The interior lights go off immediately in the following situations:
- When you lock the driver’s door.
- When you close the driver’s door with the key in the ignition switch.
- When you close the driver’s door in ACCESSORY mode.
- When you turn the ignition switch to ON [*1].

If you leave any doors open in VEHICLE OFF (LOCK) mode, or without the key in the ignition switch, the interior lights go off after about 15 minutes.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

Continued
Map Lights

The map lights can be turned on and off by pressing the lenses.

Map Lights

When the interior light switch is in the door activated position and any door is open, pressing the lens does not turn off the map light.
Interior Convenience Items

■ Glove Box

Pull the handle to open the glove box. You can lock the glove box with the master key or the built-in key.

■ Console Compartment

Pull the handle to open the console compartment.

WARNING

An open glove box can cause serious injury to your passenger in a crash, even if the passenger is wearing the seat belt.

Always keep the glove box closed while driving.

Continued
Interior Lights/Interior Convenience Items

### Beverage Holders

**Front seat beverage holders**
Are located in the console between the front seats.

**Rear seat beverage holders**
Fold the armrest down to use the rear seat beverage holders.

---

Notice
Spilled liquids can damage the upholstery, carpeting, and electrical components in the interior.

Be careful when you are using the beverage holders. Hot liquid can scald you.

The front and rear separators are not interchangeable, and are labeled with their appropriate locations. Always ensure they are positioned as shown.
The accessory power sockets can be used when the ignition switch is in ACCESSORY I or ON II*1.

- Accessory power socket on the console panel
  Open the cover to use it.

NOTICE
Do not insert an automotive type cigarette lighter element. This can overheat the power socket.

The accessory power socket is designed to supply power for 12 volt DC accessories that are rated 180 watts or less (15 amps).

To prevent battery drain, only use the power socket with the engine running.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Access to the console compartment:

- **Models with smart entry system**: Open the console lid and the cover to use it.
- **Models without smart entry system**: Follow the instructions provided in the manual for access.
Coat Hook
There is a coat hook on the rear left grab handle. Pull it down to use it.

Cargo Side Net
Use the cargo side net to secure items to the side.
**Tie-down Anchors**

The tie-down anchors on the cargo area floor can be used to install a net for securing items.

Do not let anyone access items in the cargo area while driving. Loose items can cause injury if you have to brake hard.

**Cargo Hooks**

The cargo hooks on both sides of the cargo area can be used to hang a light items.

**NOTICE**

Do not hang a large object or an object that weighs more than 6 lbs (3 kg) on the side cargo hooks. Hanging heavy or large objects may damage the hooks.
**Sunglasses Holder**

To open the sunglasses holder, press and release the indent. To close, press it again until it latches.

You can store eyeglasses and other small items in this holder.

**Conversation mirror**

The sunglasses holder comes with a mirror. Open the sunglasses holder fully, then push it back to the first detent.

You can use the mirror to view the rear seats.

---

Keep the holder closed while driving except when accessing stored items.
The power mode must be in ON to use the seat heaters. The HI setting heats the seats faster than the LO setting.

The indicator for your setting comes on while the seat heater is in use. Press the button on the opposite side to turn the heater off. The indicator goes off.

While in HI, the heater cycles on and off. When a comfortable temperature is reached, select LO to keep the seat warm.

**WARNING**

Heat induced burns are possible when using seat heaters.

Persons with a diminished ability to sense temperature (e.g., persons with diabetes, lower-limb nerve damage, or paralysis) or with sensitive skin should not use seat heaters.

Do not use the seat heaters even in LO when the engine is off. Under such conditions, the battery may be weakened, making the engine difficult to start.

In the LO setting, the heater runs continuously and does not automatically turn off.

*Not available on all models*
The tonneau cover can be used to conceal items in the cargo area and protect them from direct sunlight.

**To extend:**
Pull the handle on the center edge, then clip the mounting rods in the hooks on both sides of the tailgate opening.

**To retract:**
Slip the rods out of the hooks, then slowly roll it back until it is completely retracted.

**To remove:**
Push either end of the housing inward, then lift it out of its position.

Do not let anyone access items in the cargo area while driving. Loose items can cause injury if you have to brake hard.
Do not stack objects higher than the top of the seat in the cargo area. They could block your view and be thrown about the vehicle during a sudden stop.

To prevent tonneau cover damage:
- Do not place items on the tonneau cover.
- Do not put weight on the tonneau cover.

* Not available on all models

---

Continued
To store:
The housing unit can be stored on the cargo area floor to make more space available.

Push one end of the unit into the hole on one side panel, then insert the other end into the hole on the other side.

After storing the unit, rock it up and down to make sure it is securely placed.
Heating and Cooling System*

Using Vents, Heating and A/C

**Mode Buttons**
Change airflow.
- Floor and defroster vents
- Floor vents
- Dashboard and floor vents and back of the center console
- Dashboard vents and back of the center console

**Fan Control Dial**
Adjusts the fan speed. Rotate the dial all the way to OFF to turn everything off.

**A/C Button**
Turns on the A/C, selects airflow from the dashboard vents, and switches the mode to recirculation.

**A/C Button**
Press to cool the interior or dehumidify while heating.

**Windshield Defroster Button**
Turns on the A/C, selects airflow from the defroster vents at the base of the windshield, and switches the mode to fresh air.

**Temperature Control Dial**
Adjusts the interior temperature.

**Recirculation Button**
Press the button and switch the mode depending on environmental conditions.
- Recirculation mode (indicator on): Recirculates air from the vehicle's interior through the system.
- Fresh air mode (indicator off): Maintains outside ventilation. Keep the system in fresh air mode in normal situations.

* Not available on all models
Heating and Cooling System

Using Vents, Heating and A/C

Heating

The heater uses heat from the engine coolant to warm the air.

1. Adjust the fan speed using the fan control dial.
2. Select 
3. Adjust the temperature using the temperature control dial.
4. Press the button (indicator off).

To rapidly warm up the interior

1. Set the fan to the maximum speed.
2. Select 
3. Set the temperature to maximum high.
4. Press the button (indicator on).

To dehumidify the interior

When used in combination with the heater, the air conditioning system makes the interior warm and dry and can prevent the windows from fogging up.

1. Adjust the fan speed using the fan control dial.
2. Press the A/C button to turn on the air conditioning system.
3. Select 
4. Adjust the temperature using the temperature control dial.

Heating

When you select the mode automatically switches to fresh air.

To rapidly warm up the interior

Change to fresh air mode as soon as the interior gets warm enough. The windows may fog up if kept in recirculation mode.
To rapidly cool down the interior
1. Set the fan to the maximum speed.
2. Set the temperature to maximum low.
3. Press the **A/C** button (indicator on).

Pressing the **A/C** button turns the air conditioning system on and automatically switches the system to fresh air mode.

To rapidly defrost the windows
1. Set the fan to the maximum speed.
2. Press the **A/C** button.
3. Press the **Fan Speed** button.
4. Set the temperature to maximum high.

For your safety, make sure you have a clear view through all the windows before driving.
Do not set the temperature near the upper or lower limit.
When cold air hits the windshield, the outside of the windshield may fog up.
If the side windows fog up, adjust the vents so that the air hits the side windows.

After defrosting the windows, switch over to fresh air mode.
If you keep the system in recirculation mode, the windows may fog up from humidity. This impedes visibility.
Using Automatic Climate Control

The automatic climate control system maintains the interior temperature you select. The system also selects the proper mix of heated or cooled air that raises or lowers the interior temperature to your preference as quickly as possible.

1. Press the AUTO button.
2. Adjust the interior temperature using the driver’s side or passenger’s side temperature control dial.
3. Press the button to cancel.

Switching between the recirculation and fresh air modes

Press the button and switch the mode depending on environmental conditions.

Recirculation mode (indicator on): Recirculates air from the vehicle’s interior through the system.

Fresh air mode (indicator off): Maintains outside ventilation. Keep the system in fresh air mode in normal situations.

Using Automatic Climate Control

If any button is pressed while in AUTO, the function of that button takes priority. The AUTO indicator goes off, but functions of other buttons pressed are still in auto mode.

To prevent cold air from blowing in from outside, the fan may operate at low speed for a while after the AUTO button has been pressed.

If the interior is very warm, you can cool it down more rapidly by partially opening the windows, turning the system on AUTO, and setting the temperature to low. Change the fresh air mode to recirculation mode until the temperature cools down.

When you set the temperature to the lower or upper limit, Lo or Hi is displayed.

Pressing the button switches the climate control system between on and off. When turned on, the system returns to your last selection.

While in ECON mode, the system has greater temperature fluctuations.
≤ Defrosting the Windshield and Windows

Pressing the button turns the air conditioning system on and automatically switches the system to fresh air mode.

Pressing the button again to turn off, the system returns to the previous settings.

■ To rapidly defrost the windows

1. Press the button.
2. Press the button.

> Defrosting the Windshield and Windows

For your safety, make sure you have a clear view through all the windows before driving.

Do not set the temperature near the upper or lower limit.
When cold air hits the windshield, the outside of the windshield may fog up.

If the side windows fog up, adjust the vents so that the air hits the side windows.

To rapidly defrost the windows

After defrosting the windows, switch over to fresh air mode. If you keep the system in recirculation mode, the windows may fog up from humidity. This impedes visibility.
Synchronized Mode

You can set the temperature synchronously for the driver side and the passenger side in synchronized mode.

1. Press the **SYNC** button.
   - The system switches to synchronized mode.
2. Adjust the temperature using driver’s side temperature control dial.

Press the **SYNC** button to return to dual mode.

---

**Climate Control System**

**Synchronized Mode**

When you press the **SYNC** button, the system changes to synchronized mode.

When the system is in dual mode, the driver side temperature and the passenger side temperature can be set separately.

**Models with navigation system**

In AUTO mode, the system adjusts each temperature based on the information of the sunlight sensor and the sun position updated by the navigation system’s GPS.
Automatic Climate Control Sensors

The automatic climate control system is equipped with sensors. Do not cover or spill any liquid on them.
Features

This chapter describes how to operate technology features.

Audio System

About Your Audio System

Models with navigation system
See the Navigation System Manual for operation of the audio system, Bluetooth® HandsFreeLink®, and voice commands for these features.

Models without navigation system
The audio system features AM/FM radio and the SiriusXM® Radio* service. It can also play audio CDs, WMA/MP3/AAC files, USB flash drives, and iPod, iPhone, and Bluetooth® devices.

You can operate the audio system from the buttons and switches on the panel, or the remote controls on the steering wheel.

SiriusXM® Radio* is available on a subscription basis only. For more information on SiriusXM® Radio*, contact a dealer.

General Information on the Audio System
P. 267

SiriusXM® Radio* is available in the United States and Canada, except Hawaii, Alaska, and Puerto Rico.

SiriusXM®* is a registered trademark of SiriusXM Radio, Inc.

Video CDs, DVDs, and 3-inch (8-cm) mini CDs are not supported.

iPod, iPhone and iTunes are trademarks of Apple Inc.

State or local laws may prohibit the operation of handheld electronic devices while operating a vehicle.

* Not available on all models
Audio System

Auxiliary Input Jack*

Use the jack to connect a standard audio device.

1. Open the AUX cover.
2. Connect a standard audio device to the input jack using a 1/8 inch (3.5 mm) stereo miniplug.
   > The audio system automatically switches to the AUX mode.

USB Adapter Cable*

1. Unclip the USB connector and loosen the adapter cable.
2. Install the iPod dock connector or the USB flash drive to the USB connector.

* Not available on all models
Audio System

USB Port(s)*

Features

1. Open the cover.
2. Install the iPod dock connector or the USB flash drive to the USB port.

• Do not leave the iPod or USB flash drive in the vehicle. Direct sunlight and high temperatures may damage it.
• Do not use an extension cable with the USB port.
• Do not connect the iPod or USB flash drive using a hub.
• Do not use a device such as a card reader or hard disk drive, as the device or your files may be damaged.
• We recommend keeping your data backed up before using the device in your vehicle.
• Displayed messages may vary depending on the device model and software version.

If the audio system does not recognize the iPod, try reconnecting it a few times or reboot the device. To reboot, follow the manufacturer’s instructions provided with the iPod or visit www.apple.com/ipod.

* Not available on all models
HDMI® Port*

1. Open the cover.
2. Install the HDMI® cable to the HDMI® port.

Audio Antenna

Your vehicle is equipped with a removable antenna at the rear of the roof.

NOTICE

Before using a “drive-through” car wash, remove the antenna by unscrewing it by hand. This prevents the antenna from being damaged by the car wash brushes.

* Not available on all models

The terms HDMI and HDMI High-Definition Multimedia Interface, and the HDMI Logo are trademarks or registered trademarks of HDMI Licensing LLC in the United States and other countries.

* Not available on all models
Audio System Theft Protection

The audio system is disabled when it is disconnected from the power source, such as when the battery is disconnected or goes dead. In certain conditions, the system may display *ENTER CODE*/Enter Code*

■ Reactivating the audio system
1. Turn the ignition switch to ON *1*
2. Turn on the audio system.
3. Press and hold the audio system power button for more than two seconds.
   ▶ The audio system is reactivated when the audio control unit establishes a connection with the vehicle control unit. If the control unit fails to recognize the audio unit, you must go to a dealer and have the audio unit checked.

*1: Models with one display
*2: Models with two displays
*3: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Audio Remote Controls

Allow you to operate the audio system while driving.

**SOURCE Button**
Cycles through the audio modes as follows:
- **Models with one display**
  - FM1 → FM2 → AM → CD → AUX
- **Models with two displays**
  - FM → AM → SiriusXM® → CD → USB → iPod → Pandora® → Aha™ → Apps → Bluetooth® Audio → AUX HDMI®

**+ - (Volume) Buttons**
Press +: To increase the volume.
Press -: To decrease the volume.

**Buttons**
- When listening to the radio
  - Press →: To select the next preset radio station.
  - Press ←: To select the previous preset radio station.
- When listening to a CD, iPod, USB flash drive, or Bluetooth® Audio
  - Press →: To skip to the next song.
  - Press ←: To go back to the beginning of the current or previous song.
- When listening to a CD or USB flash drive
  - Press and hold →: To skip to the next folder.
  - Press and hold ←: To go back to the previous folder.
- When listening to Pandora®
  - Press →: To skip to the next song.
  - Press and hold ←: To select the previous station.
  - Press and hold →: To select the next station.

*Not available on all models

Some sources will only appear when available, such as when a CD is inserted or when a compatible device is connected.
Models with two displays

Steering Wheel MENU Button

- When listening to the radio

  **Press and hold the MENU button**: To select the radio station by **Scan**, **Save Preset**, or **Seek**.

- When listening to the SiriusXM® radio*

  **Press and hold the MENU button**: To select **Scan**, **Save Preset**, **Channel**, or **Category**.

- When listening to a CD or USB flash drive

  **Press and hold the MENU button**: To select the song by **Scan**, **Repeat**, or **Random**.

- When listening to an iPod

  **Press and hold the MENU button**: To select the song by **Repeat** or **Shuffle**.

- When listening to Internet radio*

  **Press and hold the MENU button**: To select **Bookmark**, or **Play/Pause**.

- When listening to a Bluetooth® Audio

  **Press and hold the MENU button**: To select **Pause** or **Play** for the song.

* Not available on all models
Audio System Basic Operation

Models with one display
To use the audio system, the ignition switch must be in ACCESSORY [1] or ON [II].
Use the selector knob or SETUP button to access some audio functions.

Press 🌈 to switch between the normal and extended display for some functions.

Selector knob: Rotate left or right to scroll through the available choices. Press 🌈 to set your selection.
SETUP button: Press to select any mode such as the Auto Select, RDS Information, Sound Settings, Play Mode, Resume/Pause, or Adjust Clock.
emetery button: Press to go back to the previous display.

Audio Remote Controls P. 211
Setup menu items
- Auto Select P. 216
- RDS information P. 217
- Sound Settings P. 214
- Play Mode P. 220
- Resume/Pause P. 230
- Adjust Clock P. 128
Adjusting the Sound

Press the SETUP button, and rotate to select Sound Settings, then press . Rotate to scroll through the following choices:

- Bass
- Treble
- Fader
- Balance
- Speed-sensitive Volume Compensation

The SVC has four modes: Off, Low, Mid, and High. SVC adjusts the volume level based on the vehicle speed. As you go faster, audio volume increases. As you slow down, audio volume decreases.
Playing AM/FM Radio

- **FM Button**
  - Press to display and select an RDS category.

- **SCAN Button**
  - Press to sample each of the strongest stations on the selected band for 10 seconds.
  - To turn off scan, press the button again.

- **AM Button**
- **FM Button**
  - Press to select a band.

- **(Power) Button**
  - Press to turn the audio system on and off.

- **Preset Buttons (1-6)**
  - To store a station:
    1. Tune to the selected station.
    2. Pick a preset button and hold it until you hear a beep.
  - To listen to a stored station, select a band, then press the preset button.

- **Seek/Skip Buttons**
  - Press to search up and down the selected band for a station with a strong signal.

- **Selector Knob**
  - Turn to adjust the volume.
  - Press and turn to tune the radio frequency.

- **SETUP Button**
  - Press to display menu items.

Continued
Auto Select

Use the auto select feature to scan both bands and store the strongest station in each preset.

1. Press the SETUP button.
2. Rotate to select Auto Select, then press .

To turn off auto select, press again. This restores the presets you originally set.

Playing AM/FM Radio

The ST indicator appears on the display indicating stereo FM broadcasts. Stereo reproduction in AM is not available.

To switch the audio mode, press the SOURCE button on the steering wheel.

Audio Remote Controls P. 211

You can store 6 AM stations and 12 FM stations into the preset button memory. FM1 and FM2 let you store 6 stations each.

Auto Select function scans and stores up to 6 AM stations and 12 FM stations with a strong signal into the preset button memory.

If you do not like the stations auto select has stored, you can manually store your preferred frequencies.
■ Radio Data System (RDS)
Provides text data information related to your selected RDS-capable FM station.

■ RDS information
1. Press the SETUP button and rotate ☰ to select RDS Information.
2. Each time you press ☰, the RDS Information switches between on and off.

■ To find an RDS station from your selected program category
1. Press the ▲/▼ button to display and select an RDS category.
2. Use Seek/Skip or SCAN to select an RDS station.
Playing a CD

Your audio system supports audio CDs, CD-Rs and CD-RWs in either MP3 or WMA format. With the CD loaded, press the **CD** button.

**SCAN Button**
You will get a 10-second sampling of each song.
- Press to sample all tracks on the CD (all files in the current folder in MP3 or WMA).
- Press twice to sample the first file in each of the main folders (MP3 or WMA).
- To turn off scan, press and hold the button.

**Buttons**
Press ▶️ or ▶️ to skip to the next folder, and ▼️ to skip to the beginning of the previous folder in MP3 or WMA.

**Seek/Skip Buttons**
Press ◀️ or ▶️ to change tracks (files in MP3 or WMA).

**Features**
**Power** Button
Press to turn the audio system on and off.

**CD Slot**
Insert a CD about halfway into the CD slot.

**CD Button**
Press to play a CD.

**CD Eject** Button
Press to eject a CD.

**Selector Knob**
Turn to adjust the volume. Press and turn to select an item, then press to set your selection.

**SETUP Button**
Press to display menu items.
How to Select a File from a Folder with the Selector Knob (MP3/WMA)

1. Press to switch the display to a folder list.

2. Rotate to select a folder.

3. Press to change the display to a list of files in that folder.

4. Rotate to select a file, then press .

Playing a CD

NOTICE

Do not use CDs with adhesive labels. The label can cause the CD to jam in the unit.

WMA files protected by digital rights management (DRM) cannot be played. The audio system displays Unsupported, then skips to the next file.

Text data appears on the display under the following circumstances:
• When you select a new folder, file, or track.
• When you change the audio mode to CD.
• When you insert a CD.

If you eject the CD but do not remove it from the slot, the system reloads the CD automatically after several seconds.
How to Select a Play Mode

You can select repeat and random modes when playing a track or file.

1. Press the SETUP button.

2. Rotate \( \Rightarrow \) to select Play Mode, then press \( \Rightarrow \).

3. Rotate \( \Rightarrow \) to select a mode, then press \( \Rightarrow \).

To turn off a play mode

1. Press the SETUP button.

2. Rotate \( \Rightarrow \) to select Play Mode, then press \( \Rightarrow \).

3. Rotate \( \Rightarrow \) to select Normal Play, then press \( \Rightarrow \).
Playing an iPod

Connect the iPod using your dock connector to the USB adapter cable, then press the **AUX** button.

**USB Adapter Cable** * P. 207

### Pandora® Menu

You can operate some of the Pandora menu items from your vehicle’s audio system. The available items are:

- **Station List** *(QuickMix is also available)*
- **Like**
- **Dislike**
- **Resume/Pause**
- **SKIP**
- **Bookmark this song**
- **Bookmark this artist**

#### Operating a menu item

1. Press 🎧 to display the **PANDORA MENU**.
2. Rotate 🎧 to select a menu.
3. Press 🎧 to display the items on that menu.

### Playing Internet Radio

Pandora® is a personalized Internet radio service that selects music based on an artist, song, or genre a user enters, and streams what is likely to be of interest.

To use this service in your vehicle, the Pandora® app must first be installed on your iPhone. Visit [www.pandora.com](http://www.pandora.com) for more information.

If you cannot operate Pandora® through the audio system, it may be streaming through Bluetooth® Audio. Make sure Pandora® mode on your audio system is selected.

Available operating functions vary on software versions. Some functions may not be available on the vehicle’s audio system.

If there is a problem, you may see an error message on the i-MID. **P. 264**

There are restrictions on the number of songs you can skip or dislike in a given hour.
Playing a USB Flash Drive

Your audio system reads and plays sound files on a USB flash drive in either MP3, WMA or AAC*1 format.

Connect your USB flash drive to the USB adapter cable, then press the **AUX** button.

* USB Adapter Cable* P. 207

*1:Only AAC format files recorded with iTunes are playable on this unit.

* Not available on all models
How to Select a File from a Folder with the Selector Knob

1. Press \( \text{ } \) to switch the display to a folder list.

2. Rotate \( \text{ } \) to select a folder.

3. Press \( \text{ } \) to change the display to a list of files in that folder.

4. Rotate \( \text{ } \) to select a file, then press \( \text{ } \).

Playing a USB Flash Drive

Use the recommended USB flash drives.

General Information on the Audio System P. 267

Files in WMA format protected by digital rights management (DRM) are not played. The audio system displays Unplayable File, and then skips to the next file.

If there is a problem, you may see an error message on the i-MID.

iPod/USB Flash Drive P. 263
How to Select a Play Mode

You can select repeat and random modes when playing a file.

1. Press the SETUP button.
2. Rotate \( \Rightarrow \) to select Play Mode, then press \( \Rightarrow \).
3. Rotate \( \Rightarrow \) to select a mode, then press \( \Rightarrow \).

To turn off a play mode

1. Press the SETUP button.
2. Rotate \( \Rightarrow \) to select Play Mode, then press \( \Rightarrow \).
3. Rotate \( \Rightarrow \) to select Normal Play, then press \( \Rightarrow \).
Playing **Bluetooth®** Audio

Your audio system allows you to listen to music from your **Bluetooth**-compatible phone. This function is available when the phone is paired and connected to the vehicle’s **Bluetooth®** HandsFreeLink® (HFL) system.

Phone Setup P. 291

---

**Not all Bluetooth-enabled phones with streaming audio capabilities are compatible with the system.**

For a list of compatible phones:

- **U.S.** Visit www.acura.com/handsfreelink, or call 1-888-528-7876.
- **Canada** Visit www.handsfreelink.ca, or call 1-888-528-7876.

In some states, it may be illegal to operate devices that use data while driving.

If more than one phone is paired to the HFL system, there will be a delay before the system begins to play.

---

---

Continued

---

---
Audio System Basic Operation

Playing Bluetooth® Audio

To Play Bluetooth® Audio Files

1. Make sure that your phone is paired and connected to HFL.
2. Press the AUX button.

If the phone is not recognized, another HFL-compatible phone, which is not compatible for Bluetooth® Audio, may already be connected.

To pause or resume a file

1. Press the SETUP button.
2. Rotate to select Resume/Pause, then press .

Each time you press , the setting switches between pause and resume.

To play the audio files, you may need to operate your phone. If so, follow the phone maker’s operating instructions.

The pause function may not be available on some phones.

If any audio device is connected to the auxiliary input jack, you may need to press the AUX button repeatedly to select the Bluetooth® Audio system.

Switching to another mode pauses the music playing from your phone.
Audio System Basic Operation

Models with two displays
To use the audio system function, the power mode must be in ACCESSORY or ON.

(Home) Button: Press to go to the home screen.

(Menu) Button: Press to select any mode. The available mode includes Change Source, Station List, Save Preset, Radio Text, Music Search, and play modes. Play modes can be also selected from Scan, Random/Repeat, and so on.

(Back) Button: Press to go back to the previous display when it is displayed.

Button: Press to change the audio/information screen brightness. Press once and select or to make an adjustment.

Each time you press , the mode switches between the daytime mode, nighttime mode and OFF mode.

Audio System Basic Operation

Audio Menu Items
- Station List P. 240
- Music Search P. 246, 249, 254
- Random/Repeat P. 247, 255
- Scan P. 241, 247, 255
Audio System Basic Operation

How to access the disc slot

Press the (Eject/CLOSE) button to open the screen.

- The screen folds back, and the CD slot appears.

Press the (Eject/CLOSE) button to return the screen to the upright position.

If you eject the CD but do not remove it from the slot, the system reloads the CD automatically after several seconds.

Do not use the folded down screen as a tray.

You cannot open the screen when the power mode is in VEHICLE OFF.
Audio/Information Screen
Displays the audio status and wallpaper. From this screen, you can go to various setup options.

Switching the Display

Press the (Home) button to go to the home screen.
Select Phone, Info, Audio, Settings, or Connect.

- **Phone**
  Shows the HFL information.
  - *Bluetooth® HandsFreeLink®* P. 284
Audio System Basic Operation

Audio/Information Screen

- **Info**
  Shows the Trip Computer, Clock/Wallpaper, Voice Info, or System/Device Information.

- **Audio**
  Shows the current audio information.

- **Settings**
  Enters the customizing menu screen.
  
  Customized Features P. 271

- **Connect Apps**
  Connects with your smartphone*1 to play personalized music, information, and social media streams.
  
  Smartphone Apps P. 260

Changing the Home screen icon Layout

1. Press the **（）** button.
2. Select **Settings** to go to the settings screen.
3. Select **System**.
4. Select the **Home** tab.
5. Select **Home Screen Edit Order**.
6. Select and hold the icon then, drag it to the desired position.

*1: Available on specific phones only. Check handsfreelink.honda.com for compatible phones and hondalink.com for feature details.
### Wallpaper Setup

You can change, store, and delete the wallpaper on the audio/information screen.

#### Import wallpaper

You can import up to five images, one at a time, for wallpaper from a USB flash drive.

1. Connect the USB flash drive to the USB port.
2. Select Settings to go to the settings screen.
3. Select Clock/Info.
4. Select Clock/Wallpaper Type, then the Wallpaper tab.
5. Select Add New.  
   - The picture name is displayed on the list.
6. Select a desired picture.  
   - The preview is displayed on the left side on the screen.
7. Select Start Import to save the data.  
   - Then the display will return to the wallpaper list.

---

* Not available on all models

---

**Wallpaper Setup**

- When importing wallpaper files, the image must be in the USB flash drive's root directory. Images in a folder cannot be imported.
- The file name must be fewer than 256 characters.
- The file format of the image that can be imported is BMP (bmp) or JPEG (jpg).
- The individual file size limit is 5 MB.
- The maximum image size is 4,096 x 4,096 pixels. If the image size is less than 800 x 480 pixels, the image is displayed in the middle of the screen with the extra area appearing in black.
- If the USB flash drive does not have any pictures, the **No files detected** message appears.
Audio System Basic Operation
Audio/Information Screen

■ Select wallpaper
1. Select Settings to go to the settings screen.
2. Select Clock/Info.
3. Select Clock/Wallpaper Type, then the Wallpaper tab.
   ▶ The screen changes to the wallpaper list.
4. Select a desired wallpaper.
   ▶ The preview is displayed on the left side on the screen.
   ▶ The pop-up menu appears on the screen.
5. Select Set.
   ▶ The display will return to the wallpaper list.

■ Delete wallpaper
1. Select Settings to go to the settings screen.
2. Select Clock/Info.
3. Select Clock/Wallpaper Type, then the Wallpaper tab.
   ▶ The screen changes to the wallpaper list.
4. Select a wallpaper that you want to delete.
   ▶ The preview is displayed on the left side on the screen.
   ▶ The pop-up menu appears on the screen.
5. Select Delete.
   ▶ The confirmation message will appear.
6. Select Yes to delete completely.
   ▶ The display will return to the wallpaper list.

Wallpaper Setup
From the pop-up menu, select Preview to see a preview at full-size screen.

To go back to the previous screen, select OK, or press the BACK button.

When the file size is large, it takes a while to be previewed.

To delete all wallpapers you add, select Delete All, then Yes.
Adjusting the Sound

1. Press the button.
2. Select Settings.
3. Select Audio.
4. Select Sound.

Select the tabs to adjust the following choices:
BASS, TREBLE, FADER, BALANCE,
Subwoofer, SVC (Speed-sensitive Volume Compensation)

Adjusting the Sound

The SVC has four modes: Off, Low, Mid, and High.
SVC adjusts the volume level based on the vehicle speed. As you go faster, audio volume increases. As you slow down, audio volume decreases.
Audio System Basic Operation > Display Setup

Display Setup
You can change the brightness or color theme of the audio/information screen.

■ Changing the Screen Brightness

1. Press the button.
2. Select Settings to go to the Settings screen.
3. Select System.
4. Select the Display tab.
5. Select Display Settings.
6. Select the setting you want.
7. Select OK.

■ Changing the Screen’s Color Theme

1. Press the button.
2. Select Settings to go to the Settings screen.
3. Select System.
4. Select the Display tab.
5. Select Background Color.
6. Select the setting you want.
7. Select OK.

Changing the Screen Brightness
You can change the Contrast and Black level settings in the same manner.
Playing AM/FM Radio

**(Power)** Button
Press to turn the audio system on and off.

**VOL (Volume) Buttons**
Press to adjust the volume.

**Menu** Button
Press to display the menu items.

**Back** Button
Press to go back to the previous display.

**Scan**
Select to scan each station with a strong signal.

**Tune Icons**
Select ▼ or ▲ to tune the radio frequency.

**Open/Close Icon**
Displays/hides the detailed information.

**Seek Icons**
Select ▼ or ▲ to search up and down the selected band for a station with a strong signal.

**Preset Icons**
Tune the radio frequency for preset memory. Select and hold the preset icon to store that station. Select ▼ ▼ to display preset 7 onwards.

---

*1: Some or all of the lists may not be displayed.
Audio System Basic Operation
Playing AM/FM Radio

### Preset Memory

To store a station:
1. Tune to the selected station.
2. Press the button.
3. Select Save Preset.
4. Select the preset number for the station you want to store.

You can also store a preset station by the following procedure.
1. Select open/close icon to display a channel list.
2. Select Preset tab.
3. Press and hold the preset number for the station you want to store until you hear a beep.

### Radio Data System (RDS)

Provides text data information related to your selected RDS-capable FM station.

**To find an RDS station from Station List**
1. Press the button while listening to an FM station.
2. Select Station List.
3. Select the station.

**Manual update**
Updates your available station list at any time.
1. Press the button while listening to an FM station.
2. Select Station List.
3. Select Refresh.
■ Radio text
Displays the radio text information of the selected RDS station.
1. Press the button.
2. Select View Radio Text.

■ Scan
Samples each of the strongest stations on the selected band for 10 seconds.
1. Press the button.
2. Select Scan.
To turn off scan, select Cancel.
Playing SiriusXM® Radio*

- **(Power) Button**: Press to turn the audio system on and off.
- **VOL (Volume) Buttons**: Press to adjust the volume.
- **(Menu) Button**: Press to display the menu items.
- **(Back) Button**: Press to go back to the previous display.
- **Scan**: Select to scan each station with a strong signal.
- **Category Icons**: Select ← or → to display and select an SiriusXM® Radio category.

*1: Some or all of the lists may not be displayed.

* Not available on all models
To Play SiriusXM® Radio

1. Select SiriusXM® mode.
   - Audio Remote Controls P. 211
   - Audio/Information Screen P. 233

From the Status Mode screen:
2. Select a channel using the \( \text{\[} \) or \( \text{\]} \) icon.

To select a preset station:
2. Select open/close icon to display a preset channel list.
3. Select a channel from the list.

To switch between channel and category modes:
1. Select SiriusXM® mode.
2. Press the \( \text{\[} \) button.
3. Select XM Tune Mode.
4. Select Channel Mode or Category Mode.

* Not available on all models

Playing SiriusXM® Radio*

In channel mode, all available channels are selectable.
In category mode, you can select a channel within a category (Jazz, Rock, Classical, etc.).

There may be instances when SiriusXM® Radio does not broadcast all the data fields (artist name, title). This does not indicate a problem with your audio system.
Audio System Basic Operation

Playing SiriusXM® Radio *

Preset Memory

To store a station:
1. Tune to the selected station.
2. Press the 
   button.
3. Select Save Preset.
4. Select the preset number for the station you want to store.

You can also store a preset station by the following procedure.
1. Tune to the selected station.
2. Select open/close icon. The preset channel list appears.
3. Select Preset tab.
4. Press and hold the preset number for the station you want to store until you hear a beep.

To Select a Channel from a List

1. Press the 
   button.
2. Select Channel List.
3. Select the station.

Scan

1. Press the 
   button.
2. Select Scan.
   - In channel mode, all channels are sampled for a few seconds each.
   - In category mode, channels within a category are sampled for a few seconds each.
3. Select Cancel to stop scanning channels and to continue listening to the sampling channel.

* Not available on all models

Switching audio mode
Press the SOURCE button on the steering wheel or select SOURCE on the list.

Audio Remote Controls P. 211
You can also switch the mode by selecting Change Source on the MENU screen.

You can store 12 SiriusXM® stations into the preset memory.
Playing a CD

Your audio system supports audio CDs, CD-Rs, and CD-RWs in either MP3 or WMA, or AAC*1 format. With the CD loaded, select the CD mode.

*1: Only AAC format files recorded with iTunes are playable on this unit.

*2: Some or all of the lists may not be displayed.
How to Select a File from the Music Search List (MP3/WMA/AAC)

1. Press the button and select Music Search.

2. Select a folder.

3. Select a track.

NOTICE
Do not use CDs with adhesive labels. The label can cause the CD to jam in the unit.

WMA files protected by digital rights management (DRM) cannot be played. The audio system displays Unplayable File, then skips to the next file.

Text data appears on the display under the following circumstances:
- When you select a new folder, file, or track.
- When you change the audio mode to CD.
- When you insert a CD.

If you eject the CD but do not remove it from the slot, the system reloads the CD automatically after several seconds.
Audio System Basic Operation

Playing a CD

Features

You can select scan, repeat, and random modes when playing a track or file.

1. Press the \( \text{menu} \) button.
2. Select Scan or Random/Repeat.
3. Select a mode.

■ How to Select a Play Mode

To turn off a play mode
1. Press the \( \text{menu} \) button.
2. Select the mode you want to turn off.

Play Mode Menu Items

Scan
Scan Folders (MP3/WMA/AAC): Provides 10-second sampling of the first file in each of the main folders.
Scan Tracks: Provides 10-second sampling of all tracks on the CD (all files in the current folder in MP3, WMA, or AAC).

Random/Repeat
Repeat Folder (MP3/WMA/AAC): Repeats all files in the current folder.
Repeat Track: Repeats the current track/file.
Random in Folder (MP3/WMA/AAC): Plays all files in the current folder in random order.
Random All Tracks: Plays all tracks/files in random order.
Playing an iPod

Connect the iPod using your dock connector to the USB port, then select the iPod mode.

- **USB Port(s)**  P. 208

*Not available on all models*
1. Press the \( \text{Music Search} \) button and select Music Search.
2. Select the items on that menu.

Functions may vary by model or version. Some audio system functions may not be available.

If there is a problem, you may see an error message on the audio/information screen.

If you operate the music app on your iPhone/iPod while the phone is connected to the display audio system, you may no longer be able to operate the same app on the display audio. Reconnect the device if necessary.

iPod will only play through the USB cable, you cannot play the iPod through the HondaLink Cable.
Audio System Basic Operation
Playing an iPod

How to Select a Play Mode

You can select repeat and shuffle modes when playing a file.

1. Press the button.
2. Select Shuffle/Repeat.
3. Select a mode.

To turn off a play mode

1. Press the button.
2. Select the mode you want to turn off.

Play Mode Menu Items

- **Repeat Song**: Repeats the current file.
- **Shuffle Albums**: Plays all available albums in a selected list (playlists, artists, albums, songs, genres, or composers) in random order.
- **Shuffle All Songs**: Plays all available files in a selected list (playlists, artists, albums, songs, genres, or composers) in random order.
Playing Internet Radio

Connect a compatible phone through Bluetooth®.

iPhone only
You can also connect the phone using your dock connector to the USB port. Select Source to select Pandora mode.

Pandora®, the Pandora logo, and the Pandora trade dress are trademarks or registered trademarks of Pandora Media, Inc., used with permission. Pandora is currently available exclusively in the United States.

To find out if your phone is compatible with this feature, visit www.handsfreelink.honda.com, or call 1-888-528-7876

To use this service in your vehicle, the Pandora® app must first be installed on your phone. Visit www.pandora.com for more information.

Pandora on the iPhone will only play through the USB cable or Bluetooth® Audio, you cannot play Pandora® through the HondaLink Cable.

*1: Some or all of the lists may not be displayed.
Pandora® Menu

You can operate some of the Pandora® menu items from your vehicle’s audio system. The available items are:

• Bookmark
• Station List
• New Station
• Change Source
• Sound

Operating a menu item

1. Press the button.
2. Select an item.

Playing Internet Radio

Pandora® is free, personalized radio that plays music and comedy you’ll love. Just start with the name of one of your favorite artists, songs, comedians or composers and Pandora® will create a custom station that plays similar tracks. Pandora® also features hundreds of genre stations ranging from Dubstep to Smooth Jazz to Power Workout.

If you cannot operate Pandora® through the audio system, it may be streaming through Bluetooth® Audio. Make sure Pandora® mode on your audio system is selected.

Changing Stations

To change stations, activate the Pandora® menu, select Station List, and then select a new station.

Available operating functions vary on software versions. Some functions may not be available on the vehicle’s audio system.

If there is a problem, you may see an error message on the audio/information screen.

Pandora® may limit the total number of skips allowed on the service. If you dislike a track after the skip limit has been reached, your feedback will be saved but the current track will continue to play.
Playing a USB Flash Drive

Your audio system reads and plays sound files on a USB flash drive in either MP3, WMA or AAC*1 format. Connect your USB flash drive to the USB port, then select the USB mode.

Connect your USB flash drive to the USB port, then select the USB mode.

| USB Port(s)* | P. 208 |

*1: Only AAC format files recorded with iTunes are playable on this unit.

*2: Some or all of the lists may not be displayed.

* Not available on all models

---

*Not available on all models*
How to Select a File from the Music Research List

1. Press the button and select Music Search.

2. Select a folder.

3. Select a track.

Playing a USB Flash Drive

Use the recommended USB flash drives.

General Information on the Audio System P. 267

Files in WMA format protected by digital rights management (DRM) are not played. The audio system displays Unplayable File, and then skips to the next file.

If there is a problem, you may see an error message on the audio/information screen.

iPod/USB Flash Drive P. 263
How to Select a Play Mode

You can select scan, repeat, and random modes when playing a file.

1. Press the \( \text{\textquotedblleft} \text{\textquotedblright} \) button.
2. Select Scan or Random/Repeat.
3. Select a mode.

To turn off a play mode

1. Press the \( \text{\textquotedblleft} \text{\textquotedblright} \) button.
2. Select the mode you want to turn off.

Scan
- Scan Folders: Provides 10-second sampling of the first file in each of the main folders.
- Scan Tracks: Provides 10-second sampling of all files in the current folder.

Random/Repeat
- Repeat Folder: Repeats all files in the current folder.
- Repeat Track: Repeats the current file.
- Random in Folder: Plays all files in the current folder in random order.
- Random All Tracks: Plays all files in random order.
Playing Bluetooth® Audio

Your audio system allows you to listen to music from your Bluetooth-compatible phone. This function is available when the phone is paired and connected to the vehicle’s Bluetooth® HandsFreeLink® (HFL) system.

Phone Setup P. 320

Not all Bluetooth-enabled phones with streaming audio capabilities are compatible with the system. For a list of compatible phones:

- U.S.: Visit www.handsfreelink.honda.com, or call 1-888-528-7876.
- Canada: Visit www.handsfreelink.ca, or call 1-888-528-7876.

In some states, it may be illegal to operate devices that use data while driving.

Only one phone can be used with HFL at a time. When there are more than two paired phones in the vehicle, the first paired phone the system finds is automatically linked.

If more than one phone is paired to the HFL system, there may be a delay before the system begins to play.

In some cases, the name of the artist, album, or track may not appear correctly.

A NO CONNECT message may be displayed if:

- The phone is not linked to HFL.
- The phone is not turned on.
- The phone is not in the vehicle.
- An incompatible phone is connected.

The following functions may not be available on some devices:

- Pause function
- Group selection

*1: Depending on the Bluetooth device you connect, some or all of the lists may not be displayed.
Audio System Basic Operation

Playing Bluetooth® Audio Features

To Play Bluetooth® Audio Files

1. Make sure that your phone is paired and connected to HFL.
2. Press the Bluetooth® Audio mode.

If the phone is not recognized, another HFL-compatible phone, which is not compatible for Bluetooth® Audio, may already be connected.

To pause or resume a file

Select the play icon or pause icon.

Searching for Music

1. Press the button.
2. Select Music Search.
3. Select a search category (e.g., Albums).
4. Select an item.

The selection begins playing.

 Searching for Music

Depending on the Bluetooth device you connect, some or all of the lists may not be displayed.
Playing a Video Using the HDMI®

Your audio system allows you to play videos from an HDMI®-compatible device. Connect the device, using an HDMI® cable, then select the HDMI® mode.

HDMI® Port* P. 209

* Not available on all models
Audio System Basic Operation

Playing a Video Using the HDMI® Features

1. Press the button.
2. Select Settings to go to the Settings screen.
3. Select Audio.
4. Select Aspect Ratio Adjustment.
5. Select the setting you want.
6. Select OK.

Changing the Screen Aspect

This feature is limited while driving. To play videos, stop your vehicle and apply the parking brake.
Smartphone Apps

You can connect a compatible smartphone to the system to enable integration between the smartphone’s approved apps and the vehicle. This allows you to control the phone through the vehicle display. To check smart phone compatibility, download the HondaLink app, and view connection instructions, visit handsfreelink.honda.com. For the latest apps and feature details, check hondalink.com.

Park in a safe place before connecting your phone and while operating the displayed apps.

Not all phones and apps are compatible with the system. The system does not display all the available apps on smartphone, and some apps need to be preinstalled. Ask a dealer for details.

You need to switch the Bluetooth connection to your smartphone if another electronic device is connected.

Changing the currently paired phone

The following may vary by phone type:
• Connection methods.
• How to connect a smartphone to the system.
• Apps that can be operated on the screen.
• Display response time/update time.

We do not support every app operation on the display audio.
Ask the app provider for any questions on the app’s features.
Siri Eyes Free

You can talk to Siri using the Talk button on the steering wheel when your iPhone is paired to Bluetooth® HandsFreeLink®.

Siri Eyes Free

Siri is a trademark of Apple Inc.

Check Apple Inc. website for features available for Siri.

When operating the vehicle, only use Siri through the Talk button.

Some commands work only on specific phone features or apps.

Using Eyes Free

While in Eyes Free:
The display remains the same.
No feedback or commands appear.

(Talk) button: Press and hold until the display changes as shown.

(Hang-up/back) button: Press to deactivate Siri.
**Audio Error Messages**

General Information on the Audio System

SiriusXM® Radio Service*

■ Subscribing to SiriusXM® Radio
1. You need your radio ID ready before registering for subscription. To see the ID in the display: Select Channel List.
2. Have your radio ID and credit card number ready, and either call or visit the SiriusXM® website to subscribe.

■ Receiving SiriusXM® Radio
Switch to the SiriusXM® mode by using the SOURCE button on the steering wheel, or through the audio/information screen, and stay in this mode for about 30 minutes until the service is activated. Make sure your vehicle is in an open area with good reception.

■ SiriusXM® Radio Display Messages
Loading:
SiriusXM® is loading the audio or program information.
Channel off air:
The channel is not currently broadcasting.
Channel unauthorized:
SiriusXM® radio is receiving information update from the network.
No Signal:
The signal is too weak in the current location.
Channel unavailable:
No such channel exists, the channel is not part of your subscription, or the artist or title information is unavailable.
Check antenna:
There is a problem with the SiriusXM® antenna. Contact a dealer.

* Not available on all models

Contact Information for SiriusXM® Radio:
US: SiriusXM® Radio at www.siriusxm.com or 1-800-852-9696
Canada: SiriusXM® Canada at www.xmradio.ca, or 1-877-209-0079

The SiriusXM® satellites are in orbit over the equator; therefore, objects south of the vehicle may cause satellite reception interruptions. Satellite signals are more likely to be blocked by tall buildings and mountains the farther north you travel from the equator.

You may experience reception problems under the following circumstances:
• In a location with an obstruction to the south of your vehicle.
• In tunnels
• On the lower level of a multi-tiered road
• Large items carried on the roof rack
Recommended CDs

- Use only high-quality CD-R or CD-RW discs labeled for audio use.
- Use only CD-R or CD-RW discs on which the recordings are closed.
- Play only standard round-shaped CDs.

The CD packages or jackets should have one of these marks.

CDs with MP3, WMA, or AAC* files

- Some software files may not allow for audio play or text data display.
- Some versions of MP3, WMA, or AAC* formats may be unsupported.

* Not available on all models
■ Protecting CDs
Follow these precautions when handling or storing CDs:
• Store a CD in its case when it is not being played.
• When wiping a CD, use a soft clean cloth from the center to the outside edge.
• Handle a CD by its edge. Never touch either surface.
• Never insert foreign objects into the CD player.
• Keep CDs out of direct sunlight and extreme heat.
• Do not place stabilizer rings or labels on the CD.
• Avoid fingerprints, liquids, and felt-tip pens on the CD.

NOTICE
Do not insert a damaged CD. It may be stuck inside and damage the audio unit.

Examples:
• Bubbled, wrinkled, labeled, and excessively thick CDs
• Sealed with plastic ring
• Damaged CDs
• Using printer label kit

USB Flash Drives

- Use a recommended USB flash drive of 256 MB or higher.
- Some digital audio players may not be compatible.
- Some USB flash drives (e.g., a device with security lockout) may not work.
- Some software files may not allow for audio play or text data display.
- Some versions of MP3, WMA, or AAC formats may be unsupported.

IPod and iPhone Model Compatibility

This system may not work with all software versions of these devices.

USB Flash Drives

Files on the USB flash drive are played in their stored order. This order may be different from the order displayed on your PC or device.
Customized Features

Models with two displays

How to customize
While the vehicle is at a complete stop with the power mode in ON, select Settings, then select a setting item.

To customize other features, select Settings.

List of customizable options P. 275

Models with navigation system
See the Navigation System Manual for information of the customized features.

When you customize settings:
• Make sure that the vehicle is at a complete stop.
• Shift to [P].

* Not available on all models
Defaulting All the Settings

Models with two displays
Reset all the menu and customized settings as the factory defaults.

1. Press the button.
2. Select Settings.
3. Select System.
   - Repeat the procedure to select Others tab, then Factory Data Reset.
   - The confirmation message will appear.
4. Select Yes to reset the settings.
5. Select Yes again to reset the settings.
   - The confirmation message will appear. Select OK.

When you transfer the vehicle to a third party, reset all settings to default and delete all personal data.

The following settings will be reset:
- Audio preset settings
- Phonebook entries
- Other display and personal settings.
HomeLink® Universal Transceiver*

The HomeLink® Universal Transceiver can be programmed to operate up to three remote controlled devices around your home, such as garage doors, lighting, or home security systems.

**Important Safety Precautions**

Refer to the safety information that came with your garage door opener to test that the safety features are functioning properly. If you do not have the safety information, contact the manufacturer.

Before programming HomeLink, make sure that people and objects are out of the way of the garage or gate to prevent potential injury or damage.

When programming a garage door opener, park just outside the garage door’s path.

**Training HomeLink**

If you have not trained any of the buttons in HomeLink before, you should erase any previously learned codes. To do this:

- Press and hold the two outside buttons for about 20 seconds, until the red indicator blinks. Release the buttons, and proceed to step 1.
- If you are training the second or third button, go directly to step 1.
### Training a Button

1. Position the remote transmitter you wish to link 1 to 3 inches (3 - 8 cm) from the HomeLink button you want to program.

   **YES**

2. Press and hold the desired HomeLink button and the button on the remote transmitter. Does the HomeLink indicator (LED) blink after 10 secs?

   **NO**

3. Press and hold the programmed HomeLink button for about a sec. Does the device (garage door opener) work?

   **YES**

4. Press and hold the HomeLink button again.

   **HomeLink LED is on.**

5. Press and hold the HomeLink button again. The remote-controlled device should operate.

   **Training Complete**

6. The remote has a rolling code. Press the “learn” button on the remote-controlled device (e.g. garage door opener).

   **b. Within 30 secs, press and hold the programmed HomeLink button for 2 secs.**

---

#### Retraining a Button

If you want to retrain a programmed button for a new device, you do not have to erase all button memory. You can replace the existing memory code using this procedure:

1. Press and hold the desired HomeLink button until the HomeLink indicator begins to blink.

   **Standard transmitter**
   - Indicator remains on for about 25 secs.

   **Rolling code transmitter**
   - Indicator blinks rapidly for 2 secs, then remains on for about 23 secs.

2. Continue to hold the HomeLink button and follow steps 1 - 3 under “Training a Button.”

Erasing Codes

To erase all the codes, press and hold the two outside buttons until the HomeLink indicator begins to blink (about 10 to 20 secs). You should erase all codes before selling the vehicle.

If you have any problems, see the device’s instructions, visit www.homelink.com, or call HomeLink at 1-800-355-3515.
**Bluetooth® HandsFreeLink®**

Models with navigation system

See the Navigation System Manual for how to operate the **Bluetooth® HandsFreeLink®**.

Models without navigation system

**Bluetooth® HandsFreeLink®** (HFL) allows you to place and receive phone calls using your vehicle’s audio system, without handling your cell phone.

Models with one display

**Using HFL**

### HFL Buttons

- **Pick-up Button**: Press to go directly to the Phone screen or to answer an incoming call.
- **(Hang-up/back) button**: Press to end a call or to cancel a command.
- **(Talk) button**: Press to call a number with a stored voice tag.
- **PHONE button**: Press to go directly to the Phone screen.
- **Selector knob**: Rotate to select an item on the screen, then press .

To use HFL, you need a Bluetooth-compatible cell phone. For a list of compatible phones, pairing procedures, and special feature capabilities:
- **U.S.**: Visit [www.handsfreelink.honda.com](http://www.handsfreelink.honda.com), or call 1-888-528-7876.
- **Canada**: Visit [www.handsfreelink.ca](http://www.handsfreelink.ca), or call 1-888-528-7876.

Voice control tips
- Aim the vents away from the ceiling and close the windows, as noise coming from them may interfere with the microphone.
- Press and release the button when you want to call a number using a stored voice tag. Speak clearly and naturally after a beep.
- If the microphone picks up voices other than yours, the command may be misinterpreted.
- To change the volume level, use the audio system’s volume knob or the remote audio controls on the steering wheel.

State or local laws may prohibit the operation of handheld electronic devices while operating a vehicle.

If you receive a call while using the audio system, the system resumes its operation after ending the call.
The i-MID notifies you when there is an incoming call.

Certain manual functions are disabled or inoperable while the vehicle is in motion. You cannot select a grayed-out option until the vehicle is stopped.

Only previously stored speed dial entries can be called using voice commands while the vehicle is in motion.

You can change the system language to English, French, or Spanish.

HFL Limitations
An incoming call on HFL will interrupt the audio system when it is playing. It will resume when the call is ended.

HFL Status Display
The information that appears on the i-MID varies between phone models.

You can change the system language to English, French, or Spanish.
Models with one display

**HFL Menus**

The ignition switch must be in ACCESSORY [Ⅰ] or ON [Ⅱ] to use HFL.

- **PHONE** or [ ∈

- **Phone**

- [ ∈ → **Speed Dial**

  Display your speed dial entry lists,
  (up to 15 entries per paired phone)

- [ ∈ → **Call History**

  Display the last 20
  outgoing calls.

- [ ∈ → **Received Calls**

  Display the last 20
  incoming calls.

- [ ∈ → **Missed Calls**

  Display the last 20
  missed calls.

- [ ∈ → **Phonebook**

  Display the paired phone’s phonebook.

- [ ∈ → **Dialed Calls**

  Display the last 20
  outgoing calls.

- **Dial**

  Enter a phone number to dial.

*1: Appears only when a phone is connected to HFL.

To use HFL, you must first pair your Bluetooth-compatible cell phone to the system while the vehicle is parked.

Some functions are limited while driving. A message appears on the screen when the vehicle is moving and the operation is canceled.
Features

Redial

Redial the last number dialed in the phone's history.

Text Message

Select a message and Read/Stop reading. The message is read aloud.

Read/Stop reading

System reads received message aloud, or stop message from being read.

Reply

Reply to a received message using one of six fixed phrases.

Call

Make a call to the sender.

Display Message

See an entire received message (if more than three lines of text).

*1: Appears only when a phone is connected to HFL.
Pair a phone to the system
Connect a phone to the system.
Disconnect a paired phone from the system.
Delete a previously paired phone.
Create a code for a paired phone.
Features

*1: Appears only when a phone is connected to HFL.

**Bluetooth® HandsFreeLink®**

**HFL Menus**

- **Speed Dial**
  - Add New
  - Phonebook: Select a phone number from the phonebook to store as a speed dial number.
  - Call History: Select a phone number from the call history to store as a speed dial number.
  - Phone Number: Enter a phone number to store as a speed dial number.
- **Existing entry list**
  - **Change Speed Dial**: Change a previously stored speed dial number.
  - **Delete Speed Dial**: Delete a previously stored speed dial number.
  - **Store Voice Tag**: Create a voice tag for a speed dial number.
  - **Change Voice Tag**: Change a voice tag for a speed dial number.
  - **Delete Voice Tag**: Delete a voice tag for a speed dial number.
Bluetooth® HandsFreeLink® HFL Menus

- **Auto Transfer**: Set calls to automatically transfer from your phone to HFL when you enter the vehicle.
- **Caller ID Info**: Prioritize the caller’s name as the caller ID.
- **Name Priority**: Prioritize the caller’s phone number as the caller ID.
- **Passcode**: Create a security PIN for a paired phone.
- **Text Message Notice**: Turn incoming text message notifications on or off.
- **System Clear**: Clear the system of all paired phones, phonebook entries, and security codes.

*1: Appears only when a phone is connected to HFL.
**Phone Setup**

**To pair a cell phone (No phone has been paired to the system)**

1. Press the **PHONE** button or the **</></></>** button.
2. Rotate **</></></>** to select **Yes**, then press **</></></>**.
3. Make sure your phone is in search or discoverable mode, then press **</></></>**.
   - HFL automatically searches for a Bluetooth device.

4. When your phone appears on the list, select it by pressing **</></></>**.
   - If your phone doesn’t appear, select **Phone Not Found?** and search for Bluetooth devices using your phone.
   - From your phone, select **HandsFreeLink**.

5. HFL gives you a four-digit pairing code to input on your phone.
   - When your phone prompts you, input the four-digit pairing code.
6. A notification appears on the screen if pairing is successful.

**Phone Setup**

Your Bluetooth-compatible phone must be paired to HFL before you can make and receive hands-free calls.

Phone Pairing Tips:
- You cannot pair your phone while the vehicle is moving.
- Up to six phones can be paired.
- Your phone’s battery may drain faster when it is connected to HFL.
- If your phone is not ready for pairing or not found by the system within three minutes, the system will time out and returns to idle.

Once you have paired a phone, you can see it displayed on the screen with one or two icons on the right side.

These icons indicate the following:
- ː: The phone can be used with HFL.
- ːː: The phone is compatible with Bluetooth® Audio.
To pair a cell phone (when a phone has already been paired to the system)

1. Press the PHONE button or the button.
2. Rotate to select Phone Setup, then press .
   If a prompt appears asking to connect to a phone, select No and proceed with step 2.
3. Rotate to select Connection, then press .
4. Rotate to select Add a New Phone, then press .
   The screen changes to Select Location.
5. Rotate to select Empty, then press .
6. Make sure your phone is in search or discoverable mode, then press 📏.
   ▶️ HFL automatically searches for a Bluetooth device.

7. When your phone appears on the list, select it by pressing 📏.
   ▶️ If your phone doesn’t appear, select Phone Not Found? and search for Bluetooth devices using your phone. From your phone, select HandsFreeLink.

8. HFL gives you a four-digit pairing code to input on your phone. When your phone prompts you, input the four-digit pairing code.

9. A notification appears on the screen if pairing is successful.

Continued
To change the pairing code setting
1. Press the PHONE button or the button.
2. Rotate to select Phone Setup, then press .
3. Rotate to select Connection, then press .
4. Rotate to select Pairing Code, then press .
5. Rotate to select Fixed or Random, then press .

To create your own, select Fixed, and delete the current code, then enter a new one.
For a randomly generated pairing code each time you pair a phone, select Random.
To delete a paired phone
1. Press the PHONE button or the button.
2. Rotate to select Phone Setup, then press .
   - Repeat the procedure to select Connection, then Delete a Phone.
3. Rotate to select a phone you want to delete, then press .
4. A confirmation message appears on the screen. Rotate to select Yes, then press .
   - A notification appears if the deletion is successful.
To Set Up a Text Message Notice Option

1. Press the PHONE button or the \[button.\]
2. Rotate \[to select Phone Setup, then press \].
3. Rotate \[to select Message Notice, then press \].
4. Rotate \[to select a mode you want, then press \].

To Set Up a Text Message Notice Option

ON: A pop-up notification comes on every time you receive a new text message.
OFF: The message you receive is stored in the system without notification.
To Create a Security PIN
You can protect each of the six cell phones with a security PIN.

1. Press the PHONE button or the button.
2. Rotate \(\downarrow\) to select Phone Setup, then press \(\Rightarrow\).
   - Repeat the procedure to select Passcode.
3. Select a phone you want to add a security PIN to.
   - Rotate \(\uparrow\) to select a phone you want to add a security PIN to, then press \(\Rightarrow\).
4. A confirmation message appears on the screen.
   - Rotate \(\downarrow\) to select Yes, then press \(\Rightarrow\).
5. Enter a new four-digit number.
   - Rotate \(\uparrow\) to select, then press \(\Rightarrow\). Press \(\downarrow\) to delete. Press \(\uparrow\) to enter the security PIN.
6. Re-enter the four-digit number.
   - The screen returns to the screen in step 2.

Continued
### Automatic Transferring

If you get into the vehicle while you are on the phone, the call can be automatically transferred to HFL.

1. Press the PHONE button or the button.
2. Rotate to select Phone Setup, then press.
   - Repeat the procedure to select Auto Transfer.
3. Rotate to select On, then press.
4. A notification appears on the screen if the change is successful.

### Caller’s ID Information

You can select a caller’s information to be displayed when you have an incoming call.

1. Press the PHONE button or the button.
2. Rotate to select Phone Setup, then press.
   - Repeat the procedure to select Caller ID Info.
3. Rotate to select a mode you want, then press.
4. A notification appears on the screen if the change is successful.

---

**Automatic Transferring**

**Caller’s ID Information**

Name Priority mode: A caller’s name is displayed if it is stored in the phonebook.
Number Priority mode: A caller’s phone number is displayed.
To Clear the System

Security codes, paired phones, all stored voice tags, all speed dial entries, and all imported phonebook data are erased.

1. Press the PHONE button or the button.
2. Rotate to select Phone Setup, then press.
   ▶️ Repeat the procedure to select System Clear.
3. Rotate to select Yes, then press.

4. A confirmation message appears on the screen. Rotate to select Yes, then press .

5. A confirmation message appears on the screen. Rotate to finish.
Automatic Import of Cellular Phonebook and Call History

When your phone is paired, the contents of its phonebook and call history are automatically imported to HFL.

When you select a person from the list in the cellular phonebook, you can see up to three category icons. The icons indicate what types of numbers are stored for that name.

If a name has four or more numbers, ∙∙∙ appears instead of category icons.

On some phones, it may not be possible to import the category icons to HFL.

The phonebook is updated after every connection. Call history is updated after every connection or call.
### Speed Dial

Up to 15 speed dial numbers can be stored per phone.

To store a speed dial number:

1. Press the PHONE button or the button.
2. Rotate to select Phone Setup, then press .
   - Repeat the procedure to select Speed Dial, then Add New.
3. Rotate to select a place to choose a number from, then press .
   - By Phonebook: Select a number from the linked cell phone’s imported phonebook.
   - By Call History: Select a number from the call history.
   - By Phone Number: Input the number manually.
4. When the speed dial is successfully stored, you are asked to create a voice tag for the number. Rotate to select Yes or No, then press .
5. Using the button, follow the prompts to say the name for the speed dial entry.

---

You can use the audio preset buttons during a call to store a speed dial number:

1. Press and hold the desired audio preset button during a call.
2. The contact information for the active call will be stored for the corresponding speed dial.

When a voice tag is stored, you can press the button and call the number using voice commands.
To add a voice tag to a stored speed dial number

1. Press the PHONE button or the button.
2. Rotate to select Phone Setup, then press.
   ► Repeat the procedure to select Speed Dial.
3. Select an existing speed dial entry.
4. Rotate to select Store Voice Tag, then press.
5. Using the button, follow the prompts to complete the voice tag.

To delete a voice tag

1. Press the PHONE button or the button.
2. Rotate to select Phone Setup, then press.
   ► Repeat the procedure to select Speed Dial.
3. Select an existing speed dial entry.
4. Rotate to select Delete Voice Tag, then press.
   ► A confirmation message appears on the screen. Rotate to select Yes, then press.

Avoid using duplicate voice tags.
Avoid using “home” as a voice tag.
It is easier for HFL to recognize a longer name. For example, use “John Smith” instead of “John.”
To delete a speed dial number

1. Press the PHONE button or the button.
2. Rotate to select Phone Setup, then press .
   - Repeat the procedure to select Speed Dial.
3. Select an existing speed dial entry.
4. Rotate to select Delete Speed Dial, then press .
   - A confirmation message appears on the screen. Rotate to select Yes, then press .

Making a Call

You can make calls by inputting any phone number, or by using the imported phonebook, call history, speed dial entries, or redial.

Making a Call

Any voice-tagged speed dial entry can be dialed by voice from any screen.
Press the button and follow the prompts.

The maximum range between your phone and vehicles is 30 feet (10 meters).

Once a call is connected, you can hear the voice of the person you are calling through the audio speakers.
To make a call using the imported phonebook
When your phone is paired, the contents of its phonebook are automatically imported to HFL.
1. Press the PHONE button or the button.
2. Rotate to select Phonebook, then press.
3. The phonebook is stored alphabetically. Rotate to select the initial, then press.
4. Rotate to select a name, then press.
5. Rotate to select a number, then press.
   ►Dialing starts automatically.

To make a call using a phone number
1. Press the PHONE button or the button.
2. Rotate to select Dial, then press.
3. Rotate to select a number, then press.
4. Rotate to select , then press.
   ►Dialing starts automatically.

To make a call using the imported phonebook
This function is disabled while the vehicle is moving. However, you can call a stored voice-tagged speed dial number using voice commands.
   ►Limitations for Manual Operation P. 285
   ►Speed Dial P. 301

To make a call using a phone number
This function is disabled while the vehicle is moving. However, you can call a stored voice-tagged speed dial number using voice commands.
   ►Limitations for Manual Operation P. 285
   ►Speed Dial P. 301
To make a call using redial
1. Press the PHONE button or the button.
2. Rotate to select Redial, then press .
   ▶ Dialing starts automatically.

To make a call using the call history
Call history is stored by Dialed Calls, Received Calls, and Missed Calls.
1. Press the PHONE button or the button.
2. Rotate to select Call History, then press .
3. Rotate to select Dialed Calls, Received Calls, or Missed Calls, then press .
4. Rotate to select a number, then press .
   ▶ Dialing starts automatically.

To make a call using a speed dial entry
1. Press the PHONE button or the button.
2. Rotate to select Speed Dial, then press .
3. Rotate to select a number, then press .
   ▶ Dialing starts automatically.

To make a call using the call history
The call history appears only when a phone is connected to HFL, and displays the last 20 dialed, received, or missed calls.

To make a call using a speed dial entry
On the Phone screen, the first six speed dials on the list can be directly selected by pressing the corresponding audio preset buttons (1-6).

Select More Speed Dial Lists to view another paired phone’s speed dial list.

When a voice tag is stored, press the button and call the number using voice commands.

Speed Dial P. 301

Any voice-tagged speed dial entry can be dialed by voice from any screen.
Press the button and follow the prompts.
When there is an incoming call, an audible notification sounds (if activated) and the Incoming Call screen appears.

Press the button to answer the call.
Press the button to decline or end the call.
Options During a Call

The following options are available during a call.

**Mute**: Mute your voice.

**Transfer Call**: Transfer a call from HFL to your phone.

**Touch Tones**: Send numbers during a call. This is useful when you call a menu-driven phone system.

1. To view the available options, press the PHONE button.

2. Rotate the knob to select the option, then press it.

   - The check box is checked when **Mute** is selected. Select **Mute** again to turn it off.

---

**Touch Tones**: Available on some phones.
Receiving a Text Message

HFL can display newly received text messages as well as 20 of the most recently received messages on a connected cell phone. Each received message can be read aloud and replied to using a fixed common phrase.

1. A pop-up appears and notifies you of a new text message.
2. Rotate to select Yes to listen to the message, then press .
   - The text message is displayed. The system automatically starts reading out the message.
3. To discontinue the message read-out, press the button.

Receiving a Text Message

The system does not display any received messages while you are driving. You can only hear them read aloud.

With some phones, you may be able to display up to 20 most recent text messages.

Only the first three lines of the received message are displayed with this option.

Displaying an entire message P. 312
### Displaying Messages

1. Press the **PHONE** button or the **TEXT** button.
2. Rotate **Text Message** to select **Text Message**, then press **Text Message**.

3. Rotate **Text Message** to select a message, then press **Text Message**.
   - The text message is displayed. The system automatically starts reading the message aloud.

---

**Displaying Messages**

The **TEXT** icon appears next to an unread message.

Only the first three lines of the received message are displayed with this option.

*Displaying an entire message* P. 312

If you delete a message on the phone, the message disappears from the system. If you send a message from the system, the message goes to your phone.
Using the stop reading or read option
1. Press the PHONE button or the button.
2. Rotate to select Text Message, then press .
3. Rotate to select a message, then press .
   ▶ The text message is displayed. The system automatically starts reading the message aloud.
4. Press to enter Text Message Menu.
5. Rotate to select Stop Reading or Read, then press .

Using the stop reading or read option
This option changes to:
• Stop Reading while the text message is read out. Select this option to discontinue the message readout.
• Read when you go to the Text Message menu, or after you selected Stop Reading. Select this option to hear the system reading out the selected message.
■ Reply to a message
You can reply to a message using one of the six common phrases available in the system.

1. Press the PHONE button or the  button.
2. Rotate  to select Text Message, then press .
3. Rotate  to select a message, then press .
   ▶ The text message is displayed. The system automatically starts reading out the message.
4. Press  to enter the Text Message Menu.
5. Rotate  to select Reply, then press .
6. Rotate  to select the reply message, then press .
7. The reply message you selected is displayed. Select Yes to send the message.

You cannot add, edit, or delete reply messages.

After you reply, the following is displayed:

The available fixed reply messages are as follows:
• Talk to you later, I'm driving.
• I am on my way.
• I'm running late.
• OK
• Yes
• No
Making a call to a sender
You can call the text message sender.
1. Press the PHONE button or the \( \text{📞} \) button.
2. Rotate \( \text{旋转} \) to select to Text Message, then press \( \text{📞} \).
3. Rotate \( \text{旋转} \) to select a message, then press \( \text{📞} \).
   ▶ The text message is displayed. The system automatically starts reading out the message.
4. Press \( \text{📞} \) to enter the Text Message Menu.
5. Rotate \( \text{旋转} \) to select Call, then press \( \text{📞} \).
   ▶ HFL begins dialing.

Displaying an entire message
1. Press the PHONE button or the \( \text{📞} \) button.
2. Rotate \( \text{旋转} \) to select to Text Message, then press \( \text{📞} \).
3. Rotate \( \text{旋转} \) to select a message, then press \( \text{📞} \).
   ▶ The text message is displayed. The system automatically starts reading out the message.
4. Press \( \text{📞} \) to enter the Text Message Menu.
5. Rotate \( \text{旋转} \) to select Display Message, then press \( \text{📞} \).
6. Rotate \( \text{旋转} \) to scroll down and display the entire message.
Using HFL

Models with two displays

**HFL Buttons**

- **MENU Button**: Press and hold to display **Speed Dial**, **Call History**, or **Redial** on the Phone screen.
- **SOURCE Button**: Press to select an item displayed on the Phone screen.
- **(Pick-up) Button**: Press to go directly to the Phone screen, or to answer an incoming call.
- **(Hang-up/Back) Button**: Press to end a call, go back to the previous command, or to cancel a command.
- **(Talk) Button**: Press to call a number with a stored voice tag, a phonebook, name, or a number.
- **/(Menu) Button**: Press to select an item displayed on the Phone screen.
- **SOURCE button**: Press to call a number listed in the selected item on the Phone screen.

**Voice control tips**

- Press the button when you want to call a number using a stored voice tag, a phonebook, name or a number. Speak clearly and naturally after a beep.
- If the microphone picks up voices other than yours, the command may be misinterpreted.
- To change the volume level, use the audio system’s VOL (Volume) or use the remote audio controls on the steering wheel.

**State or local laws may prohibit the operation of handheld electronic devices while operating a vehicle.**

Up to six speed dial entries can be displayed among a total of 20 that can be entered. If there is no entries in the system, Speed Dial is disabled.

**To use HFL, you need a Bluetooth-compatible cell phone. For a list of compatible phones, pairing procedures, and special feature capabilities:**

- **U.S.**: Visit [www.handsfreelink.honda.com](http://www.handsfreelink.honda.com), or call 1-888-528-7876.
- **Canada**: Visit [www.handsfreelink.ca](http://www.handsfreelink.ca), or call 1-888-528-7876.

**Customized Features**

To use HFL, the Bluetooth On/Off Status setting must be in On.
To go to the Phone menu screen:
1. Press the button.
2. Select Phone to switch the display to the Phone screen.
3. Press the button.

**HFL Status Display**

The audio/information screen notifies you when there is an incoming call.

- **Bluetooth Indicator**
  Comes on when your phone is connected to HFL.
- **Battery Level Status**
- **Signal Strength**
- **HFL Mode**
- **Caller's Name**
- **Caller's Number**

**Limitations for Manual Operation**

Certain manual functions are disabled or inoperable while the vehicle is in motion. You cannot select a grayed-out option until the vehicle is stopped.

Only previously stored speed dial entries with voice tags, phone book names, or numbers can be called using voice commands while the vehicle is in motion.

**Using HFL**

*Bluetooth® Wireless Technology*

The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc., and any use of such marks by Honda Motor Co., Ltd., is under license. Other trademarks and trade names are those of their respective owners.

**HFL Limitations**

An incoming call on HFL will interrupt the audio system when it is playing. It will resume when the call is ended.

**HFL Status Display**

The information that appears on the audio/information screen varies between phone models.

You can change the system language to English, French, or Spanish.

*Customized Features* P. 271

Phone Setup

To pair a mobile phone (when there is no phone paired to the system)
1. Select Phone.
2. Select Yes.
3. Make sure your phone is in search or discoverable mode, then select Continue.
   HFL automatically searches for a Bluetooth device.
4. Select your phone when it appears on the list.
   If your phone does not appear, you can select Refresh to search again.
   If your phone still does not appear, select Phone not Found and search for Bluetooth devices using your phone.
   From your phone, select HandsFreeLink.
5. The system gives you a pairing code on the audio/information screen.
   Confirm if the pairing code on the screen and your phone match. This may vary by phone.
6. A notification appears on the screen if pairing is successful.

Phone Setup

Your Bluetooth-compatible phone must be paired to HFL before you can make and receive hands-free calls.

Phone Pairing Tips:
- You cannot pair your phone while the vehicle is moving.
- Up to six phones can be paired.
- Your phone's battery may drain faster when it is paired to HFL.
- If your phone is not ready for pairing or not found by the system, the system will return to the previous screen.
■ To pair a phone when a phone is already paired
1. Go to the Phone settings screen. Phone settings screen P. 315
2. Select Connect Phone.
3. Select a phone to connect.
   - Pairing start.
4. A notification appears on the screen if pairing is successful.

■ Changing the currently paired phone
1. Go to the Phone settings screen. Phone settings screen P. 315
2. Select Connect Phone.
3. Select a phone to connect.
   - HFL disconnects the current phone and starts searching for another paired phone.

Changing the currently paired phone
If no other phones are found or paired when trying to switch to another phone, HFL will inform you that the original phone is connected again.

To pair other phones, select Add Bluetooth Device from the Connect Phone screen.

Continued
To change the pairing code setting

1. Press the [HandsFreeLink] button.
2. Select **Settings**.
3. Select **Bluetooth**.
4. Select **Bluetooth** tab.
5. Select **Edit Pairing Code**.
6. Select **Fixed** or **Random**.

The default pairing code is **0000** until you change the setting.

To create your own, select **Fixed**, and delete the current code, then enter a new one.

For a randomly generated pairing code each time you pair a phone, select **Random**.
To edit an already-paired phone name
1. Go to the Phone settings screen.
2. Select Phone tab.
3. Select Bluetooth Device List.
4. Select a paired phone you want to edit.
5. Select Edit Device Name.
6. Edit the name and select OK.
7. A notification appears if the change is successful.
To delete a paired phone
1. Go to the Phone settings screen.
2. Select Phone tab.
3. Select Bluetooth Device List.
4. Select a phone you want to delete.
5. Select Delete This Device.
6. You will receive a confirmation message on the screen. Select Yes.
7. A notification appears if the deletion is successful.
To Set Up a Text/E-mail Message Options

To turn on or off the text/e-mail message function
1. Go to the Phone settings screen.
   Phone settings screen P. 315
2. Select Text/Email tab, then Enable Text/Email.
   A pop-up menu appears on the screen.
3. Select On or Off.

To turn on or off the text/e-mail message notice
1. Go to the Phone settings screen.
   Phone settings screen P. 315
2. Select Text/Email tab, then New Message Notification.
   A pop-up menu appears on the screen.
3. Select On or Off.

On: A pop-up notification comes on every time you receive a new message.
Off: The message you receive is stored in the system without notification.
You can change the ring tone setting.

1. Go to the Phone settings screen. Phone settings screen P. 315
2. Select Phone tab, then Ring Tone.
3. Select Fixed or Mobile Phone.

**Fixed**: The fixed ring tone sounds from the speaker.

**Mobile Phone**: The ring tone stored in the connected cell phone is heard through the vehicle speakers.
■ When Automatic Phone Sync is set to On:
When your phone is paired, the contents of its phonebook and call history are automatically imported to the system.

■ Changing the Automatic Phone Sync setting
1. Go to the Phone settings screen.  
   Phone settings screen P. 315
2. Select Phone tab, then Automatic Phone Sync.
3. Select On or Off.

Automatic Import of Cellular Phonebook and Call History
When you select a person from the list in the cellular phonebook, you can see up to three category icons. The icons indicate what types of numbers are stored for that name.

Pref Home Mobile Work Pager Fax Car Other Voice

On some phones, it may not be possible to import the category icons to the system.

The phonebook is updated after every connection. Call history is updated after every connection or call.

### To delete a speed dial

1. Go to the Phone settings screen.

   Phone settings screen P. 315

2. Select Phone tab, then Edit Speed Dial.

3. Select an existing speed dial entry.

   From the pop-up menu, select Delete.

4. A confirmation message appears on the screen. Select Yes.

### Making a Call

You can make calls by inputting any phone number, or by using the imported phonebook, call history, speed dial entries, or redial.

Making a Call

Any voice-tagged speed dial entry, phonebook name, or number can be dialed by voice from most screens. Press the voice button and say "Call" and the stored voice tag name.

The maximum range between your phone and vehicles is 30 feet (10 meters).

Once a call is connected, you can hear the voice of the person you are calling through the audio speakers.
■ To make a call using the imported phonebook
1. Go to the Phone menu screen.  
   Phone menu screen P. 318
2. Select Phonebook.
3. Select a name.
   ▶ You can also search by letter. Select Search.
   ▶ Use the keyboard on the touch screen for entering letters.
4. Select a number.
   ▶ Dialing starts automatically.

■ To make a call using a phone number
1. Go to the Phone menu screen.
   Phone menu screen P. 318
2. Select Dial.
3. Select a number.
   ▶ Use the keyboard on the touch screen for entering numbers.
4. Select .
   ▶ Dialing starts automatically.
To make a call using redial
1. Go to the Phone menu screen.
2. Select Redial.
   - Dialing starts automatically.

To make a call using the call history
Call history is stored by All, Dialed, Received, and Missed.
1. Go to the Phone menu screen.
2. Select Call History.
3. Select All, Dialed, Received, or Missed.
4. Select a number.
   - Dialing starts automatically.

To make a call using a speed dial entry
1. Go to the Phone menu screen.
2. Select Speed Dial.
3. Select a number.
   - Dialing starts automatically.

To make a call using redial
Press and hold the button to redial the last number dialed in your phone’s history.

To make a call using the call history
The call history displays the last 20 dialed, received, or missed calls.
(Appears only when a phone is connected to the system.)

To make a call using a speed dial entry
When a voice tag is stored, press the button to call the number using the voice tag.

Any voice-tagged speed dial entry can be dialed by voice from any screen.
Press the button and follow the prompts.
When there is an incoming call, an audible notification sounds and the **Incoming call** screen appears.

Press the **Answer** button to answer the call. Press the **Ignore** button to decline or end the call.

### Mute:
Mute your voice.
- The mute icon appears when **Mute** is selected. Select **Mute** again to turn it off.

### Transfer:
Transfer a call from the system to your phone.

### Touch Tones:
Send numbers during a call. This is useful when you call a menu-driven phone system.

You can select the icons on the touch screen instead of the **Answer** and **Ignore** buttons.
Receiving a Text/E-mail Message

HFL can display newly received text or e-mail messages as well as 20 of the most recently received messages on a linked cell phone. Each received message can be read aloud and replied to using a fixed common phrase.

1. A pop-up appears and notifies you of a new text or e-mail message.
2. Select Read to listen to the message.
   ▶ The text or e-mail message is displayed. The system automatically starts reading out the message.
3. To discontinue the message read-out, select Stop.
If a paired phone has text or e-mail message accounts, you can select one of them to be active and receive notifications.

1. Go to the **Phone settings** screen.  
   - **Phone settings screen** P. 315
2. Select **Text/Email** tab, then **Select Account**.  
   - A pop-up menu appears on the screen.
3. Select **Text Message** or an e-mail message account you want.

**Selecting a E-mail Message Account**

You can also select a mail account from the folder list screen or the message list screen.

You can only receive notifications from one text message or mail account at a time.
### Displaying Messages

#### Displaying Text Messages

1. Go to the **Phone menu** screen. 
   - **Phone menu screen** P. 318
2. Select **Text/Email**.
   - Select account if necessary.
3. Select a message.
   - The text message is displayed. The system automatically starts reading the message aloud.

#### Displaying Messages

The icon appears next to an unread message.

If you delete a message on the phone, the message is also deleted in the system. If you send a message from the system, the message goes to your phone's outbox.

To see the previous or next message, select **Previous** or **Next** on the message screen.
Displaying e-mail messages

1. Go to the Phone menu screen.
   - Phone menu screen P. 318
2. Select Text/Email.
   - Select Select Account if necessary.
3. Select a folder.
4. Select a message.
   - The e-mail message is displayed. The system automatically starts reading the message aloud.

Folder List

Message List

E-mail Message

Continued
**Bluetooth® HandsFreeLink®**

---

**HFL Menus**

---

**Read or Stop reading a message**

1. Go to the text or e-mail message screen. The system automatically starts reading the message aloud.
   - Displaying Messages P. 336
2. Select Stop to stop reading. Select Read again to start reading the message from the beginning.

---

**Reply to a message**

1. Go to the text or e-mail message screen. The system automatically starts reading the message aloud.
   - Displaying Messages P. 336
2. Select Read.
3. Select the reply message. The pop-up menu appears on the screen.
4. Select Send to send the message. Complete appears on the screen when the reply message was successfully sent.

---

**Reply to a message**

The available fixed reply messages are as follows:
- Talk to you later, I'm driving.
- I'm on my way.
- I'm running late.
- OK
- Yes
- No

You cannot add, edit, or delete reply messages.
Making a call to a sender
1. Go to the text message screen.
2. Select Dial.
In Case of Emergency

Automatic collision notification

If your vehicle’s airbags deploy or if the unit detects that the vehicle is severely impacted, your vehicle automatically will attempt to connect to the HondaLink operator. If connected, information about your vehicle, its location, and its condition will be sent to the operator; you also can speak to the operator when connected.

IMPORTANT: For vehicles equipped with HondaLink Assist, owner activation constitutes authorization for Honda to collect information from your vehicle needed to provide the service, and agreement to the Terms of Use at www.hondalink.com/TermsAndConditions. In a crash, HondaLink Assist will attempt to notify emergency services but NEITHER HONDA NOR ITS SERVICE PROVIDERS GUARANTEE THAT SUCH NOTIFICATION WILL OCCUR.

Honda reserves the right to terminate HondaLink Assist services at any time or for any reason, and in the future may not be able to provide services due to changes in, or obsolescence of, technology integral to the service or changes in governmental regulation.

In Case of Emergency

Your vehicle may not be able to connect to the operator if the battery level is low, the line is disconnected, or you do not have adequate cellular coverage.

You cannot use this emergency services when:
• You travel outside the HondaLink service coverage areas.
• There is a problem with the connecting devices, such as the microphones, speakers, or the unit itself.

You cannot operate other phone-related functions using the screen while talking to the operator. Select Hang Up to terminate the connection to your vehicle.

Automatic collision notification

If the unit fails to connect to the operator, it repeatedly tries until it succeeds.
■ To enable notification

1. Go to the Phone settings screen.
   - Phone settings screen P. 315
2. Select Phone tab, then HondaLink Assist.
   - A pop-up menu appears on the screen.
3. Select On or Off.

Setting options:
- **On**: Notification is available.
- **Off**: Disable the feature.
Compass

When you turn the ignition switch to ON [II]*1, the compass self-calibrates, and the compass display appears.

Compass Calibration

If the compass indicates the wrong direction, or the CAL indicator blinks, you need to manually calibrate the system.

1. Turn the ignition switch to ON [II].
2. Press and hold the SETUP button until the display shows the compass setting menu.
3. Rotate ⬤ to select Calibration, then press ⬤.
4. When the display changes to Calibration Start, press ⬤.
5. Drive the vehicle slowly in two circles.
   ▶ The compass starts to show a direction after the calibration. The CAL indicator goes off.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Compass Calibration

Models with two displays

1. Press the button.
2. Select Settings.
3. Select System.
4. Select Compass.
5. Select Calibration.
6. Drive the vehicle slowly in two circles.

Compass Indicator
Compass Zone Selection

Models with one display

1. Turn the ignition switch to ON [II].
2. Press and hold the SETUP button until the display shows the compass setting menu.
3. Rotate 🍳 to select Zone, then press 🍳.
   The display shows the current zone number.
4. Rotate 🍳 to select the zone number of your area (See Zone Map), then press 🍳.

Models with two displays

1. Press the button.
2. Select Settings.
3. Select System.
4. Select Compass.
5. Select Zone.
6. Select the zone number of your area (See Zone Map), then select OK.

Compass Zone Selection

The zone selection is done to compensate the variation between magnetic north and true north.

If the calibration starts while the audio system is in use, the display returns to normal after the calibration is completed.

Before Driving

Driving Preparation

Check the following items before you start driving.

■ Exterior Checks

- Make sure there are no obstructions on the windows, door mirrors, exterior lights, or other parts of the vehicle.
  ▶ Remove any frost, snow, or ice.
  ▶ Remove any snow on the roof, as this can slip down and obstruct your field of vision while driving. If frozen solid, remove ice once it has softened.
  ▶ When removing ice from around the wheels, be sure not to damage the wheel or wheel components.
- Make sure the hood is securely closed.
  ▶ If the hood opens while driving, your front view will be blocked.
- Make sure the tires are in good condition.
  ▶ Check air pressures, and check for damage and excessive wear.
  ◅ Checking and Maintaining Tires P. 465
- Make sure there are no people or objects behind or around the vehicle.
  ▶ There are blind spots from the inside.

**NOTICE**

When doors are frozen shut, use warm water around the door edges to melt any ice. Do not try to force them open, as this can damage the rubber trim around the doors. When done, wipe dry to avoid further freezing.

Do not pour warm water into the key cylinder. You will be unable to insert the key if the water freezes in the hole.

Heat from the engine and exhaust can ignite flammable materials left under the hood, causing a fire. If you’ve parked your vehicle for an extended period, inspect and remove any debris that may have collected, such as dried grass and leaves that have fallen or have been carried in for use as a nest by a small animal. Also check under the hood for leftover flammable materials after you or someone else has performed maintenance on your vehicle.
**Interior Checks**

- Store or secure all items on board properly.
  - Carrying too much cargo, or improperly storing it, can affect your vehicle’s handling, stability, stopping distance, and tires, and make it unsafe.
  - **Maximum Load Limit** P. 351

- Do not pile items higher than the seat height.
  - They can block your view and may be thrown forward in the event of sudden braking.

- Do not place anything in the front seat footwells. Make sure to secure the floor mat.
  - An object or unsecured floor mat can interfere with your brake and accelerator pedal operation while driving.

- If you have any animals on board, do not let them move around in the vehicle.
  - They may interfere with driving and a crash could occur.

- Securely close and lock all doors and the tailgate.
  - **Locking/Unlocking the Doors from the Inside** P. 137

- Adjust your seating position properly.
  - Adjust the head restraint, too.
  - **Adjusting the Seats** P. 175
  - **Adjusting the Head Restraints** P. 178

- Adjust the mirrors and steering wheel properly for your driving.
  - Adjust them while sitting in the proper driving position.
  - **Adjusting the Steering Wheel** P. 172
  - **Adjusting the Mirrors** P. 173

---

**Continued**

The headlight aim is set by the factory, and does not need to be adjusted. However, if you regularly carry heavy items in the cargo area or tow a trailer, have the aiming readjusted at a dealer or by a qualified technician.
Before Driving

Driving Preparation

- Be sure items placed on the floor behind the front seats cannot roll under the seats. They can interfere with the driver's ability to operate the pedals, the operation of the seats, or the operation of the sensors under the seats.
- Everyone in the vehicle must fasten their seat belt.
  - Fastening a Seat Belt P. 36
- Make sure that the indicators in the instrument panel come on when you start the vehicle, and go off soon after.
  - Always have a dealer check the vehicle if a problem is indicated.
    - Indicators P. 70
Maximum Load Limit

The maximum load for your vehicle is 850 lbs (385 kg). See Tire and Loading Information label attached to the driver’s doorjamb.

This figure includes the total weight of all occupants, cargo, and accessories, and the tongue load if you are towing a trailer. Steps for Determining Correct Load Limit -

1. Locate the statement “The combined weight of occupants and cargo should never exceed XXX kg or XXX lbs.” on your vehicle’s placard.
2. Determine the combined weight of the driver and passengers that will be riding in your vehicle.
3. Subtract the combined weight of the driver and passengers from XXX kg or XXX lbs.
4. The resulting figure equals the available amount of cargo and luggage load capacity. For example, if the “XXX” amount equals 1,400 lbs. and there will be five 150 lb. passengers in your vehicle, the amount of available cargo and luggage load capacity is 650 lbs.

\[(1,400 - 750 \times 5) = 650 \text{ lbs.}\]

WARNING

Overloading or improper loading can affect handling and stability and cause a crash in which you can be hurt or killed.

Follow all load limits and other loading guidelines in this manual.

Gross Vehicle Weight Rating (GVWR): The maximum allowable weight of the vehicle, all occupants, all accessories, all cargo, and the tongue load.

Specifications P. 510

Gross Axle Weight Rating (GAWR): The maximum allowable weight of the vehicle axle.

Specifications P. 510
(5) Determine the combined weight of luggage and cargo being loaded on the vehicle. That weight may not safely exceed the available cargo and luggage load capacity calculated in step 4. 
(6) If your vehicle will be towing a trailer, load from your trailer will be transferred to your vehicle. Consult this manual to determine how this reduces the available cargo and luggage load capacity of your vehicle.

In addition, the total weight of the vehicle, all occupants, accessories, cargo, and trailer tongue load must not exceed the Gross Vehicle Weight Rating (GVWR) or the Gross Axle Weight Rating (GAWR). Both are on a label on the driver’s doorjamb.
Towing a Trailer

Towing Preparation

■ Towing Load Limits

Your vehicle can tow a trailer if you carefully observe the load limits, use the proper equipment, and follow the towing guidelines. Check the load limits before driving.

■ Total trailer weight

Maximum allowable weight of the trailer, cargo, and everything in or on it must not exceed 1,500 lbs (680 kg). Towing loads in excess of this can seriously affect vehicle handling and performance and can damage the engine and drivetrain.

■ Tongue load

The weight of the tongue with a fully loaded trailer on the hitch should be approximately 10% of the total trailer weight.

- Excessive tongue load reduces front tire traction and steering control. Too little tongue load can make the trailer unstable and cause it to sway.
- To achieve a proper tongue load, start by loading 60% of the load toward the front of the trailer and 40% toward the rear. Readjust the load as needed.

WARNING

Exceeding any load limit or improperly loading your vehicle and trailer can cause a crash in which you can be seriously hurt or killed.

Check the loading of your vehicle and trailer carefully before starting to drive.

Check if all loads are within limits at a public scale. If a public scale is not available, add the estimated weight of your cargo load to the weight of your trailer (as quoted by the manufacturer), and the tongue load.

Break-in Period
Avoid towing a trailer during your vehicle’s first 600 miles (1,000 km).

Never exceed the gross weight ratings.
Gross weight information

Vehicle Specifications P. 510
Towing Equipment and Accessories

Towing equipment varies by the size of your trailer, how much load you are towing, and where you are towing.

- **Hitches**
The hitch must be of an approved type and properly bolted to the underbody.

- **Safety chains**
Always use safety chains when you tow a trailer. Leave enough slack to allow the trailer to turn corners easily, but do not allow the chains to drag on the ground.

- **Trailer brakes**
Recommended for any trailer with a total weight of 1,000 lbs (450 kg) or more:
There are two common types of trailer brakes: surge and electric. Surge brakes are common for boat trailers, since the brakes will get wet. If you choose electric brakes, be sure they are electronically actuated. Do not attempt to attach trailer brakes to your vehicle's hydraulic system, as it will lower braking effectiveness and create a potential hazard.

- **Additional towing equipment**
Many states and provinces/territories require special outside mirrors when towing a trailer. Even if mirrors are not required in your locale, you should install special mirrors if visibility is restricted in any way.

Towing Equipment and Accessories

Make sure that all equipment is properly installed and maintained, and that it meets federal, state, province/territory, and local regulations.

Consult your trailer sales or rental agency if any other items are recommended or required for your towing situation.

The lighting and wiring of trailers can vary by type and brand. If a connector is required, it should only be installed by a qualified technician.
■ Trailer light

Trailer lights and equipment must comply with federal, state, province/territory, and local regulations. Check with your local trailer sales or rental agency for the requirements in the area where you plan to tow.

<table>

</tbody>
</table>

Your trailer lighting connector is located behind the left side panel in the cargo area. Each pin’s purpose and wiring color code are shown in the image.

When using a non-Honda trailer lighting harness and converter, get the connector and pins for your vehicle from a dealer.
Driving Safely with a Trailer

### Things You Need To Know Before Towing a Trailer
- Have the trailer properly serviced and keep it in good condition.
- Make sure that all the weights and load in the vehicle and trailer are within limits. See Towing Load Limits P. 353
- Securely attach the hitch, safety chains, and other necessary parts to the trailer.
- Securely store all the items in and on the trailer so that they do not shift while driving.
- Check if the lights and brakes on the trailer are working properly.
- Check the pressures of the trailer tires, including the spare.

### Towing Speeds and Gears
- Drive slower than normal.
- Obey posted speed limits for vehicles with trailers.
- Use the D position when towing a trailer on level roads.

### Turning and Braking
- Turn more slowly and with a wider turning arc than normal.
- Allow more time and distance for braking.
- Do not brake or turn suddenly.

### Driving in Hilly Terrain
- Monitor your temperature gauge. If it nears the red (Hot) mark, turn off the heating and cooling system and reduce speed. Pull to the side of the road safely to cool down the engine if necessary.

* Not available on all models
Towing Your Vehicle

Your vehicle is not designed to be towed behind a motor home. If your vehicle needs to be towed in an emergency, refer to the emergency towing information.

Emergency Towing P. 506
Off-Highway Driving Guidelines

General Information

Your vehicle has been designed primarily for use on pavement, however, its higher ground clearance allows you to occasionally travel on unpaved roads. It is not designed for trail-blazing, or other challenging off-road activities.

If you decide to drive on unpaved roads, you will find that it requires somewhat different driving skills and that your vehicle will handle somewhat differently than it does on pavement. Pay attention to the precautions and tips in this section, and get acquainted with your vehicle before leaving the pavement.

Important Safety Precautions

To avoid loss of control or rollover, be sure to follow all precautions and recommendations:

- Be sure to store cargo properly and do not exceed your cargo load limits. Maximum Load Limit P. 351
- Whenever you drive, make sure you and your passengers always wear seat belts.
- Keep your speed low, and never go faster than the conditions allow.
- It's up to you to continually assess the situation and drive within the limits.

Failure to operate your vehicle correctly might result in a crash or a rollover.

WARNING

Improperly operating this vehicle on or off pavement can cause a crash or rollover in which you and your passengers can be seriously injured or killed.

- Follow all instructions and guidelines in this owner's manual.
- Keep your speed low, and don't drive faster than conditions permit.
Avoiding Trouble

• **Check Out Your Vehicle** before you leave the pavement and make sure that all scheduled maintenance has been completed. Pay special attention to the condition of the tires, and check the tire pressures.

• **Remember** the route you choose presents limits (too steep or bumpy), you have limits (driving skill and comfort), and your vehicle has limits (traction, stability, and power). Failing to recognize these limits will likely put you and your passengers in a hazardous situation.

• **Accelerating and Braking** should be done slowly and gradually. Trying to start or stop too fast can cause a loss of traction and you could lose control.

• **Avoiding Obstacles and Debris** in the road reduces the likelihood of a rollover or damage to your suspension or other components.

• **Driving on Slopes** increases your risk of a rollover, particularly if you attempt to drive across a slope that is too steep. Going straight or down a slope is usually the safest. If you can’t clearly see all conditions or obstacles on a slope, walk it before you drive it. If there is any doubt whether you can safely pass, don’t try it. Find another route. If you get stuck when climbing, do not try to turn around. Back down slowly following the same route you took up the hill.

• **Crossing a Stream** - Avoid driving through deep water. If you encounter water in your route (a small stream or large puddle, for example), evaluate it carefully before going ahead. Make sure it is shallow, flowing slowly, and has firm ground underneath. If you are not sure of the depth or the ground, turn around and find another route. Driving through deep water can also damage your vehicle. The water can get into the transmission and differential, diluting the lubricant and causing an eventual failure. It can also wash the grease out of the wheel bearings.

• **If You Get Stuck**, carefully go in the direction that you think will get you unstuck. Do not spin the tires as this will only make things worse and could damage the transmission. If you are unable to free yourself, your vehicle will need to be towed. Front and rear tow hooks are provided for this purpose.
When Driving

Models without smart entry system

Starting the Engine

1. Make sure the parking brake is applied.

2. Check that the shift lever is in P, then depress the brake pedal.
   ► Although it is possible to start the vehicle in N, it is safer to start it in P.

3. Turn the ignition switch to START without depressing the accelerator pedal.

Starting the Engine

Keep your foot firmly on the brake pedal when starting the engine.

The engine is harder to start in cold weather and in thinner air found at altitudes above 8,000 feet (2,400 meters).

When starting the engine in cold weather, turn off all electrical accessories such as the lights, heating and cooling system /climate control system/, and rear defogger in order to reduce battery drain.

If you live in a region where winter is extremely cold, an engine block heater will improve starting and warming of the engine. If temperatures consistently below −22°F (−30°C) are expected, the coolant mixture should be changed to a higher concentration to prevent freezing. Consult a dealer for details.

If the exhaust system sounds abnormal or you can smell exhaust gas inside the vehicle, have your vehicle checked by a dealer. There may be a problem with the engine or exhaust system.

* Not available on all models
When Driving

Starting the Engine

1. Keeping your right foot on the brake pedal, release the parking brake. Check that the parking brake indicator has gone off.
   - Parking Brake P. 405

2. Put the shift lever in D. Select R when reversing.

3. Gradually release the brake pedal and gently depress the accelerator pedal to pull away.

Hill start assist system

Hill start assist keeps the brake engaged briefly to help prevent the vehicle from rolling on inclines as you move your foot from the brake pedal to the accelerator.

Move the shift lever to D or S when facing uphill, or R when facing downhill, then release the brake pedal.

Starting to Drive

1. Parking Brake P. 405

2. Put the shift lever in D. Select R when reversing.

3. Gradually release the brake pedal and gently depress the accelerator pedal to pull away.

Hill start assist system

Hill start assist is not a replacement for the parking brake.

Hill start assist may not prevent the vehicle from rolling downhill on a very steep or slippery slope, and does not operate on small inclines.

Hill start assist will operate even when VSA® is switched off.
Starting the Engine

1. Make sure the parking brake is applied.

2. Check that the shift lever is in P, then depress the brake pedal.
   ▶ Although it is possible to start the vehicle in N, it is safer to start it in P.

Starting the Engine

Keep your foot firmly on the brake pedal when starting the engine.

The engine is harder to start in cold weather and in thinner air found at altitudes above 8,000 feet (2,400 meters).

When starting the engine in cold weather, turn off all electrical accessories such as the lights, climate control system, and rear defogger in order to reduce battery drain.

If you live in a region where winter is extremely cold, an engine block heater will improve starting and warming of the engine. If temperatures consistently below −22°F (−30°C) are expected, the coolant mixture should be changed to a higher concentration to prevent freezing. Consult a dealer for details.

If the exhaust system sounds abnormal or you can smell exhaust gas inside the vehicle, have your vehicle checked by a dealer. There may be a problem with the engine or exhaust system.

The immobilizer system protects your vehicle from theft.
If an improperly coded device is used, the engine’s fuel system is disabled.

şı Immobilizer System P. 147
When Driving
Starting the Engine

3. Press the ENGINE START/STOP button without depressing the accelerator pedal.

Bring the smart entry remote close to the ENGINE START/STOP button if the battery in the smart entry remote is weak.

- **If the Smart Entry Remote Battery is Weak**
  P. 492

The engine may not start if the smart entry remote is subjected to strong radio waves.

Do not hold the ENGINE START/STOP button to start the engine.
If the engine does not start, wait at least 10 seconds before trying again.
When Driving

Starting the Engine

You can turn the engine off when the vehicle is completely stopped.

1. Shift to [P].
2. Press the ENGINE START/STOP button.

■ Stopping the Engine

Starting to Drive

1. Keeping your right foot on the brake pedal, release the parking brake. Check that the parking brake indicator has gone off.
   [Parking Brake P. 405]
2. Put the shift lever in [D]. Select [R] when reversing.
3. Gradually release the brake pedal and gently depress the accelerator pedal to pull away.
**Hill start assist system**

Hill start assist keeps the brake engaged briefly to help prevent the vehicle from rolling on inclines as you move your foot from the brake pedal to the accelerator.

Move the shift lever to **D**, **S**, or **L** when facing uphill, or **R** when facing downhill, then release the brake pedal.

**Hill start assist system**

Hill start assist may not prevent the vehicle from rolling downhill on a very steep or slippery slope, and does not operate on small inclines.

Hill start assist is not a replacement for the parking brake.
When Driving ★ Precautions While Driving

Precautions While Driving

Driving Guidelines for Your Utility Vehicle

Utility vehicles have a significantly higher rollover rate than other types of vehicles. To prevent rollovers or loss of control:

- Take corners at slower speeds than you would with a passenger vehicle.
- Avoid sharp turns and abrupt maneuvers whenever possible.
- Do not modify your vehicle in any way that you would raise the center of gravity.
- Never carry more than 165 lbs (75 kg) of cargo on the roof rack (Honda accessory).

In Rain

Avoid driving in deep water and on flooded roads. This can damage the engine, driveline, or cause electrical component failure.

Other Precautions

If there is a strong impact with something under the vehicle, stop in a safe location. Check the underside of the vehicle for damage or any fluid leaks.

Precautions While Driving

NOTICE

Do not operate the shift lever while pressing the accelerator pedal. You could damage the transmission.

NOTICE

If you repeatedly turn the steering wheel at an extremely low speed, or hold the steering wheel on the full left or right position for a while, the system heats up. The system goes into a protective mode, and limits its performance. The steering wheel becomes harder and harder to operate. Once the system cools down, the EPS system is restored. Repeated operation under these conditions can eventually damage the system.
Continuously Variable Transmission

■ Creeping

The engine runs at a higher idle speed and creeping increases. Keep the brake pedal firmly depressed when stopped.

■ Kickdown

Quickly depressing the accelerator pedal while driving uphill may cause the transmission to drop to a lower gear, unexpectedly increasing vehicle speed. Depress the accelerator pedal carefully, especially on slippery roads and curves.

Precautions While Driving

If the ignition switch is turned to ACCESSORY 1 or LOCK 0*1 while driving, the engine will shut down and all steering and brake power assist functions will stop, making it difficult to control the vehicle.

Do not put the shift lever in N, as you will lose engine braking (and acceleration) performance.

During the first 600 miles (1,000 km) of operation, avoid sudden acceleration or full throttle operation so as to not damage the engine or powertrain.

Avoid hard braking for the first 200 miles (300 km). You should also follow this when the brake pads are replaced.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

Driving Guidelines for Your Utility Vehicle

Failure to operate your vehicle correctly might result in a crash or a rollover.

Important Handling Information P. 30

Precautions While Driving P. 366
When Driving

Shifting

Change the shift position in accordance with your driving needs.

**Shift lever positions**

- **P** Park Used when parking or starting the engine
- **R** Reverse Used when reversing
- **N** Neutral Used when idling
- **D** Drive Used for normal driving
- **S** Drive (S) Used:
  - For better acceleration
  - To increase engine braking
  - When going up or down hills
- **L** Low
  - Used to further increase engine braking
  - Used when going up or down hills

**Shifting**

You cannot turn the ignition switch to LOCK \( \text{O}^{\ast\ast} \) and remove the key unless the shift lever is in **P**.

The vehicle may move forward very slightly even in **N** while the engine is cold. Depress the brake pedal firmly and, when necessary, apply the parking brake.

\[ \ast\ast: \text{Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.} \]
When Driving

**Shift Lever Operation**

**NOTICE**
When you change the shift lever from D to R and vice versa, come to a complete stop and keep the brake pedal depressed. Operating the shift lever before the vehicle has come to a complete standstill can damage the transmission.

Use the shift lever position indicator to check the lever position before pulling away.

If the transmission indicator D blinks when driving in any shift position, there is a problem with the transmission. Avoid sudden acceleration and have the transmission checked by a dealer as soon as possible.

The fuel supply may be cut off if you drive at engine speeds in or over the tachometer’s red zone (engine speed limit). If this happens, you may experience a slight jolt.

It may not be possible to operate the shift lever if the brake pedal is applied while the shift lever release button is held down. Depress the brake pedal first.

**Shift Lever Position Indicator**

- Depress the brake pedal and press the shift lever release button to shift.
- Shift without pressing the shift lever release button.
- Press the shift lever release button and shift.

**Tachometer’s red zone**
When Driving

ECON Button

The ECON button turns the ECON mode on and off. The ECON mode helps you improve your fuel economy by adjusting the performance of the engine, transmission, air conditioning system, and cruise control.
Cruise Control*

Maintains a constant vehicle speed without having to keep your foot on the accelerator pedal. Use cruise control on freeways or open roads where you can travel at a constant speed with little acceleration or deceleration.

**When to use**

- **Vehicle speed for cruise control:** Desired speed in a range above roughly 25 mph (40 km/h) ~
- **Shift positions for cruise control:** In D or S

Always keep sufficient distance between you and the vehicle in front of you.

**How to use**

- **Press the CRUISE button on the steering wheel.**

**CRUISE MAIN** is on in the instrument panel. Cruise control is ready to use.

**WARNING**

Improper use of the cruise control can lead to a crash.

Use the cruise control only when traveling on open highways in good weather.

It may not be possible to maintain a constant speed when driving uphill or downhill.

When not using cruise control:
- Turn off cruise control by pressing the CRUISE button.
- While in the ECON mode, it may take relatively more time to accelerate to maintain the set speed.

* Not available on all models

Continued
When Driving
Cruise Control

To Set the Vehicle Speed

Take your foot off the pedal and press the −/SET button when you reach the desired speed.

The moment you release the −/SET button, the set speed is fixed, and cruise control begins. The CRUISE CONTROL indicator comes on.
When Driving

Cruise Control*

■ To Adjust the Vehicle Speed

Increase or decrease the vehicle speed using the RES/+ or −/SET buttons on the steering wheel.

- Each time you press the button, the vehicle speed is increased or decreased by about 1 mph (1.6 km/h).
- If you keep the button pressed, the vehicle speed increases or decreases until you release it. This speed is then set.

■ To Cancel

To cancel cruise control, do any of the following:
- Press the CANCEL button.
- Press the CRUISE button.
- Depress the brake pedal.

The CRUISE CONTROL indicator goes off.

To Adjust the Vehicle Speed

You can set the vehicle speed using the −/SET button on the steering wheel when adjusting the speed with the accelerator and brake pedals.

To Cancel

Resuming the prior set speed:
After cruise control has been canceled, you can still resume the prior set speed by pressing the RES/+ button while driving at a speed of at least 25 mph (40 km/h) or more.

You cannot set or resume in the following situations:
- When vehicle speed is less than 25 mph (40 km/h)
- When the CRUISE button is turned off

At vehicle speeds of 22 mph (35 km/h) or less, cruise control is canceled automatically.
When Driving  Front Sensor Camera*

Front Sensor Camera*

The camera, used in systems such as LDW, LKAS, ACC and CMBS™, is designed to detect an object that triggers any of the systems to operate their functions.

**Camera Location and Handling Tips**

![Front Sensor Camera](image)

This camera is located behind the rearview mirror.

To help reduce the likelihood that high interior temperatures will cause the camera’s sensing system to shut off, when parking, find a shady area or face the front of the vehicle away from the sun. If you use a reflective sun shade, do not allow it to cover the camera housing. Covering the camera can concentrate heat on it.

Never apply a film or attach any objects to the windshield that could obstruct the camera’s field of vision. Scratches, nicks, and other damage to the windshield within the camera’s field of vision can cause the system to operate abnormally. If this occurs, we recommend that you replace the windshield with a genuine Honda replacement windshield. Making even minor repairs within the camera’s field of vision or installing an aftermarket replacement windshield may also cause the system to operate abnormally. After replacing the windshield, have a dealer recalibrate the camera. Proper calibration of the camera is necessary for the system to operate properly.

Do not place an object on the top of the instrument panel. It may reflect onto the windshield and prevent the system from detecting lane lines properly.

If the **SOME DRIVER ASSIST SYSTEMS CANNOT OPERATE:** message appears:

- Use the climate control system to cool down the interior and, if necessary, also use defroster mode with the air flow directed toward the camera.
- Start driving the vehicle to lower the windshield temperature, which cools down the area around the camera.
Adaptive Cruise Control (ACC)*

Helps maintain a constant vehicle speed and a set following distance behind a vehicle detected ahead of yours, without you having to keep your foot on the brake or the accelerator.

When to use

- The camera is located behind the rearview mirror.
- The radar sensor is inside the front grille.

- Vehicle speed for adaptive cruise control:
  Desired speed in a range above roughly 25 mph (40 km/h)
- Shift positions for adaptive cruise control:
  In D or S

WARNING

Improper use of ACC can lead to a crash.

Use ACC only when traveling on open highways in good weather.

WARNING

ACC has limited braking capability.

When your vehicle speed drops below 22 mph, ACC will automatically cancel and no longer will apply your vehicle's brakes.

Always be prepared to apply the brake pedal when conditions require.

* Not available on all models
When Driving

Adaptive Cruise Control (ACC)*

How to use

ACC is on in the multi-information display. Adaptive cruise control is ready to use.

Press the MAIN button on the steering wheel.

Important Reminder

As with any system, there are limits to ACC. Use the brake pedal whenever necessary, and always keep a safe distance between your vehicle and other vehicles.

* Not available on all models
When Driving

Adaptive Cruise Control (ACC)*

**To Set the Vehicle Speed**

When Driving

Adaptive Cruise Control (ACC)*

ACC may not work properly under certain conditions.

**ACC Conditions and Limitations** P. 380

When not using adaptive cruise control: Turn off adaptive cruise by pressing the **MAIN** button.

**To Set the Vehicle Speed**

You can switch the displayed set speed measurements on the multi-information display between **mph** and **km/h**.

**Customized Features** P. 100, 114

Take your foot off the pedal and press the **–/SET** button when you reach the desired speed.

The moment you release the **–/SET** button, the set speed is fixed, and adaptive cruise control begins.

▶ A vehicle icon and distance bars appear on the multi-information display.

* Not available on all models

Continued
When Driving

Adaptive Cruise Control (ACC)*

When in Operation

There is a vehicle ahead
ACC monitors if a vehicle ahead of you enters the ACC range. If a vehicle is detected doing so, the ACC system maintains or decelerates your vehicle’s set speed in order to keep the vehicle’s set following-distance from the vehicle ahead.

To Change Vehicle Distance P. 382

When ACC detects a vehicle within ACC range:
The vehicle icon appears on the multi-information display.

When the vehicle goes out of ACC range:
The vehicle icon on the multi-information display becomes a dotted-line contour.

ACC Range: 394 ft. (120 m)

Depress the brake pedal, and keep an appropriate distance from the vehicle ahead.

Even if the distance between your vehicle and the vehicle detected ahead is short, ACC may start accelerating your vehicle under the following circumstances:

• The vehicle detected ahead of you is going at almost the same speed as, or faster than your vehicle.
• A vehicle that cuts in front of you is going faster than your vehicle, gradually distancing itself from you.

Beep

When in Operation

If the vehicle detected ahead of you slows down abruptly, or if another vehicle is detected cutting in front of you, the beeper sounds and a message appears on the multi-information display to alert you to brake.
When Driving

Adaptive Cruise Control (ACC)*

■ **There is no vehicle ahead**
Your vehicle cruises at the set speed.

■ **A vehicle ahead is within ACC range and going slower than the set speed**
Your vehicle slows down, and maintains the same speed as the speed of the vehicle ahead to maintain the set following distance.

■ **A vehicle ahead is within ACC range and going at a steady speed**
Your vehicle follows the vehicle ahead of it, keeping a constant distance, without going beyond the set speed.

■ **A vehicle ahead goes out of range**
ACC accelerates your vehicle to the set speed, and then maintains it.

■ **When you depress the accelerator pedal**
You can temporarily increase the vehicle speed. In this case, there is no audible or visual alerts even if a vehicle is in ACC range. ACC stays on unless you cancel it. Once you release the accelerator pedal, the system resumes the set speed.

When in Operation
You can also set the system to beep when a vehicle detected in front of you comes in and goes out of the ACC detecting range. Change the ACC FORWARD VEHICLE DETECT BEEP* setting.

Customized Features P. 100, 114

Limitations
You may need to use the brake to maintain a safe distance when using ACC. Additionally, ACC may not work properly under certain conditions.

ACC Conditions and Limitations P. 380

* Not available on all models

Continued
When Driving

Adaptive Cruise Control (ACC)*

**ACC Conditions and Limitations**

The system may automatically shut off and the ACC indicator will come on under certain conditions. Some examples of these conditions are listed below. Other conditions may reduce some of the ACC functions.

- **Front Sensor Camera** * P. 374

- **Environmental conditions**
  Driving in bad weather (rain, fog, snow, etc.).

- **Roadway conditions**
  Driving on a snowy or wet roadway (obscured lane marking, vehicle tracks, reflected lights, road spray, high contrast).

- **Vehicle conditions**
  - The outside of the windshield is blocked by dirt, mud, leaves, wet snow, etc.
  - An abnormal tire or wheel condition (wrong sized, varied size or construction, improperly inflated, compact spare tire, etc.).
  - The camera temperature gets too hot.
  - The parking brake is applied.

* Not available on all models
■ Detection limitations

- A vehicle or pedestrian suddenly crosses in front of you.
- The distance between your vehicle and the vehicle or pedestrian ahead of you is too short.
- A vehicle or pedestrian cuts in front of you at a slow speed, and it brakes suddenly.
- When you accelerate rapidly and approach the vehicle or pedestrian ahead of you at high speed.
- The vehicle ahead of you is a motorcycle, bicycle, mobility scooter, or other small vehicle.
- When there are animals in front of your vehicle.
- When you drive on a curved or winding or undulating road that makes it difficult for the sensor to properly detect a vehicle or a pedestrian in front of you.
- The speed difference between your vehicle and a vehicle in front of you is significantly large.
- An oncoming vehicle suddenly comes in front of you.
- Your vehicle abruptly crosses over in front of an oncoming vehicle.
- When driving through a narrow iron bridge.
When Driving

Adaptive Cruise Control (ACC)*

To Adjust the Vehicle Speed

Increase or decrease the vehicle speed using the RES/+ or –/SET buttons on the steering wheel.

- Each time you press the button, the vehicle speed is increased or decreased by about 1 mph or 1 km/h accordingly.
- If you keep the button pressed, the vehicle speed increases or decreases by about 5 mph or 5 km/h accordingly.

To Change Vehicle Distance

Press the (distance) button to change ACC range.

Each time you press the button, the following distance (the distance behind a vehicle detected ahead of you) setting cycles through extra long, long, middle, and short following distances.

To Adjust the Vehicle Speed

If a vehicle detected ahead is going at a speed slower than your increased set speed, ACC may not accelerate your vehicle. This is to maintain the set following distance between your vehicle and the vehicle ahead.

You can set the vehicle speed using the –/SET button on the steering wheel when adjusting the speed with the accelerator and brake pedals.
Determine the most appropriate following distance setting based on your specific driving conditions. Be sure to adhere to any following distance requirements set by local regulation.

The higher your selected set speed is, the greater the short, middle, long or extra long following distance becomes. See the following examples for your reference.

<table>

Continued
When Driving
Adaptive Cruise Control (ACC)*

To Cancel
To cancel adaptive cruise control, do any of the following:
- Press the CANCEL button.
- Press the MAIN button.
- Depress the brake pedal.

Automatic cancellation
The beeper sounds and a message appears on the multi-information display when ACC is automatically canceled. Any of these conditions may cause the ACC cancellation:
- Your vehicle speed slows down to 22 mph (35 km/h) and below.
- Bad weather (rain, fog, snow, etc.).
- When the radar sensor inside the front grille gets dirty.
- The vehicle ahead of you cannot be detected.
- An abnormal tire condition is detected, or the tires are skidding.
- Driving on a mountainous road, or driving off road for extended periods.
- Abrupt steering wheel movement.
- When the ABS or VSA® is activated.
- When the ABS or VSA® system indicator comes on.

To Cancel
Resuming the prior set speed: After you have canceled adaptive cruise control, you can resume the prior set speed while it is still displayed. Press the RES/+ button when driving at a speed of at least 25 mph (40 km/h) or more.

You cannot set or resume in the following situations:
- When vehicle speed is less than 25 mph (40 km/h).
- When the MAIN button is turned off.

Automatic cancellation
Even though adaptive cruise control has been automatically canceled, you can still resume the prior set speed. Wait until the condition that caused ACC to cancel improves, then press the RES/+ button.
When Driving

When Driving

Adaptive Cruise Control (ACC)*

To Switch ACC to Cruise Control

Press and hold the (distance) button for one second.

CRUISE MODE SELECTED appears on the multi-information display for two seconds, and then the mode switches to Cruise.

To switch back to ACC, press and hold the button again for one second.

To Switch ACC to Cruise Control

Always be aware which mode you are in. When you are driving in Cruise Mode, the system will not assist you to maintain a following distance from a vehicle ahead of you.
When Driving

Lane Departure Warning (LDW)*

Alerts you when the system determines a possibility of your vehicle unintentionally crossing over detected lane markings.

- How the System Works

If your vehicle is getting too close to detected left or right side lane markings without a turn signal activated, LDW will give audible and visual alerts.

The beeper sounds and the Lane Departure message appears on the multi-information display, letting you know that you need to take appropriate action.

- How the System Activates

The system begins to search for lane markings when all the following conditions are met:
- The vehicle is traveling between 45 and 90 mph (72 and 145 km/h).
- The vehicle is on a straight or slightly curved road.
- The turn signals are off.
- The brake pedal is not depressed.
- The wipers are not in continuous operation.

* Not available on all models

Important Safety Reminder

Like all assistance systems, LDW has limitations. Over-reliance on LDW may result in a collision. It is always your responsibility to keep the vehicle within your driving lane.

LDW only alerts you when lane drift is detected without a turn signal in use. LDW may not detect all lane markings or lane departures; accuracy will vary based on weather, speed and lane marker condition. It is always your responsibility to safely operate the vehicle and avoid collisions.

You can read about handling information for the camera equipped with this system.

Front Sensor Camera* P. 374

Indicators P. 85
When Driving

Lane Departure Warning (LDW)*

■ LDW On and Off

Press the LDW button to turn the system on and off.

- The indicator in the button comes on when the system is on.

Continued
LDW Limitations

LDW may not activate or may not recognize lanes, and may activate even when keeping in the middle of a lane, under certain conditions. Some examples of these conditions are listed below.

- **Environmental conditions**
  - Driving in bad weather (rain, fog, snow, etc.).
  - Sudden changes between light and dark, such as an entrance or exit of a tunnel.
  - There is little contrast between lane lines and the roadway surface.
  - Driving into low sunlight (e.g., at dawn or dusk).
  - Strong light is reflected onto the roadway.
  - Driving in the shadows of trees, buildings, etc.
  - Shadows of adjacent objects are parallel to lane markings.
  - Roadway objects or structures are misinterpreted as lane markings.
  - Reflections on the interior of the front windshield.

- **Roadway conditions**
  - Driving on a snowy or wet roadway (obscured lane marking, vehicle tracks, reflected lights, road spray, high contrast).
  - Driving on a road with temporary lane markings.
  - Faint, multiple, or varied lane markings are visible on the roadway due to road repairs or old lane markings.
  - The roadway has merging, split, or crossing lines (e.g., such as at an intersection or crosswalk).
  - The lane markings are extremely narrow, wide, or changing.
  - The vehicle in front of you is driving near the lane lines.
  - The road is hilly or the vehicle is approaching the crest of a hill.
  - Driving over bumps.
Vehicle conditions

- Headlight lenses are dirty or the headlights are not properly adjusted.
- The outside of the windshield is blocked by dirt, mud, leaves, wet snow, etc.
- The inside of the windshield is fogged.
- The camera temperature gets too hot.
- An abnormal tire or wheel condition (wrong sized, varied size or construction, improperly inflated, compact spare tire, etc.).
- The vehicle is tilted due to a heavy load or suspension modifications.
When Driving
Lane Keeping Assist System (LKAS)*

Provides steering input to help keep the vehicle in the middle of a detected lane and provides audible and visual alerts if the vehicle is detected drifting out of its lane.

- **Audible and visual alerts**
  Beeps and a warning display alert you that the vehicle is drifting out of a detected lane.

- **Steering input assist**
  The system applies torque to the steering to keep the vehicle between the left and right lane lines. The applied torque becomes stronger as the vehicle gets closer to either of the lane lines.

- **LKAS camera**
  Monitors the lane lines.

When you operate the turn signals to change lanes, the system is suspended, and resumes after the signals are off. If you make a lane change without operating the turn signals, the LKAS alerts activate, and torque is applied to the steering.

**Important Safety Reminders**

The LKAS is for your convenience only. It is not a substitute for your vehicle control. The system does not work if you take your hands off the steering wheel or fail to steer the vehicle.

- Display Warning and Information Messages* P. 86

LKAS only alerts you when lane drift is detected without a turn signal in use. LKAS may not detect all lane markings or lane departures; accuracy will vary based on weather, speed, and lane marker condition. It is always your responsibility to safely operate the vehicle and avoid collisions.

The LKAS is convenient when it is used on freeways.

LKAS may not work properly under certain conditions.

- LKAS Limitations P. 394

* Not available on all models
When the System can be Used

The system can be used when the following conditions are met.

- The lane in which you are driving has detectable lane markers on both sides, and your vehicle is in the center of the lane.
- The vehicle speed is between about 45 and 90 mph (72 and 145 km/h).
- You are driving on a straight or slightly curved road.
- The turn signals are off.
- The brake pedal is not depressed.
- The wipers are not in continuous operation.

How to activate the system

1. Press the MAIN button.
   - The LKAS is on in the multi-information display.
   - The system is ready to use.

2. Press the LKAS button.
   - Lane outlines appear on the multi-information display.
   - The system is activated.

* Not available on all models

Lane Keeping Assist System (LKAS)*

You can read about handling information for the camera equipped with this system.

Front Sensor Camera* P. 374

If the vehicle drifts toward either left or right lane line due to the system applying torque, turn off the LKAS and have your vehicle checked by a dealer.
When Driving

Lane Keeping Assist System (LKAS)

3. Keep your vehicle near the center of the lane while driving. The dotted outer lines change to solid ones once the system starts operating after detecting the left and right lane markings.

To cancel

To cancel the LKAS:

Press the MAIN or LKAS button. The LKAS is turned off every time you stop the engine, even if you turned it on the last time you drove the vehicle.

When the System can be Used

The LKAS temporarily deactivates when it fails to detect lane lines. When the system detects the lines again, it comes back on automatically.

To cancel

Pressing the MAIN button also turns ACC on and off.
When Driving
Lane Keeping Assist System (LKAS)

When the LKAS is suspended, the lane lines on the multi-information display change to contour lines.

The system operation is suspended if you:
- Set the wipers to continuous operation.
  - Turning the wipers off resumes the LKAS.
- Decrease the vehicle speed to about 40 mph (64 km/h) or less.
  - Increasing the vehicle speed to about 45 mph (72 km/h) or more resumes the LKAS.
- Depress the brake pedal.
  - The LKAS resumes and starts detecting the lane lines again once you release the brake pedal.

The LKAS may automatically be suspended when:
- The system fails to detect lane lines.
- The steering wheel is quickly turned.
- You fail to steer the vehicle.
- The vehicle runs on a curved road over the speed limit.

Once these conditions no longer exist, the LKAS automatically resumes.

The LKAS may automatically be canceled when:
- The camera temperature gets too high.
- The camera behind the rearview mirror, or the area around the camera, including the windshield, gets dirty.

Continued
When Driving

Lane Keeping Assist System (LKAS)

---

**LKAS Limitations**

The system may not detect lane markings and therefore may not keep the vehicle in the middle of a lane under certain conditions, including the following:

- **Environmental conditions**
  - Driving in bad weather (rain, fog, snow, etc.).
  - Sudden changes between light and dark, such as an entrance or exit of a tunnel.
  - There is little contrast between lane lines and the roadway surface.
  - Driving into low sunlight (e.g., at dawn or dusk).
  - Strong light is reflected onto the roadway.
  - Driving in the shadows of trees, buildings, etc.
  - Shadows of adjacent objects are parallel to lane markings.
  - Roadway objects or structures are misinterpreted as lane markings.
  - Reflections on the interior of the front windshield.

- **Roadway conditions**
  - Driving on a snowy or wet roadway (obscured lane marking, vehicle tracks, reflected lights, road spray, high contrast).
  - Driving on a road with temporary lane markings.
  - Faint, multiple, or varied lane markings are visible on the roadway due to road repairs or old lane markings.
  - The roadway has merging, split, or crossing lines (e.g., such as at an intersection or crosswalk).
  - The lane markings are extremely narrow, wide, or changing.
  - The vehicle in front of you is driving near the lane lines.
  - The road is hilly or the vehicle is approaching the crest of a hill.
  - Driving over bumps.
Vehicle conditions

- Headlight lenses are dirty or the headlights are not properly adjusted.
- The outside of the windshield is blocked by dirt, mud, leaves, wet snow, etc.
- The inside of the windshield is fogged.
- The camera temperature gets too hot.
- An abnormal tire or wheel condition (wrong sized, varied size or construction, improperly inflated, compact spare tire*, etc.).
- The vehicle is tilted due to a heavy load or suspension modifications.

* Not available on all models
Vehicle Stability Assist (VSA®), aka Electronic Stability Control (ESC), System

Helps stabilize the vehicle during cornering if the vehicle turns more or less than what was intended. It also assists in maintaining traction on slippery surfaces. It does so by regulating engine output and selectively applying the brakes.

VSA® Operation

When VSA® activates, you may notice that the engine does not respond to the accelerator. You may also notice some noise from the hydraulic system. You will also see the indicator blink.

Vehicle Stability Assist (VSA®), aka Electronic Stability Control (ESC), System

The VSA® may not function properly if tire types and size are mixed. Make sure to use the same size and types of tire, and the air pressures as specified.

When the VSA® indicator comes on and stays on while driving, there may be a problem with the system. While this may not interfere with normal driving, have your vehicle checked by a dealer immediately.

VSA® cannot enhance stability in all driving situations and does not control the entire braking system. You still need to drive and corner at speeds appropriate for the conditions and always leave a sufficient margin of safety.

The main function of the VSA® system is generally known as Electronic Stability Control (ESC). The system also includes a traction control function.
When Driving

Vehicle Stability Assist (VSA®), aka Electronic Stability Control (ESC), System

**VSA® On and Off**

This button is on the driver side control panel. To partially turn the VSA® features on and off, press and hold it until you hear a beep.

The traction control stops fully functioning, allows the wheels to spin more freely at low speed. The VSA® OFF indicator will also come on.

To turn it on again, press the (VSA® OFF) button until you hear a beep.

VSA® is turned on every time you start the engine, even if you turned it off the last time you drove the vehicle.

With the button pressed, your vehicle will have normal braking and cornering ability, but VSA® traction and stability enhancement becomes less effective.

In certain unusual conditions when your vehicle gets stuck in shallow mud or fresh snow, it may be easier to free it with VSA® temporarily switched off.

When the button is pressed, the traction control function becomes less effective. This allows for the wheels to spin more freely at low speed. You should only attempt to free your vehicle with the VSA® off if you are not able to free it when the VSA® is on.

Immediately after freeing your vehicle, be sure to switch VSA® on again. We do not recommend driving your vehicle with the VSA® system switched off.

You may hear a motor sound coming from the engine compartment while system checks are being performed immediately after starting the engine or while driving. This is normal.
LaneWatch™

LaneWatch is an assistance system that allows you to check the passenger side rear areas displayed on the audio/information screen when the turn signal is activated to the passenger’s side. A camera in the passenger side door mirror monitors these areas and allows you to check for vehicle, in addition to your visual check and use of the passenger door mirror. You can also keep the system on for your convenience while driving.

1. The system activates when you:
   - Move the turn signal lever to the passenger side.
   - Press the LaneWatch button.

2. The passenger side view display appears on the audio/information screen.

The system deactivates when you:
- Pull the turn signal lever back.
- Press the LaneWatch button again.

**WARNING**

Failure to visually confirm that it is safe to change lanes before doing so may result in a crash and serious injury or death.

Do not rely only on LaneWatch while driving.

Always look in your mirrors, to either side of your vehicle, and behind you for other vehicles before changing lanes.

**Important Safety Reminder**

Like all assistance systems, LaneWatch has limitations. Over reliance on LaneWatch may result in a collision.

The LaneWatch function can be affected by weather, lighting (including headlights and low sun angle), ambient darkness, camera condition, and loading.

The LaneWatch may not provide the intended display of traffic to the side and rear under the following conditions:
- Your vehicle’s suspension has been altered, changing the height of the vehicle.
- Your tires are over or under inflated.
- Your tires or wheels are of varied size or construction.

* Not available on all models
■ Customizing the LaneWatch settings
You can customize the following items using the audio/information screen.

- **Show with Turn Signal**: Selects whether LaneWatch monitor comes on when you operate the turn signal light lever.
- **Display Time after Turn Off**: Changes the remaining LaneWatch display time after you pull the turn signal lever back.
- **Reference Lines**: Selects whether the reference lines appear on the LaneWatch monitor.
- **Next Maneuver Pop up**: Selects whether a turn direction screen of the navigation system interrupts the LaneWatch display.
- **Display**: Adjusts display settings.

**Customized Features** P. 271

■ Reference Lines
Three lines that appear on the screen can give an idea of how far the vehicles or objects on the screen are from your vehicle, respectively. If an object is near line 1 (in red), it indicates that it is close to your vehicle whereas an object near line 3 farther away.

* Not available on all models
Real Time AWD with Intelligent Control System™

When the system senses a loss of front wheel traction, it automatically transfers some power to the rear wheels. This allows you to utilize all available traction and may increase mobility.

You still need to exercise the same care when accelerating, steering, and braking that you would in a two wheel drive vehicle.

If you excessively spin all four wheels and overheat the AWD system, only the front wheels receive power. Stop until the system cools down.

NOTICE
Do not continuously spin the front tires of your vehicle. Continuously spinning the front tires can cause transmission or rear differential damage.

The AWD system may not function properly if tire type and size are mixed. Make sure to use the same size and type of tire, and the air pressures as specified.

☞ Tire and Wheel Replacement P. 471

* Not available on all models
When Driving

Tire Pressure Monitoring System (TPMS)

Instead of directly measuring the pressure in each tire, the TPMS on this vehicle monitors and compares the rolling radius and rotational characteristics of each wheel and tire while you are driving to determine if one or more tires are significantly under-inflated. This will cause the low tire pressure/TPMS indicator to come on and a message to appear on the multi-information display.

TPMS Calibration

You must start TPMS calibration every time you:
• Adjust the pressure in one or more tires.
• Rotate the tires.
• Replace one or more tires.
  ► Before calibrating the TPMS, turn the ignition switch to ON [1], and make sure that the vehicle is at a complete stop.

Models with information display

Press and hold the TPMS button.
  ► The low tire pressure/TPMS indicator blinks a few times.

If the indicator does not blink a few times, the calibration is not successful. Press and hold the TPMS button again.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
* Not available on all models

Continued
When Driving Tire Pressure Monitoring System (TPMS)

You can calibrate the system from the customized features on the multi-information display.

1. Press button to select TPMS CALIBRATION, then press the SEL/RESET button.
2. Press the SEL/RESET button.
3. Press the button and select Calibrate, then press the SEL/RESET button.

Calibration Started screen appears, then the display returns to the customization menu screen.

If the Calibration Failed to Start message appears, repeat steps 2-3.

TPMS Calibration

- TPMS cannot be calibrated if a compact spare tire is installed.
- The calibration process requires approximately 30 minutes of cumulative driving at speeds between 30-60 mph (48-97 km/h).
- During this period, if the ignition is turned on*1 and the vehicle is not moved within 45 seconds, you may notice the low tire pressure indicator comes on briefly. This is normal and indicates that the calibration process is not yet complete.

If the snow chains are installed, remove them before calibrating the TPMS.

If the low tire pressure/TPMS indicator comes on even when the properly inflated specified regular tires are installed, have the vehicle checked by a dealer.

We recommend that the tires be replaced with the same brand, model, and size as the originals. Ask a dealer for details.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
When Driving

Tire Pressure Monitoring System (TPMS) - Required Federal Explanation

Each tire, including the spare (if provided), should be checked monthly when cold and inflated to the inflation pressure recommended by the vehicle manufacturer on the vehicle placard or tire inflation pressure label.

(If your vehicle has tires of a different size than the size indicated on the vehicle placard or tire inflation pressure label, you should determine the proper tire inflation pressure for those tires.)

As an added safety feature, your vehicle has been equipped with a tire pressure monitoring system (TPMS) that illuminates a low tire pressure telltale when one or more of your tires is significantly under-inflated.

Accordingly, when the low tire pressure telltale illuminates, you should stop and check your tires as soon as possible, and inflate them to the proper pressure.

Driving on a significantly under-inflated tire causes the tire to overheat and can lead to tire failure. Under-inflation also reduces fuel efficiency and tire tread life, and may affect the vehicle’s handling and stopping ability.

Continued
When Driving

Tire Pressure Monitoring System (TPMS) - Required Federal Explanation

Please note that the TPMS is not a substitute for proper tire maintenance, and it is the driver’s responsibility to maintain correct tire pressure, even if under-inflation has not reached the level to trigger illumination of the TPMS low tire pressure telltale.

Your vehicle has also been equipped with a TPMS malfunction indicator to indicate when the system is not operating properly. The TPMS malfunction indicator is combined with the low tire pressure telltale. When the system detects a malfunction, the telltale will flash for approximately one minute and then remain continuously illuminated. This sequence will continue upon subsequent vehicle start-ups as long as the malfunction exists.

When the malfunction indicator is illuminated, the system may not be able to detect or signal low tire pressure as intended.

TPMS malfunctions may occur for a variety of reasons, including the installation of replacement or alternate tires or wheels on the vehicle that prevent the TPMS from functioning properly.

Always check the TPMS malfunction telltale after replacing one or more tires or wheels on your vehicle to ensure that the replacement or alternate tires and wheels allow the TPMS to continue to function properly.
Braking

Brake System

Parking Brake

Use the parking brake to keep the vehicle stationary when parking.

To apply:
Depress the parking brake pedal down with your foot.

To release:
1. Depress the brake pedal.
2. Depress the parking brake.
Braking

Your vehicle is equipped with disc brakes at all four wheels. A vacuum power assist helps reduce the effort needed on the brake pedal. The brake assist system increases the stopping force when you depress the brake pedal hard in an emergency situation. The anti-lock brake system (ABS) helps you retain steering control when braking very hard.

- **Brake Assist System** P. 408
- **Anti-lock Brake System (ABS)** P. 407

**Foot Brake**

Check the brakes after driving through deep water, or if there is a buildup of road surface water. If necessary, dry the brakes by lightly depressing the pedal several times.

If you hear a continuous metallic friction sound when applying the brakes, the brake pads need to be replaced. Have the vehicle checked by a dealer.

Constantly using the brake pedal while going down a long hill builds up heat, which reduces the brake effectiveness. Apply engine braking by taking your foot off the accelerator pedal and downshifting to a lower gear.

Do not rest your foot on the brake pedal while driving, as it will lightly apply the brakes and cause them to lose effectiveness over time and reduce pad life. It will also confuse drivers behind you.
**Anti-lock Brake System (ABS)**

Helps prevent the wheels from locking up, and helps you retain steering control by pumping the brakes rapidly, much faster than you.

The electronic brake distribution (EBD) system, which is part of the ABS, also balances the front-to-rear braking distribution according to vehicle loading.

You should never pump the brake pedal. Let the ABS work for you by always keeping firm, steady pressure on the brake pedal. This is sometimes referred to as "stomp and steer."

**ABS operation**

The brake pedal may pulsate slightly when the ABS is working. Keep holding the pedal firmly down. On dry pavement, you need to press on the brake pedal very hard before the ABS activates. However, you may feel the ABS activate immediately if you are trying to stop on snow or ice.

When the vehicle speed goes under 6 mph (10 km/h), the ABS stops.

---

**NOTICE**

The ABS may not function correctly if you use an incorrect tire type and size.

When the ABS indicator comes on while driving, there may be a problem with the system. While normal braking is not affected, there is a possibility of the ABS not operating. Have the vehicle checked by a dealer immediately.

The ABS does not reduce the time or distance it takes to stop the vehicle. It only helps with steering control during hard braking.

In the following cases, your vehicle may need more stopping distance than a vehicle without the ABS:

- When driving on rough road surfaces, including when driving on uneven surfaces, such as gravel or snow.
- When tire chains are installed.

You may hear a motor sound coming from the engine compartment while system checks are being performed immediately after starting the engine or while driving. This is normal.
Braking

Brake Assist System

Designed to assist the driver by generating greater braking force when you depress the brake pedal hard during emergency braking.

■ Brake assist system operation
Depress the brake pedal firmly for more powerful braking.

When brake assist operates, the pedal may wiggle slightly and an operating noise may be heard. This is normal. Keep holding the brake pedal firmly down.
Collision Mitigation Braking System™ (CMBS™)

Can assist you when there is a possibility of your vehicle colliding with a vehicle or a pedestrian detected in front of yours. The CMBS™ is designed to alert you when a potential collision is determined, as well as to reduce your vehicle speed when a collision is deemed unavoidable to help minimize collision severity.

■ How the system works

When to use

The camera is located behind the rearview mirror.

The radar sensor is in the front grille.

The system starts monitoring the roadway ahead when your vehicle speed is about 3 mph (5 km/h) and there is a vehicle in front of you.

The CMBS™ activates when:

- The speed difference between your vehicle and a vehicle or pedestrian detected in front of you becomes about 3 mph (5 km/h) and over with a chance of a collision.
- Your vehicle speed is about 62 mph (100 km/h) or less and there is a chance of a collision with an oncoming detected vehicle or a pedestrian in front of you.

* Not available on all models

Continued
Braking

Collision Mitigation Braking System™ (CMBS™)*

When the system activates

The system provides visual and audible alerts of a possible collision, and stops if the collision is avoided.

- Take appropriate action to prevent a collision (apply the brakes, change lanes, etc.)

At system’s earliest collision alert stage, you can change the distance (LONG/NORMAL/SHORT) between vehicles at which alerts will come on through multi-information display setting options.

List of customizable options P. 104, 118

When the system activates

The camera in the CMBS™ is also designed to detect pedestrians. However, this pedestrian detection feature may not activate or may not detect a pedestrian in front of your vehicle under certain conditions. Refer to the ones indicating the pedestrian detection limitations from the list.

CMBS™ Conditions and Limitations P. 414
## Collision Alert Stages

The system has three alert stages for a possible collision. However, depending on circumstances, the CMBS™ may not go through all of the stages before initiating the last stage.

*Continued*
Braking
Collision Mitigation Braking System™ (CMBSTM) *

CMBS™ On and Off

Press this button for about one second to turn the system on and off.

When the CMBS™ is off:
• The beeper sounds.
• The CMBS™ indicator in the instrument panel comes on.
• A message on the multi-information display reminds you that the system is off.

The CMBS™ is in the previously selected ON or OFF setting each time you start the engine.

Collision Mitigation Braking System™ (CMBSTM) *
The CMBS™ may automatically shut off, and the CMBS™ indicator will come and stay on under certain conditions.
 CMBS™ Conditions and Limitations P. 414

* Not available on all models
With Little Chance of a Collision

The CMBS™ may activate even when you are aware of a vehicle ahead of you, or when there is no vehicle ahead. Some examples of this are:

■ When Passing
Your vehicle approaches another vehicle ahead of you and you change lanes to pass.

■ At an intersection
Your vehicle approaches or passes another vehicle that is making a left or right turn.

■ On a curve
When driving through curves, your vehicle comes to a point where an oncoming vehicle is right in front of you.

■ Through a low bridge at high speed
You drive under a low or narrow bridge at high speed.

■ Speed bumps, road work sites, train tracks, roadside objects, etc.
You drive over speed bumps, steel road plates, etc., or your vehicle approaches train tracks or roadside objects [such as a traffic sign and guard rail] on a curve or, when parking, stationary vehicles and walls.

Avoid the following conditions that may cause the radar aim to be temporarily out of range and prevent the CMBS™ from working properly.

- A heavy load in the rear or modifications to the suspension tilts your vehicle.
- The tire pressures are not correct, the tire sizes are incorrect, the tire types are different, and/or the tires are not in good condition.

For the CMBS™ to work properly:

Always keep the radar sensor cover clean.

Never use chemical solvents or polishing powder for cleaning the sensor cover. Clean it with water or a mild detergent.

Do not put a sticker on the emblem or replace the emblem.

If you need the radar sensor to be repaired, or removed, or the radar sensor cover is strongly impacted, turn off the system by pressing the CMBS™ off button and take your vehicle to a dealer.

* Not available on all models
Braking
Collision Mitigation Braking System™ (CMBSTM)*

■ CMBS™ Conditions and Limitations

The system may automatically shut off and the CMBS™ indicator will come on under certain conditions. Some examples of these conditions are listed below. Other conditions may reduce some of the CMBS™ functions.

Front Sensor Camera* P. 374

■ Environmental conditions
- Driving in bad weather (rain, fog, snow, etc.).
- Sudden changes between light and dark, such as an entrance or exit of a tunnel.
- There is little contrast between objects and the background.
- Driving into low sunlight (e.g., at dawn or dusk).
- Strong light is reflected onto the roadway.
- Driving in the shadows of trees, buildings, etc.
- Roadway objects or structures are misinterpreted as vehicles and pedestrians.
- Reflections on the interior of the front windshield.

■ Roadway conditions
- Driving on a snowy or wet roadway (obscured lane marking, vehicle tracks, reflected lights, road spray, high contrast).

■ Vehicle conditions
- Headlight lenses are dirty or the headlights are not properly adjusted.
- The outside of the windshield is blocked by dirt, mud, leaves, wet snow, etc.
- The inside of the windshield is fogged.
- An abnormal tire or wheel condition (wrong sized, varied size or construction, improperly inflated, compact spare tire, etc.).
- The vehicle is tilted due to a heavy load or suspension modifications.
- The camera temperature gets too hot.

* Not available on all models
• Driving with the parking brake applied.
• When the radar sensor in the front grille gets dirty.

**Detection limitations**
• A vehicle or pedestrian suddenly crosses in front of you.
• The distance between your vehicle and the vehicle or pedestrian ahead of you is too short.
• A vehicle切入s in front of you at a slow speed, and it brakes suddenly.
• When you accelerate rapidly and approach the vehicle or pedestrian ahead of you at high speed.
• The vehicle ahead of you is a motorcycle, bicycle, mobility scooter or other small vehicle.
• When there are animals in front of your vehicle.
• When you drive on a curved, winding or undulating road that makes it difficult for the sensor to properly detect a vehicle in front of you.
• The speed difference between your vehicle and a vehicle in front of you is significantly large.
• An oncoming vehicle suddenly comes in front of you.
• Your vehicle abruptly crosses over in front of an oncoming vehicle.
• When driving through a narrow iron bridge.

**Limitations applicable to pedestrian detection only**
• When there is a group of people in front of your vehicle walking together side by side.
• Surrounded conditions or belongings of the pedestrian alter the pedestrian’s shape, preventing the system from recognizing that the person is a pedestrian.
• When the pedestrian is squatting.
• When the pedestrian is shorter than about 3.3 feet (1 meter) or taller than about 6.6 feet (2 meters) in height.
Parking Your Vehicle

When Stopped

1. Depress the brake pedal firmly with the shift lever in D.
2. Firmly apply the parking brake.
3. Move the shift lever from D to P.
4. Turn off the engine.

Always set the parking brake firmly, in particular if you are parked on an incline.

NOTICE

Do not park your vehicle near flammable objects, such as dry grass, oil, or timber.
Heat from the exhaust can cause a fire.

The following can damage the transmission:
• Depressing the accelerator and brake pedals simultaneously.
• Holding the vehicle in place when facing uphill by depressing the accelerator pedal.
• Moving the shift lever into P before the vehicle stops completely.

Raise the wiper arms when snow is expected.
Multi-View Rear Camera*

About Your Multi-View Rear Camera

Models with one display
The intelligent multi-information display (i-MID) can display your vehicle’s rear view. The display automatically changes to the rear view when the shift lever is moved to R.

Models with two displays/Models with navigation system
See the Navigation System Manual.

Models with two displays/Models without navigation system
The audio/information screen can display your vehicle’s rear view. The display automatically changes to the rear view when the shift lever is moved to R.

The rear camera view is restricted. You cannot see the corner ends of the bumper or what is underneath the bumper. Its unique lens also makes objects appear closer or farther than they actually are.

Visually confirm that it is safe to drive before backing up. Certain conditions, such as weather, lighting, and high temperatures, may also restrict the rear view. Do not rely on the rearview display which does not give you all information about conditions at the back of your vehicle.

If the camera lens is covered with dirt or moisture, use a soft, moist cloth to keep the lens clean and free of debris.

* Not available on all models

Continued
About Your Multi-View Rear Camera

You can change the Fixed Guideline and Dynamic Guideline settings.

Electronic Customized Features P. 271

Models with two displays/Models without navigation system

Fixed Guideline
On: Guidelines appear when you shift into R.  
Off: Guidelines do not appear.

Dynamic Guideline
On: Guidelines move according to the steering wheel direction.  
Off: Guidelines do not move.
You can view three different camera angles on the rearview display.

**Models with one display**
Press the selector knob to switch the angle.

**Models with two displays/Models without navigation system**
Touch the appropriate icon to switch the angle.
- Wide view
- Normal view
- Top down view

**All models**
If the last used viewing mode is Wide or Normal, the same mode is selected the next time you shift into (R). If Top View is last used before you turned off the engine, Wide mode is selected next time you turn the ignition switch to ON [II]*1 and shift to (R).

*1: Models with the smart entry system have an **ENGINE START/STOP** button instead of an ignition switch.
Fuel Information

■ Fuel recommendation

Use of lower octane gasoline can cause a persistent, heavy metallic knocking noise that can lead to engine damage.

■ Top tier detergent gasoline

Because the level of detergency and additives in gasoline vary in the market, Honda endorses the use of “TOP TIER Detergent Gasoline” where available to help maintain the performance and reliability of your vehicle. TOP TIER Detergent Gasoline meets a new gasoline standard jointly established by leading automotive manufacturers to meet the needs of today’s advanced engines.

Qualifying gasoline retailers will, in most cases, identify their gasoline as having met “TOP TIER Detergent Gasoline” standards at the retail location. This fuel is guaranteed to contain the proper level of detergent additives and be free of metallic additives. The proper level of detergent additives, and absence of harmful metallic additives in gasoline, help avoid build-up of deposits in your engine and emission control system.

For further important fuel-related information for your vehicle, or on information on gasoline that does not contain MMT, visit www.hondacars.com. In Canada, visit www.honda.ca for additional information on gasoline. For more information on top tier gasoline, visit www.toptiergas.com.

NOTICE

We recommend quality gasoline containing detergent additives that help prevent fuel system and engine deposits. In addition, in order to maintain good performance, fuel economy, and emissions control, we strongly recommend the use of gasoline that does NOT contain harmful manganese-based fuel additives such as MMT, if such gasoline is available.

Use of gasoline with these additives may adversely affect performance, and cause the malfunction indicator lamp on your instrument panel to come on. If this happens, contact a dealer for service.

Some gasoline today is blended with oxygenates such as ethanol. Your vehicle is designed to operate on oxygenated gasoline containing up to 15% ethanol by volume. Do not use gasoline containing methanol. If you notice any undesirable operating symptoms, try another service station or switch to another brand of gasoline.
Fuel tank capacity: 15.3 US gal (58 liters)

How to Refuel

1. Stop your vehicle with the service station pump on the left side of the vehicle in the rear.
2. Turn off the engine.
3. Pull on the fuel fill door release handle under the lower left corner of the dashboard. The fuel fill door opens.

WARNING

Gasoline is highly flammable and explosive. You can be burned or seriously injured when handling fuel.

• Stop the engine, and keep heat, sparks, and flame away.
• Handle fuel only outdoors.
• Wipe up spills immediately.
4. Remove the fuel fill cap slowly. If you hear a release of air, wait until this stops, then turn the knob slowly to open the fuel fill cap.

5. Place the fuel fill cap in the holder.

6. Insert the fuel filler nozzle fully.
   - When the tank is full, the filler nozzle will click off automatically. This leaves space in the fuel tank in case the fuel expands with a change in the temperature.

7. After filling, replace the fuel fill cap, tightening it until you hear it click at least once.
   - Shut the fuel fill door by hand.

How to Refuel

The filler nozzle automatically stops to leave space in the fuel tank so that fuel does not overflow as a result of changes in air temperature.

If the filler nozzle keeps turning off when the tank is not full, there may be a problem with the pump's fuel vapor recovery system. Try filling at another pump. If this does not fix the problem, consult a dealer.

Do not continue to add fuel after the filler nozzle has automatically stopped. Additional fuel can exceed the full tank capacity.
Fuel Economy

Improving Fuel Economy

Fuel economy depends on several conditions, including driving conditions, your driving habits, the condition of your vehicle, and loading. Depending on these and other conditions, you may or may not achieve the rated fuel economy of this vehicle.

Maintenance and Fuel Economy

You can optimize your fuel economy with proper maintenance of your vehicle. Always maintain your vehicle in accordance with the messages displayed on the information display*/multi-information display*/intelligent multi-information display (i-MID).

- Use the recommended viscosity engine oil, displaying the API Certification Seal.
- Maintain the specified tire pressure.
- Do not load the vehicle with excess cargo.
- Keep your vehicle clean. A buildup of snow or mud on your vehicle’s underside adds weight and increases wind resistance.

Improving Fuel Economy

Direct calculation is the recommended method to determine actual fuel consumed while driving.

\[
\begin{align*}
\text{Miles driven} \div \text{Gallons of fuel} &= \text{Miles per Gallon}\\
\frac{100}{\text{Liter}} \times \text{Kilometers} &= \text{L per 100 km}
\end{align*}
\]

In Canada, posted fuel economy numbers are established following a simulated test. For more information on how this test is performed, please visit [http://oee.nrcan.gc.ca/](http://oee.nrcan.gc.ca/)

* Not available on all models
Accessories and Modifications

Accessories

When installing accessories, check the following:

- Do not install accessories on the windshield. They can obstruct your view and delay your reaction to driving conditions.
- Do not install any accessories over areas marked SRS Airbag, on the sides or backs of the front seats, on front or side pillars, or near the side windows. Accessories installed in these areas may interfere with proper operation of the vehicle’s airbags or may be propelled into you or another occupant if the airbags deploy.
- Be sure electronic accessories do not overload electrical circuits or interfere with proper operation of your vehicle.
  
  Fuses P. 503

- Before installing any electronic accessory, have the installer contact a dealer for assistance. If possible, have a dealer inspect the final installation.

Modifications

Do not modify your vehicle or use non-Honda components that can affect its handling, stability, and reliability.

Overall vehicle performance can be affected. Always make sure all equipment is properly installed and maintained, and that it meets federal, state, province, territory, and local regulations.

**WARNING**

Improper accessories or modifications can affect your vehicle’s handling, stability, and performance, and cause a crash in which you can be seriously hurt or killed.

Follow all instructions in this owner’s manual regarding accessories and modifications.

Honda Genuine accessories are recommended to ensure proper operation on your vehicle.

Before Performing Maintenance

Inspection and Maintenance

For your safety, perform all listed inspections and maintenance to keep your vehicle in good condition. If you become aware of any abnormality (noise, smell, insufficient brake fluid, oil residue on the ground, etc.), have your vehicle inspected by a dealer. (Note, however, that service at a dealer is not mandatory to keep your warranties in effect.) Refer to the separate maintenance booklet for detailed maintenance and inspection information.

- Types of Inspection and Maintenance

- **Daily inspections**
  Perform inspections before long distance trips, when washing the vehicle, or when refueling.

- **Periodic inspections**
  - Check the brake fluid level monthly.
    - [Checking the Brake Fluid](P. 450)
  - Check the tire pressure monthly. Examine the tread for wear and foreign objects.
    - [Checking and Maintaining Tires](P. 465)
  - Check the operation of the exterior lights monthly.
    - [Replacing Light Bulbs](P. 452)
  - Check the condition of the wiper blades at least every six months.
    - [Checking and Maintaining Wiper Blades](P. 461)

- *U.S. models*
  Maintenance, replacement, or repair of emissions control devices and systems may be done by any automotive repair establishment or individuals using parts that are “certified” to EPA standards.

  According to state and federal regulations, failure to perform maintenance on the maintenance main items marked with # will not void your emissions warranties. However, all maintenance services should be performed in accordance with the intervals indicated by the information display/multi-information display/intelligent multi-information display (i-MID).
  - [Maintenance Service Items](P. 434)

  If you want to perform complex maintenance tasks that require more skills and tools, you can purchase a subscription to the Service Express website at [www.techinfo.honda.com](http://www.techinfo.honda.com).
  - [Authorized Manuals](P. 519)

  If you want to perform maintenance yourself, make sure that you have the necessary tools and skills first. After performing maintenance, update the records in the separate maintenance booklet.

* Not available on all models
Safety When Performing Maintenance

Some of the most important safety precautions are given here. However, we cannot warn you of every conceivable hazard that can arise in performing maintenance. Only you can decide whether or not you should perform a given task.

**Maintenance Safety**

- To reduce the possibility of fire or explosion, keep cigarettes, sparks, and flames away from the battery and all fuel related parts.
- Never leave rags, towels, or other flammable objects under the hood.
  - Heat from the engine and exhaust can ignite them causing a fire.
- To clean parts, use a commercially available degreaser or parts cleaner, not gasoline.
- Wear eye protection and protective clothing when working with the battery or compressed air.
- Engine exhaust contains carbon monoxide, which is poisonous and can kill you.
  - Operate the engine only when there is sufficient ventilation.

**Vehicle Safety**

- The vehicle must be in a stationary condition.
  - Make sure your vehicle is parked on level ground, the parking brake is set, and the engine is off.
- Be aware that hot parts can burn you.
  - Make sure to let the engine and exhaust system cool thoroughly before touching vehicle parts.
- Be aware that moving parts can injure you.
  - Do not start the engine unless instructed, and keep your hands and limbs away from moving parts.
Before Performing Maintenance

Parts and Fluids Used in Maintenance Service

The use of Honda genuine parts and fluids is recommended when maintaining and servicing your vehicle. Honda genuine parts are manufactured according to the same high quality standards used in Honda vehicles.
Maintenance Minder™

If the engine oil life is less than 15%, you will see the Maintenance Minder messages appear on the information display/multi-information display* and the i-MID every time you turn the ignition switch to ON [II]*1. The messages notify you when to change the engine oil, or when to bring your vehicle to a dealer for indicated maintenance services.

To Use Maintenance Minder™

1. Turn the ignition switch to ON [II]*1.
2. Press the (Select/Reset) knob repeatedly until the engine oil life appears on the information display.

The Maintenance Minder indicator ( ) stays on in the instrument panel after the engine oil life becomes 0%. Have the indicated maintenance done by a dealer immediately.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
* Not available on all models

To Use Maintenance Minder™

Based on the engine operating conditions, the remaining engine oil life is calculated and displayed as a percentage.

There is a list of maintenance main and sub items you can view on the i-MID.

Maintenance Service Items P. 434
To Use Maintenance Minder™

- Displaying the Engine Oil Life on the Multi-Information Display*

1. Set the power mode to ON.
2. Press the ▲▼ button repeatedly until the engine oil life appears on the multi-information display.

*Not available on all models
Displaying the Engine Oil Life and Maintenance Items on the i-MID

Maintenance items, which should be serviced at the same time that you replace the engine oil, appear on the i-MID.
You can view them on the Maintenance info screen at any time.
1. Turn the ignition switch to ON [ii]*1.
2. Press the MENU button to go to the Vehicle Menu screen.
3. Select Vehicle Information, then press the SOURCE button.
4. Press the SOURCE button again to go to the Maintenance info screen. The engine oil life appears on the i-MID.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

- **Maintenance Minder Message**

**Models with multi-information display**

- **System Message Indicator**
- **Maintenance Minder Message**

### Maintenance Service Items

- Independent of the Maintenance Minder information, replace the brake fluid every 3 years.
- Inspect idle speed every 160,000 miles (256,000 km).
- Adjust the valves during services A, B, 1, 2, or 3 if they are noisy.
<table>
<thead>
<tr>

</tbody>
</table>

*1: If a message SERVICE does not appear more than 12 months after the display is reset, change the engine oil every year.
# : See information on maintenance and emissions warranty.

*2: If you drive in dusty conditions, replace the air cleaner element every 15,000 miles (24,000 km).
*3: If you drive primarily in urban areas that have high concentrations of soot in the air from industry and diesel-powered vehicles, replace the dust and pollen filter every 15,000 miles (24,000 km).
*4: Driving in mountainous areas at very low vehicle speeds or trailer towing results in higher transmission temperatures. This requires transmission fluid changes more frequently than recommended by the Maintenance Minder. If you regularly drive your vehicle under these conditions, have the transmission fluid changed every 25,000 miles (40,000 km).
Resetting the Display

Reset the engine oil life display if you have performed the maintenance service.

Models with information display

1. Turn the ignition switch to ON \(^{1}\).
2. Display the engine oil life by repeatedly pressing the \(\text{Select/Reset}\) knob.
3. Press and hold the \(\text{Select/Reset}\) knob for 10 seconds or more.
   - The engine oil life indicator and the maintenance item codes blink.
4. Press the \(\text{Select/Reset}\) knob for five seconds or more.
   - The displayed maintenance items disappear, and the engine oil life display returns to 100%.

NOTICE

Failure to reset the engine oil life after a maintenance service results in the system showing incorrect maintenance intervals, which can lead to serious mechanical problems.

The dealer will reset the engine oil life display after completing the required maintenance service. If someone other than a dealer performs maintenance service, reset the engine oil life display yourself.
1. Set the power mode to ON.
2. Select **VEHICLE SETTINGS** using the \(^{\uparrow}/^{\downarrow}\) button, then press the **SEL/RESET** button.
3. Select **MAINTENANCE RESET** using the \(^{\uparrow}/^{\downarrow}\) button, then press the **SEL/RESET** button.
4. Select **RESET** using the \(^{\uparrow}/^{\downarrow}\) button, then press the **SEL/RESET** button.

   The service code will disappear and the engine oil life display will return to 100%.

To cancel the oil life reset mode, select **CANCEL**, then press the **SEL/RESET** button.
To Use Maintenance Minder™

1. Turn the ignition switch to ON [II] *1.
2. Go to the Maintenance info screen.
   * Displaying the Engine Oil Life and Maintenance Items on the i-MID P. 431
3. Press the SOURCE button.
   ✔ The oil life reset mode is displayed on the i-MID.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
4. Select Yes with the button, then press the SOURCE button.
   - The displayed maintenance items disappear, and the engine oil life display returns to 100%.
   - Any maintenance items that are necessary for your vehicle at the next maintenance service will appear.
   To cancel the oil life reset mode, select No, then press the SOURCE button.
Maintenance Under the Hood

Maintenance Items Under the Hood

- Engine Oil Fill Cap (Orange)
- Brake Fluid (Black Cap)
- Washer Fluid (Blue Cap)
- Engine Coolant Reserve Tank
- Battery
- Radiator Cap
- Engine Oil Dipstick

440
Opening the Hood

1. Park the vehicle on level ground, and set the parking brake.
2. Pull the hood release handle under the lower left corner of the dashboard. The hood will pop up slightly.
3. Push up the hood latch lever in the center of the hood to release the lock mechanism, and open the hood.
4. Remove the support rod from the clamp using the grip. Mount the support rod in the hood.

When closing, remove the support rod, and stow it in the clamp, then gently lower the hood. Remove your hand at a height of approximately 12 inches (30 cm) and let the hood close.

**NOTICE**
Do not open the hood when the wiper arms are raised. The hood will strike the wipers, and may damage either the hood or the wipers.

When closing the hood, check that the hood is securely latched.

If the hood latch lever moves stiffly, or if you can open the hood without lifting the lever, the latch mechanism should be cleaned and lubricated.
Recommended Engine Oil

- Genuine Honda Motor Oil
- Premium-grade 0W-20 detergent oil with an API Certification Seal on the container.

Oil is a major contributor to your engine’s performance and longevity. If you drive the vehicle with insufficient or deteriorated oil, the engine may fail or be damaged.

This seal indicates the oil is energy conserving and that it meets the American Petroleum Institute’s latest requirements.

Use a Genuine Honda Motor Oil or another commercial engine oil of suitable viscosity for the ambient temperature as shown here.

- Synthetic oil
You may also use synthetic motor oil if it is labeled with the API Certification Seal and is the specified viscosity grade.
Oil Check

We recommend that you check the engine oil level every time you refuel. Park the vehicle on level ground. Wait approximately three minutes after turning the engine off before you check the oil.

1. Remove the dipstick (orange handle).
2. Wipe the dipstick with a clean cloth or paper towel.
3. Insert the dipstick back all the way into its hole.
4. Remove the dipstick again, and check the level. It should be between the upper and lower marks. Add oil if necessary.

If the oil level is near or below the lower mark, slowly add oil being careful not to overfill.
Adding Engine Oil

1. Unscrew and remove the engine oil fill cap.
2. Add oil slowly.
3. Reinstall the engine oil fill cap, and tighten it securely.
4. Wait for three minutes and recheck the engine oil dipstick.

**NOTICE**
If any oil spills, wipe it away immediately. Spilled oil may damage the engine compartment components.

**NOTICE**
Do not fill the engine oil above the upper mark. Overfilling the engine oil can result in leaks and engine damage.
Maintenance Under the Hood

Changing the Engine Oil and Oil Filter

You must change the engine oil and oil filter regularly in order to maintain the engine's lubrication. The engine may be damaged if they are not changed regularly.

Change the oil and filter in accordance with the maintenance message on the information display/multi-information display/i-MID.

1. Run the engine until it reaches normal operating temperature, and then turn the engine off.
2. Open the hood and remove the engine oil fill cap.
3. Remove the drain bolt and washer from the bottom of the engine, and drain the oil into a suitable container.

**NOTICE**

You may damage the environment if you do not dispose of the oil in a suitable way. If you are changing the oil by yourself, appropriately dispose of the used oil. Put the oil in a sealed container and take it to a recycling center. Do not throw the oil away into a garbage can or onto the ground.

* Not available on all models
4. Remove the oil filter and dispose of the remaining oil.
5. Check that the filter gasket is not stuck to the engine contact surface. If it is stuck, you must detach it.
6. Wipe away dirt and dust adhering to the contact surface of the engine block, and install a new oil filter. Apply a light coat of new engine oil to the oil filter gasket.
7. Put a new washer on the drain bolt, then reinstall the drain bolt. Tightening torque: 30 lbf·ft (40 N·m, 4.0 kgf·m)
8. Pour the recommended engine oil into the engine. Engine oil change capacity (including filter): 4.6 US qt (4.4 L)
9. Reinstall the engine oil fill cap securely and start the engine.
10. Run the engine for a few minutes, and then check that there is no leak from the drain bolt or oil filter.
11. Stop the engine, wait for three minutes, and then check the oil level on the dipstick. If necessary, add more engine oil.

**Changing the Engine Oil and Oil Filter**

You will need a special wrench to replace the oil filter. You can buy this wrench from a dealer.

When installing the new oil filter, follow the instructions supplied with the oil filter.

Reinstall the engine oil fill cap. Start the engine. The low oil pressure indicator should go off within five seconds. If it does not, turn off the engine, and check your work.

Be sure to verify that the oil filter is designed for your vehicle. A genuine Honda oil filter is recommended for optimum lubrication flow and filtration properties to assure the reliability of the engine.
**Engine Coolant**

**Specified coolant: Honda Long Life Antifreeze/Coolant Type 2**

This coolant is premixed with 50% antifreeze and 50% water. Do not add any straight antifreeze or water.

We recommend you check the engine coolant level every time you refuel. Check the reserve tank first. If it is completely empty, also check the coolant level in the radiator. Add the engine coolant accordingly.

---

**Reserve Tank**

1. Check the amount of coolant in the reserve tank.

2. If the coolant level is below the **MIN** mark, add the specified coolant until it reaches the **MAX** mark.

3. Inspect the cooling system for leaks.
1. Make sure the engine and radiator are cool.
2. Turn the radiator cap counterclockwise to relieve any pressure in the cooling system. Do not push the cap down when turning.
3. Push down and turn the radiator cap counterclockwise to remove it.
4. The coolant level should be up to the base of the filler neck. Add coolant if it is low.
5. Put the radiator cap back on, and tighten it fully.
6. Pour coolant into the reserve tank until it reaches the MAX mark. Put the cap back on the reserve tank.

**WARNING**
Removing the radiator cap while the engine is hot can cause the coolant to spray out, seriously scalding you.
Always let the engine and radiator cool down before removing the radiator cap.

**NOTICE**
Pour the fluid slowly and carefully so you do not spill any. Clean up any spills immediately; they can damage components in the engine compartment.
Transmission Fluid

■ Continuously Variable Transmission Fluid

Specified fluid: Honda HCF-2 Transmission Fluid

Have a dealer check the fluid level and replace if necessary.

NOTICE
Do not mix HCF-2 with other transmission fluids. Using a transmission fluid other than HCF-2 may adversely affect the operation and durability of your vehicle’s transmission, and damage the transmission. Any damage caused by using a transmission fluid that is not equivalent to HCF-2 is not covered by Honda’s new vehicle warranty.
**Brake Fluid**

**Specified fluid: Honda Heavy Duty Brake Fluid DOT 3**

---

### Checking the Brake Fluid

The fluid level should be between the **MIN** and **MAX** marks on the side of the reservoir.

---

**NOTICE**

Brake fluid marked DOT 5 is not compatible with your vehicle’s braking system and can cause extensive damage.

If the specified brake fluid is not available, you should use only DOT 3 or DOT 4 fluid from a sealed container as a temporary replacement.

Using any non-Honda brake fluid can cause corrosion and decrease the longevity of the system. Have the brake system flushed and refilled with Honda Heavy Duty Brake Fluid DOT 3 as soon as possible.

If the brake fluid level is at or below the **MIN** mark, have a dealer inspect the vehicle for leaks or worn brake pad as soon as possible.
Refilling Window Washer Fluid

Check the amount of window washer fluid by looking at the reservoir. If the level is low, fill the washer reservoir.

If the washer fluid is low, the washer level indicator comes on.

If the washer fluid is low, a message appears on the multi-information display.

Pour the washer fluid carefully. Do not overflow the reservoir.

NOTICE
Do not use engine antifreeze or a vinegar/water solution in the windshield washer reservoir. Antifreeze can damage your vehicle's paint. A vinegar/water solution can damage the windshield washer pump.
Replacing Light Bulbs

Headlight Bulbs

When replacing, use the following bulbs.

- **High beam headlight:** 60 W (HB3)
- **Low beam headlight:** 55 W (H11 for halogen bulb type)

### High Beam Headlight

1. Push the tab to remove the coupler.
2. Rotate the old bulb to the left to remove.
3. Insert a new bulb into the headlight assembly and turn it to the right.
4. Insert the coupler into the connector of the bulb.

**NOTICE**

Halogen bulbs get very hot when lit. Oil, perspiration, or a scratch on the glass can cause the bulb to overheat and shatter.

The headlight aim is set by the factory, and does not need to be adjusted. However, if you regularly carry heavy items in the cargo area or tow a trailer, have the aiming readjusted at a dealer or by a qualified technician.

When replacing a halogen bulb, handle it by its base, and protect the glass from contact with your skin or hard objects. If you touch the glass, clean it with denatured alcohol and a clean cloth.

Low Beam Headlights

1. Push the tab to remove the coupler.
2. Rotate the old bulb to the left to remove.
3. Insert a new bulb into the headlight assembly and turn it to the right.
4. Insert the coupler into the connector of the bulb.

Fog Light Bulbs*

When replacing, use the following bulbs.

Fog Light: 35 W (H8 for halogen bulb type)

1. Pull the hole of the cover with your finger, then remove it.

NOTICE

Halogen bulbs get very hot when lit. Oil, perspiration, or a scratch on the glass can cause the bulb to overheat and shatter.

When replacing a halogen bulb, handle it by its plastic case, and protect the glass from contact with your skin or hard objects. If you touch the glass, clean it with denatured alcohol and a clean cloth.

* Not available on all models
Replacing Light Bulbs

1. Remove the screw using a Phillips-head screwdriver and carefully pull the fog light assembly out of the bumper.

2. Push the tab to remove the coupler.

3. Rotate the old bulb to the left to remove.

4. Insert new bulb.
Replacing Light Bulbs

Front Turn Signal/Side Marker Light/Parking Light Bulbs

When replacing, use the following bulbs.

**Front Turn Signal/Side Marker Light/Parking Light: 28/8 W (Amber)**

1. Turn the socket to the left and remove it, then remove the old bulb.
2. Insert a new bulb.
Replacing Light Bulbs

Front Turn Signal/Side Marker Light Bulbs

When replacing, use the following bulbs.

Front Turn Signal/Side Marker Light: 28/8 W (Amber)

1. Turn the socket to the left and remove it, then remove the old bulb.
2. Insert a new bulb.

Parking Light Bulbs

Parking light bulbs are LED type. Have an authorized Honda dealer inspect and replace the light bulbs.
Replacing Light Bulbs

Side Turn Signal/Emergency Indicator Light Bulbs*

Door mirrors have the side turn lights. Have an authorized Honda dealer inspect and replace the light assembly.

Brake Light, Taillight, Back-Up Light, Rear Turn Signal Light and Lower Rear Side Marker Light Bulbs

When replacing, use the following bulbs.

<table>
<thead>
<tr>
<th>Light Bulb</th>
<th>Wattage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lower Rear Side Marker</td>
<td>21/5W</td>
</tr>
<tr>
<td>Brake/Taillight</td>
<td>21/5W</td>
</tr>
<tr>
<td>Back-Up Light</td>
<td>21W</td>
</tr>
<tr>
<td>Rear Turn Signal Light</td>
<td>21W (Amber)</td>
</tr>
</tbody>
</table>

1. Use a Phillip-head screwdriver to remove the bolts.
2. Pull the light assembly out of the rear pillar.

* Not available on all models

Continued
Replacing Light Bulbs
Brake Light, Taillight, Back-Up Light, Rear Turn Signal Light and Lower Rear Side Marker Light Bulbs

3. Turn the socket to the left and remove it.
Remove the old bulb.
4. Insert a new bulb.

5. Reinstall the light assembly by sliding it on to the guide on the body.
Upper Rear Side Marker/Taillight Bulbs

When replacing, use the following bulbs.

**Upper Rear Side Marker/Taillight: 3CP**

1. Remove the lower taillight assembly.

2. Use a Phillip-head screwdriver to remove the bolt.

3. Pull the light assembly out of the rear pillar.

4. Turn the socket to the left and remove it.

5. Insert a new bulb.
Replacing Light Bulbs

Rear License Plate Light Bulb

When replacing, use the following bulb.

Rear License Plate Light: 3CP

1. Push the left edge of the lens to the right and pull out the license light assembly.

2. Push the tabs to remove the lens.

3. Remove the old bulb.

4. Insert a new bulb.

High-Mount Brake Light Bulb

High-mount brake light bulbs are LED type. Have an authorized Honda dealer inspect and replace the light bulbs.
Checking and Maintaining Wiper Blades

Checking Wiper Blades
If the wiper blade rubber has deteriorated, it will leave streaks and the hard surfaces of the blade may scratch the window glass.

Changing the Front Wiper Blade Rubber
1. Lift the driver side wiper arm first, then the passenger side.

2. Push the lock tab up.
3. Slide the blade from the wiper arm.

NOTICE
Avoid dropping the wiper arm; it may damage the windshield.
Checking and Maintaining Wiper Blades

4. Slide the wiper blade out from its holder by pulling the tabbed end out.

5. Remove the retainers from the rubber blade that has been removed, and mount to a new rubber blade. Correctly align the rubber protrusion and the retainer grooves.

6. Slide the new wiper blade onto the holder from the bottom end. The tab on the holder should fit in the indent of the wiper blade.

7. Slide the wiper blade onto the wiper arm until it clicks.

8. Lower the passenger side wiper arm first, then the driver side.
Changing the Rear Wiper Blade Rubber

1. Raise the rear wiper arm up and away from the rear window.

2. Pull up the lock tab and release the wiper arm.

3. Slide the wiper blade out from the end with the indent.

NOTICE
Avoid dropping the wiper arm; it may damage the rear window.
4. Remove the retainers from wiper blade and mount to a new rubber blade.

5. Slide the wiper blade onto the holder.
   ➤Make sure it is engaged correctly, then install the wiper blade assembly onto the wiper arm.
Checking and Maintaining Tires

Checking Tires

To safely operate your vehicle, your tires must be of the proper type and size, in good condition with adequate tread, and properly inflated.

■ Inflation guidelines

- Underinflated tires wear unevenly, adversely affect handling and fuel economy, and are more likely to fail from overheating.

- Overinflated tires make your vehicle ride harshly, are more prone to road hazards, and wear unevenly.

Every day before you drive, look at each of the tires. If one looks lower than the others, check the pressure with a tire gauge.

At least once a month or before long trips, use a gauge to measure the pressure in all tires, including the spare. Even tires in good condition can lose 1 to 2 psi (10 to 20 kPa, 0.1 to 0.2 kgf/cm²) per month.

■ Inspection guidelines

- Bumps or bulges on the side or in the tread. Replace the tire if you find any cuts, splits, or cracks in the side of the tire. Replace it if you see fabric or cord.
- Remove any foreign objects and inspect for air leaks.
- Uneven tread wear. Have a dealer check the wheel alignment.
- Excessive tread wear. See Wear Indicators P. 470
- Cracks or other damage around valve stem.

WARNING

Using tires that are excessively worn or improperly inflated can cause a crash in which you can be seriously hurt or killed.

Follow all instructions in this owner’s manual regarding tire inflation and maintenance.

Measure the air pressure when tires are cold. This means the vehicle has been parked for at least three hours, or driven less than 1 mile (1.6 km). If necessary, add or release air until the specified pressure is reached.

If checked when hot, tire pressure can be as much as 4–6 psi (30–40 kPa, 0.3–0.4 kgf/cm²) higher than if checked when cold.

Have a dealer check the tires if you feel a consistent vibration while driving. New tires and any that have been removed and reinstalled should be properly balanced.
Checking and Maintaining Tires

Tire and Loading Information Label

The label attached to the driver’s doorjamb provides necessary tire and loading information.

Tire Labeling

The tires that came on your vehicle have a number of markings. Those you should be aware of are described below.

Tire Sizes

Whenever tires are replaced, they should be replaced with tires of the same size.

The tire and loading information label attached to the driver’s doorjamb contains:

1. The number of people your vehicle can carry.
2. The total weight your vehicle can carry. Do not exceed this weight.
3. The original tire sizes for front, rear, and spare.
4. The proper cold tire pressure for front, rear, and spare.

Following is an example of tire size with an explanation of what each component means.

215/70R16 100S

215: Tire width in millimeters.
70: Aspect ratio (the tire’s section height as a percentage of its width).
R: Tire construction code (R indicates radial).
16: Rim diameter in inches.
100: Load index (a numerical code associated with the maximum load the tire can carry).
S: Speed symbol (an alphabetical code indicating the maximum speed rating).
### Tire Identification Number (TIN)

The tire identification number (TIN) is a group of numbers and letters that look like the example in the side column. TIN is located on the sidewall of the tire.

### Glossary of Tire Terminology

**Cold Tire Pressure** – The tire air pressure when the vehicle has been parked for at least three hours or driven less than 1 mile (1.6 km).

**Load Rating** – Means the maximum load that a tire is rated to carry for a given inflation pressure.

**Maximum Inflation Pressure** – The maximum tire air pressure that the tire can hold.

**Maximum Load Rating** – Means the load rating for a tire at the maximum permissible inflation pressure for that tire.

**Recommended Inflation Pressure** – The cold tire inflation pressure recommended by the manufacturer.

**Treadwear Indicators (TWI)** – Means the projections within the principal grooves designed to give a visual indication of the degrees of wear of the tread.
Checking and Maintaining Tires

DOT Tire Quality Grading (U.S. Vehicles)

The tires on your vehicle meet all U.S. Federal Safety Requirements. All tires are also graded for treadwear, traction, and temperature performance according to Department of Transportation (DOT) standards. The following explains these gradings.

Uniform Tire Quality Grading

Quality grades can be found where applicable on the tire sidewall between tread shoulder and maximum section width.

Treadwear

The treadwear grade is a comparative rating based on the wear rate of the tire when tested under controlled conditions on a specified government test course. For example, a tire graded 150 would wear one and one-half (1 1/2) times as well on the government course as a tire graded 100. The relative performance of tires depends upon the actual conditions of their use, however, and may depart significantly from the norm due to variations in driving habits, service practices and differences in road characteristics and climate.
Checking and Maintaining Tires

DOT Tire Quality Grading (U.S. Vehicles)

■ Traction

The traction grades, from highest to lowest, are AA, A, B, and C. Those grades represent the tire's ability to stop on wet pavement as measured under controlled conditions on specified government test surfaces of asphalt and concrete. A tire marked C may have poor traction performance.

■ Temperature

The temperature grades are A (the highest), B, and C, representing the tire’s resistance to the generation of heat and its ability to dissipate heat when tested under controlled conditions on a specified indoor laboratory test wheel. Sustained high temperature can cause the material of the tire to degenerate and reduce tire life, and excessive temperature can lead to sudden tire failure. The grade C corresponds to a level of performance which all passenger car tires must meet under the Federal Motor Vehicle Safety Standard No. 109. Grades B and A represent higher levels of performance on the laboratory test wheel than the minimum required by law.

Warning: The traction grade assigned to this tire is based on straight-ahead braking traction tests, and does not include acceleration, cornering, hydroplaning, or peak traction characteristics.

Warning: The temperature grade for this tire is established for a tire that is properly inflated and not overloaded. Excessive speed, underinflation, or excessive loading, either separately or in combination, can cause heat buildup and possible tire failure.
Checking and Maintaining Tires

Wear Indicators

The groove where the wear indicator is located is 1/16 inch (1.6 mm) shallower than elsewhere on the tire. If the tread has worn so that the indicator is exposed, replace the tire. **Worn out tires have poor traction on wet roads.**

Tire Service Life

The life of your tires is dependent on many factors, including driving habits, road conditions, vehicle loading, inflation pressure, maintenance history, speed, and environmental conditions (even when the tires are not in use).

In addition to regular inspections and inflation pressure maintenance, it is recommended that you have annual inspections performed once the tires reach five years old. All tires, including the spare, should be removed from service after 10 years from the date of manufacture, regardless of their condition or state of wear.
Tire and Wheel Replacement

Replace your tires with radials of the same size, load range, speed rating, and maximum cold tire pressure rating (as shown on the tire’s sidewall). Using tires of a different size or construction can cause the ABS, vehicle stability assist (VSA®), hill start assist, and the AWD* system to work incorrectly.

It is best to replace all four tires at the same time. If that isn’t possible, replace the front or rear tires in pairs.

Make sure that the wheel’s specifications match those of the original wheels.

If you replace a wheel, only use TPMS specified wheels approved for your vehicle.

* Not available on all models
Tire Rotation

Rotating tires according to the maintenance messages on the information display’/multi-information display’/intelligent multi-information display (i-MID) helps to distribute wear more evenly and increase tire life.

■ Tires without rotation marks

Rotate the tires as shown here.

■ Tires with rotation marks

Rotate the tires as shown here.

Tires with directional tread patterns should only be rotated front to back (not from one side to the other). Directional tires should be mounted with the rotation indication mark facing forward, as shown below.

* Not available on all models
**Winter Tires**

If driving on snowy or frozen roads, mount all season marked “M+S” tires, snow tires, or tire chains; reduce speed; and maintain sufficient distance between vehicles when driving.

Be particularly careful when operating the steering wheel or brakes to prevent skidding.

Use tire chains, snow tires, or all season tires when necessary or according to the law.

When mounting, refer to the following points.

For winter tires:
- Select the size and load ranges that are the same as the original tires.
- Mount the tires to all four wheels.

For tire chains:
- Install them on the front tires only.
- Because your vehicle has limited tire clearance, we strongly recommend using the chains listed below:

**Models with 215/70R16 tires**
- **Cable-type: SCC Radial Chain SC1042**

**Models with 225/65R17 or P225/60R18 99H tires**
- **Cable-type: SCC Radial Chain TC2111MM**
- Follow the chain manufacturer’s instruction when installing. Mount them as tightly as you can.
- Check that the chains do not touch the brake lines or suspension.
- Drive slowly.

**NOTICE**

Traction devices that are the wrong size or improperly installed can damage your vehicle’s brake lines, suspension, body, and wheels. Stop driving if they are hitting any part of the vehicle.

When tire chains are mounted, follow the chain manufacturer’s instructions regarding vehicle operational limits.

If your vehicle is equipped with summer tires, be aware that these tires are not designed for winter driving conditions. For more information, contact a dealer.

**WARNING**

Using the wrong chains, or not properly installing chains, can damage the brake lines and cause a crash in which you can be seriously injured or killed.

Follow all instructions in this owner’s manual regarding the selection and use of tire chains.
Battery

Checking the Battery
Check the battery condition monthly and check the terminals for corrosion.

If your vehicle's battery is disconnected or goes dead:
• The audio system is disabled.  
  📀 Reactivating the audio system p. 210
• The clock resets.
  📉 Clock p. 128
• The navigation system* is disabled.
  📉 Refer to the navigation system manual

Charging the Battery
Disconnect both battery cables to prevent damaging your vehicle's electrical system. Always disconnect the negative (–) cable first, and reconnect it last.

WARNING: Battery post, terminals, and related accessories contain lead and lead compounds. Wash your hands after handling.

When you find corrosion, clean the battery terminals by applying a baking powder and water solution. Clean the terminals with a damp towel. Cloth/towel dry the battery. Coat the terminals with grease to help prevent future corrosion.

When replacing the battery, the replacement must be of the same specifications. Please consult a dealer for more information.

* Not available on all models
Remote Transmitter Care

Replacing the Button Battery
If the indicator does not come on when the button is pressed, replace the battery.

1. Unscrew the cover with a small Phillips-head screwdriver.
2. Open the remote transmitter.
   ▶ Wrap the small flat-tip screwdriver with a cloth to prevent scratching the transmitter.
3. Remove the button battery with the small flat-tip screwdriver.
4. Make sure to replace the battery with the correct polarity.

Master Keys with Remote Transmitter*

Battery type: CR1620

1. Unscrew the cover with a small Phillips-head screwdriver.

NOTICE
An improperly disposed of battery can damage the environment. Always confirm local regulations for battery disposal.

Replacement batteries are commercially available or at a dealer.

* Not available on all models
Remote Transmitter Care
Replacing the Button Battery

Smart Entry Remote*

**Battery type: CR2032**

1. Remove the built-in key.

2. Remove the upper half of the cover by carefully prying on the edge with a coin. ▶ Remove carefully to avoid losing the buttons.
   ▶ Wrap a coin with a cloth to prevent scratching the smart entry remote.

3. Make sure to replace the battery with the correct polarity.

* Not available on all models
Dust and Pollen Filter

The heating and cooling system*/climate control system* is equipped with a dust and pollen filter that collects pollen, dust, and other debris in the air. The Maintenance Minder™ messages will let you know when to replace the filter.

We recommend that you replace the dust and pollen filter sooner when using your vehicle in areas with high concentrations of dust.

* Not available on all models
Cleaning

**Interior Care**

Use a damp cloth with a mixture of mild detergent and warm water to remove dirt. Use a clean cloth to remove detergent residue.

**Cleaning Seat Belts**

Use a soft brush with a mixture of mild soap and warm water to clean the seat belts. Let the belts air dry. Wipe the openings of the seat belt anchors using a clean cloth.

Do not spill liquids inside the vehicle. Electrical devices and systems may malfunction if liquids are splashed on them.

Do not use silicone based sprays on electrical devices such as audio devices and switches. Doing so may cause the items to malfunction or a fire inside the vehicle.

If a silicone based spray is inadvertently used on electrical devices, consult a dealer.

Depending on their composition, chemicals and liquid aromatics may cause discoloration, wrinkles, and cracking to resin-based parts and textiles. Do not use alkali solvents or organic solvents such as benzene or gasoline.

After using chemicals, make sure to gently wipe them away using a dry cloth. Do not place used cloths on top of resin based parts or textiles for long periods of time without washing.
Floor Mats

The driver’s floor mat hooks over the floor anchors, which keep the mat from sliding forward. To remove a mat for cleaning, turn the anchor knobs to the unlock position. When reinstalling the mat after cleaning, turn the knobs to the lock position.

Do not put additional floor mats on top of the anchored mat.

Maintaining Genuine Leather*

Vacuum dirt and dust from the leather frequently. Pay close attention to the pleats and seams. Clean the leather with a soft cloth dampened with a 90% water and 10% neutral soap solution. Then buff it with a clean, dry cloth. Remove any dust or dirt on leather surfaces immediately.

* Not available on all models
Exterior Care

Dust off the vehicle body after you drive. Regularly inspect your vehicle for scratches on painted surfaces. A scratch on a painted surface can result in body rust. If you find a scratch, promptly repair it.

■ Washing the Vehicle

Wash the vehicle regularly. Wash more frequently when driving in the following conditions:
- If driving on roads with road salt.
- If driving in coastal areas.
- If tar, soot, bird droppings, insects, or tree sap are stuck to painted surfaces.

■ Using an Automated Car Wash

- Remove the audio antenna.  
- Fold in the door mirrors.
- Turn off the automatic intermittent wipers*.
Make sure to follow the instructions indicated on the automated car wash.

■ Using High Pressure Cleaners

- Keep sufficient distance between the cleaning nozzle and the vehicle body.
- Take particular care around the windows. Standing too close may cause water to enter the vehicle interior.
- Do not spray high pressure water directly into the engine compartment. Instead, use low pressure water and a mild detergent.

* Not available on all models
A good coat of automotive body wax helps protect your vehicle’s paint from the elements. Wax will wear off over time and expose your vehicle’s paint to the elements, so reapply as necessary.

If you get gasoline, oil, engine coolant, or battery fluid on resin coated parts, they may be stained or the coating may peel. Promptly wipe it away using a soft cloth and clean water.

Wipe using a glass cleaner.

Aluminum is susceptible to deterioration caused by salt and other road contaminants. Use a sponge and mild detergent to wipe away promptly. Be careful not to use harsh chemicals (including some commercial wheel cleaners) or a stiff brush. They can damage the clear coat of the aluminum alloy wheels that helps keep the aluminum from corroding and tarnishing.

* Not available on all models
Fogged Exterior Light Lenses

The inside lenses of exterior lights (headlights, brake lights, etc.) may fog temporarily if you have driven in the rain, or after the vehicle has been run through a car wash. Dew condensation also may build up inside the lenses when there is a significant enough difference between the ambient and inside lens temperatures (similar to vehicle windows fogging up in rainy conditions). These conditions are natural processes, not structural design problems in the exterior lights. Lens design characteristics may result in moisture developing on the light lens frame surfaces. This also is not a malfunction.

However, if you see large amounts water accumulation, or large water drops building up inside the lenses, have your vehicle inspected by a dealer.
Handling the Unexpected

This chapter explains how to handle unexpected troubles.

Tools

Types of Tools

Wheel Nut Wrench/
Jack Handle

Jack Handle Bar

Jack

The tools are stored in the cargo area.
If a Tire Goes Flat

Changing a Flat Tire

If a tire goes flat while driving, grasp the steering wheel firmly, and brake gradually to reduce speed. Then, stop in a safe place. Replace the flat tire with a compact spare tire. Go to a dealer as soon as possible to have the full-size tire repaired or replaced.

1. Park the vehicle on firm, level, and non-slippery and apply the parking brake.
2. Move the shift lever to [P].
3. Turn on the hazard warning lights and turn the ignition switch to LOCK [O]*1.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
If a Tire Goes Flat

Changing a Flat Tire

Getting Ready to Replace the Flat Tire

1. Open the cargo area floor lid.

2. Take the tool bag out of the cargo area. Take the wheel nut wrench and jack handle bar out of the tool bag.

3. Take the jack out of the spare tire area.

4. Unscrew the wing bolt, and remove the spacer cone. Then, remove the spare tire.
5. Place a wheel block or rock in front and rear of the wheel diagonal to the flat tire.

6. Place the compact spare tire wheel side up under the vehicle body, near the tire that needs to be replaced.

7. Loosen each wheel nut about one turn using the wheel nut wrench.

Continued
If a Tire Goes Flat

1. Place the jack under the jacking point closest to the tire to be changed.

2. Turn the end bracket clockwise as shown in the image until the top of the jack contacts the jacking point. Make sure that the jacking point tab is resting in the jack notch.

3. Raise the vehicle, using the jack handle bar and the jack handle, until the tire is off the ground.

WARNING

The vehicle can easily roll off the jack, seriously injuring anyone underneath.

Follow the directions for changing a tire exactly, and never get under the vehicle when it is supported only by the jack.

Do not use the jack with people or luggage in the vehicle.

Use the jack provided in your vehicle. Other jacks may not support the weight (“load”) or may not fit the jacking point.

The following instructions must be followed to use the jack safely:
- Do not use while the engine is running.
- Use only where the ground is firm and level.
- Use only at the jacking points.
- Do not get in the vehicle while using the jack.
- Do not put anything on top of or underneath the jack.
If a Tire Goes Flat

### Changing a Flat Tire

1. Remove the wheel nuts and flat tire.
2. Wipe the mounting surfaces of the wheel with a clean cloth.
3. Mount the compact spare tire.
4. Screw the wheel nuts until they touch the lips around the mounting holes, then stop rotating.
5. Lower the vehicle and remove the jack. Tighten the wheel nuts in the order indicated in the image. Go around, tightening the nuts, two to three times in this order.

**Wheel nut torque:**
80 lbf-ft (108 N·m, 11 kgf·m)

---

Reverting the Flat Tire

Do not over tighten the wheel nuts by applying extra torque using your foot or a pipe.
If a Tire Goes Flat

Changing a Flat Tire

1. Remove the center cap.

2. Place the flat tire face down in the spare tire well.

3. Remove the spacer cone from the wing bolt, flip it over, and insert it back on the bolt. Secure the flat tire with the wing bolt.

4. Securely store the wheel nut wrench and jack handle bar back in the tool bag. Store the bag in the cargo area.

5. Store the jack in its holder. Turn the jack’s end bracket to lock it in place.

If you replace a flat tire with the spare tire, the TPMS comes on while you are driving. After driving for a few miles (kilometers), the indicator will start blinking for a short time and then stay on, but this is normal.

Calibrate the TPMS when you replace the tire with a specified regular tire.

TPMS Calibration P. 401
# Engine Does Not Start

## Checking the Engine

If the engine does not start, check the starter.

<table>
<thead>
<tr>
<th>Starter condition</th>
<th>Checklist</th>
</tr>
</thead>
</table>
| **Starter doesn’t turn or turns over slowly.** The battery may be dead. Check each of the items on the right and respond accordingly. | **Check for a message on the intelligent multi-information display (i-MID).**  
- If the **TO START, HOLD REMOTE NEAR START BUTTON** message appears  
  - If the **Smart Entry Remote Battery is Weak** P. 492  
  - Make sure the smart entry remote is in its operating range.  
  - **ENGINE START/STOP Button Operating Range** P. 154 |
| **The starter turns over normally but the engine doesn’t start.** There may be a problem with the fuse. Check each of the items on the right and respond accordingly. | **Review the engine start procedure.**  
Follow its instructions, and try to start the engine again. **Starting the Engine** P. 360  
**Check the immobilizer system indicator.**  
When the immobilizer system indicator is blinking, the engine cannot be started.  
- **Immobilizer System** P. 147  
**Check the fuel level.**  
There should be enough fuel in the tank. **Fuel Gauge** P. 92  
**Check the fuse.**  
Check all fuses, or have the vehicle checked by a dealer.  
- **Inspecting and Changing Fuses** P. 505  
If the problem continues:  
- **Emergency Towing** P. 506 |
If the Smart Entry Remote Battery is Weak

Models with smart entry system
If the beeper sounds, the indicator on the ENGINE START/STOP button flashes, and the engine won't start.

Models with intelligent multi-information display
The TO START, HOLD REMOTE NEAR START BUTTON message appears on the intelligent multi-information display (i-MID).

Start the engine as follows.

1. Touch the center of the ENGINE START/STOP button with the H logo on the smart entry remote while the indicator on the ENGINE START/STOP button is flashing. The buttons on the smart entry remote should be facing you.
   - The indicator flashes for about 30 seconds.

2. Depress the brake pedal and press the ENGINE START/STOP button within 10 seconds after the beeper sounds and the indicator changes from flashing to on.
   - If you don’t depress the pedal, the mode will change to ACCESSORY.
Emergency Engine Stop

The ENGINE START/STOP button may be used to stop the engine due to an emergency situation even while driving. If you must stop the engine, do either of the following operations:
• Press and hold the ENGINE START/STOP button for about two seconds.
• Firmly press the ENGINE START/STOP button twice.

The steering wheel will not lock. However, because turning off the engine disables the power assist the engine provides to the steering and braking systems, it will require significantly more physical effort and time to steer and slow the vehicle. Use both feet on the brake pedal to slow down the vehicle and stop immediately in a safe place.

The power mode is in ACCESSORY when the engine is stopped. To change the mode to VEHICLE OFF, change the gear position to [P] after the vehicle comes to a complete stop.
Jump Starting

Jump Starting Procedure

Turn off the power to electric devices, such as audio and lights. Turn off the engine, then open the hood.

1. Connect the first jumper cable to your vehicle's + terminal.
2. Connect the other end of the first jumper cable to the booster battery + terminal.
   - Use a 12 volt booster battery only.
   - When using an automotive battery charger to boost your 12-volt battery, select a lower charging voltage than 15 volts. Check the charger manual for the proper setting.
3. Connect the second jumper cable to the booster battery − terminal.
4. Connect the other end of the second jumper cable to the engine mounting bolt as shown. Do not connect this jumper cable to any other part.
5. If your vehicle is connected to another vehicle, start the assisting vehicle's engine and increase its rpm slightly.
6. Attempt to start your vehicle's engine. If it turns over slowly, check that the jumper cables have good metal-to-metal contact.

Jump Starting

WARNING

A battery can explode if you do not follow the correct procedure, seriously injuring anyone nearby.

Keep all sparks, open flames, and smoking materials away from the battery.

Battery performance degrades in cold conditions and may prevent the engine from starting.
What to Do After the Engine Starts

Once your vehicle's engine has started, remove the jumper cables in the following order.

1. Disconnect the jumper cable from your vehicle's ground.
2. Disconnect the other end of the jumper cable from the booster terminal.
3. Disconnect the jumper cable from your vehicle's terminal.
4. Disconnect the other end of the jumper cable from the booster terminal.

Have your vehicle inspected by a nearby service station or a dealer.
Shift Lever Does Not Move

Follow the procedure below if you cannot move the shift lever out of the P position.

### Releasing the Lock

1. Set the parking brake.
2. Remove the key from the ignition switch.
3. Wrap a cloth around the tip of a small flat-tip screwdriver. Put it into the shift lock release slot as shown in the image, and remove the cover.
4. Insert the key into the shift lock release slot.
5. While pushing the key down, press the shift lever release button and place the shift lever into N.
   - The lock is now released. Have the shift lever checked by a dealer as soon as possible.
Handling the Unexpected

How to Handle Overheating

Overheating symptoms are as follows:

- The temperature gauge needle is at the H mark or the engine suddenly loses power.
- Steam or spray comes out of the engine compartment.

**First thing to do**

1. Immediately park the vehicle in a safe place.
2. Turn off all accessories and turn on the hazard warning lights.
   - **No steam or spray present:** Keep the engine running and open the hood.
   - **Steam or spray is present:** Turn off the engine and wait until it subsides. Then open the hood.

---

**WARNING**

Steam and spray from an overheated engine can seriously scald you.

Do not open the hood if steam is coming out.

**NOTICE**

Continuing to drive with the temperature gauge needle at the H mark may damage the engine.
How to Handle Overheating

1. Check that the cooling fan is operating and stop the engine once the temperature gauge needle goes down.
   - If the cooling fan is not operating, immediately stop the engine.
2. Once the engine has cooled down, inspect the coolant level and check the cooling system components for leaks.
   - If the coolant level in the reserve tank is low, add coolant until it reaches the MAX mark.
   - If there is no coolant in the reserve tank, check that the radiator is cool. Cover the radiator cap with a heavy cloth and open the cap. If necessary, add coolant up to the base of the filler neck, and put the cap back on.

WARNING
Removing the radiator cap while the engine is hot can cause the coolant to spray out, seriously scalding you.
Always let the engine and radiator cool down before removing the radiator cap.

If the coolant is leaking, contact a dealer for repairs.
Use water as an emergency/temporary measure only. Have a dealer flush the system with proper antifreeze as soon as possible.

---

Next thing to do

1. Check that the cooling fan is operating and stop the engine once the temperature gauge needle goes down.
   - If the cooling fan is not operating, immediately stop the engine.
2. Once the engine has cooled down, inspect the coolant level and check the cooling system components for leaks.
   - If the coolant level in the reserve tank is low, add coolant until it reaches the MAX mark.
   - If there is no coolant in the reserve tank, check that the radiator is cool. Cover the radiator cap with a heavy cloth and open the cap. If necessary, add coolant up to the base of the filler neck, and put the cap back on.

Last thing to do

Once the engine has cooled sufficiently, restart it and check the temperature gauge. If the temperature needle has gone down, resume driving. If it has not gone down, contact a dealer for repairs.
Indicator, Coming On/Blinking

If the Low Oil Pressure Indicator Comes On

■ Reasons for the indicator to come on
Comes on when the engine oil pressure is low.

■ What to do as soon as the indicator comes on
1. Immediately park the vehicle on level ground in a safe place.
2. If necessary, turn the hazard warning lights on.

■ What to do after parking the vehicle
1. Stop the engine and let it sit for about three minutes.
2. Open the hood and check the oil level.
   Oil Check P. 443
3. Start the engine and check the low oil pressure indicator.
   • The indicator goes off: Start driving again.
   • The indicator does not go off within 10 seconds: Stop the engine and contact a dealer for repairs immediately.

If the Charging System Indicator Comes On

■ Reasons for the indicator to come on
Comes on when the battery is not being charged.

■ What to do when the indicator comes on
Turn off the heating and cooling system/Climate control system*, rear defogger, and other electrical systems, and immediately contact a dealer for repairs.

* Not available on all models

NOTICE
Running the engine with low oil pressure can cause serious mechanical damage almost immediately.

If you need to stop temporarily, do not turn off the engine. Restarting the engine may rapidly discharge the battery.

If the Low Oil Pressure Indicator Comes On

If the Charging System Indicator Comes On
If the Malfunction Indicator Lamp Comes On or Blinks

**Reasons for the indicator lamp to come on or blink**
- Comes on if there is a problem with the engine emissions control system, or the fuel fill cap is missing, or loose.
- Blinks when engine misfiring is detected.

**What to do when the indicator lamp comes on**
Avoid high speeds and immediately get your vehicle inspected at a dealer.

**What to do when the indicator lamp blinks**
Park the vehicle in a safe place with no flammable items and wait at least 10 minutes or more with the engine stopped until it cools.

**Check/Tighten Fuel Cap Message**

**The message appears on when:**
An evaporative system leak is detected. This may be caused by the fuel fill cap being loose or not being installed.

**What to do when the message appears:**
1. Stop the engine.
2. Check if the fuel fill cap is fully installed.
   - If not, loosen the cap, and then retighten it until it clicks at least once.
3. Drive for several days of normal driving.
   - The message should go off.

**When the malfunction indicator lamp comes on**
The malfunction indicator lamp comes on if the system continues to detect a leak of gasoline vapor. If this happens, follow the procedures described earlier to check the fuel fill cap.

**Notice**
If you drive with the malfunction indicator lamp on, the emissions control system and the engine could be damaged.

If the malfunction indicator lamp blinks again when restarting the engine, drive to the nearest dealer at 31 mph (50 km/h) or less. Have your vehicle inspected.
If the Brake System Indicator (Red) Comes On

- **Reasons for the indicator to come on**
  - The brake fluid is low.
  - There is a malfunction in the brake system.
- **What to do when the indicator comes on while driving**
  Press the brake pedal lightly to check pedal pressure.
  - If normal, check the brake fluid level the next time you stop.
  - If abnormal, take immediate action. If necessary, downshift the transmission to slow the vehicle using engine braking.

If the Electric Power Steering (EPS) System Indicator Comes On

- **Reasons for the indicator to come on**
  - Comes on if there is a problem with the EPS system.
  - If you depress the accelerator pedal repeatedly to increase the engine speed while the engine is idling, the indicator comes on, and sometimes the steering wheel becomes harder to operate.
- **What to do when the indicator comes on**
  Stop the vehicle in a safe place and restart the engine.
  If the indicator comes on and stays on, immediately have your vehicle inspected by a dealer.
If the Low Tire Pressure/TPMS Indicator Comes On or Blinks

- **Reasons for the indicator to come on or blink**
  A tire pressure is significantly low, or the TPMS has not been calibrated. If there is a problem with the TPMS or the compact spare tire is installed, the indicator blinks for about one minute, and then stays on.

- **What to do when the indicator comes on**
  Drive carefully and avoid abrupt cornering and hard braking.
  Stop your vehicle in a safe place. Check the tire pressure and adjust the pressure to the specified level. The specified tire pressure is on a label on the driver side doorjamb.
  - Calibrate the TPMS after the tire pressure is adjusted.
    - TPMS Calibration P. 401

- **What to do when the indicator blinks, then remains on**
  Have the tire inspected by a dealer as soon as possible. If the compact spare tire causes the indicator to blink, change the tire to a full-size tire.
  The indicator goes off after driving for a few miles (kilometers).
  - Calibrate the TPMS after a full-size tire is reinstalled.
    - TPMS Calibration P. 401

**NOTICE**
Driving on an extremely underinflated tire can cause it to overheat. An overheated tire can fail. Always inflate your tires to the prescribed level.
Fuses

Fuse Locations
If any electrical devices are not working, turn the ignition switch to LOCK [0] and check to see if any applicable fuse is blown.

Fuse locations are shown on the fuse box cover. Locate the fuse in question by the fuse number and box cover number.

Engine Compartment Fuse Box
Located near the brake fluid reservoir. Push the tabs to open the box.

Inspecting and Changing Fuses

1. Turn the ignition switch to LOCK (O). Turn headlights and all accessories off.
2. Remove the fuse box cover.
3. Check the large fuse in the engine compartment.
   - If the fuse is blown, use a Phillips-head screwdriver to remove the screw and replace it with a new one.
4. Inspect the small fuses in the engine compartment and the vehicle interior.
   - If there is a burned out fuse, remove it with the fuse puller and replace it with a new one.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

**NOTICE**
Replacing a fuse with one that has a higher rating greatly increases the chances of damaging the electrical system.

Replace fuse with a spare fuse of the same specified amperage.

Confirm the specified amperage using the charts on P. 503 to 504.

Use the charts to locate the fuse in question and conform the specific amperage on the fuse label.

Fuse Locations P. 503

There is a fuse puller on the back of the engine compartment fuse box cover.
Emergency Towing

Call a professional towing service if you need to tow your vehicle.

**All models**

- **Flat bed equipment**
  The operator loads your vehicle on the back of a truck. **This is the best way to transport your vehicle.**

**2WD models**

- **Wheel lift equipment**
  The tow truck uses two pivoting arms that go under the front tires and lift them off the ground. The rear tires remain on the ground. **This is an acceptable way to tow your vehicle.**

**NOTICE**

Trying to lift or tow your vehicle by the bumpers will cause serious damage. The bumpers are not designed to support the vehicle's weight.

**NOTICE**

Improper towing such as towing behind a motor vehicle can damage the transmission.

Never tow your vehicle with just a rope or chain. It is very dangerous since ropes or chains may shift from side to side or break.
When You Cannot Open the Tailgate

What to Do When Unable to Open the Tailgate

If you cannot open the tailgate, use the following procedure.

1. Use a flat-tip screwdriver and remove the cover on the inside of the tailgate.
   - Wrap the flat-tip screwdriver with a cloth to prevent scratches.

2. **Models with power tailgate**
   To open the tailgate, push the tailgate while pushing the lever to the right.

2. **Models without power tailgate**
   To open the tailgate, push the tailgate while sliding the lever using a flat-tip screwdriver.

What to do—following up

After taking these steps, contact a dealer to have the vehicle checked.

When you open the tailgate from inside, make sure there is enough space around the tailgate, and it does not hit anyone or any object.
Information

This chapter includes your vehicle's specifications, locations of identification numbers, and other information required by regulation.

Identification Numbers

Vehicle Identification Number (VIN), Engine Number and Transmission Number

Your vehicle has a 17-digit vehicle identification number (VIN) used to register your vehicle for warranty purposes, and for licensing and insuring your vehicle. The locations of your vehicle’s VIN, engine number and transmission number are shown as follows.

The interior vehicle identification number (VIN) is located under the cover.
The following products and systems on your vehicle emit radio waves when in operation.

<table>

Each of the above complies with the appropriate requirements or the required standards of FCC (Federal Communications Commission) and Industry Canada Standard, described below:

As required by the FCC:
This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Industry Canada Standard RSS-Gen/210/310. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

* Not available on all models
Reporting Safety Defects

In the U.S.
If you believe that your vehicle has a defect which could cause a crash or could cause injury or death, you should immediately inform the National Highway Traffic Safety Administration (NHTSA) in addition to notifying American Honda Motor Co., Inc.

If NHTSA receives similar complaints, it may open an investigation, and if it finds that a safety defect exists in a group of vehicles, it may order a recall and remedy campaign. However, NHTSA cannot become involved in individual problems between you, your dealer, or American Honda Motor Co., Inc.

To contact NHTSA, you may call the Vehicle Safety Hotline toll-free at 1-888-327-4236 (TTY: 1-800-424-9153); go to http://www.safercar.gov; or write to: Administrator, NHTSA, 1200 New Jersey Avenue, SE., Washington, DC 20590. You can also obtain other information about motor vehicle safety from http://www.safercar.gov.

In Canada
If you believe that your vehicle has a defect which could cause a crash or could cause injury or death, you should immediately inform Honda Canada Inc. and you may also inform Transport Canada.

If Transport Canada receives similar complaints, it may open an investigation, and if it finds that a safety defect exists in a group of vehicles, it may lead to a recall and remedy campaign. However, Transport Canada cannot become involved in individual problems between you, your dealer, or Honda Canada Inc.

To contact Transport Canada’s Defect Investigations and Recalls Division, you may call 1-800-333-0510. For more information on reporting safety defects or about motor vehicle safety, go to http://www.tc.gc.ca/roadsafety.
Emissions Testing

Testing of ReadinessCodes

Your vehicle has “Readiness Codes,” as part of the onboard self diagnostic system. Some States use these codes as a test to see if your vehicle’s emissions components are working properly. The codes may not be read properly if testing is performed just after the battery has gone dead or been disconnected.

To check if they are set, turn the ignition switch to ON (1), without starting the engine. The malfunction indicator lamp will come on for several seconds. If it then goes off, the readiness codes are set. If it blinks five times, the readiness codes are not set.

If you are required to have your vehicle tested before the readiness codes are ready, prepare the vehicle for retesting by doing the following:

1. Fill the fuel tank to approximately 3/4 full.
2. Park the vehicle and leave the engine off for six hours or more.
3. Make sure the ambient temperature is between 40°F and 95°F (4°C and 35°C).
4. Start the engine without touching the accelerator pedal, and let it idle for 20 seconds.
5. Keep the vehicle in P. Increase the engine speed to 2,000 rpm, and hold it there for about three minutes.
6. Let the engine idle with your foot off the accelerator for 20 seconds.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

Testing of Readiness Codes

The readiness codes are erased when the battery is disconnected, and set again only after several days of driving under a variety of conditions.

If a testing facility determines that the readiness codes are not set, you may be requested to return at a later date to complete the test.

If the testing facility determines the readiness codes are still not set, see a dealer.
7. Select a nearby, lightly traveled major highway where you can maintain a speed of 50 to 60 mph (80 to 97 km/h) for at least 20 minutes. Drive on the highway in D. Do not use cruise control. When traffic allows, drive for 90 seconds without moving the accelerator pedal. (Vehicle speed may vary slightly; this is okay.) If you cannot do this for a continuous 90 seconds because of traffic conditions, drive for at least 30 seconds, then repeat it two more times (for a total of 90 seconds).

8. Drive in city/suburban traffic for at least 10 minutes. When traffic conditions allow, let the vehicle coast for several seconds without using the accelerator pedal or the brake pedal.

9. Park the vehicle and leave the engine off for 30 minutes.
Warranty Coverages

■ U.S. Owners

Your new vehicle is covered by these warranties:

New Vehicle Limited Warranty – covers your new vehicle, except for the emissions control systems and accessories, against defects in materials and workmanship.

Emissions Control Systems Defects Warranty and Emissions Performance Warranty – these two warranties cover your vehicle's emissions control systems. Time, mileage, and coverage are conditional. Please read your warranty booklet for exact information.

Seat Belt Limited Warranty – a seat belt that fails to function properly is covered by a limited warranty. Please read your warranty booklet for details.

Rust Perforation Limited Warranty – all exterior body panels are covered for rust-through from the inside for the specified time period with no mileage limit.

Accessory Limited Warranty – Honda accessories are covered under this warranty. Time and mileage limits depend on the type of accessory and other factors. Please read your warranty booklet for details.

Replacement Parts Limited Warranty – covers all Honda replacement parts against defects in materials and workmanship.
Replacement Battery Limited Warranty – provides prorated coverage for a replacement battery purchased from a dealer.

Replacement Muffler Lifetime Limited Warranty – provides coverage for as long as the purchaser of the muffler owns the vehicle.

Restrictions and exclusions apply to all these warranties. Please read the Honda warranty information booklet that came with your vehicle for precise information on warranty coverages. Your vehicle’s original tires are covered by their manufacturer. Tire warranty information is in a separate booklet.

■ Canadian Owners
Please refer to the warranty manual that came with your vehicle.
Authorized Manuals

■ Service Express
For electronic copies of service publications, you can purchase a subscription to Service Express. Visit www.techinfo.honda.com for pricing and options.

■ For U.S. Owners:
Manuals can be purchased from Helm Incorporated. You can order a manual by phone at 1-800-782-4356 (credit card orders only), or online at www.helminc.com.

■ For Canadian Owners:
Please contact a dealer to order any manuals that you may require.
Customer Service Information

Honda dealership personnel are trained professionals.

They should be able to answer all your questions. If you encounter a problem that your dealership does not solve to your satisfaction, please discuss it with the dealership’s service manager or general manager. If you are dissatisfied with the decision made by the dealership’s management, contact Honda Customer Services.

When you call or write, please give us the following information:
- Vehicle Identification Number (VIN), Engine Number and Transmission Number
- Date of purchase
- Odometer reading of your vehicle
- Your name, address, and telephone number
- A detailed description of the problem
- Name of the dealer who sold the vehicle to you
Requirements to access Pandora®
- Latest version of the Pandora application installed on your mobile device. (Visit the Apple iTunes® store or Google Play Marketplace to download the latest version.)
- Registered Pandora account (you can create a free account at www.pandora.com <http://www.pandora.com/> or on your smartphone)
- Connection to the internet via WiFi or cellular data network.
- Android devices must be connected to the vehicle via Bluetooth®, iPhone® devices may be connected via Bluetooth® or USB.

Limitations
- Access to Pandora requires an active internet connection
- Ability to access Pandora through this system is subject to change without notice
- Certain functionality of Pandora service is not available when accessing the service through this system including, but not limited to, creating new stations, deleting stations, emailing current stations, buying songs, viewing additional text information, logging in to Pandora, and adjusting Cell Network Audio Quality.

Pandora Internet Radio is a music service not affiliated with HONDA. More information is available at http://www.pandora.com <http://www.pandora.com/>. Pandora, the Pandora logo, and the Pandora tradename are trademarks or registered trademarks of Pandora Media, Inc., used with permission.
- Mobile access requires a smartphone with an active data plan. Standard data rates may apply.
- Pandora is only available in the United States.

* Not available on all models
