California Proposition 65 Warning

**WARNING:** This product contains or emits chemicals known to the state of California to cause cancer and birth defects or other reproductive harm.

Event Data Recorders

**This vehicle is equipped with an event data recorder (EDR).**

The main purpose of an EDR is to record, in certain crash or near crash-like situations, such as an air bag deployment or hitting a road obstacle, data that will assist in understanding how a vehicle’s systems performed. The EDR is designed to record data related to vehicle dynamics and safety systems for a short period of time, typically 30 seconds or less. The EDR in this vehicle is designed to record such data as:

- How various systems in your vehicle were operating;
- Whether or not the driver and passenger safety belts were buckled/fastened;
- How far (if at all) the driver was depressing the accelerator and/or brake pedal; and,
- How fast the vehicle was traveling.

These data can help provide a better understanding of the circumstances in which crashes and injuries occur. NOTE: EDR data are recorded by your vehicle only if a non-trivial crash situation occurs; no data are recorded by the EDR under normal driving conditions and no personal data (e.g., name, gender, age, and crash location) are recorded. However, other parties, such as law enforcement, could combine the EDR data with the type of personally identifying data routinely acquired during a crash investigation.

To read data recorded by an EDR, special equipment is required, and access to the vehicle or the EDR is needed. In addition to the vehicle manufacturer, other parties, such as law enforcement, that have the special equipment, can read the information if they have access to the vehicle or the EDR.

The data belongs to the vehicle owner and may not be accessed by anyone else except as legally required or with the permission of the vehicle owner.

Service Diagnostic Recorders

This vehicle is equipped with service-related devices that record information about powertrain performance. The data can be used to verify emissions law requirements and/or help technicians diagnose and solve service problems. It may also be combined with data from other sources for research purposes, but it remains confidential.

California Perchlorate Contamination Prevention Act

The airbags, seat belt tensioners, and CR type batteries in this vehicle may contain perchlorate materials - special handling may apply. See [www.dtsc.ca.gov/hazardouswaste/perchlorate/](http://www.dtsc.ca.gov/hazardouswaste/perchlorate/)

As you read this manual, you will find information that is preceded by a **NOTICE** symbol. This information is intended to help you avoid damage to your vehicle, other property, or the environment.
A Few Words About Safety

Your safety, and the safety of others, is very important. And operating this vehicle safely is an important responsibility.

To help you make informed decisions about safety, we have provided operating procedures and other information on labels and in this manual. This information alerts you to potential hazards that could hurt you or others.

Of course, it is not practical or possible to warn you about all the hazards associated with operating or maintaining your vehicle. You must use your own good judgment.

You will find this important safety information in a variety of forms, including:

- **Safety Labels** - on the vehicle.
- **Safety Messages** - preceded by a safety alert symbol ☢️ and one of three signal words: DANGER, WARNING, or CAUTION. These signal words mean:
  - ☢️ **DANGER** - You WILL be KILLED or SERIOUSLY HURT if you don’t follow instructions.
  - ☢️ **WARNING** - You CAN be KILLED or SERIOUSLY HURT if you don’t follow instructions.
  - ☢️ **CAUTION** - You CAN be HURT if you don’t follow instructions.

- **Safety Headings** - such as Important Safety Precautions.
- **Safety Section** - such as Safe Driving.
- **Instructions** - how to use this vehicle correctly and safely.

This entire book is filled with important safety information - please read it carefully.
This owner’s manual should be considered a permanent part of the vehicle and should remain with the vehicle when it is sold.

This owner’s manual covers all models of your vehicle. You may find descriptions of equipment and features that are not on your particular model.

Images throughout this owner’s manual (including the front cover) represent features and equipment that are available on some, but not all, models. Your particular model may not have some of these features.

This owner’s manual is for vehicles sold in the United States and Canada.

The information and specifications included in this publication were in effect at the time of approval for printing. Honda Motor Co., Ltd. reserves the right, however, to discontinue or change specifications or design at any time without notice and without incurring any obligation.

Eco Assist System

**Ambient Meter**
- Changes color to reflect your driving style.
  - **Green**: Fuel efficient driving
  - **Light green**: Moderate acceleration/deceleration
  - **White**: Aggressive acceleration/deceleration
- The ambient meter color changes in accordance with your brake or accelerator pedal operation.
- You can change color while the vehicle is at a stop in ACCESSORY, LOCK or VEHICLE OFF with the ambient meter on. Press the select/reset knob repeatedly; the color changes from white*1, blue, purple, pink, red, amber to yellow.
  - *1: Default setting

**ECON Mode Indicator***
- [P. 81](#)
  - Comes on when the ECON button is pressed.

**ECON Button***
- [P. 343](#)
  - Helps maximize your fuel economy.

*Not available on all models*
Safe Driving  

Airbags  
- Your vehicle is fitted with airbags to help protect you and your passengers during a moderate-to-severe collision.

Child Safety  
- All children 12 and younger should be seated in the rear seat.
- Smaller children should be properly restrained in a forward-facing child seat.
- Infants must be properly restrained in a rear-facing child seat.

Exhaust Gas Hazard  
- Your vehicle emits dangerous exhaust gases that contain carbon monoxide. Do not run the engine in confined spaces where carbon monoxide gas can accumulate.

Seat Belts  
- Fasten your seat belt and sit upright well back in the seat.
- Check that your passengers are wearing their seat belts correctly.

Before Driving Checklist  
- Before driving, check that the front seats, head restraints, steering wheel, and mirrors have been properly adjusted.

Controls  

Clock  

Models with navigation system
The navigation system receives signals from GPS satellites, updating the clock automatically.

Models without navigation system
The clock in the information display is automatically updated along with the audio system’s clock display.

1. Select the (HOME) icon, then select Settings.
2. Select System, Clock, then Clock Adjustment.
3. Touch the ▲ / ▼ icon to adjust the numbers up or down.
4. Select OK.

Models with display audio system

Models with color audio system

1. Press and hold the MENU/CLOCK button.
2. Rotate to change hour, then press .
3. Rotate to change minute, then press .
4. Select SET, then press .

These indications are used to show how to operate the LIST/SELECT (List/Selector) knob.
• Rotate to select.
• Press to enter.
ENGINE START/STOP
Button* [P.123]
Press the button to change the vehicle’s power mode.

Turn Signals [P.127]
Turn Signal Control Lever
- Right
- Left

Lights [P.127]
Light Control Switches
- High Beam
- Low Beam
- Flashing

Wipers and Washers [P.132]
Wiper/Washer Control Lever
- Adjustment Ring*
  - Lower speed, fewer sweeps
  - Higher speed, more sweeps
- Pull toward you to spray washer fluid.

* Not available on all models
**Steering Wheel [P.137]**

- To adjust, pull the adjustment lever towards you, adjust to the desired position, then lock the lever back in place.

**Unlocking the Front Doors from the Inside [P.106]**

- Pull either front door inner handle to unlock and open it in one motion.

**Tailgate [P.113]**

- With all the doors unlocked, press the tailgate release button and lift open the tailgate.

**Models without smart entry system**

- Unlocking and opening the driver’s door from the inner handle unlocks all the other doors.

**Models with smart entry system**

- Press the tailgate release button to unlock and open the tailgate when you carry the smart entry remote.
Power Door Mirrors

*P.139

- With the ignition switch in ON [II]*1, move the selector switch to L or R.
- Push the appropriate edge of the adjustment switch to adjust the mirror.

Power Windows  P.119

- With the ignition switch in ON [II]*1, open and close the power windows.
- If the power window lock button is in the off position, each passenger’s window can be opened and closed with its own switch.
- If the power window lock button is in the on position (indicator on), each passenger’s window switch is disabled.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Heating and Cooling System* *(P.161)

- Rotate the fan control dial to adjust the fan speed.
- Rotate the mode control dial (↑ / ↓ / ← / → / ⏱) to select the vents air flows from.
- Rotate the temperature control dial to adjust the temperature.
- Rotate the fan control dial to OFF to turn the system off.
- Rotate the mode control dial to to defrost the windshield.

---

**Fan Control Dial**
- Air flows from dashboard vents.

**Temperature Control Dial**
- Air flows from floor and dashboard vents.
- Air flows from floor vents.
- Air flows from floor and windshield defroster vents.
- Air flows from windshield defroster vents.

**Mode Control Dial**
- Fan control dial
- Mode control dial

**A/C (Air Conditioning) Button**

**(Recirculation) Button**
Climate Control System*  ⇨ P. 165

- Select the AUTO icon to activate the climate control system.
- Select the OFF icon to turn the system on or off.
- Select the icon to defrost the windshield.
- The climate control system is voice operable.

* See the Navigation System Manual for complete details.

Driving (P313)

Manual Transmission* (P340)

Continuously Variable Transmission*

(P334, 336)

● Shift to P and depress the brake pedal when starting the engine.

Shifting

[Diagram of manual transmission positions: P, R, N, D, S, L]

- **P** Park
  - Turn off or start the engine.
  - Transmission is locked.

- **R** Reverse
  - Used when reversing.

- **N** Neutral
  - Transmission is not locked.

- **D** Drive
  - Normal driving.
  - On models with paddle shifters, 7-speed mode can be used temporarily.

- **S** Drive (S)
  - 7-speed manual shift mode can be used.

- **L** Low
  - Used to further increase engine braking
  - Used when going up or down hills

7-Speed Manual Shift Mode* (P338)

- Allows you to manually shift the transmission up or down without removing your hands from the steering wheel.

**When the shift lever is in S**

- Pulling a paddle shifter changes the mode from continuously variable transmission to 7-speed manual shift mode.
- The M indicator and the selected speed number are displayed in the shift indicator.

**When the shift lever is in D**

- Pulling a paddle shifter temporarily changes the mode from continuously variable transmission to 7-speed manual shift mode. The selected speed number is displayed in the shift indicator.

- **Shift Lever**
- **Release Button**
- **M Indicator**
- **Shift Down Paddle Shifter**
- **Shift Up Paddle Shifter**

* Not available on all models
VSA® OFF Button  \( \rightarrow \text{P.355} \)
- The vehicle stability assist (VSA®) system helps stabilize the vehicle during cornering, and helps maintain traction while accelerating on loose or slippery road surfaces.
- VSA® comes on automatically every time you start the engine.
- To turn VSA® on or off, press and hold the button until you hear a beep.

Cruise Control  \( \rightarrow \text{P.344} \)
- Cruise control allows you to maintain a set speed without keeping your foot on the accelerator pedal.
- To use cruise control, press the CRUISE button, then press the -/SET button once you have achieved the desired speed (above 25 mph or 40 km/h).

Tire Pressure Monitoring System (TPMS)  \( \rightarrow \text{P.359} \)
- Detects a change in tire conditions and overall dimensions due to decrease in tire pressures.
- TPMS is turned on automatically every time you start the engine.
- A calibration procedure must be performed when certain conditions arise.

Refueling  \( \rightarrow \text{P.374} \)

**Fuel recommendation:** Unleaded gasoline with a pump octane number 87 or higher required

**Fuel tank capacity:** 13.2 US gal (50 L)

1. Pull the fuel fill door release handle.

2. Turn the fuel fill cap slowly to remove the cap.

3. Place the cap in the holder on the fuel fill door.

4. After refueling, screw the cap back on until it clicks at least once.
Maintenance  [P. 379]

Under the Hood  [P. 387]
- Check engine oil, engine coolant, and window washer fluid. Add when necessary.
- Check brake fluid.
- Check the battery condition monthly.

1. Pull the hood release handle under the corner of the dashboard.

2. Locate the hood latch lever, push the lever, and lift up the hood.

3. When finished, close the hood and make sure it is firmly locked in place.

Wiper Blades  [P. 407]
- Replace blades if they leave streaks across the windshield.

Tires  [P. 411]
- Inspect tires and wheels regularly.
- Check tire pressures regularly.
- Install snow tires for winter driving.

Lights  [P. 399]
- Inspect all lights regularly.
Handling the Unexpected  

**Flat Tire**  
- Park in a safe location and replace the flat tire with the compact spare tire in the cargo area.

**Engine Won’t Start**  
- If the battery is dead, jump start using a booster battery.

**Overheating**  
- Park in a safe location. If you do not see steam under the hood, open the hood, and let the engine cool down.

**Indicators Come On**  
- Identify the indicator and consult the owner’s manual.

**Blown Fuse**  
- Check for a blown fuse if an electrical device does not operate.

**Emergency Towing**  
- Call a professional towing service if you need to tow your vehicle.
What to Do If

**Q** U.S. models with manual transmission
The ignition switch does not turn from **0** to **1**.*1* Why?

**A**
- The steering wheel may be locked.
- **Models without smart entry system**
  - Try to turn the steering wheel left and right while turning the ignition key.
- **Models with smart entry system**
  - Move the steering wheel left and right while pressing the ENGINE START/STOP button at the same time.

---

**Q** Canadian models
The ignition switch does not turn from **0** to **1**.*1* Why?

**A**
- The steering wheel may be locked.
- **Models without smart entry system**
  - Try to turn the steering wheel left and right while turning the ignition key.
- **Models with smart entry system**
  - Move the steering wheel left and right while pressing the ENGINE START/STOP button at the same time.

---

**Q** Models without smart entry system
The ignition switch does not turn from **I** to **0** and I cannot remove the key. Why?

**A**
- The shift lever should be moved to **P**.

---

**Q** Models with smart entry system
The power mode does not change from ON to VEHICLE OFF (LOCK). Why?

**A**
- The shift lever should be moved to **P**.

---

**Q** Why does the brake pedal pulsate slightly when applying the brakes?

**A**
This can occur when the ABS activates, and does not indicate a problem. Apply firm, steady pressure on the brake pedal. Never pump the brake pedal.

---

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
**The rear door cannot be opened from inside the vehicle. Why?**

**Check if the childproof lock is in the lock position. If so, open the rear door with the outside door handle. To cancel this function, push the lever to the unlock position.**

---

**Why do the doors lock after I unlocked the doors using a remote transmitter?**

**If you do not open the doors within 30 seconds, the doors are relocked automatically for security.**

---

**Why does the beeper sound when I open the driver's door?**

**The beeper sounds when:**
- The exterior lights are left on.

**Models without smart entry system**
- The key is left in the ignition switch.

**Models with smart entry system**
- The power mode is in ACCESSORY.

---

**Why does the beeper sound when I start driving?**

**The beeper sounds when driver and/or front passenger are not wearing their seat belts.**

---

**Why do I hear a screeching sound when I apply the brake pedal?**

**The brake pads may need to be replaced. Have your vehicle inspected by a dealer.**
Pressing the electric parking brake switch does not release the parking brake. Why?

A Press the electric parking brake switch with the brake pedal depressed.

Depressing the accelerator pedal does not release the parking brake automatically. Why?

A
- Fasten the driver’s seat belt.
- Check if the transmission is in P or N. If so, select any other position.
Safe Driving

You can find many safety recommendations throughout this chapter, and throughout this manual.

For Safe Driving

The following pages explain your vehicle’s safety features and how to use them properly. The safety precautions below are ones that we consider to be among the most important.

**Important Safety Precautions**

■ **Always wear your seat belt**
A seat belt is your best protection in all types of collisions. Airbags are designed to supplement seat belts, not replace them. So even though your vehicle is equipped with airbags, make sure you and your passengers always wear your seat belts, and wear them properly.

■ **Restrain all children**
Children ages 12 and under should ride properly restrained in a back seat, not the front seat. Infants and small children should be restrained in a child seat. Larger children should use a booster seat and a lap/shoulder seat belt until they can use the belt properly without a booster seat.

■ **Be aware of airbag hazards**
While airbags can save lives, they can cause serious or fatal injuries to occupants who sit too close to them, or are not properly restrained. Infants, young children, and short adults are at the greatest risk. Be sure to follow all instructions and warnings in this manual.

■ **Don’t drink and drive**
Alcohol and driving don’t mix. Even one drink can reduce your ability to respond to changing conditions, and your reaction time gets worse with every additional drink. So don’t drink and drive, and don’t let your friends drink and drive, either.
For Safe Driving

Important Safety Precautions

■ Pay appropriate attention to the task of driving safely
Engaging in cell phone conversation or other activities that keep you from paying close attention to the road, other vehicles, and pedestrians could lead to a crash. Remember, situations can change quickly, and only you can decide when it is safe to divert some attention away from driving.

■ Control your speed
Excessive speed is a major factor in crash injuries and deaths. Generally, the higher the speed, the greater the risk, but serious injuries can also occur at lower speeds. Never drive faster than is safe for current conditions, regardless of the maximum speed posted.

■ Keep your vehicle in safe condition
Having a tire blowout or a mechanical failure can be extremely hazardous. To reduce the possibility of such problems, check your tire pressures and condition frequently, and perform all regularly scheduled maintenance.
Important Handling Information

For Safe Driving

Your vehicle has higher ground clearance than a passenger vehicle designed for use only on pavement. Higher ground clearance has many advantages for off-highway driving. It allows you to travel over bumps, obstacles, and rough terrain. It also provides good visibility so you can anticipate problems earlier.

These advantages come at some cost. Because your vehicle is taller and rides higher off the ground, it has a higher center gravity making it more susceptible to tripping or roll over if you make abrupt turns. Utility vehicles have a significantly higher rollover rate than other types of vehicles. In a rollover crash, an unbelted person is significantly more likely to die than a person wearing a seat belt. As a reminder, make sure you and your passengers always wear seat belts.

For information on how to reduce the risk of rollover, read:
- Driving Guidelines for Your Utility Vehicle P. 332
- Off-Highway Driving Guidelines P. 323

Failure to operate your vehicle correctly might result in a crash or a rollover.
Your Vehicle’s Safety Features

Your vehicle is equipped with many features that work together to help protect you and your passengers during a crash.

Some features do not require any action on your part. These include a strong steel framework that forms a safety cage around the passenger compartment, front and rear crush zones, a collapsible steering column, and tensioners that tighten the front seat belts in a sufficient crash.

However, you and your passengers cannot take full advantage of these features unless you remain seated in the correct position and always wear your seat belts. In fact, some safety features can contribute to injuries if they are not used properly.

The following checklist will help you take an active role in protecting yourself and your passengers.

Continued
For Safe Driving

Your Vehicle’s Safety Features

For the safety of you and your passengers, make a habit of checking these items each time before you drive.

- After everyone has entered the vehicle, be sure all doors and the tailgate are closed and locked. Locking the doors and the tailgate helps prevent an occupant from being ejected and an outsider from unexpectedly opening a door or the tailgate.

  Locking/Unlocking the Doors from the Inside P. 105

- Adjust your seat to a position suitable for driving. Be sure the front seats are adjusted as far to the rear as possible while allowing the driver to control the vehicle. Sitting too close to a front airbag can result in serious or fatal injury in a crash.

  Adjusting the Seats P. 140

- Adjust head restraints to the proper position. Head restraints are most effective when the center of the head restraint aligns with the center of your head. Taller persons should adjust their head restraint to the highest position.

  Adjusting the Head Restraints P. 142

- Always wear your seat belt, and make sure you wear it properly. Confirm that any passengers are properly belted as well.

  Fastening a Seat Belt P. 38

- Protect children by using seat belts or child seats according to a child’s age, height and weight.

  Child Safety P. 57

Safety Checklist

If the door and tailgate open indicator is on, a door and/or the tailgate is not completely closed. Close all doors and the tailgate tightly until the indicator goes off.

Door and Tailgate Open Indicator P. 78
Seat Belts

About Your Seat Belts

Seat belts are the single most effective safety device because they keep you connected to the vehicle so that you can take advantage of many built-in safety features. They also help keep you from being thrown against the inside of the vehicle, against other passengers, or out of the vehicle. When worn properly, seat belts also keep your body properly positioned in a crash so that you can take full advantage of the additional protection provided by the airbags.

In addition, seat belts help protect you in almost every type of crash, including:
- frontal impacts
- side impacts
- rear impacts
- rollovers

Lap/shoulder seat belts

All five seating positions are equipped with lap/shoulder seat belts with emergency locking retractors. In normal driving the retractor lets you move freely while keeping some tension on the belt. During a collision or sudden stop the retractor locks to restrain your body. The rear seat belts also have a lockable retractor for use with child seats.

\[ \text{Installing a Child Seat with a Lap/Shoulder Seat Belt P. 64} \]

WARNING

Not wearing a seat belt properly increases the chance of serious injury or death in a crash, even though your vehicle has airbags.

Be sure you and your passengers always wear seat belts and wear them properly.

Seat belts cannot completely protect you in every crash. But in most cases, seat belts can reduce your risk of serious injury.

Most states and all Canadian provinces and territories require you to wear seat belts.

The emergency locking retractor may lock if you lean forward too quickly. Slower movements will allow the belt to extend fully without locking.
Safe Driving

About Your Seat Belts

Proper use of seat belts
Follow these guidelines for proper use:
• All occupants should sit upright, well back in the seat, and remain in that position for the duration of the trip. Slouching and leaning reduce the effectiveness of the belt and can increase the chance of serious injury in a crash.
• Never place the shoulder part of a lap/shoulder seat belt under your arm or behind your back. This could cause very serious injuries in a crash.
• Two people should never use the same seat belt. If they do, they could be very seriously injured in a crash.
• Do not put any accessories on the seat belts. Devices intended to improve comfort or reposition the shoulder part of a seat belt can reduce the protective capability and increase the chance of serious injury in a crash.

Seat Belt Reminder

Your vehicle monitors front seat belt use. If the ignition switch is turned to ON [1] before the driver’s seat belt is fastened, the beeper will sound and the indicator will blink. If the driver does not fasten the belt before the beeper stops, the indicator will remain on.

The beeper will also periodically sound and the indicator will blink while driving until the driver’s and front passenger’s seat belts are fastened.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

About Your Seat Belts
If a rear seat passenger moves around and extends the seat belt, the lockable retractor may activate. If this happens, release the retractor by unfastening the seat belt and allow the belt to retract completely. Then refasten the belt.

Seat Belt Reminder
The indicator will also come on if a front passenger does not fasten their seat belt within six seconds after the ignition switch is turned to ON [1].
When no one is sitting in the front passenger’s seat, the indicator will not come on and the beeper will not sound. The indicator also may not come on and the beeper may not sound when the occupant is not heavy enough to trigger the weight sensor. Such occupants (e.g., infants and smaller children) should be moved to the rear seat as a deploying front airbag likely will injure or kill them.

Protecting Child Passengers P. 57
About Your Seat Belts

The front seats are equipped with automatic seat belt tensioners to enhance safety.

The tensioners automatically tighten the front seat belts during a moderate-to-severe frontal collision, sometimes even if the collision is not severe enough to inflate the front airbags.
Fastening a Seat Belt

After adjusting a front seat to the proper position, and while sitting upright and well back in the seat:

1. Pull the seat belt out slowly.

2. Insert the latch plate into the buckle, then tug on the belt to make sure the buckle is secure.
   - Make sure that the belt is not twisted or caught on anything.

No one should sit in a seat with an inoperative seat belt or one that does not appear to be working correctly. Using a seat belt that is not working properly may not protect the occupant in a crash. Have a dealer check the belt as soon as possible.

Never insert any foreign objects into the buckle or retractor mechanism.
3. Position the lap part of the belt as low as possible across your hips, then pull up on the shoulder part of the belt so the lap part fits snugly. This lets your strong pelvic bones take the force of a crash and reduces the chance of internal injuries.

4. If necessary, pull up on the belt again to remove any slack, then check that the belt rests across the center of your chest and over your shoulder. This spreads the forces of a crash over the strongest bones in your upper body.

**WARNING**

Improperly positioning the seat belts can cause serious injury or death in a crash.

Make sure all seat belts are properly positioned before driving.

To release the belt, push the red PRESS button then guide the belt by hand until it has retracted completely. When exiting the vehicle, be sure the belt is out of the way and will not get caught by closing the door.

Continued
Fastening a Seat Belt

1. Move the anchor up and down while pulling the release outward.
2. Position the anchor so that the belt rests across the center of your chest and over your shoulder.

Adjusting the Shoulder Anchor

The front seats have adjustable shoulder anchors to accommodate taller and shorter occupants.

1. Pull outward

Adjusting the Shoulder Anchor

The shoulder anchor height can be adjusted to four levels. If the belt contacts your neck, lower the height one level at a time.

After an adjustment, make sure that the shoulder anchor position is secure.
Fastening a Seat Belt

1. Pull out the seat belt’s small latch plate and the latch plate from each holding slot in the ceiling.

2. Line up the triangle marks on the small latch plate and anchor buckle. Make sure the seat belt is not twisted. Attach the belt to the anchor buckle.

3. Insert the latch plate into the buckle. Properly fasten the seat belt the same way you fasten the lap/shoulder seat belt.

Seat Belt with Detachable Anchor

Using the seat belt with the detachable anchor unlatched increases the chance of serious injury or death in a crash.

Before using the seat belt, make sure the detachable anchor is correctly latched.

To unlatch the detachable anchor, insert the latch plate into the slot on the side of the anchor buckle.
If you are pregnant, the best way to protect yourself and your unborn child when driving or riding in a vehicle is to always wear a seat belt and keep the lap part of the belt as low as possible across the hips.

Advice for Pregnant Women

Each time you have a checkup, ask your doctor if it is okay for you to drive.

To reduce the risk of injuries to both you and your unborn child that can be caused by an inflating front airbag:
- When driving, sit upright and adjust the seat as far back as possible while allowing full control of the vehicle.
- When sitting in the front passenger’s seat, adjust the seat as far back as possible.
Seat Belt Inspection

Regularly check the condition of your seat belts as follows:

• Pull each belt out fully, and look for frays, cuts, burns, and wear.
• Check that the latches work smoothly and the belts retract easily.
  ► If a belt does not retract easily, cleaning the belt may correct the problem. Only use a mild soap and warm water. Do not use bleach or cleaning solvents. Make sure the belt is completely dry before allowing it to retract.

Any belt that is not in good condition or working properly will not provide proper protection and should be replaced as soon as possible.
A belt that has been worn during a crash may not provide the same level of protection in a subsequent crash. Have your seat belts inspected by a dealer after any collision.

⚠️ WARNING

Not checking or maintaining seat belts can result in serious injury or death if the seat belts do not work properly when needed.
Check your seat belts regularly and have any problem corrected as soon as possible.
Airbags

Airbag System Components
The front, front side, and side curtain airbags are deployed according to the direction and severity of impact. Both side curtain airbags are deployed in a rollover.

The airbag system includes:

1. Two SRS (Supplemental Restraint System) front airbags. The driver’s airbag is stored in the center of the steering wheel; the front passenger’s airbag is stored in the dashboard. Both are marked SRS AIRBAG.

2. Two side airbags, one for the driver and one for a front passenger. The airbags are stored in the outer edges of the seatbacks. Both are marked SIDE AIRBAG.

3. Two side curtain airbags, one for each side of the vehicle. The airbags are stored in the ceiling, above the side windows. The front and rear pillars are marked SIDE CURTAIN AIRBAG.

4. An electronic control unit that continually monitors and can record information about the sensors, the airbag activators, the seat belt tensioners, and driver and front passenger seat belt use when the ignition switch is in ON **1**.

5. Automatic front seat belt tensioners. The driver’s and front passenger’s seat belts incorporate sensors that detect whether or not they are fastened.

6. A driver’s seat position sensor. If the seat is too far forward, the airbag will inflate with less force.

7. Weight sensors in the front passenger’s seat. The front passenger’s airbag will be turned off if the weight on the seat is 65 lbs (29 kg) or less (the weight of an infant or small child).

8. Impact sensors that can detect a moderate-to-severe front or side impact.

9. An indicator near the shift lever that alerts you that the front passenger’s front airbag has been turned off.

10. An indicator on the instrument panel that alerts you to a possible problem with your airbag system or seat belt tensioners.

11. Safing Sensor

12. A rollover sensor that detects whether the vehicle is about to roll over.

---

**1**: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Airbags can pose serious hazards. To do their job, airbags must inflate with tremendous force. So, while airbags help save lives, they can cause burns, bruises, and other minor injuries, sometimes even fatal ones if occupants are not wearing their seat belts properly and sitting correctly.

**What you should do:** Always wear your seat belt properly, and sit upright and as far back from the steering wheel as possible while allowing full control of the vehicle. A front passenger should move their seat as far back from the dashboard as possible.

Remember, however, that no safety system can prevent all injuries or deaths that can occur in a severe crash, even when seat belts are properly worn and the airbags deploy.

**Do not place hard or sharp objects between yourself and a front airbag.** Carrying hard or sharp objects on your lap, or driving with a pipe or other sharp object in your mouth, can result in injuries if your front airbag inflates.

**Do not attach or place objects on the front airbag covers.** Objects on the covers marked SRS AIRBAG could interfere with the proper operation of the airbags or be propelled inside the vehicle and hurt someone if the airbags inflate.
Types of Airbags

Your vehicle is equipped with three types of airbags:

- **Front airbags**: Airbags in front of the driver’s and front passenger’s seats.
- **Side airbags**: Airbags in the driver’s and front passenger’s seat-backs.
- **Side curtain airbags**: Airbags above the side windows.

Each is discussed in the following pages.

Front Airbags (SRS)

The front SRS airbags inflate in a moderate-to-severe frontal collision to help protect the head and chest of the driver and/or front passenger.

SRS (Supplemental Restraint System) indicates that the airbags are designed to supplement seat belts, not replace them. Seat belts are the occupant’s primary restraint system.

### Housing Locations

The front airbags are housed in the center of the steering wheel for the driver, and in the dashboard for the front passenger. Both airbags are marked **SRS AIRBAG**.

*1: Models with the smart entry system have an **ENGINE START/STOP** button instead of an ignition switch.
Airbags

Front Airbags (SRS)

Operation

Front airbags are designed to inflate during moderate-to-severe frontal collisions. When the vehicle decelerates suddenly, the sensors send information to the control unit which signals one or both front airbags to inflate.

A frontal collision can be either head-on or angled between two vehicles, or when a vehicle crashes into a stationary object, such as a concrete wall.

How the Front Airbags Work

While your seat belt restrains your torso, the front airbag provides supplemental protection for your head and chest.

The front airbags deflate immediately so that they won’t interfere with the driver’s visibility or the ability to steer or operate other controls.

The total time for inflation and deflation is so fast that most occupants are not aware that the airbags deployed until they see them lying in front of them.
When front airbags should not deploy

Minor frontal crashes: Front airbags were designed to supplement seat belts and help save lives, not to prevent minor scrapes, or even broken bones that might occur during a less than moderate-to-severe frontal crash.

Side impacts: Front airbags can provide protection when a sudden deceleration causes a driver or front passenger to move towards the front of the vehicle. Side airbags and side curtain airbags have been specifically designed to help reduce the severity of injuries that can occur during a moderate-to-severe side impact which can cause the driver or passenger to move towards the side of the vehicle.

Rear impacts: Head restraints and seat belts are your best protection during a rear impact. Front airbags cannot provide any significant protection and are not designed to deploy in such collisions.

Rollovers: Seat belts and, in vehicles equipped with a rollover sensor, side airbags and side curtain airbags offer the best protection in a rollover. Because front airbags could provide little if any protection, they are not designed to deploy during a rollover.

When front airbags deploy with little or no visible damage

Because the airbag system senses sudden deceleration, a strong impact to the vehicle framework or suspension might cause one or more of the airbags to deploy. Examples include running into a curb, the edge of a hole, or other low fixed object that causes a sudden deceleration in the vehicle chassis. Since the impact is underneath the vehicle, damage may not be readily apparent.

When front airbags may not deploy, even though exterior damage appears severe

Since crushable body parts absorb crash energy during an impact, the amount of visible damage does not always indicate proper airbag operation. In fact, some collisions can result in severe damage but no airbag deployment because the airbags would not have been needed or would not have provided protection even if they had deployed.
Advanced Airbags

Your front airbags have advanced features to help reduce the likelihood of airbag related injuries to smaller occupants.

The driver’s advanced front airbag system includes a seat position sensor.

If the seat is too far forward, the airbag inflates with less force, regardless of the severity of the impact.

The passenger’s advanced front airbag system has weight sensors.

Although we recommend against carrying an infant or small child in front, if the sensors detect the weight of a child (up to about 65 lbs or 29 kg), the system will automatically turn off the passenger’s front airbag.

Advanced Airbags

If there is a problem with the driver’s seat position sensor, the SRS indicator will come on and the airbag will inflate with full (normal) force, regardless of the driver’s seating position.

For both advanced front airbags to work properly:

- Do not spill any liquid on or under the seats.
- Do not put any object under the passenger’s seat.
- Make sure any objects are positioned properly on the floor. Improperly positioned objects can interfere with the advanced airbag sensors.
- All occupants should sit upright and wear their seat belts properly.
- Do not place any cover over the passenger side dashboard.
Side Airbags
The side airbags help protect the torso and pelvis of the driver or a front passenger during a moderate-to-severe side impact.

### Housing Locations
The side airbags are housed in the outside edge of the driver’s and passenger’s seatbacks.

Both are marked **SIDE AIRBAG**.

### Operation
When the sensors detect a moderate-to-severe side impact, the control unit signals the side airbag on the impact side to immediately inflate.

Make sure you and your front seat passenger always sit upright. Leaning into the path of a side airbag can prevent the airbag from deploying properly and increases your risk of serious injury.

Do not attach accessories on or near the side airbags. They can interfere with the proper operation of the airbags, or hurt someone if an airbag inflates.

If the impact is on the passenger side, the airbag deploys even if there is no passenger in the passenger seat.

Do not cover or replace the front seat-back covers without consulting a dealer. Improperly replacing or covering front seat-back covers can prevent your side airbags from properly deploying during a side impact.
■ When a side airbag deploys with little or no visible damage
Because the airbag system senses sudden acceleration, a strong impact to the side of the vehicle’s framework can cause a side airbag to deploy. In such cases, there may be little or no damage, but the side impact sensors detected a severe enough impact to deploy the airbag.

■ When a side airbag may not deploy, even though visible damage appears severe
It is possible for a side airbag to not deploy during an impact that results in apparently severe damage. This can occur when the point of impact was towards the far front or rear of the vehicle, or when the vehicle’s crushable body parts absorbed most of the crash energy. In either case, the side airbag would not have been needed nor provided protection even if it had deployed.
Side Curtain Airbags

The side curtain airbags help protect the heads of the driver and passengers in outer seating positions during a moderate-to-severe side impact. The side curtain airbags equipped in this vehicle are also designed to help reduce the likelihood of partial and complete ejection of vehicle occupants through side windows in crashes, particularly rollover crashes.

Housing Locations

The side curtain airbags are located in the ceiling above the side windows on both sides of the vehicle.

Operation

The side curtain airbag is designed to deploy in a rollover or a moderate-to-severe side impact.
Airbag System Indicators

If a problem occurs in the airbag system, the SRS indicator will come on.

Supplemental Restraint System (SRS) Indicator

When the ignition switch is turned to ON *

1

The indicator comes on for a few seconds, then goes off. This tells you the system is working properly.

If the indicator comes on at any other time, or does not come on at all, have the system checked by a dealer as soon as possible. If you don’t, your airbags and seat belt tensioners may not work properly when they are needed.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Airbag System Indicators

When the passenger airbag off indicator comes on
The indicator comes on to alert you that the passenger’s front airbag has been turned off. This occurs when the front passenger’s weight sensors detect 65 lbs (29 kg) or less, the weight of an infant or small child, on the seat.

Passenger Airbag Off Indicator

Infants and small children should always ride properly restrained in a back seat. 📚 Child Safety P. 57

Objects placed on the seat can also cause the indicator to come on.

If the front passenger seat is empty, the passenger’s front airbag will not deploy and the indicator will not come on.

If the indicator comes on with no front passenger and no objects on the passenger’s seat, or with an adult riding there, something may be interfering with the weight sensors, such as:

- An object hanging on the seat or in the seat-back pocket.
- A child seat or other object pressing against the rear of the seat-back.
- A rear passenger pushing or pulling on the back of the front passenger’s seat.
- The front seat or seat-back is forced back against an object on the seat or floor behind it.
- An object placed under the front passenger’s seat.

If none of these conditions exist, have your vehicle checked by a dealer as soon as possible.

The passenger airbag off indicator may come on and goes off repeatedly if the total weight on the seat is near the airbag cutoff threshold.
Airbag Care

You do not need to, and should not, perform any maintenance on or replace any airbag system components yourself. However, you should have your vehicle inspected by a dealer in the following situations:

■ When the airbags have deployed
If an airbag has inflated, the control unit and other related parts must be replaced. Similarly, once an automatic seat belt tensioner has been activated, it must be replaced.

■ When the vehicle has been in a moderate-to-severe collision
Even if the airbags did not inflate, have your dealer inspect the following: the driver’s seat position sensor, weight sensors in the passenger’s seat, front seat belt tensioners, and each seat belt that was worn during the crash.

■ Do not remove or modify a front seat without consulting a dealer
This would likely disable the driver’s seat position sensor or the weight sensors in the passenger’s seat. If it is necessary to remove or modify a front seat to accommodate a person with disabilities, contact a Honda dealer, or for U.S. vehicles, American Honda Automobile Customer Service at 800-999-1009 and for Canadian vehicles, Honda Canada Customer Relations at 888-9-HONDA-9.

Airbag Care

We recommend against the use of salvaged airbag system components, including the airbag, tensioners, sensors, and control unit.
Protecting Child Passengers

Each year, many children are injured or killed in vehicle crashes because they are either unrestrained or not properly restrained. In fact, vehicle accidents are the number one cause of death of children ages 12 and under.

To reduce the number of child deaths and injuries, every state, Canadian province and territory requires that infants and children be properly restrained when they ride in a vehicle.

Children should sit properly restrained in a rear seat. This is because:

- An inflating front or side airbag can injure or kill a child sitting in the front seat.
- A child in the front seat is more likely to interfere with the driver’s ability to safely control the vehicle.
- Statistics show that children of all sizes and ages are safer when they are properly restrained in a rear seat.

WARNING

Children who are unrestrained or improperly restrained can be seriously injured or killed in a crash.

Any child too small for a seat belt should be properly restrained in a child seat. A larger child should be properly restrained with a seat belt, using a booster seat if necessary.

The National Highway Traffic Safety Administration and Transport Canada recommend that all children ages 12 and under be properly restrained in a rear seat. Some states or provinces/territories have laws restricting where children may ride.

Continued
• Any child who is too small to wear a seat belt correctly must be restrained in an approved child seat that is properly secured to the vehicle using either the lap belt portion of the lap/shoulder belt or the lower anchors of the LATCH system.

• Never hold a child on your lap because it is impossible to protect them in the event of a collision.

• Never put a seat belt over yourself and a child. During a crash, the belt would likely press deep into the child and cause serious or fatal injuries.

• Never let two children use the same seat belt. Both children could be very seriously injured in a crash.

• Do not allow children to operate the doors, windows or seat adjustments.

• Do not leave children in the vehicle unattended, especially in hot weather when the inside of the vehicle can get hot enough to kill them. They could also activate vehicle controls causing it to move unexpectedly.

<table>
<thead>
<tr>
<th>Warning</th>
</tr>
</thead>
</table>

Allowing a child to play with a seat belt or wrap one around their neck can result in serious injury or death.

Instruct children not to play with any seat belt and make sure any unused seat belt a child can reach is buckled, fully retracted, and locked.

To deactivate a lockable retractor, release the buckle and allow the seat belt to wind up all the way.

To remind you of the passenger’s front airbag hazards and child safety, your vehicle has warning labels on the dashboard (U.S. models) and on the front visors. Please read and follow the instructions on these labels.

| Safety Labels | P. 70 |
Safety of Infants and Small Children

Protecting Infants

An infant must be properly restrained in a rear-facing, reclining child seat until the infant reaches the seat maker’s weight or height limit for the seat, and the infant is at least one year old.

Positioning a rear-facing child seat
Child seats must be placed and secured in a rear seating position.

When properly installed, a rear-facing child seat may prevent the driver or a front passenger from moving their seat all the way back, or from locking their seat-back in the desired position.

It can also interfere with proper operation of the passenger’s advanced front airbag system.

WARNING

Placing a rear-facing child seat in the front seat can result in serious injury or death during a crash.

Always place a rear-facing child seat in the rear seat, not the front.

Rear-facing child seats should never be installed in a forward facing position.

Always refer to the child seat manufacturer’s instructions before installation.

Continued
### Protecting Smaller Children

If a child is at least one year old and within the weight range indicated by the child seat manufacturer, the child should be properly restrained in a firmly secured forward-facing child seat.

#### Forward-facing child seat placement

We strongly recommend placing a forward-facing child seat in a rear seating position. Placing a forward-facing child seat in the front seat can be hazardous, even with advanced front airbags that automatically turn the passenger’s front airbag off. A rear seat is the safest place for a child.

---

### WARNING

Placing a forward-facing child seat in the front seat can result in serious injury or death if the front airbag inflates.

If you must place a forward-facing child seat in front, move the vehicle seat as far back as possible, and properly restrain the child.

Educate yourself about the laws and regulations regarding child seat use where you are driving, and follow the child seat manufacturer’s instructions.

Many experts recommend use of a rear-facing seat for a child up to two years old if the child’s height and weight are appropriate for a rear-facing seat.
Selecting a Child Seat

Most child seats are LATCH-compatible (Lower Anchors and Tethers for CHildren). Some have a rigid-type connector, while others have a flexible-type connector. Both are equally easy to use. Some existing and previously owned child seats can only be installed using the seat belt. Whichever type you choose, follow the child seat manufacturer’s use and care instructions as well as the instructions in this manual. Proper installation is key to maximizing your child’s safety.

In seating positions and vehicles not equipped with LATCH, a LATCH compatible child seat can be installed using the seat belt and a top tether for added security. This is because all child seats are required to be designed so that they can be secured with a lap belt or the lap part of a lap/shoulder belt. In addition, the child seat manufacturer may advise that a seat belt be used to attach a LATCH-compatible seat once a child reaches a specified weight. Please read the child seat owner’s manual for proper installation instructions.

Important consideration when selecting a child seat

Make sure the child seat meets the following three requirements:
• The child seat is the correct type and size for the child.
• The child seat is the correct type for the seating position.
• The child seat is compliant with Federal Motor Vehicle Safety Standard 213 or Canadian Motor Vehicle Safety Standard 213.

Installation of a LATCH-compatible child seat is simple.

LATCH-compatible child seats have been developed to simplify the installation process and reduce the likelihood of injuries caused by incorrect installation.
Safe Driving

Child Safety

Safety of Infants and Small Children

Installing a LATCH-Compatible Child Seat

A LATCH-compatible child seat can be installed in either of the two outer rear seats. A child seat is attached to the lower anchors with either the rigid or flexible type of connectors.

1. Locate the lower anchors under the marks.
2. Raise the head restraint to its highest position.

3. Place the child seat on the vehicle seat then attach the child seat to the lower anchors according to the instructions that came with the child seat.

When installing the child seat, make sure that the lower anchors are not obstructed by the seat belt or any other object.
4. Remove the tonneau cover*.

5. Route the tether strap between the head restraint legs, and secure the tether strap hook onto the anchor. Make sure the strap is not twisted.

6. Tighten the tether strap as instructed by the child seat manufacturer.

7. Make sure the child seat is firmly secured by rocking it forward and back and side to side; little movement should be felt.

8. Make sure any unused seat belt that a child can reach is buckled, the lockable retractor is activated, and the belt is fully retracted and locked.

9. Reinstall the tonneau cover*.

* Not available on all models

Installing a LATCH-Compatible Child Seat

For your child’s safety, when using a child seat installed using the LATCH system, make sure that the seat is properly secured to the vehicle. A child seat that is not properly secured will not adequately protect a child in a crash and may cause injury to the child or other vehicle occupants.
Child Safety

Safety of Infants and Small Children

Installing a Child Seat with a Lap/Shoulder Seat Belt

1. Raise the head restraint to its highest position.
2. Place the child seat on the vehicle seat.
3. Route the seat belt through the child seat according to the seat maker’s instructions, and insert the latch plate into the buckle.
   ▶ Insert the latch plate fully until it clicks.
4. Slowly pull the shoulder part of the belt all the way out until it stops. This activates the lockable retractor.
5. Let the seat belt completely wind up into the retractor, then try to pull it out to make sure the retractor is locked.
   ▶ If you are able to pull the shoulder belt out, the lockable retractor is not activated. Pull the seat belt all the way out, and repeat steps 4 – 5.
6. Grab the shoulder part of the seat belt near the buckle, and pull up to remove any slack from the lap part of the belt.
   ▶ When doing this, place your weight on the child seat and push it into the vehicle seat.

A child seat that is not properly secured will not adequately protect a child in a crash and may cause injury to the child or other vehicle occupants.
7. Make sure the child seat is firmly secured by rocking it forward and back and side to side; little movement should be felt.

8. Make sure any unused seat belt that a child can reach is buckled, the lockable retractor is activated, and the belt is fully retracted and locked.

### Adding Security with a Tether

Two tether anchorage points are provided behind the rear outer seating positions and one in the ceiling for the rear center. A child seat that is installed with a seat belt and comes with a tether can use the tether for additional security.

![Tether Anchorage Points]

![Tether Anchorage Point]

---

**Installing a Child Seat with a Lap/Shoulder Seat Belt**

To deactivate a lockable retractor, release the buckle and allow the seat belt to wind up all the way.

**Adding Security with a Tether**

Since a tether can provide additional security to the lap/shoulder seat belt installation, we recommend using a tether whenever one is available.

*Continued*
Child Safety » Safety of Infants and Small Children

- Using an outer anchor
  1. Remove the tonneau cover*.
  2. Put the outer head restraint to its upper most position, then route the tether strap between the head restraint legs, and secure the tether strap hook onto the anchor. Make sure the strap is not twisted.
  3. Tighten the tether strap as instructed by the child seat manufacturer.
  4. Reinstall the tonneau cover*.

- Using the center anchor
  1. Lower the head restraint to its lowest position.
  2. Open the anchor cover.
  3. Route the tether strap over the head restraint. Make sure the strap is not twisted.
  4. Secure the tether strap hook onto the anchor.
  5. Tighten the tether strap as instructed by the child seat manufacturer.

* Not available on all models
Safety of Larger Children

Protecting Larger Children

The following pages give instructions on how to check proper seat belt fit, what kind of booster seat to use if one is needed, and important precautions for a child who must sit in front.

Checking Seat Belt Fit

When a child is too big for a child seat, secure the child in a rear seat using the lap/shoulder seat belt. Have the child sit upright and all the way back, then answer the following questions.

Checklist

- Do the child’s knees bend comfortably over the edge of the seat?
- Does the shoulder belt cross between the child’s neck and arm?
- Is the lap part of the seat belt as low as possible, touching the child’s thighs?
- Will the child be able to stay seated like this for the whole trip?

If you answer yes to all these questions, the child is ready to wear the lap/shoulder seat belt correctly. If you answer no to any question, the child needs to ride on a booster seat until the seat belt fits properly without a booster seat.
Safe Driving

If a lap/shoulder seat belt cannot be used properly, position the child in a booster seat in a rear seating position. For the child’s safety, check that the child meets the booster seat manufacturer’s recommendations.

Protecting Larger Children-Final Checks

Your vehicle has a rear seat where children can be properly restrained. If you ever have to carry a group of children, and a child must ride in front:

- Make sure you read and fully understand the instructions and safety information in this manual.
- Move the front passenger seat as far back as possible.
- Have the child sit upright and well back in the seat.
- Check that the seat belt is properly positioned so that the child is secure in the seat.

Monitoring child passengers

We strongly recommend that you keep an eye on child passengers. Even older, more mature children sometimes need to be reminded to fasten their seat belts and sit up properly.

Booster Seats

When installing a booster seat, make sure to read the instructions that came with it, and install the seat accordingly. There are high- and low-type booster seats. Choose a booster seat that allows the child to wear the seat belt correctly.

Some U.S. states and Canadian provinces and territories require children to use a booster seat until they reach a given age or weight (e.g. 6 years or 60 lbs). Be sure to check current laws in the state or province, or territory where you intend to drive.
Exhaust Gas Hazard

Carbon Monoxide Gas

The engine exhaust from this vehicle contains carbon monoxide, a colorless, odorless, and highly toxic gas. As long as you properly maintain your vehicle, carbon monoxide gas will not get into the interior.

■ Have the exhaust system inspected for leaks whenever
  • The exhaust system is making an unusual noise.
  • The exhaust system may have been damaged.
  • The vehicle is raised for an oil change.

When you operate a vehicle with the tailgate open, airflow can pull exhaust gas into the interior and create a hazardous condition. If you must drive with the tailgate open, open all the windows and set the heating and cooling system/*climate control system* as shown below.

1. Select the fresh air mode.
2. Select the AUTO mode.
3. Set the fan speed to high.
4. Set the temperature control to a comfortable setting.

Adjust the heating and cooling system/*climate control system* in the same manner if you sit in your parked vehicle with the engine running.

* Not available on all models

WARNING

Carbon monoxide gas is toxic. Breathing it can cause unconsciousness and even kill you.

Avoid any enclosed areas or activities that expose you to carbon monoxide.

An enclosed area such as a garage can quickly fill up with carbon monoxide gas. Do not run the engine with the garage door closed. Even when the garage door is open, drive out of the garage immediately after starting the engine.
Safety Labels

Label Locations

These labels are in the locations shown. They warn you of potential hazards that can cause serious injury or death. Read these labels carefully.

If a label comes off or becomes hard to read (except for the U.S. dashboard label which may be removed by the owner), contact a dealer for a replacement.
Instrument Panel

This chapter describes the buttons, indicators, and gauges that are used while driving.

Gauges and Displays

Gauges

Gauges include the speedometer, tachometer and related indicators. They are displayed when the ignition switch is in ON [II]*1.

- **Speedometer**
  Displays your driving speed in mph and km/h.

- **Tachometer**
  Shows the number of engine revolutions per minute.

---

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Information Display

The information display shows the fuel gauge, odometer, trip meter, engine oil life and maintenance service item codes, and other gauges.

Switching the Display

Press the (select/reset) knob to change the display.
Gauges and Displays

Information Display

- **Instant Fuel Economy**
  Shows the instant fuel economy as a bar graph in mpg (U.S.) or l/100 km (Canada).

- **Odometer**
  Shows the total number of miles (U.S.) or kilometers (Canada) that your vehicle has accumulated.

- **Trip Meter**
  Shows the total number of miles (U.S.) or kilometers (Canada) driven since the last reset. TRIP A and B can be used to measure two separate trips.

- **Resetting a trip meter**
  To reset a trip meter, display it, then press and hold the knob. The trip meter is reset to 0.0.

- **Range**
  Shows the estimated distance you can travel on the remaining fuel. This distance is estimated from the fuel economy of your previous trips.

- **Average Fuel Economy**
  Shows the estimated average fuel economy of each trip meter in mpg (U.S.) or l/100 km (Canada). The display is updated at set intervals. When a trip meter is reset, the average fuel economy is also reset.
### Gauges and Displays

#### Information Display

**Outside Temperature**

Shows the outside temperature in Fahrenheit (U.S.) or Celsius (Canada).

**Adjusting the outside temperature indicator**

Adjust the temperature reading up to ± 5°F or ± 3°C if the temperature reading seems incorrect.

1. Turn the ignition switch to ON *(1)*.
2. Press and hold the \( \text{Select/Reset} \) knob for 10 seconds or more while the outside temperature is shown on the information display.
   - The information display goes into temperature adjustment mode. The display starts showing from -5°F to +5°F (U.S.) or -3°C to +3°C (Canada).
3. Release the \( \text{Select/Reset} \) knob when the right adjustment amount is shown.
   - The adjustment is complete.

**Engine Oil Life and Maintenance Items**

Shows the remaining oil life and Maintenance Minder™.

**Maintenance Minder™** P. 383

**Fuel Gauge**

Displays the amount of fuel left in the fuel tank.

---

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
The center ring illumination can be changed to a color of your choice. With the ignition switch in the ACCESSORY \( \text{O} \) or LOCK \( \text{L} \)^*1 position and with the meter ring illuminated, press the select/reset knob. Each time the knob is pressed, the colors change in the following order:

White \( \rightarrow \) Blue \( \rightarrow \) Purple \( \rightarrow \) Pink \( \rightarrow \) Red \( \rightarrow \) Amber \( \rightarrow \) Yellow

---

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Controls

This chapter explains how to operate the various controls necessary for driving.
Clock

Adjusting the Clock

Models without navigation system

You can adjust the time in the clock display with the ignition switch is in ON 1.

Adjusting the Time

Models with navigation system

The clock in the information display is automatically adjusted along with the audio system’s clock display.

Models without navigation system

You can customize the clock display to show the 12 hour clock or 24 hour clock.

Display audio system

You can turn the clock display on and off.

1. Select the HOME icon, then select Settings.
2. Select System, Clock, then Clock Adjustment.
3. Adjust the hours and minutes by selecting ▲▼.
4. Select OK to set the time.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
Clock

Adjusting the Clock

Controls

■ Color audio system*

1. Press and hold the MENU/CLOCK button.  
   ➤ Adjust Clock is selected.
2. Rotate  to change hour, then press .
3. Rotate  to change minute, then press .
4. To enter the selection, rotate  and select Set, then press .

*Not available on all models

---

* Color audio system*

These indications are used to show how to operate the LIST/SELECT (List/Selector) knob.
Rotate  to select.
Press  to enter.

You can also select Adjust Clock by pressing the MENU/CLOCK button.
Rotate  to select Adjust Clock, then press .
Locking and Unlocking the Doors

Key Types and Functions

This vehicle comes with the following keys:

- **Keys**
  - **Models with smart entry system**
    - Use the smart entry remote to start and stop the engine, and to lock and unlock all the doors and tailgate. You can also use the smart entry system to lock and unlock the doors and tailgate.
  - **Models without smart entry system**
    - Use the key to start and stop the engine, and to lock and unlock all the doors and tailgate. You can also use the remote transmitter to lock and unlock the doors and tailgate.

---

**Key Types and Functions**

All the keys have an immobilizer system. The immobilizer system helps to protect against vehicle theft.

- **Immobilizer System** P. 116

The keys contain precision electronics. Adhere to the following advice to prevent damage to the electronics:

- Do not leave the keys in direct sunlight, or in locations with high temperature or high humidity.
- Do not drop the keys or set heavy objects on them.
- Keep the keys away from liquids.
- Do not take the keys apart except for replacing the battery.

If the circuits in the keys are damaged, the engine may not start, and the remote transmitter/smart entry system* may not work.

If the keys do not work properly, have them inspected by a dealer.

---

* Not available on all models
Locking and Unlocking the Doors

Key Types and Functions

■ Smart entry remote*

The built-in key can be used to lock/unlock the doors when the smart entry remote battery becomes weak and the power door lock/unlock operation is disabled.

To remove the built-in key, pull it out while sliding the release knob. To reinstall the built-in key, push the built-in key into the smart entry remote until it clicks.

■ Key Number Tag

Contains a number that you will need if you purchase a replacement key.

* Not available on all models
Locking and Unlocking the Doors

Low Smart Entry Remote Signal Strength*

The vehicle transmits radio waves to locate the smart entry remote when locking/unlocking the doors and tailgate, or to start the engine.

In the following cases, locking/unlocking the doors and tailgate, or starting the engine may be inhibited or operation may be unstable:

- Strong radio waves are being transmitted by nearby equipment.
- You are carrying the smart entry remote together with telecommunications equipment, laptop computers, cell phones, or wireless devices.
- A metallic object is touching or covering the smart entry remote.

Communication between the smart entry remote and the vehicle consumes the smart entry remote’s battery.
Battery life is about two years, but this varies depending on regularity of use.
The battery is consumed whenever the smart entry remote is receiving strong radio waves. Avoid placing it near electrical appliances such as televisions and personal computers.

* Not available on all models
Locking/Unlocking the Doors from the Outside

■ Using the Remote Transmitter

Locking the doors
Press the lock button.

Once:
▶ Some exterior lights flash, all the doors and tailgate lock, and the security system sets.

Twice (within five seconds after the first push):
▶ A beeper sounds and verifies the security system is set.

Using the Remote Transmitter

If you do not open a door within 30 seconds of unlocking the vehicle with the remote transmitter, the doors will automatically relock.

If the interior light switch is in the door activated position, the interior lights come on when you press the unlock button.

No doors opened: The lights fade out after 30 seconds.

Doors relocked with the remote transmitter: The lights go off immediately.

The remote transmitter uses low-power signals, so the operating range may vary depending on the surroundings.

The remote transmitter will not lock the vehicle when a door is open.

Models without smart entry system
The remote transmitter will not work when the key is in the ignition switch.

Models with smart entry system
You can lock or unlock doors using the remote transmitter or smart entry system only when the power mode is in VEHICLE OFF.
Unlocking the doors
Press the unlock button.

Once:
- Some exterior lights flash twice, and the driver’s door unlocks.

Twice:
- The remaining doors and the tailgate unlock.

Using the Remote Transmitter
If the distance at which the remote transmitter works varies, the battery is probably low. Replace the button battery as soon as possible.
If the LED does not come on when you press a button, the battery is dead.

Replacing the Button Battery P. 422
When you carry the smart entry remote, you can lock/unlock the doors and the tailgate. You can lock/unlock the doors and the tailgate within a radius of about 32 inches (80 cm) of the outside door handle. You can open the tailgate within about 32 inches (80 cm) radius from the tailgate release button.

**Locking the doors and tailgate**
Press the door lock button on the front door or the tailgate.
- Some exterior lights flash; the beeper sounds; all the doors and tailgate lock; and the security system sets.

---

*Not available on all models*
Locking and Unlocking the Doors

Locking/Unlocking the Doors from the Outside

Unlocking the doors and tailgate
Grab the driver’s door handle:
► The driver’s door unlocks.
► Some exterior lights flash twice and the beeper sounds twice.
Grab the front passenger’s door handle:
► All the doors and the tailgate unlock.
► Some exterior lights flash twice and the beeper sounds twice.
Press the tailgate release button:
► The tailgate unlocks.
► Some exterior lights flash twice and the beeper sounds twice.

Using the Tailgate Release Button
P. 114

* Not available on all models

Using the Smart Entry with Push Button Start System*
If you do not open a door or the tailgate within 30 seconds of unlocking the vehicle, the doors will automatically relock.
**Locking/Unlocking the Doors Using a Key**

Fully insert the key and turn it.

When you lock the driver’s door with a key, all the other doors and tailgate lock at the same time. When unlocking, the driver’s door unlocks first. Turn the key a second time within a few seconds to unlock the remaining doors and the tailgate.

If you unlock the doors with the key, the alarm goes off when you open the hood or move the shift lever out of P (continuously variable transmission models).
Locking and Unlocking the Doors

Locking/Unlocking the Doors from the Outside

- Locking the driver's door
  Push the lock tab forward or push the master door lock switch in the lock direction, and close the door.

- Locking the passengers' doors
  Push the lock tab forward and close the door.

- Lockout prevention system
  
  **Models without smart entry system**
  The doors and the tailgate cannot be locked when the key is in the ignition switch.

  **Models with smart entry system**
  The doors and the tailgate cannot be locked when the smart entry remote is inside the vehicle.

- Locking a Door Without Using a Key

  When you lock the driver's door, all the other doors and tailgate lock at the same time.
  Make sure you have the key in your hand before locking the door to prevent it from being locked in the vehicle.
Locking and Unlocking the Doors

Locking/Unlocking the Doors from the Inside

Using the Lock Tab

- **Locking a door**  
  Push the lock tab forward.

- **Unlocking a door**  
  Pull the lock tab rearward.

When you lock the door using the lock tab on the driver’s door, all the other doors and the tailgate lock at the same time.

When you unlock the door using the lock tab on the driver’s door, only the driver’s door will unlock.

Continued
Unlocking Using the Front Door Inner Handle

Pull the front door inner handle.
► The door unlocks and opens in one motion.

Unlocking and opening the driver’s door from the inner handle unlocks all the other doors.

To prevent all the doors unlocking, use the lock tab on the driver’s door to unlock, then lock again before opening the door.
► This setting works for one time only. If you do not want all the doors to unlock all the time, customize the Auto Door Unlock setting to Off using the master door lock switch.

Auto Door Locking/Unlocking P. 109

Unlocking Using the Front Door Inner Handle
The front door inner handles are designed to allow front seat occupants to open the door in one motion. However this feature requires that front seat occupants never pull a front door inner handle while the vehicle is in motion.

Children should always ride in a rear seat where childproof door locks are provided.
Childproof Door Locks P. 108
Locking and Unlocking the Doors

Locking/Unlocking the Doors from the Inside

Using the Master Door Lock Switch

Press the master door lock switch in as shown to lock or unlock all doors and the tailgate.

When you lock/unlock the driver's door using the master lock switch, all the other doors and the tailgate lock/unlock at the same time.
### Childproof Door Locks

The childproof door locks prevent the rear doors from being opened from the inside regardless of the position of the lock tab.

#### Setting the Childproof Door Locks

Slide the lever in the rear door to the lock position, and close the door.

- **When opening the door**
  Open the door using the outside door handle.

#### Childproof Door Locks

To open the door from the inside when the childproof door lock is on, put the lock tab in the unlock position, lower the rear window, put your hand out of the window, and pull the outside door handle.
Auto Door Locking/Unlocking

Your vehicle locks and unlocks all doors automatically when a certain condition is met.

- **Auto Door Locking**
  - **Drive lock mode**
    All doors lock when the vehicle’s speed reaches about 10 mph (15 km/h).

- **Auto Door Unlocking**
  - **Driver’s door open mode**
    All doors unlock when the driver’s door is opened.
Customizing the Auto Door Locking/Unlocking Setting

You can customize the auto door locking/unlocking setting to your liking using the master door lock switch.

**List of the Auto Door Locking/Unlocking Customizable Options**

Opening and Closing the Tailgate

Precautions for Opening/Closing the Tailgate

Always make sure individuals and objects are clear of the tailgate before opening or closing it.

- **Opening the tailgate**
  - Open the tailgate all the way.
    - If it is not fully opened, the tailgate may come down accidentally by its own weight.
  - Be careful when it is windy. The wind may cause the tailgate to close.

- **Closing the tailgate**
  Keep the tailgate closed while driving to:
  - Avoid possible damage.
  - Prevent exhaust gas from leaking into the vehicle.
    - **Carbon Monoxide Gas** P. 69

- **Precautions for Opening/Closing the Tailgate**
  - Be careful not to hit your head on the tailgate or to put your hands between the tailgate and the cargo area when closing the tailgate.
  
  When you are storing or picking up luggage from the cargo area while the engine is idling, do not stand in front of the exhaust pipe. You may get burned.
  
  Do not allow any passenger in the cargo space. They may get hurt during hard braking, a sudden acceleration, or a crash.
Opening and Closing the Tailgate

Using the Tailgate Release Button

When all the doors are unlocked or you press the tailgate unlock button on the remote transmitter, the tailgate is unlocked. Press the tailgate release button and lift open the tailgate.

Models with smart entry system

Even if the tailgate is locked, you can open the tailgate if you carry the smart entry remote. To close the tailgate, grab the inner handle, pull the tailgate down, and push it closed from outside.

If you close the tailgate when all the doors are locked, the tailgate locks automatically.

Some exterior lights flash.

- Do not leave the smart entry remote in the vehicle when you get out. Carry it with you.
- Even if you are not carrying the smart entry remote, you can unlock the tailgate while someone else is with the remote is within range.
Opening and Closing the Tailgate

Using the Tailgate Release Button

**Remote Transmitter**

Press the tailgate unlock button to unlock the tailgate.

If you have unlocked and opened the tailgate using the remote transmitter, or smart entry remote, when closing, the tailgate locks automatically.
Controls

Security System

Immobilizer System

The immobilizer system prevents a key that has not been pre-registered from starting the engine. Each key contains electronic transmitters that use electronic signals to verify the key.

Pay attention to the following when inserting the key into the ignition switch or pressing the ENGINE START/STOP button:

- Do not allow objects that emit strong radio waves near the ignition switch or the ENGINE START/STOP button.
- Make sure the key is not covered by or touching a metal object.
- Do not bring a key from another vehicle’s immobilizer system near the ignition switch.

Security System Alarm

The security system alarm activates when the tailgate, hood or doors are forcibly opened. The alarm does not go off if the tailgate or doors are opened with the key, remote transmitter or smart entry system. However, the alarm goes off when a door is opened with the key, then the shift lever is moved out of P (continuously variable transmission models) or the hood is opened before the ignition switch is turned to ON II”¹.

When the security system alarm activates

The horn sounds intermittently and all of the exterior lights flash.

*¹: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

NOTICE

Leaving the ignition key in the vehicle can result in theft or accidental movement of the vehicle. Always take the ignition key with you whenever you leave the vehicle unattended.

Do not alter the system or add other devices to it. Doing so may damage the system and make your vehicle inoperable.

The security alarm continues for a maximum of two minutes until the security system deactivates.

*¹: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
To deactivate the security system alarm
Unlock the vehicle using the remote transmitter or smart entry remote, or turn the ignition switch to ON [II]*1. The system, along with the horn and flashing lights, is deactivated.

Setting the security system alarm
The security system alarm automatically sets when the following conditions have been met:
- The ignition switch is in LOCK [0]*1, and the key has been removed from the ignition switch.
- The hood is closed.
- All doors and the tailgate are locked from outside with the key, remote transmitter, or smart entry system.

When the security system alarm sets
The security system alarm indicator in the instrument panel blinks. When the blinking interval changes after about 15 seconds, the security system alarm is set.

To cancel the security system alarm
The security system alarm is canceled when the vehicle is unlocked using the remote transmitter or smart entry system, or the ignition switch is turned to ON [II]*1. The security system alarm indicator goes off at the same time.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
■ Panic Mode

- The panic button on the remote transmitter
  If you press the panic button for approximately one second, the following will occur for about 30 seconds:
  - The horn sounds.
  - Some exterior lights flash.

- Canceling panic mode
  Press any button on the remote transmitter, or turn the ignition switch to ON [II]*1.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Opening and Closing the Windows

Opening/Closing the Power Windows

The power windows can be opened and closed when the ignition switch is in ON \( \text{II}^*1 \), using the switches on the doors. The driver’s side switches can be used to open and close all of the windows.

The power window lock button on the driver’s side must be switched off (not pushed in, indicator off) to open and close the windows from anywhere other than the driver’s seat.

When the power window lock button is pushed in, the indicator comes on and you can only operate the driver’s window. Turn the power window lock button on when children are in the vehicle.

■ Opening/Closing Windows with Auto-Open/Close Function

Automatic operation
To open: Push the switch down firmly.
To close: Pull the switch up firmly.

The window opens or closes completely. To stop the window at any time, push or pull the switch briefly.

Manual operation
To open: Push the switch down lightly, and hold it until the desired position is reached.
To close: Pull the switch up lightly, and hold it until the desired position is reached.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Opening and Closing the Windows

Opening/Closing the Power Windows

Controls

**To open:** Push the switch down lightly, and hold it until the desired position is reached.

**To close:** Pull the switch up lightly, and hold it until the desired position is reached.

Opening/Closing Windows without Auto-Open/Close Function
Opening and Closing the Moonroof*

You can only operate the moonroof when the ignition switch is in ON [II]*1. Use the switch in the front of the ceiling to open and close the moonroof.

### Automatic operation

**To open:** Pull the switch back firmly.
**To close:** Push the switch forward firmly.

The moonroof will automatically open or close all the way. To stop the moonroof midway, touch the switch briefly.

### Manual operation

**To open:** Pull the switch back lightly, and hold it until the desired position is reached.
**To close:** Push the switch forward lightly, and hold it until the desired position is reached.

### Tilting the moonroof up

**To tilt:** Push on the center of the moonroof switch.
**To close:** Push the switch forward firmly, then release.

---

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models

---

**WARNING**

Opening or closing the moonroof on someone’s hands or fingers can cause serious injury.

Make sure all hands and fingers are clear of the moonroof before opening or closing it.

**NOTICE**

Opening the moonroof in below freezing temperature or when it is covered with snow or ice can damage the moonroof panel or motor.

The power moonroof can be operated for up to 10 minutes after you turn the ignition switch to LOCK [0]*1. Opening either front door cancels this function.

When resistance is detected, the auto reverse function causes the moonroof to change directions, then stop. Auto reverse stops sensing when the moonroof is almost closed to ensure that it fully closes.
Operating the Switches Around the Steering Wheel

Models without smart entry system

**Ignition Switch**

LOCK: Insert and remove the key in this position.

ACCESSORY: Operate the audio system and other accessories in this position.

ON: This is the position when driving.

START: This position is for starting the engine. The switch returns to ON when you let go of the key.

**WARNING**

Removing the key from the ignition switch while driving locks the steering. This can cause you to lose control of the vehicle.

Remove the key from the ignition switch only when parked.

Manual transmission models

You cannot take the key out unless the shift lever is in P.

All models

If you open the driver’s door when the key is in LOCK or ACCESSORY, a warning buzzer will sound to remind you to take the key out.

If the key won’t turn from LOCK to ACCESSORY, turn the key while moving the steering wheel left and right. The steering wheel will unlock, allowing the key to turn.

*1: Except U.S. models with continuously variable transmission

You can start the engine when the smart entry remote is inside the vehicle. The engine may also run if the smart entry remote is close to the door or window, even if it is outside the vehicle.

ON mode:
Indicator in the button is off, if the engine is running.

If the smart entry remote battery is weak, beeper sounds and the **KEY** message appears in the information display.

If the Smart Entry Remote Battery is Weak

P. 444

Do not leave the power mode in ACCESSORY or ON when you get out.

Except U.S. models with continuously variable transmission

If the power mode does not change from VEHICLE OFF to ACCESSORY, press the ENGINE START/STOP button while moving the steering wheel left and right. The steering wheel will unlock, allowing the mode to change.
Operating the Switches Around the Steering Wheel

ENGINE START/STOP Button

Controls

If you leave the vehicle for 30 to 60 minutes with the shift lever in P*1 and the power mode in ACCESSORY, the vehicle automatically goes into the mode similar to VEHICLE OFF (LOCK) to avoid the battery drain.

When in this mode:
- The steering wheel does not lock.
- You cannot lock or unlock doors with the remote transmitter or the smart entry system.

Press the ENGINE START/STOP button to switch the mode to VEHICLE OFF (LOCK).

Automatic Power Off

If you leave the vehicle for 30 to 60 minutes with the shift lever in P and the power mode in ACCESSORY, the vehicle automatically goes into the mode similar to VEHICLE OFF (LOCK) to avoid the battery drain.

Except U.S. models with continuously variable transmission

When in this mode:
- The steering wheel does not lock.
- You cannot lock or unlock doors with the remote transmitter or the smart entry system.

Press the ENGINE START/STOP button to switch the mode to VEHICLE OFF (LOCK).

*1: Continuously variable transmission models
Power Mode Reminder

If you open the driver’s door when the power mode is set to ACCESSORY, a warning buzzer sounds.

Smart Entry Remote Reminder

Warning buzzers may sound from inside or and outside the vehicle to remind you that the smart entry remote is out of the vehicle. If the buzzer continues even after the remote is put back inside, place it to be within its operational range.

When the power mode is in ON

If the smart entry remote is taken out of the vehicle, and the driver’s door is closed, warning buzzers sound from both inside and outside the vehicle. A warning message on the information display notifies the driver inside that the remote is out.

When the power mode is in ACCESSORY

If the smart entry remote is taken out of the vehicle, and all the doors are closed, a warning buzzer sounds from outside the vehicle.

Smart Entry Remote Reminder

When the smart entry remote is within the system’s operational range, and the driver’s door is closed, the warning function cancels.

If the smart entry remote is taken out of the vehicle after the engine has been started, you can no longer change the ENGINE START/STOP button mode or restart the engine. Always make sure if the remote is in your vehicle when you operate the ENGINE START/STOP button.

Removing the smart entry remote from the vehicle through a window does not activate the warning buzzer.

Do not put the smart entry remote on the dashboard or in the glove box. It may cause the warning buzzer to go off. Under some other conditions that can prevent the vehicle from locating the remote, the warning buzzer may also go off even if the remote is within the system’s operational range.
### Ignition Switch and Power Mode Comparison

Turn Signals

The turn signals can be used when the ignition switch is in ON [II]*1.

■ One-touch turn signal
When you lightly push up or down and release the turn signal lever, the exterior turn signals and turn signal indicator blink three times.

This feature can be used when signaling for a lane change.

Light Switches

■ Manual Operation

Rotating the light switch turns the lights on and off, regardless of the position of the ignition switch*1.

■ High beams
Push the lever forward until you hear a click.

■ Low beams
When in high beams, pull the lever back to return to low beams.

■ Flashing the high beams
Pull the lever back, and release it.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

Continued
Automatic Lighting Control*

Automatic lighting control can be used when the ignition switch is in ON [Ⅱ]*1.

When you turn the light switch to AUTO, the headlights and other exterior lights will switch on and off automatically depending on the ambient brightness.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
Headlight Integration with Wipers*

The headlights automatically come on when the wipers are used several times within a certain intervals with the headlight switch in AUTO. The headlights automatically go off a few minutes later if the wipers are stopped.

Automatic Lighting Off Feature

The headlights, all other exterior lights, and the instrument panel lights turn off 15 seconds after you remove the key or set the power mode to VEHICLE OFF (LOCK), take the remote with you, and close the driver’s door.

If you turn the ignition switch to LOCK [0]"*1 with the headlight switch on, but do not open the door, the lights turn off after 10 minutes (3 minutes, if the switch is in the AUTO position).

The lights turn on again when you unlock or open the driver’s door. If you unlock the door, but do not open it within 15 seconds, the lights go off. If you open the driver’s door, you will hear a lights on reminder chime.

1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
Fog Lights*

When the low beam headlights are on, turn the fog light switch on to use the fog lights.

When the fog lights are on, the indicator in the instrument panel will be on.

The fog lights go off when the headlights turn off, or when the daytime running lights are on.
Daytime Running Lights

The headlights come on slightly dimmer than normal when the following conditions have been met:

- The ignition switch is in ON [II] *1.
- The headlight switch is off, or in [DOE].
- The parking brake is released.

The lights remain on even if you set the parking brake. Turning off the ignition switch or setting the power mode to VEHICLE OFF will turn off the daytime running lights.

The headlights return to the original brightness once the headlight switch is turned on.

---

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
**Wipers and Washers**

**Front Wiper/Washer**

The windshield wipers and washers can be used when the ignition switch is in ON [II].

- **MIST**
  The wipers run at high speed until you release the lever.

- **Wiper switch (OFF, INT, LO, HI)**
  Change the wiper switch setting according to the amount of rain.

- **Adjusting wiper operation**
  Turn the adjustment ring to adjust the wiper operation.

  - Lower speed, fewer sweeps
  - Higher speed, more sweeps

- **Washer**
  Sprays while you pull the lever toward you. When you release the lever, the wipers make two or three more sweeps before stopping.

---

**NOTICE**

Do not use the wipers when the windshield is dry. The windshield will get scratched, or the rubber blades will get damaged.

In cold weather, the blades may freeze to the windshield, becoming stuck. Operating the wipers in this condition may damage the wipers. Use the defroster to warm the windshield, then turn the wipers on.

If the vehicle speeds up while the wipers are operating intermittently, the length of the wipe interval shortens. When the vehicle starts moving, the wipers make a single sweep. When the vehicle speeds up, the wiper operation's shortest delay and the LO setting become the same.

Turn the washers off if no washer fluid comes out. The pump may get damaged.

---

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
The rear wiper and washer can be used when the ignition switch is in ON [II]*1.

■ Wiper switch (OFF, INT, ON)
Change the wiper switch setting according to the amount of rain.

■ Washer ( )
Sprays while you rotate the switch to this position.

Hold it to activate the wiper and to spray the washer. Once released, it stops operating after a few more sweeps.

■ Operating in reverse
When you shift the transmission to [R] with the front wiper activated, the rear wiper operates automatically as follows even if its switch is off.

<table>
<thead>
<tr>
<th>Front Wiper Position</th>
<th>Rear Wiper Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>INT (Intermittent)</td>
<td>Intermittent</td>
</tr>
<tr>
<td>LO (Low speed wipe)</td>
<td>Continuous</td>
</tr>
<tr>
<td>HI (High speed wipe)</td>
<td></td>
</tr>
</tbody>
</table>

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

Wipers and Washers
If the wiper stops operating due to any obstacle such as the build-up of snow, park the vehicle in a safe place.

Rotate the wiper switch to OFF, and turn the ignition switch to ACCESSORY [I] or LOCK [O]*1, then remove the obstacle.

The wiper motor is equipped with a breaker that may stop motor operation temporarily to prevent an overload. Wiper operation will return to normal within a few minutes, once the circuit has returned to normal.
When the ignition switch is in ON \(^*1\), you can use the \(\triangleright\) (select/reset) knob to adjust instrument panel brightness.

**Brighten:** Turn the knob to the right.

**Dim:** Turn the knob to the left.

You will hear a beep when the brightness reaches minimum or maximum. The information display will return to its original state several seconds after you adjust the brightness.

**Brightness level indicator**
The brightness level is shown on the information display while you are adjusting it.

---

\(^*1\): Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Defogger/Heated Door Mirror* /Heater Windshield*

Rear Defogger/Heated Door Mirror* Button

Press the rear defogger button or touch the icon to defog the rear window and mirrors when the ignition switch is in ON [I]*1.

Models with climate control system
The rear defogger and heated door mirrors automatically switch off after 10-30 minutes depending on the outside temperature. However, if the outside temperature is 32°F (0°C) or below, they do not automatically switch off.

Rear Defogger/Heated Door Mirror* Button

NOTICE
When cleaning the inside of the rear window, be careful not to damage the heating wires. It is critical to wipe the window from side to side along the defogger heating wires.

This system consumes a lot of power, so turn it off when the window has been defogged. Also, do not use the system for a long period when the engine is idling. This may weaken the battery, making it difficult to start the engine.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
* Not available on all models

Continued
Operating the Switches Around the Steering Wheel

Defogger/Heated Door Mirror*/Heater Windshield*

Canadian models

Heated Windshield Button

Press the heated windshield button to deice the windshield when the ignition switch is turned to ON [Ⅰ]∗1.

The heated windshield automatically switch off after 15 minutes.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

Heated Windshield Button

This system consumes a lot of power, so turn it off when the window has been defogged or deiced.
Operating the Switches Around the Steering Wheel

Adjusting the Steering Wheel

The steering wheel height and distance from your body can be adjusted so that you can comfortably grip the steering wheel in an appropriate driving posture.

1. Pull the steering wheel adjustment lever up. ►The steering wheel adjustment lever is under the steering column.

2. Move the steering wheel up or down, and in or out. ►Make sure you can see the instrument panel gauges and indicators.

3. Push the steering wheel adjustment lever down to lock the steering wheel in position. ►After adjusting the position, make sure you have securely locked the steering wheel in place by trying to move it up, down, in, and out.

WARNING

Adjusting the steering wheel position while driving may cause you to lose control of the vehicle and be seriously injured in a crash.

Adjust the steering wheel only when the vehicle is stopped.

Make any steering wheel adjustments before you start driving.
Adjusting the Mirrors

Interior Rearview Mirror

Adjust the angle of the rearview mirror when you are sitting in the correct driving position.

Rearview Mirror with Day and Night Positions*

Flip the tab to switch the position. The night position will help to reduce the glare from headlights behind you when driving after dark.

Automatic Dimming Rearview Mirror*

When driving after dark, the automatic dimming rearview mirror reduces the glare from headlights behind you. Press the auto button to turn this function on and off. When activated, the auto indicator comes on.

Adjusting the Mirrors

Keep the inside and outside mirrors clean and adjusted for best visibility.

Adjust the mirrors before you start driving.

* Not available on all models
Power Door Mirrors

You can adjust the door mirrors when the ignition switch is in ON II*1.

■ Mirror position adjustment
L/R selector switch: Select the left or right mirror. After adjusting the mirror, return the switch to the center position.

Mirror position adjustment switch: Press the switch left, right, up, or down to move the mirror.

■ Expanded View Driver’s Mirror

The driver side door mirror has outer and inner segments.
The outer segment is slightly curved to provide a wider angle view than a standard flat mirror. This wider view may help you check areas that are not visible using a standard door mirror.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Adjusting the Seats

Adjusting the Seat Positions

Adjust the driver’s seat as far back as possible while allowing you to maintain full control of the vehicle. You should be able to sit upright, well back in the seat and be able to adequately press the pedals without leaning forward, and grip the steering wheel comfortably. The passenger’s seat should be adjusted in a similar manner, so that it is as far back from the front airbag in the dashboard as possible.

■ Adjusting the front seat

Allow sufficient space.

Move back.

Adjusting the front seat

<table>

</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Seat-back Angle Adjustment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pull up the lever to change the angle.</td>
</tr>
</tbody>
</table>

WARNING

Sitting too close to a front airbag can result in serious injury or death if the front airbags inflate.

Always sit as far back from the front airbags as possible while maintaining control of the vehicle.

The National Highway Traffic Safety Administration and Transport Canada recommend that drivers allow at least 10 inches (25 cm) between the center of the steering wheel and the chest.

Always make seat adjustments before driving.

Once a seat is adjusted correctly, rock it back and forth to make sure it is locked in position.
Adjusting the Seats

Adjust the driver’s seat-back to a comfortable, upright position, leaving ample space between your chest and the airbag cover in the center of the steering wheel.

The front seat passenger should also adjust their seat-back to a comfortable, upright position.

Reclining a seat-back so that the shoulder part of the belt no longer rests against the occupant’s chest reduces the protective capability of the belt. It also increases the chance of sliding under the belt in a crash and being seriously injured. The farther a seat-back is reclined, the greater the risk of injury.

 WARNING

Reclining the seat-back too far can result in serious injury or death in a crash.

Adjust the seat-back to an upright position, and sit well back in the seat.

Do not put a cushion, or other object, between the seat-back and your back.

Doing so may interfere with proper seat belt or airbag operation.

If you cannot get far enough away from the steering wheel and still reach the controls, we recommend that you investigate whether some type of adaptive equipment may help.
Adjusting the Seats

Adjusting the Seat Positions

Your vehicle is equipped with head restraints in all seating positions.

Head restraints are most effective for protection against whiplash and other rear-impact crash injuries when the center of the back of the occupant’s head rests against the center of the restraint. The tops of the occupant’s ears should be level with the center height of the restraint.

Adjusting the front head restraint positions

To raise the head restraint:
Pull it upward.

To lower the head restraint:
Push it down while pressing the release button.

WARNING

Improperly positioning head restraints reduces their effectiveness and increases the likelihood of serious injury in a crash.

Make sure head restraints are in place and positioned properly before driving.

In order for the head restraint system to work properly:
• Do not hang any items on the head restraints, or from the restraint legs.
• Do not place any objects between an occupant and the seat-back.
• Install each restraint in its proper location.
Changing the Rear Seat Head Restraint Positions

A passenger sitting in a back seating position should adjust the height of their head restraint to an appropriate position before the vehicle begins moving.

**To raise the head restraint:**
Pull it upward.

**To lower the head restraint:**
Push it down while pressing the release button.
Removing and Reinstalling the Head Restraints

Head restraints can be removed for cleaning or repair.

To remove a head restraint:
Pull the restraint up as far as it will go. Then push the release button, and pull the restraint up and out.

To reinstall a head restraint:
Insert the legs back in place, then adjust the head restraint to an appropriate height while pressing the release button. Pull up on the restraint to make sure it is locked in position.

WARNING
Failure to reinstall, or correctly reinstall, the head restraints can result in severe injury during a crash.

Always replace the head restraints before driving.

To remove and install the rear outer head restraint, recline the seat-back slightly forward as the space between the ceiling and the seat-back is limited.
Adjusting the Seats

Adjusting the Seat Positions

Controls

After all occupants have adjusted their seats and head restraints, and put on their seat belts, it is very important that they continue to sit upright, well back in their seats, with their feet on the floor, until the vehicle is safely parked and the engine is off.

Sitting improperly can increase the chance of injury during a crash. For example, if an occupant slouches, lies down, turns sideways, sits forward, leans forward or sideways, or puts one or both feet up, the chance of injury during a crash is greatly increased.

In addition, an occupant who is out of position in the front seat can be seriously or fatally injured in a crash by striking interior parts of the vehicle or being struck by an inflating front airbag.

Maintain a Proper Sitting Position

WARNING

Sitting improperly or out of position can result in serious injury or death in a crash.

Always sit upright, well back in the seat, with your feet on the floor.
Rear Seats

■ Adjusting the Rear Seat-Backs

Pull the lever on the right to change the angle of the right half of the seat-back, and left for the left half.
Folding Down the Rear Seats

The rear seats can be folded down separately to allow for additional storage space.

- To fold down the seat
  1. Store the center seat belt first. Insert the latch plate into the slot on the side of the anchor buckle.
  2. Retract the seat belt into the holder on the ceiling.
  3. Lower the head restraint to its lowest position.
  4. Pull the release lever and fold down the seat-back.

To return the seat to the original position, pull up the seat-back in the upright position.

Make sure all items in the cargo area or items extending to the rear seats are properly secured. Loose items can fly forward if you have to brake hard.

Remove any items from the rear seat cushion and floor before you fold down the rear seat.

To lock the seat-back upright, push it backwards until it locks.

Make sure the seat-back, head restraints and seat cushion are securely latched back into place before driving. Also, make sure all rear shoulder belts are positioned in front of the seat-back, and the center shoulder belt is re-positioned in the holding slot.

Make sure that the folded seat-back does not press against the front passenger seat, as this can cause the weight sensors in the front passenger seat to work improperly.
Adjusting the Seats

Rear Seats

Controls

Separately lift up the left and right halves of the rear seat cushions to make room for cargo area.

Lifting up the seat cushion
1. Make sure the seat belt buckles are in their loops on the seat.
2. Pull up the rear seat cushion.
3. Fold the seat leg down while pushing the seat cushion firmly against the seat-back to lock it.

Putting the seat in the original position
1. Hold the seat cushion in the upright position, and pull up the seat leg fully.
2. Slowly put down the seat cushion and set the seat leg in the floor guide.

Folding the Rear Seat Up

After you fold the seat up, or put it back in the original position, make sure the seat is firmly secured by rocking it forward and back.

Check if there are any items on the seat before you pull the seat cushion up. Check if there are any obstacles around the floor guide before you put the seat back in the original position.

Folding the Rear Seat Up

Loop

Seat Leg

Floor Guide

Latch
Armrest

■ Using the Front Seat Armrest

The console lid can be used as an armrest.

To adjust:
Slide the armrest to the desired position.

■ Using the Rear Seat Armrest*

Pull down the armrest in the center seat-back.

Interior Lights/Interior Convenience Items

Interior Lights

**Interior Light Switches**

<table>
<thead>
<tr>
<th>Position</th>
<th>Switches</th>
</tr>
</thead>
<tbody>
<tr>
<td>Front</td>
<td>![Diagram of front light switch]</td>
</tr>
<tr>
<td>Rear</td>
<td>![Diagram of rear light switch]</td>
</tr>
</tbody>
</table>

**ON**
The interior lights come on regardless of whether the doors are open or closed.

**Door activated**
The interior lights come on in the following situations:
- When any of the doors are opened.
- You unlock the driver's door.

**OFF**
The interior lights remain off regardless of whether the doors are open or closed.

---

**Interior Light Switches**

In the door activated position, the interior lights fade out and go off about 30 seconds after the doors are closed. The lights go off after 30 seconds in the following situations:
- When you unlock the driver's door but do not open it.

**Models without smart entry system**
- When you remove the key from the ignition switch but do not open a door.

**Models with smart entry system**
- When you set the power mode to VEHICLE OFF (LOCK) but do not open a door.

The interior lights go off immediately in the following situations:
- When you lock the driver's door.
- When you turn the ignition switch to ON [II]*1.

**Models without smart entry system**
- When you close the driver's door with the key in the ignition switch.

**Models with smart entry system**
- When you close the driver's door in ACCESSORY mode.

If you leave any of the doors open in VEHICLE OFF (LOCK) mode, or without the key in the ignition switch, the interior lights go off after about 15 minutes.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

---

* Not available on all models
**Map Lights**

- **Models with moonroof**
  The map lights can be turned on and off by pressing the lenses.

- **Models without moonroof**

**Cargo Area Light**

- **ON**
  The light comes on when you open the tailgate, and goes off when closed.

- **OFF**
  The light stays off with or without opening the tailgate.
Interior Convenience Items

■ Glove Box

Pull the handle to open the glove box.

![Glove Box]

**WARNING**

An open glove box can cause serious injury to your passenger in a crash, even if the passenger is wearing the seat belt.

Always keep the glove box closed while driving.

■ Console Compartment

Pull the handle to open the console compartment.
Beverage Holders

Front seat beverage holders

To put a short-size beverage: Push down the bottom plate.

To put a tall-size beverage: Pull up the bottom plate.

Center console beverage holders

NOTICE
Spilled liquids can damage the upholstery, carpeting, and electrical components in the interior.

Be careful when you are using the beverage holders. Hot liquid can scald you.
Interior Lights/Interior Convenience Items

Rear seat beverage holders

Rear Door

At the Back of the Center Console
Cargo Floor Box

Pull up the cargo area floor lid.
Interior Lights/Interior Convenience Items

Accessories Controls

### Accessory Power Sockets

The accessory power socket can be used when the ignition switch is in ACCESSORY I or ON II*.

- **Accessory power socket (console panel)**
  Open the cover to use it.

- **Accessory power socket (rearward of center console)**
  Open the cover to use it.

---

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

---

Accessory Power Sockets

**NOTICE**

Do not insert an automotive type cigarette lighter element. This can overheat the power socket.

Each accessory power socket is designed to supply power for 12 volt DC accessories that are rated 180 watts (15 amps) or less.

To prevent battery drain, only use the power socket with the engine running.

When both sockets are being used, the combined power rating of the accessories should not exceed 180 watts (15 amps).
■ Accessory power socket (cargo area)*
Open the cover to use it.

■ Coat Hook
There is a coat hook on the rear left grab handle. Pull it down to use it.

* Not available on all models
Tie-down Anchors

The tie-down anchors on the cargo area floor can be used to install a net for securing items.
The tonneau cover can be used to conceal your items and protect them from direct sunlight.

**To remove:**
Pull out the tonneau cover rearwards and remove it.

**To fold:**
The tonneau cover is collapsible.
1. Take the opposite sides, fold the cover halfway, then twist into opposite ways.
2. Curl to narrow the cover as shown.

Do not let anyone access items in the cargo area while driving. Loose items can cause injury if you have to brake hard.

Do not stack objects higher than the top of the seat in the cargo area. They could block your view and be thrown about the vehicle during a sudden stop.

To prevent tonneau cover damage, do not:
- Place items on the tonneau cover.
- Put weight on the tonneau cover.

When reinstalling the tonneau cover, put the tagged side first.

* Not available on all models
The ignition switch must be in ON (1)\(^*1\) to use the seat heaters. The HI setting heats the seats faster than the LO setting.

Touch the seat heater icon.

Once - The HI setting (two indicators on)
Twice - The LO setting
Three times - The OFF setting (no indicator on)

When a comfortable temperature is reached while using the seat heater in HI, select LO to keep the seat warm.

**WARNING**

Heat induced burns are possible when using seat heaters.

Persons with a diminished ability to sense temperature (e.g., persons with diabetes, lower-limb nerve damage, or paralysis) or with sensitive skin should not use seat heaters.

Do not use the seat heaters even in LO when the engine is off. Under such conditions, the battery may be weakened, making the engine difficult to start.

In the LO setting, the heater runs continuously and does not automatically turn off.

---

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
Heating and Cooling System*

Using Vents, Heating and A/C

**Fan Control Dial**
Adjusts the fan speed. Rotate the dial all the way to **OFF** to turn everything off.

**Temperature Control Dial**
Adjusts the interior temperature.

**A/C Button**
Press to cool the interior or dehumidify while heating.

**Mode Control Dial**
Changes airflow.

**Recirculation** Button
Press the button and switch the mode depending on environmental conditions.

- Recirculation mode (indicator on):
  Recirculates air from the vehicle’s interior through the system.

- Fresh air mode (indicator off):
  Maintains outside ventilation. Keep the system in fresh air mode in normal situations.

---

* Not available on all models
Passenger Side Vents

Three separate front passenger side air vents allow for different air flow rates through the vehicle. Passengers can separately:

- Adjust each vent to optimize airflow throughout the vehicle.

- Close individual vents to adjust passenger comfort levels.
The heater uses heat from the engine coolant to warm the air.

1. Adjust the fan speed using the fan control dial.
2. Select 
3. Adjust the temperature using the temperature control dial.

To rapidly warm up the interior
1. Set the fan to the maximum speed.
2. Select 
3. Set the temperature to maximum warm.
4. Press the button (the indicator on).

To dehumidify the interior
When used in combination with the heater, the air conditioning system makes the interior warm and dry and can prevent the windows from fogging up.
1. Turn the fan on.
2. Press the A/C button to turn on the air conditioning.
Cooling

1. Adjust the fan speed using the fan control dial.
2. Select 🚀.
3. Adjust the temperature using the temperature control dial.
4. Press the A/C button (indicator on).

To rapidly cool down the interior
1. Set the fan to the maximum speed.
2. Set the temperature to maximum cool.
3. Press the 🚀 button (the indicator on).

Defrosting the Windshield and Windows

Selecting ⏳ turns the air conditioning system on and automatically switches the system to fresh air mode.

To rapidly defrost the windows
1. Set the fan to the maximum speed.
2. Select 🚀.
3. Press the 🚀 button.
4. Set the temperature to maximum warm.

To rapidly cool down the interior
If the interior is very warm, you can cool it down more rapidly by partially opening the windows.

Models with ECON button
While in ECON mode, the system has greater temperature fluctuations.

Defrosting the Windshield and Windows

For your safety, make sure you have a clear view through all the windows before driving.
Do not set the temperature near the upper or lower limit.
When cold air hits the windshield, the outside of the windshield may fog up.
If the side windows fog up, adjust the vents so that the air hits the side windows.

To rapidly defrost the windows
After defrosting the windows, switch over to fresh air mode.
If you keep the system in recirculation mode, the windows may fog up from humidity. This impedes visibility.
Climate Control System*

Using Automatic Climate Control

The automatic climate control system maintains the interior temperature you select. The system also selects the proper mix of heated or cooled air that raises or lowers the interior temperature to your preference as quickly as possible.

Models without SYNC icon

Use the system when the engine is running.
1. Select the AUTO icon.
2. Adjust the interior temperature using the temperature control icons.
3. Select the AUTO icon to cancel.

* Not available on all models

Using Automatic Climate Control

If any icons are selected while using the climate control system in auto, the function of the icon that was selected will take priority. The AUTO indicator will go off, but functions unrelated to the icon that was selected will be controlled automatically.

To prevent cold air from blowing in from outside, the fan may not start immediately when the AUTO icon is selected.

If the interior is very warm, you can cool it down more rapidly by partially opening the windows, turning the system on auto, and setting the temperature to low. Change the fresh air mode to recirculation mode until the temperature cools down.

When you set the temperature to the lower or upper limit, Lo or Hi is displayed.

You can raise or lower the temperature or fan speed setting flicking either control icon.
Use the system when the engine is running.

1. Select the AUTO icon.
2. Adjust the interior temperature using the driver side temperature control icons.
3. Select the icon to cancel.
Switching between the recirculation and fresh air modes

Models without SYNC icon
Select the (recirculation) or (fresh air) icon to switch the mode depending on environmental conditions.
- Recirculation mode (indicator on): Recirculates air from the vehicle’s interior through the system.
- Fresh air mode (indicator on): Maintains outside ventilation. Keep the system in fresh air mode in normal situations.

Models with SYNC icon
Select the (recirculation) icon to switch the mode depending on environmental conditions.
- Recirculation mode (indicator on): Recirculates air from the vehicle’s interior through the system.
- Fresh air mode (indicator off): Maintains outside ventilation. Keep the system in fresh air mode in normal situations.
Defrosting the Windshield and Windows

Select the icon to turn the air conditioning system on and automatically switch the system to fresh air mode.

Select the icon again to turn off, the system returns to the previous settings.

For your safety, make sure you have a clear view through all the windows before driving.

Do not set the temperature near the upper or lower limit.
When cold air hits the windshield, the outside of the windshield may fog up.

If the side windows fog up, adjust the vents so that the air hits the side windows.
To rapidly defrost the windows
1. Select the icon.
2. Select the icon.

To rapidly defrost the windows
After defrosting the windows, switch over to fresh air mode. If you keep the system in recirculation mode, the windows may fog up from humidity. This impedes visibility.
Turning On and Off the Touch Screen Beep

You hear the beep when operating the climate control system on the touch screen. This can be turned on and off.

To turn off the beep:
1. Turn the ignition switch to ON "1".
2. Touch the of the temperature control icon five times while pressing and holding the .
3. Release the , after -- blinks five times and OF is displayed.

Models without SYNC icon

Models with SYNC icon

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
To turn on the beep:
1. Turn the ignition switch to ON (II)¹.
2. Touch the of the temperature control icon five times while pressing and holding the.
3. Release the after OF blinks five times and -- is displayed.

*¹: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Synchronized Mode*

You can set the temperature synchronously for the driver side and the passenger side in synchronized mode.

1. Select the **SYNC** icon.
   - The system switches to synchronized mode.
2. Adjust the temperature using the driver’s side temperature control icon.

Select the **SYNC** icon to return to dual mode.

*Not available on all models*
Automatic Climate Control Sensors

The automatic climate control system is equipped with sensors. Do not cover or spill any liquid on them.
This chapter describes how to operate technology features.

About Your Audio System

Models with navigation system
See the navigation system manual for operation of the audio system.

Models without navigation system
The audio system features AM/FM radio. It can also play audio CDs, WMA/MP3/AAC files, USB flash drives, and iPod, iPhone and Bluetooth® devices.

You can operate the audio system from the buttons and switches on the panel, the remote controls on the steering wheel, or the icons on the touchscreen interface.*

*1:Models with display audio system
*2:Models with color audio system

Video CDs, DVDs, and 3-inch (8-cm) mini CDs are not supported.

iPod, iPhone and iTunes are trademarks of Apple Inc.

State or local laws may prohibit the operation of handheld electronic devices while operating a vehicle.
**USB Port(s)**

1. Open the cover.
2. Install the iPod dock connector or the USB flash drive to the USB port.

**USB Port(s)**

- Do not leave the iPod or USB flash drive in the vehicle. Direct sunlight and high temperatures may damage it.
- Do not connect the iPod or USB flash drive using a hub.
- Do not use a device such as a card reader or hard disk drive, as the device or your files may be damaged.
- We recommend your data backed up before using the device in your vehicle.
- Displayed messages may vary depending on the device model and software version.

If the audio system does not recognize the iPod, try reconnecting it a few times or reboot the device. To reboot, follow the manufacturer's instructions provided with the iPod or visit [www.apple.com/ipod](http://www.apple.com/ipod).
Audio System ▶ HDMI® Port*

HDMI® Port*

1. Open the cover.
2. Install the HDMI® cable to the HDMI® port.

Auxiliary Input Jack*

Use the jack to connect standard audio devices.

1. Open the AUX cover.
2. Connect a standard audio device to the input jack using a 1/8 inch (3.5 mm) stereo miniplug.

The audio system automatically switches to the AUX mode.

HDMI® Port*

- Do not leave the HDMI® connected device in the vehicle. Direct sunlight and high temperatures may damage it.
- We recommend your data backed up before using the device in your vehicle.
- Displayed messages may vary depending on the device model and software version.

The terms HDMI and HDMI High-Definition Multimedia Interface, and the HDMI Logo are trademarks or registered trademarks of HDMI Licensing LLC in the United States and other countries.

Auxiliary Input Jack*

To switch mode, press any of the audio mode buttons. You can return to AUX mode by pressing the CD/AUX button.

* Not available on all models
Audio System Theft Protection

The audio system is disabled when it is disconnected from the power source, such as when the battery is disconnected or goes dead. In certain conditions, the system may display **ENTER CODE***/Enter code* 3. If this occurs, reactivate the audio system.

■ Reactivating the audio system
1. Turn the ignition switch to ON [II]* 1.
2. Turn on the audio system.
3. Press and hold the audio system power button for more than two seconds.
   ▶ The audio system is reactivated when the audio control unit establishes a connection with the vehicle control unit. If the control unit fails to recognize the audio unit, you must go to a dealer and have the audio unit checked.

---

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
*2: Models with color audio system.
*3: Models with display audio system.
Audio Remote Controls

Allow you to operate the audio system while driving.

### SOURCE Button
Cycles through the audio modes as follows:
- FM → AM → CD → USB → iPod → Bluetooth® Audio → Pandora® → Aha® → Apps*, *1 → AUX*/AUX HDMI®

- **Play Mode** P. 193, 196, 199
- **RDS Settings** P. 190
- **Bluetooth** P. 242, 266

Press the SOURCE, (3), (4), (5), or (6) button on the steering wheel to change any audio setting.

**Audio Remote Controls** P. 180

One of the operating system used in this unit is eCos. For software license terms and conditions, visit their website (eCos license URL: http://ecos.sourceforge.org/license-overview.html).

For source code disclosure and other details regarding eCos, visit: http://www.hondaopensource2.com
Audio/Information Screen

Displays the audio status and wallpaper. From this screen, you can go to various setup options.

Switching the Display
Audio System Basic Operation

Audio
Shows the current audio information.

Clock/Wallpaper
Shows a clock screen or an image you import.

Change display
1. Press the MENU/CLOCK button.
2. Rotate  to select Settings, then press .
3. Rotate  to select Display Change, then press .
4. Rotate  to select Wallpaper, then press .
   ▶ If you want to return to the audio display, select Audio.
Audio System Basic Operation

Audio/Information Screen

You can change, store, and delete the wallpaper on the audio/information screen.

### Import wallpaper

You can import up to three images, one at a time, for wallpaper from a USB flash drive.

1. Connect the USB flash drive to the USB port.
2. Press the MENU/CLOCK button.
3. Rotate  to select Settings, then press .
4. Rotate  to select Wallpaper, then press .
5. Rotate  to select Import, then press .
6. Rotate  to select a desired picture, then press .
7. Press  to save the picture.
8. Press  to select OK.
9. Rotate  to select a location to save the picture, then press .

You can import up to three images, one at a time, for wallpaper from a USB flash drive.

### Wallpaper Setup

- When importing wallpaper files, the image must be in the USB flash drive’s root directory. Images in a folder cannot be imported.
- The file name must be fewer than 64 characters.
- The file format of the image that can be imported is BMP (bmp) or JPEG (jpg).
- The individual file size limit is 2 MB.
- The maximum image size is 1,920 x 936 pixels. If the image size is less than 480 x 234 pixels, the image is displayed in the middle of the screen with the extra area appearing in black.
- Up to 255 files can be selected.
- If the USB flash drive does not have any pictures, the No files detected message appears.
Audio System Basic Operation

Audio/Information Screen

■ Select wallpaper
1. Press the **MENU/CLOCK** button.
2. Rotate  to select **Settings**, then press .
3. Rotate  to select **Wallpaper**, then press .
4. Rotate  to select **Select**, then press .
   - The screen changes to the wallpaper list.
5. Rotate  to select a desired wallpaper, then press .

■ Delete wallpaper
1. Press the **MENU/CLOCK** button.
2. Rotate  to select **Settings**, then press .
3. Rotate  to select **Wallpaper**, then press .
4. Rotate  to select **Delete**, then press .
   - The screen changes to the wallpaper list.
5. Rotate  to select a wallpaper that you want to delete, then press .
6. Rotate  to select **Yes**, then press .
   - The display will return to the wallpaper setting screen.

Wallpaper Setup

To go back to the previous screen, press the  (Back) button.

When the file size is large, it takes a while to be previewed.
**Adjusting the Sound**

Press the \( \text{(sound)} \) button, and rotate \( \circlearrowright \) to scroll through the following choices:

- **BAS**: Bass
- **TRE**: Treble
- **FAD**: Fader
- **BAL**: Balance
- **SVC**: Speed-sensitive Volume Compensation

Rotate \( \circlearrowright \) to adjust the sound setting, then press \( \text{Enter} \).

---

**Adjusting the Sound**

The SVC has four modes: **Off**, **Low**, **Mid**, and **High**. SVC adjusts the volume level based on the vehicle speed. As you go faster, audio volume increases. As you slow down, audio volume decreases.
Display Setup

You can change the brightness or color theme of the audio/information screen.

- **Changing the Screen Brightness**

  1. Press the **MENU/CLOCK** button.
  2. Rotate 🔄 to select **Settings**, then press ✅.
  3. Rotate 🔄 to select **Display Adjustment**, then press ✅.
  4. Rotate 🔄 to select **Brightness**, then press ✅.
  5. Rotate 🔄 to adjust the setting, then press ✅.

- **Changing the Screen’s Color Theme**

  1. Press the **MENU/CLOCK** button.
  2. Rotate 🔄 to select **Settings**, then press ✅.
  3. Rotate 🔄 to select **Color Theme**, then press ✅.
  4. Rotate 🔄 to select the setting you want, then press ✅.

**Changing the Screen Brightness**

You can change the Contrast and Black level settings in the same manner.
Playing the AM/FM Radio

- **RADIO Button**
  - Press to select a band.

- **VOL/\(\text{U}\) (Power/volume) Knob**
  - Press to turn the audio system on and off.
  - Turn to adjust the volume.

- **\(\text{\LSHIFT} / \text{\LSHIFT} \text{\RIGHT}\) (Seek/Skip) Buttons**
  - Press \(\text{\LSHIFT} / \text{\LSHIFT} \text{\RIGHT}\) to search up and down the selected band for a station with a strong signal.

- **Preset Buttons (1-6)**
  - To store a station:
    1. Tune to the selected station.
    2. Pick a preset button and hold it until you hear a beep.
  - To listen to a stored station, select a band, then press the preset button.

- **Selector Knob**
  - Turn to tune the radio frequency.
  - Press and turn to select an item, then press to set your selection.

- **MENU/CLOCK Button**
  - Press to display the menu items.

- **\(\text{\LSHIFT} \text{\LEFT}\) (Back) Button**
  - Press to go back to the previous display or cancel a setting.
Audio System Basic Operation

Playing the AM/FM Radio

Radio Data System (RDS)
Provides text data information related to your selected RDS capable FM station.

To find an RDS station from Station List
1. Press \( \text{AM/FM} \) while listening to an FM station.
2. Rotate \( \text{AM/FM} \) to select the station, then press \( \text{AM/FM} \).

Update List
Updates your available station list at any time.
1. Press \( \text{AM/FM} \) while listening to an FM station.
2. Rotate \( \text{AM/FM} \) to select Update List, then press \( \text{AM/FM} \).

Radio text
Displays the radio text information of the selected RDS station.
1. Press the MENU/CLOCK button.
2. Rotate \( \text{AM/FM} \) to select Settings, then press \( \text{AM/FM} \).
3. Rotate \( \text{AM/FM} \) to select RDS Settings, then press \( \text{AM/FM} \).
4. Rotate \( \text{AM/FM} \) to select Radio Text, then press \( \text{AM/FM} \).

Scan
Samples each of the strongest stations on the selected band for 10 seconds.
1. Press the MENU/CLOCK button.
2. Rotate \( \text{AM/FM} \) to select Scan, then press \( \text{AM/FM} \).

To turn off scan, press \( \text{AM/FM} \).
Playing a CD

Your audio system supports audio CDs, CD-Rs, and CD-RWs in either MP3 or WMA, or AAC*1 format. With the CD loaded, press the CD/AUX button.

*1: Only AAC format files recorded with iTunes are playable on this unit.
How to Select a File from a Folder with the Selector Knob (MP3/WMA/AAC)

1. Press to switch the display to a folder list.

2. Rotate to select a folder.

3. Press to display a list of tracks in that folder.

4. Rotate to select a track, then press .

NOTICE
Do not use CDs with adhesive labels. The label can cause the CD to jam in the unit.

WMA files protected by digital rights management (DRM) cannot be played. The audio system displays UNPLAYABLE FILE, then skips to the next file.

Text data appears on the display under the following circumstances:
- When you select a new folder, file, or track.
- When you change the audio mode to CD.
- When you insert a CD.

If you eject the CD but do not remove it from the slot, the system reloads the CD automatically after several seconds.
How to Select a Play Mode

You can select repeat, random, and scan modes when playing a track or file.

Available mode icons appear above the play mode buttons.

Press the button corresponding to the mode you want to select.

To turn off a play mode

Press the selected button.

Play Mode Buttons

Features

You can select repeat, random, and scan modes when playing a track or file.

Available mode icons appear above the play mode buttons.

Press the button corresponding to the mode you want to select.

How to Select a Play Mode

How to Select a Play Mode

Play Mode Menu Items

Repeat

Repeat One Folder (MP3/WMA/AAC):
Repeats all files in the current folder.

Repeat One Track:
Repeats the current track/file.

Random

Random in Folder (MP3/WMA/AAC):
Plays all files in the current folder in random order.

Random All:
Plays all tracks/files in random order.

Scan

Scan Folders (MP3/WMA/AAC):
Provides 10-second sampling of the first file in each of the main folders.

Scan Tracks:
Provides 10-second sampling of all tracks on the CD (all files in the current folder in MP3, WMA, or AAC).

You can also select a play mode by pressing the MENU/CLOCK button.

Rotate  to select Play Mode, then press .

Rotate  to select a mode, then press .

To turn it off, rotate  to select Normal Play, then press .
Playing an iPod

Connect the iPod using your dock connector to the USB port, then press the CD/AUX button.

USB Indicator
Appears when an iPod is connected.

CD/AUX Button
Press to select iPod (if connected).

VOL/○ (Power/volume) Knob
Press to turn the audio system on and off.
Turn to adjust the volume.

[Seek/Skip] Buttons
Press [Seek/Skip] to change songs.
Press and hold to move rapidly within a song.

Selector Knob
Turn to change songs.
Press and turn to select an item, then press to set your selection.

MENU/CLOCK Button
Press to display the menu items.

(Back) Button
Press to go back to the previous display or cancel a setting.
How to Select a Song from the iPod Music List with the Selector Knob

1. Press 🎧 to display the iPod music list.

2. Rotate 📱 to select a category.

3. Press 🎧 to display a list of items in the category.

4. Rotate 📱 to select an item, then press 🎧.
   ➤ Press 🎧 and rotate 📱 repeatedly until a desired item you want to listen is displayed.

Playing an iPod

Available operating functions vary on models or versions. Some functions may not be available on the vehicle’s audio system.

If there is a problem, you may see an error message on the audio display.

🎵 iPod/USB Flash Drive P. 232
How to Select a Play Mode

You can select repeat and shuffle modes when playing a song.

Available mode icons appear above the play mode buttons. Press the button corresponding to the mode you want to select.

■ To turn off a play mode

Press the selected button.

Play Mode Menu Items

- **Shuffle Album:** Plays all available albums in a selected category (playlists, artists, albums, songs, genres, or composers) in random order.
- **Shuffle All:** Plays all available songs in a selected category (playlists, artists, albums, songs, genres, or composers) in random order.
- **Repeat One Track:** Repeats the current song.

You can also select a play mode by pressing the **MENU/CLOCK** button.

Rotate to select **Play Mode**, then press .

Rotate to select a mode, then press .

To turn it off, rotate to select **Normal Play**, then press .
Playing a USB Flash Drive

Your audio system reads and plays sound files on a USB flash drive in either MP3, WMA or AAC*1 format.

Connect your USB flash drive to the USB port, then press the CD/AUX button.

*1: Only AAC format files recorded with iTunes are playable on this unit.
How to Select a File from a Folder with the Selector Knob

1. Press 🎧 to display a folder list.
2. Rotate 🎧 to select a folder.
3. Press 🎧 to display a list of files in that folder.
4. Rotate 🎧 to select a file, then press 🎧.

Playing a USB Flash Drive

Use the recommended USB flash drives.

General Information on the Audio System P. 235

Files in WMA format protected by digital rights management (DRM) cannot be played. The audio system displays UNPLAYABLE FILE, and then skips to the next file.

If there is a problem, you may see an error message on the audio/information screen.

iPod/USB Flash Drive P. 232

You can also select a play mode by pressing the MENU/CLOCK button. Rotate to select Play Mode, then press . Rotate to select a mode, then press . To turn it off, rotate to select Normal Play, then press .
Playing Bluetooth® Audio

Your audio system allows you to listen to music from your Bluetooth-compatible phone. This function is available when the phone is paired and connected to the vehicle’s Bluetooth® HandsFreeLink® (HFL) system.

Phone Setup P. 266

Not all Bluetooth-enabled phones with streaming audio capabilities are compatible with the system. For a list of compatible phones:
- U.S.: Visit www.handsfreelink.honda.com, or call 1-888-528-7876.
- Canada: Visit www.handsfreelink.ca, or call 1-888-528-7876.

In some states, it may be illegal to perform some data device functions while driving.

Only one phone can be used with HFL at a time. When there are more than two paired phones in the vehicle, the first paired phone the system finds is automatically connected.

If more than one phone is paired to the HFL system, there will be a delay before the system begins to play.

In some cases, the name of the artist, album, or track may not appear correctly.

Some functions may not be available on some devices.
To Play Bluetooth® Audio Files

1. Make sure that your phone is paired and connected to HFL.
2. Press the CD/AUX button until the Bluetooth Audio Source is selected.

If the phone is not recognized, another HFL-compatible phone, which is not compatible for Bluetooth® Audio, may already be connected.

To pause or resume a file
Press a Play or Pause button to select a mode.

To play the audio files, you may need to operate your phone. If so, follow the phone maker's operating instructions.

The pause function may not be available on some phones.

If any audio device is connected to the auxiliary input jack or USB port, you may need to press the CD/AUX button repeatedly to select the Bluetooth® Audio system.

Switching to another mode pauses the music playing from your phone.
How to Select a Song from the Music Search List with the Selector Knob

1. Press \( \text{ } \) to display the music search list.

2. Rotate \( \text{ } \) to select a category.

3. Press \( \text{ } \) to display a list of items in the category.

4. Rotate \( \text{ } \) to select an item, then press \( \text{ } \).
   - Press \( \text{ } \) and rotate \( \text{ } \) repeatedly until a desired item you want to listen is displayed.

Depending on the Bluetooth® device you connect, some or all of the categories may not be displayed.
Audio System Basic Operation

To use the audio system function, the ignition switch must be in ACCESSORY \( \text{q} \) or ON \( \text{w} \)*1.

- Select to go to the HOME screen.
- Touch to select any mode. The available mode includes Change Source, Station List, Save Preset, Radio Text, Music Search, and play modes. Play modes can be also selected from Scan, Random/Repeat, and so on.
- Select to go back to the previous display when it is displayed.

- button: Press to change the audio/information screen brightness. Press \( \) once and select \( \) or \( \) to make an adjustment. Each time you press \( \), the mode switches between the daytime mode, nighttime mode and OFF mode.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Audio/Information Screen

Displays the audio status and wallpaper. From this screen, you can go to various setup options.

Switching the Display

Press the (display) button on the steering wheel to change the display.

- Use simple gestures — including touching, swiping, and scrolling — to operate certain audio functions.
- Wearing gloves may limit or prevent touchscreen response.
- You can use the microfiber soft cleaning cloth to remove dust or fingerprints from the touchscreen.
Using the HOME screen

Select HOME to go to the HOME screen. Select Phone, Info, Audio, Settings, or HondaLink.

- **Phone**
  Shows the HFL information.
  - *Bluetooth® HandsFreeLink®* P. 283

- **Info**
  Shows the Trip Computer, Clock/Wallpaper, Voice Info, or System/Device Information.

Enters the customizing menu screen.
  📚 Customized Features P. 238

HondaLink Apps
Connects with your smartphone*1 to play personalized music, information, and social media streams.
  📚 Smartphone Apps P. 229

*1: Available on specific phones only. Check handsfreelink.honda.com for compatible phones and hondalink.com for feature details.
■ Wallpaper Setup
You can change, store, and delete the wallpaper on the audio/information screen.

■ Import wallpaper
You can import up to five images, one at a time, for wallpaper from a USB flash drive.

1. Connect the USB flash drive to the USB port.
   ![USB Port(s) P. 177](USB Port(s) P. 177)
2. Select Settings to go to the Settings screen.
3. Select Info.
4. Select Clock/Wallpaper Type, then the Wallpaper tab.
5. Select Add New.
   ▶ The picture name is displayed on the list.
6. Select a desired picture.
   ▶ The preview is displayed on the left side on the screen.
7. Select Start Import to save the data.
   ▶ Then the display will return to the wallpaper list.

Wallpaper Setup
- When importing wallpaper files, the image must be in the USB flash drive's root directory. Images in a folder cannot be imported.
- The file name must be fewer than 256 characters.
- The file format of the image that can be imported is BMP (bmp) or JPEG (jpg).
- The individual file size limit is 5 MB.
- The maximum image size is 4,096 x 4,096 pixels. If the image size is less than 800 x 480 pixels, the image is displayed in the middle of the screen with the extra area appearing in black.
- Up to 5 files can be selected.
- If the USB flash drive does not have any pictures, the No files detected message appears.
Audio System Basic Operation
Audio/Information Screen

- **Select wallpaper**
  1. Select **Settings** to go to the **Settings** screen.
  2. Select **Info**.
  3. Select **Clock/Wallpaper Type**, then the **Wallpaper** tab.
     - The screen changes to the wallpaper list.
  4. Select a desired wallpaper.
     - The preview is displayed on the left side on the screen.
     - The pop-up menu appears on the screen.
  5. Select **Set**.
     - The display will return to the wallpaper list.

- **Delete wallpaper**
  1. Select **Settings** to go to the **Settings** screen.
  2. Select **Info**.
  3. Select **Clock/Wallpaper Type**, then the **Wallpaper** tab.
     - The screen changes to the wallpaper list.
  4. Select a wallpaper that you want to delete.
     - The preview is displayed on the left side on the screen.
     - The pop-up menu appears on the screen.
  5. Select **Delete**.
     - The confirmation message will appear.
  6. Select **Yes** to delete completely.
     - The display will return to the wallpaper list.

**Wallpaper Setup**

From the pop-up menu, select **Preview** to see a preview at full-size screen.

To go back to the previous screen, select **OK**, or **BACK**.

When the file size is large, it takes a while to be previewed.

To delete all wallpapers you add, select **Delete All**, then **Yes**.
Adjusting the Sound

1. Select HOME.
2. Select Settings.
3. Select Audio.
4. Select Sound.

Select the tabs to adjust the following choices:
BASS, TREBLE, FADER, BALANCE, SVC
(Speed-sensitive Volume Compensation)

Adjusting the Sound

The SVC has four modes: Off, Low, Mid, and High.
SVC adjusts the volume level based on the vehicle speed. As you go faster, audio volume increases. As you slow down, audio volume decreases.
Display Setup

You can change the brightness or color theme of the audio/information screen.

### Changing the Screen Brightness

1. Select HOME.
2. Select **Settings** to go to the **Settings** screen.
3. Select **System**.
4. Select the **Display** tab.
5. Select **Display Settings**.
6. Select the setting you want.
7. Select **OK**.

### Changing the Screen’s Color Theme

1. Select HOME.
2. Select **Settings** to go to the **Settings** screen.
3. Select **System**.
4. Select the **Display** tab.
5. Select **Background Color**.
6. Select the setting you want.
7. Select **OK**.

You can change the **Contrast** and **Black Level** settings in the same manner.
Playing the AM/FM Radio

*1: Some or all of the lists may not be displayed.
Preset Memory
To store a station:
1. Tune to the selected station.
2. Select MENU.
3. Select Save Preset.
4. Select the preset number you want to store that station.

Radio Data System (RDS)
Provides text data information related to your selected RDS-capable FM station.

To find an RDS station from Station List
1. Select MENU while listening to an FM station.
2. Select Station List.
3. Select the station.

Manual update
Updates your available station list at any time.
1. Select MENU while listening to an FM station.
2. Select Station List.
3. Select Refresh.

Playing the AM/FM Radio
The ST indicator appears on the display indicating stereo FM broadcasts.
Stereo reproduction in AM is not available.

Switching the Audio Mode
Press the SOURCE button on the steering wheel or select SOURCE on the list.

Audio Remote Controls P. 180
You can also switch the mode by selecting Change Source on the MENU screen.

You can store 6 AM stations and 12 FM stations into the preset memory.

Radio Data System (RDS)
When you select an RDS-capable FM station, the RDS automatically turns on, and the frequency display changes to the station name. However, when the signals of that station become weak, the display changes from the station name to the frequency.
Audio System Basic Operation

Playing the AM/FM Radio

**Radio text**
Displays the radio text information of the selected RDS station.
1. Select **MENU**.
2. Select **View Radio Text**.

**Scan**
Samples each of the strongest stations on the selected band for 10 seconds.
1. Select **MENU**.
2. Select **Scan**.
To turn off scan, select **Cancel**.
Playing a CD

Your audio system supports audio CDs, CD-Rs, and CD-RWs in either MP3 or WMA, or AAC*1 format. With the CD loaded, select the CD mode.

*1: Only AAC format files recorded with iTunes are playable on this unit.
*2: Some or all of the lists may not be displayed.
How to Select a File from the Music Search List (MP3/WMA/AAC)

1. Select MENU and select Music Search.

2. Select a folder.

3. Select a track.

Playing a CD

NOTICE
Do not use CDs with adhesive labels. The label can cause the CD to jam in the unit.

WMA files protected by digital rights management (DRM) cannot be played. The audio system displays Unplayable File, then skips to the next file.

Text data appears on the display under the following circumstances:
- When you select a new folder, file, or track.
- When you change the audio mode to CD.
- When you insert a CD.

If you eject the CD but do not remove it from the slot, the system reloads the CD automatically after several seconds.
How to Select a Play Mode

You can select scan, repeat, and random modes when playing a track or file.

1. Select **MENU**.
2. Select **Scan** or **Random/Repeat**.
3. Select a mode.

■ To turn off a play mode

1. Select **MENU**.
2. Select the mode you want to turn off.

Play Mode Menu Items

**Scan**

- **Scan Folders (MP3/WMA/AAC)**: Provides 10-second sampling of the first file in each of the main folders.
- **Scan Tracks**: Provides 10-second sampling of all tracks on the CD (all files in the current folder in MP3, WMA, or AAC).

**Random/Repeat**

- **Repeat Folder (MP3/WMA/AAC)**: Repeats all files in the current folder.
- **Repeat Track**: Repeats the current track/file.
- **Random in Folder (MP3/WMA/AAC)**: Plays all files in the current folder in random order.
- **Random All Tracks**: Plays all tracks/files in random order.
Playing an iPod

Connect the iPod using your dock connector to the USB port, then select the iPod mode.

USB Port(s) P. 177

*1: Some or all of the lists may not be displayed.
How to Select a Song from the Music Search List

1. Select MENU and select Music Search.
2. Select the items on that menu.
How to Select a Play Mode

You can select repeat and shuffle modes when playing a file.

1. Select MENU.
2. Select Shuffle/Repeat.
3. Select a mode.

To turn off a play mode

1. Select MENU.
2. Select the mode you want to turn off.
Playing Internet Radio

Connect a compatible phone through Bluetooth®.

Phone Setup  P. 291

You can also connect the phone using your dock connector to the USB port. Select Source to select Pandora mode.

Pandora®, the Pandora logo, and the Pandora trade dress are trademarks or registered trademarks of Pandora Media, Inc., used with permission. Pandora is currently available exclusively in the United States.

To find out if your phone is compatible with this feature, visit www.handsfreelink.honda.com, or call 1-888-528-7876.

To use this service in your vehicle, the Pandora® app must first be installed on your phone. Visit www.pandora.com for more information.

*1: Some or all of the lists may not be displayed.
You can operate some of the Pandora® menu items from your vehicle's audio system. The available items are:

- Bookmark
- Station List
- New Station
- Change Source
- Sound

### Operating a menu item

1. Select MENU.
2. Select an item.

### Pandora® Menu

Pandora® is free, personalized radio that plays music and comedy you’ll love. Just start with the name of one of your favorite artists, songs, comedians or composers and Pandora® will create a custom station that plays similar tracks. Pandora® also features hundreds of genre stations ranging from Dubstep to Smooth Jazz to Power Workout.

If you cannot operate Pandora® through the audio system, it may be streaming through Bluetooth® Audio. Make sure Pandora® mode on your audio system is selected.

### Changing Stations

To change stations, activate the Pandora® menu, select Station List, and then select a new station.

Available operating functions vary on software versions. Some functions may not be available on the vehicle’s audio system.

If there is a problem, you may see an error message on the audio/information screen.

Pandora® may limit the total number of skips allowed on the service. If you dislike a track after the skip limit has been reached, your feedback will be saved but the current track will continue to play.
Playing a USB Flash Drive

Your audio system reads and plays sound files on a USB flash drive in either MP3, WMA or AAC *1 format.
Connect your USB flash drive to the USB port, then select the USB mode.

*1: Only AAC format files recorded with iTunes are playable on this unit.
*2: Some or all of the lists may not be displayed.
How to Select a File from the Music Research List

1. Select MENU and select Music Search.

2. Select a folder.

3. Select a track.

Playing a USB Flash Drive

Use the recommended USB flash drives.

General Information on the Audio System P. 235

Files in WMA format protected by digital rights management (DRM) cannot be played. The audio system displays Unplayable File, and then skips to the next file.

If there is a problem, you may see an error message on the audio/information screen.

iPod/USB Flash Drive P. 232

Continued
Audio System Basic Operation
Playing a USB Flash Drive

How to Select a Play Mode

You can select scan, repeat, and random modes when playing a file.

1. Select MENU.
2. Select Scan or Random/Repeat.
3. Select a mode.

To turn off a play mode
1. Select MENU.
2. Select the mode you want to turn off.

Scan and Repeat Features

Scan Folders: Provides 10-second sampling of the first file in each of the main folders.
Scan Tracks: Provides 10-second sampling of all files in the current folder.
Repeat Folder: Repeats all files in the current folder.
Repeat Track: Repeats the current file.
Random in Folder: Plays all files in the current folder in random order.
Random All Tracks: Plays all files in random order.
Playing Bluetooth® Audio

Your audio system allows you to listen to music from your Bluetooth-compatible phone.

This function is available when the phone is paired and connected to the vehicle’s Bluetooth® HandsFreeLink® (HFL) system.

Phone Setup P. 291

Not all Bluetooth-enabled phones with streaming audio capabilities are compatible with the system. For a list of compatible phones:

- U.S.: Visit www.handsfreelink.honda.com, or call 1-888-528-7876.
- Canada: Visit www.handsfreelink.ca, or call 1-888-528-7876.

In some states, it may be illegal to perform some data device functions while driving.

Only one phone can be used with HFL at a time. When there are more than two paired phones in the vehicle, the first paired phone the system finds is automatically linked.

If more than one phone is paired to the HFL system, there may be a delay before the system begins to play.

In some cases, the name of the artist, album, or track may not appear correctly.

A No Device Connected message may be displayed if:

- The phone is not linked to HFL.
- The phone is not turned on.
- The phone is not in the vehicle.
- An incompatible phone is connected.

The following functions may not be available on some devices:

- Pause function
- Group selection

*1: Depending on the Bluetooth device you connect, some or all of the lists may not be displayed.
Audio System Basic Operation

Playing Bluetooth® Audio

■ To Play Bluetooth® Audio Files

1. Make sure that your phone is paired and connected to HFL.
2. Press the Bluetooth® Audio mode.

If the phone is not recognized, another HFL-compatible phone, which is not compatible for Bluetooth® Audio, may already be connected.

■ To pause or resume a file
Select the play icon or pause icon.

■ Searching for Music

1. Select MENU.
2. Select Music Search.
3. Select a search category (e.g., Albums).
4. Select an item.
   ► The selection begins playing.

To Play Bluetooth® Audio Files

To play the audio files, you may need to operate your phone. If so, follow the phone maker’s operating instructions.

Switching to another mode pauses the music playing from your phone.

Searching for Music

Depending on the Bluetooth device you connect, some or all of the lists may not be displayed.
Playing a Video Using the HDMI®

Your audio system allows you to play videos from an HDMI®-compatible device when parked.

Connect the device, using an HDMI® cable, then select the HDMI® mode.

* Not available on all models
Audio System Basic Operation

Changing the Screen Aspect

1. Select HOME.
2. Select Settings to go to the Settings screen.
3. Select Audio.
4. Select Aspect Ratio Adjustment.
5. Select the setting you want.
6. Select OK.

Playing a Video Using the HDMI®

This feature is limited while driving. To play videos, stop your vehicle and apply the parking brake.
Smartphone Apps

You can connect a compatible smartphone to the system to enable integration between the smartphone’s approved apps and the vehicle. This allows you to control the phone through the vehicle display. To check smartphone compatibility, download the HondaLink app, and view connection instructions, visit handsfreelink.honda.com. For the latest apps and feature details, check hondalink.com.

- Smartphone Apps
  - Park in a safe place before connecting your phone and while operating the displayed apps.
  - Not all phones and apps are compatible with the system. The system does not display all the available apps on smartphone, and some apps need to be preinstalled. Ask a dealer for details.
  - You need to switch the Bluetooth connection to your smartphone if another electronic device is connected.

The following may vary by phone type:
- How to connect a smartphone to the system.
- Apps that can be operated on the screen.
- Display response time/update time.
We do not support every app operation on the display audio.
Ask the app provider for any questions on the app’s features.
Siri Eyes Free

You can talk to Siri using the Talk button on the steering wheel when your iPhone is paired to Bluetooth® HandsFreeLink®.

Phone Setup P. 291

Using Eyes Free

While in Eyes Free:
The display remains the same. No feedback or commands appear.

(Talk) button:
Press and hold until the display changes as shown.

(Hang-up/back) button:
Press to deactivate Siri.

Siri is a trademark of Apple Inc.

Check Apple Inc. website for features available for Siri.

When operating the vehicle, only use Siri through the Talk button.

Some commands work only on specific phone features or apps.

Recommended CDs

- Use only high-quality CD-R or CD-RW discs labeled for audio use.
- Use only CD-R or CD-RW discs on which the recordings are closed.
- Play only standard round-shaped CDs.

The CD packages or jackets should have one of these marks.

- CDs with MP3, WMA, or AAC files
  - Some software files may not allow for audio play or text data display.
  - Some versions of MP3, WMA, or AAC formats may be unsupported.
■ Protecting CDs
Follow these precautions when handling or storing CDs:
• Store a CD in its case when it is not being played.
• When wiping a CD, use a soft clean cloth from the center to the outside edge.
• Handle a CD by its edge. Never touch either surface.
• Never insert foreign objects into the CD player.
• Keep CDs out of direct sunlight and extreme heat.
• Do not place stabilizer rings or labels on the CD.
• Avoid fingerprints, liquids, and felt-tip pens on the CD.

NOTICE
Do not insert a damaged CD. It may be stuck inside and damage the audio unit.

Examples:
- Bubbled, wrinkled, labeled, and excessively thick CDs
- Damaged CDs
- Small CDs
- 3-inch (8-cm) CD
- Poor quality CDs
- Using Printer Label Kit
- Sealed with Plastic Ring
- With Label/ Sticker
- With Plastic Ring
- Printed Label Kit
- Chipped/ Cracked
- Warped
- Burrs

*1: Default Setting
Reset all the menu and customized settings as the factory defaults.

1. Select **HOME**.
2. Select **Settings**.
3. Select **System**.
   - Repeat the procedure to select the **Others** tab, then **Factory Data Reset**.
   - The confirmation message will appear.
4. Select **Yes** to reset the settings.
5. Select **Yes** again to reset the settings.
   - The confirmation message will appear. Select **OK**.

**Defaulting All the Settings**

When you transfer the vehicle to a third party, reset all settings to default and delete all personal data.

The following settings will be reset:
- Audio preset settings
- Phonebook entries
- Other display and personal settings.
Bluetooth® HandsFreeLink®

Models with navigation system
See the navigation system manual for how to operate the Bluetooth® HandsFreeLink®.

Models without navigation system
Bluetooth® HandsFreeLink® (HFL) allows you to place and receive phone calls using your vehicle’s audio system, without handling your cell phone.

Models with color audio system
Using HFL

HFL Buttons

(Talk) button: Press to call a number with a stored voice tag.
(Phone) button: Press to go directly to the Phone screen.
Selector knob: Rotate to select an item on the screen, then press .

(Pick-up) button: Press to go directly to the Phone screen or to answer an incoming call.
(Hang-up/Back) button: Press to end a call or to cancel a command.

Voice control tips
• Aim the vents away from the ceiling and close the windows, as noise coming from them may interfere with the microphone.
• Press and release the button when you want to call a number using a stored voice tag. Speak clearly and naturally after a beep.
• If the microphone picks up voices other than yours, the command may be misinterpreted.
• To change the volume level, use the audio system’s volume knob or the remote audio controls* on the steering wheel.

State or local laws may prohibit the operation of handheld electronic devices while operating a vehicle.

If you receive a call while using the audio system, the system resumes its operation after ending the call.

Up to 20 speed dial entries can be stored. If there is no entry in the system, Speed Dial is disabled.

Up to 20 call histories can be stored. If there is no call history, Call History is disabled.

* Not available on all models

To use HFL, you need a Bluetooth-compatible cell phone. For a list of compatible phones, pairing procedures, and special feature capabilities:
• U.S.: Visit www.handsfreelink.honda.com, or call 1-888-528-7876.
• Canada: Visit www.handsfreelink.ca, or call 1-888-528-7876.

Voice control tips
• Aim the vents away from the ceiling and close the windows, as noise coming from them may interfere with the microphone.
• Press and release the button when you want to call a number using a stored voice tag. Speak clearly and naturally after a beep.
• If the microphone picks up voices other than yours, the command may be misinterpreted.
• To change the volume level, use the audio system’s volume knob or the remote audio controls* on the steering wheel.

State or local laws may prohibit the operation of handheld electronic devices while operating a vehicle.

If you receive a call while using the audio system, the system resumes its operation after ending the call.

Up to 20 speed dial entries can be stored. If there is no entry in the system, Speed Dial is disabled.

Up to 20 call histories can be stored. If there is no call history, Call History is disabled.

* Not available on all models
HFL Status Display

The audio/information screen notifies you when there is an incoming call.

- Battery Level Status
- Signal Strength
- Roam Status
- Bluetooth Indicator
  Appears when your phone is connected to HFL.
- HFL Mode
- Call Name

Limitations for Manual Operation

Certain manual functions are disabled or inoperable while the vehicle is in motion. You cannot select a grayed-out option until the vehicle is stopped.

Only previously stored speed dial entries can be called using voice commands while the vehicle is in motion.

Bluetooth® HandsFreeLink®

Bluetooth® Wireless Technology
The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc., and any use of such marks by Honda Motor Co., Ltd., is under license. Other trademarks and trade names are those of their respective owners.

HFL Limitations
An incoming call on HFL will interrupt the audio system when it is playing. It will resume when the call is ended.

HFL Status Display

The information that appears on the audio/information screen varies between phone models. You can change the system language to English, French, or Spanish.

Customized Features P. 238
**Bluetooth® HandsFreeLink®** HFL Menus

**HFL Menus**

The ignition switch must be in ACCESSORY or ON to use HFL.

To use HFL, you must first pair your Bluetooth-compatible cell phone to the system while the vehicle is parked.

Some functions are limited while driving. A message appears on the screen when the vehicle is moving and the operation is canceled.

Select a phone number from the call history to store as a speed dial number.

Select a phone number from the phonebook to store as a speed dial number.

Enter a phone number to store as a speed dial number.

Features

- **Ringtone**
  - **Fixed**: Select the ring tone stored in HFL.

- **Mobile Phone**: Select the ring tone stored in the connected cell phone.

- **Caller ID Info**
  - **Name Priority**: Prioritize the caller’s name as the caller ID.
  - **Number Priority**: Prioritize the caller’s phone number as the caller ID.

- **System Clear**: Clear the system of all paired phones, phonebook entries, and security codes.
To pair a cell phone (No phone has been paired to the system)

1. Press the button or the button.
2. Rotate to select Yes, then press .
3. Make sure your phone is in search or discoverable mode, then press .
   HFL automatically searches for a Bluetooth® device.
4. When your phone appears on the list, select it by pressing .
   If your phone doesn’t appear, select Phone Not Found? and search for Bluetooth® devices using your phone.
   From your phone, select HandsFreeLink.
5. The system gives you a pairing code on the audio/information screen.
   Confirm if the pairing code on the screen and your phone match.
   This may vary by phone.
6. A notification appears on the screen if pairing is successful.
To Change the currently paired phone

1. Press the \( \text{\textbullet} \) button or the \( \text{\textbullet} \) button.
2. Rotate \( \text{\textbullet} \) to select Phone Setup, then press \( \text{\textbullet} \).
3. Rotate \( \text{\textbullet} \) to select Bluetooth Setup, then press \( \text{\textbullet} \).
4. Rotate \( \text{\textbullet} \) to select Connect a Phone, then press \( \text{\textbullet} \).
   ▶ The screen changes to a device list.
5. Rotate \( \text{\textbullet} \) to select a desired device name, then press \( \text{\textbullet} \).
   ▶ HFL disconnects the connected phone and starts searching for another paired phone.

Phone Setup

You can pair a phone in the following steps.
Phone Setup \( \rightarrow \) Bluetooth Setup \( \rightarrow \) Add New Device \( \rightarrow \) confirmation message \( \rightarrow \) Yes \( \rightarrow \) confirmation message \( \rightarrow \) OK \( \rightarrow \) Select a Phone \( \rightarrow \) Pairing code.
■ To change the pairing code setting
1. Press the button or the button.
2. Rotate to select Phone Setup, then press .
3. Rotate to select Bluetooth Setup, then press .

4. Rotate to select Pass-Key, then press .

5. Input a new pairing code, then press .
To delete a paired phone

1. Press the button or the button.
2. Rotate to select **Phone Setup**, then press.
3. Rotate to select **Bluetooth Setup**, then press.

4. Rotate to select **Delete Device**, then press.
   - The screen changes to a device list.
5. Rotate to select a phone you want to delete, then press.

6. A confirmation message appears on the screen. Rotate to select **Yes**, then press.
Bluetooth® HandsFreeLink® HFL Menus

### Ring Tone

You can change the ring tone setting.

1. Press the button or the button.
2. Rotate to select Phone Setup, then press .
3. Rotate to select Ringtone, then press .
4. Rotate to select Fixed or Mobile Phone, then press .

<table>
<thead>
<tr>
<th>Ring Tone</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Fixed</strong>: The fixed ring tone sounds from the speakers.</td>
</tr>
<tr>
<td><strong>Mobile Phone</strong>: The ring tone stored in the connected cell phone sounds from the speakers.</td>
</tr>
</tbody>
</table>

### Caller's ID Information

You can select a caller's information to be displayed when you have an incoming call.

1. Press the button or the button.
2. Rotate to select Phone Setup, then press .
3. Rotate to select Caller ID Info, then press .
4. Rotate to select a mode you want, then press .

<table>
<thead>
<tr>
<th>Caller's ID Information</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Name Priority</strong>: A caller’s name is displayed if it is stored in the phonebook.</td>
</tr>
<tr>
<td><strong>Number Priority</strong>: A caller’s phone number is displayed.</td>
</tr>
</tbody>
</table>
To Clear the System

Pairing codes, paired phones, all stored voice tags, all speed dial entries, all call history data, and all imported phonebook data are erased.

1. Press the button or the button.
2. Rotate to select Phone Setup, then press .
3. Rotate to select System Clear, then press .
4. Rotate to select Yes, then press .

5. A confirmation message appears on the screen. Rotate to select Yes, then press .

Continued
When your phone is paired, the contents of its phonebook and call history are automatically imported to HFL.

When you select a person from the list in the cellular phonebook, you can see up to three category icons. The icons indicate what types of numbers are stored for that name.

If a name has four or more numbers, ... appears instead of category icons.

On some phones, it may not be possible to import the category icons to HFL.

The phonebook is updated after every connection. Call history is updated after every connection or call.
### Speed Dial

Up to 20 speed dial numbers can be stored per phone.

To store a speed dial number:
1. Press the "button or the button.
2. Rotate to select Speed Dial, then press .
3. Rotate to select Add New, then press .
4. Rotate to select a place to choose a number from, then press .
   - From Call History: Select a number from the call history.
   - From Phonebook: Select a number from the connected cell phone’s imported phonebook.
   - From Phone Number: Input the number manually.
5. When the speed dial is successfully stored, you are asked to create a voice tag for the number. Rotate to select Yes or No, then press .
6. Using the button, follow the prompts to say the name for the speed dial entry.

---

**Continued**
To edit a speed dial
1. Press the button or the button.
2. Rotate to select Phone Setup, then press .
3. Rotate to select Speed Dial, then press .
4. Select an existing speed dial entry.
5. Rotate to select Change Speed Dial, then press .
6. Select a new speed dial number, then press .
To add a voice tag to a stored speed dial number
1. Press the button or the button.
2. Rotate to select Phone Setup, then press .
3. Rotate to select Speed Dial, then press .
4. Select an existing speed dial entry.
5. Rotate to select Store Voice Tag, then press .
6. Using the button, follow the prompts to complete the voice tag.

To change a voice tag
1. Press the button or the button.
2. Rotate to select Phone Setup, then press .
3. Rotate to select Speed Dial, then press .
4. Select an existing speed dial entry.
5. Rotate to select Change Voice Tag, then press .
6. Using the button, follow the prompts to complete the voice tag.
To delete a voice tag
1. Press the button or the button.
2. Rotate to select Phone Setup, then press .
3. Rotate to select Speed Dial, then press .
4. Select an existing speed dial entry.
5. Rotate to select Delete Voice Tag, then press .
   ▶ A confirmation message appears on the screen. Rotate to select Yes, then press .

To delete a speed dial number
1. Press the button or the button.
2. Rotate to select Phone Setup, then press .
3. Rotate to select Speed Dial, then press .
4. Select an existing speed dial entry.
5. Rotate to select Delete Speed Dial, then press .
   ▶ A confirmation message appears on the screen. Rotate to select Yes, then press .
Making a Call

You can make calls by inputting any phone number, or by using the imported phonebook, call history, speed dial entries, or redial.

Any voice-tagged speed dial entry can be dialed by voice from any screen. Press the button and follow the prompts.

The maximum range between your phone and vehicles is 30 feet (10 meters).

Once a call is connected, you can hear the voice of the person you are calling through the audio speakers.
To make a call using the imported phonebook
When your phone is paired, the contents of its phonebook are automatically imported to HFL.
1. Press the button or the button.
2. Rotate to select Phonebook, then press .
3. The phonebook is stored alphabetically. Rotate to select the initial, then press .
4. Rotate to select a name, then press .
5. Rotate to select a number, then press .
   ▶ Dailing starts automatically.

To make a call using a phone number
1. Press the button or the button.
2. Rotate to select Dial, then press .
3. Rotate to select a number, then press .
4. Rotate to select then press .
   ▶ Dailing starts automatically.

To make a call using the imported phonebook
This function is disabled while the vehicle is moving. However, you can call a stored voice-tagged speed dial number using voice commands.
▶ Limitations for Manual Operation P. 261
▶ Speed Dial P. 273

To make a call using a phone number
This function is disabled while the vehicle is moving. However, you can call a stored voice-tagged speed dial number using voice commands.
▶ Limitations for Manual Operation P. 261
▶ Speed Dial P. 273
To make a call using redial
1. Press the button or the button.
2. Rotate to select Redial, then press .
   ►Dialing starts automatically.

To make a call using the call history
Call history is stored by Dialed Calls, Received Calls, and Missed Calls.
1. Press the button or the button.
2. Rotate to select Call History, then press .
3. Rotate to select Dialed Calls, Received Calls, or Missed Calls, then press .
4. Rotate to select a number, then press .
   ►Dialing starts automatically.
To make a call using a speed dial entry

1. Press the button or the button.
2. Rotate to select Speed Dial, then press .
3. Rotate to select a number, then press .
   - Dialing starts automatically.

To make a call using a speed dial entry

On the Phone screen, the first six speed dials on the list can be directly selected by pressing the corresponding audio preset buttons (1-6).

Select Others to view another paired phone’s speed dial list.

When a voice tag is stored, press the button and call the number using voice commands.

   Speed Dial P. 273

Any voice-tagged speed dial entry can be dialed by voice from any screen. Press the button and follow the prompts.
When there is an incoming call, an audible notification sounds and the **Incoming Call** screen appears.

Press the \( \text{Answer} \) button to answer the call. Press the \( \text{Ignore} \) button to decline or end the call.

**Call Waiting**

Press the \( \text{Answer} \) button to put the current call on hold to answer the incoming call. Press the \( \text{Answer} \) button again to return to the current call. Select **Ignore** to ignore the incoming call if you do not want to answer it. Press the \( \text{Ignore} \) button if you want to hang up the current call.

You can select the icons on the audio/information screen instead of the \( \text{Answer} \) and \( \text{Ignore} \) buttons. Rotate \( \text{NR} \) to select the icon, then press \( \text{NR} \).
The following options are available during a call.

**Swap Call:** Put the current call on hold to answer the incoming call.

**Mute:** Mute your voice.

**Transfer Call:** Transfer a call from HFL to your phone.

**Dial Tones:** Send numbers during a call. This is useful when you call a menu-driven phone system.

1. To view the available options, press the button.
2. Rotate to select the option, then press .
   - The check box is checked when **Mute** is selected. Select **Mute** again to turn it off.
Bluetooth® HandsFreeLink®

Models with navigation system
See the navigation system manual for how to operate the Bluetooth® HandsFreeLink®.

Models without navigation system
Bluetooth® HandsFreeLink® (HFL) allows you to place and receive phone calls using your vehicle's audio system, without handling your cell phone.

Models with display audio system

Using HFL

HFL Buttons

To use HFL, you need a Bluetooth-compatible cell phone. For a list of compatible phones, pairing procedures, and special feature capabilities:
• U.S.: Visit www.handsfreelink.honda.com, or call 1-888-528-7876.
• Canada: Visit www.handsfreelink.ca, or call 1-888-528-7876.

To use HFL, the Bluetooth On/Off Status setting must be On.

Voice control tips
• Press and release the button when you want to call a number using a stored voice tag, a phonebook, name or a number. Speak clearly and naturally after a beep.
• If the microphone picks up voices other than yours, the command may be misinterpreted.
• To change the volume level, use the audio system’s VOL (Volume) or use the remote audio controls on the steering wheel.

State or local laws may prohibit the operation of handheld electronic devices while operating a vehicle.

Continued
Using HFL

(Pick-up) button: Press to go directly to the Phone screen, or to answer an incoming call.
(Hang-up/Back) button: Press to end a call, go back to the previous command, or to cancel a command.
(Talk) button: Press to call a number with a stored voice tag, a phonebook, name, or a number.
button: Press to display Speed Dial, Call History, or Redial on the Phone screen.
button: Press to select an item displayed on the Phone screen.
SOURCE button: Press to call a number listed in the selected item on the Phone screen.

To go to the Phone menu screen:
1. Select HOME.
2. Select Phone to switch the display to the Phone screen.
3. Select MENU.

HFL Limitations
An incoming call on HFL will interrupt the audio system when it is playing. It will resume when the call is ended.
The audio/information screen notifies you when there is an incoming call.

**Bluetooth Indicator**
Comes on when your phone is connected to HFL.

**Battery Level Status**

**Signal Strength**

**HFL Mode**

**Caller’s Name**

**Caller’s Number**

**Limitations for Manual Operation**

Certain manual functions are disabled or inoperable while the vehicle is in motion. You cannot select a grayed-out option until the vehicle is stopped.

Only previously stored speed dial entries with voice tags, phone book names, or numbers can be called using voice commands while the vehicle is in motion.

**Speed Dial** P. 298

You can change the system language to English, French, or Spanish.

**Customized Features** P. 238
HFL Menus

The ignition switch must be in ACCESSORY or ON to use HFL.

1. Select HOME.
2. Select Settings.
3. Select Phone Settings.

To use HFL, you must first pair your Bluetooth-compatible mobile phone to the system while the vehicle is parked.

Some functions are limited while driving. A message appears on the screen when the vehicle is moving and the operation is canceled.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

*2: Appears only when a phone is connected to HFL.

## Phone Setup

### To pair a mobile phone (when there is no phone paired to the system)

1. Select **Phone**.
2. Select **Yes**.
3. Make sure your phone is in search or discoverable mode, then select **OK**.
   - HFL automatically searches for a Bluetooth device.
4. Select your phone when it appears on the list.
   - If your phone does not appear, you can select **Refresh** to search again.
   - If your phone still does not appear, select **Phone not found** and search for Bluetooth devices using your phone.
   - From your phone, select **HandsFreeLink**.
5. The system gives you a pairing code on the audio/information screen.
   - Confirm if the pairing code on the screen and your phone match. This may vary by phone.
6. A notification appears on the screen if pairing is successful.

### Phone Setup

Your Bluetooth-compatible phone must be paired to HFL before you can make and receive hands-free calls.

Phone Pairing Tips:
- You cannot pair your phone while the vehicle is moving.
- Up to six phones can be paired.
- Your phone’s battery may drain faster when it is paired to HFL.
- If your phone is not ready for pairing or not found by the system, the system will return to the previous screen.
### Bluetooth® HandsFreeLink® HFL Menus

#### Changing the currently paired phone
1. Go to the **Phone settings** screen.  
   - **Phone settings screen** P. 286
2. Select **Connect Phone**.
3. Select a phone to connect.
   - HFL disconnects the current phone and starts searching for another paired phone.

#### To change the pairing code setting
1. Select **HOME**.
2. Select **Settings**.
3. Select **Bluetooth**.
4. Select the **Bluetooth** tab.
5. Select **Edit Pairing Code**.
6. Select **Fixed** or **Random**.

### Changing the currently paired phone
If no other phones are found or paired when trying to switch to another phone, HFL will inform you that the original phone is connected again.

### To change the pairing code setting
The default pairing code is **0000** until you change the setting.
To create your own, select **Fixed**, and delete the current code, then enter a new one.

For a randomly generated pairing code each time you pair a phone, select **Random**.
To edit an already-paired phone name

1. Go to the Phone settings screen. [Phone settings screen P. 286]
2. Select the Phone tab.
3. Select Bluetooth Device List.
4. Select a paired phone you want to edit.
5. Select Edit Device Name.
6. Edit the name and select OK.
7. A notification appears if the change is successful.
To delete a paired phone
1. Go to the Phone settings screen.
   \[\text{Phone settings screen P. 286}\]
2. Select the Phone tab.
3. Select Bluetooth Device List.
4. Select a phone you want to delete.
5. Select Delete This Device.
6. You will receive a confirmation message on the screen. Select Yes.
7. A notification appears if the deletion is successful.
To turn on or off the text/e-mail function
1. Go to the Phone settings screen. Phone settings screen P. 286
2. Select the Text/Email tab, then Enable Text/Email.
   ▶ A pop-up menu appears on the screen.
3. Select On or Off.

To turn on or off the text/e-mail notice
1. Go to the Phone settings screen. Phone settings screen P. 286
2. Select the Text/Email tab, then New Message Notification.
   ▶ A pop-up menu appears on the screen.
3. Select On or Off.
Ring Tone

You can change the ring tone setting.

1. Go to the Phone settings screen.
   - Phone settings screen P. 286
2. Select the Phone tab, then Ring Tone.
3. Select Fixed or Mobile Phone.

■ Ring Tone

Fixed: The fixed ring tone sounds from the speaker.
Mobile Phone: The ring tone stored in the connected cell phone is heard through the vehicle speakers.
**Automatic Import of Cellular Phonebook and Call History**

- **When Automatic Phone Sync is set to On:**
  When your phone is paired, the contents of its phonebook and call history are automatically imported to the system.

- **Changing the Automatic Phone Sync setting**
  1. Go to the Phone settings screen.
  2. Select the Phone tab, then Automatic Phone Sync.
  3. Select On or Off.

- **Automatic Import of Cellular Phonebook and Call History**

  When you select a person from the list in the cellular phonebook, you can see up to three category icons. The icons indicate what types of numbers are stored for that name.

  - **Pref**
  - **Home**
  - **Mobile**
  - **Work**
  - **Fax**
  - **Car**
  - **Other**
  - **Voice**

On some phones, it may not be possible to import the category icons to the system.

The phonebook is updated after every connection. Call history is updated after every connection or call.
Bluetooth® HandsFreeLink®

HFL Menus

Speed Dial

Up to 20 speed dial numbers can be stored per phone.

To store a speed dial number:

1. Go to the Phone menu screen.  
   Phone menu screen P. 289

2. Select Speed Dial.
   Repeat the procedure to select New Entry.

3. Select a place to choose a number.
   From Import from Call History:
   Select a number from the call history.
   From Manual Input:
   Input the number manually.
   From Import from Phonebook:
   Select a number from the linked cell phone’s imported phonebook.

4. When the speed dial is successfully stored from Import from Call History or Import from Phonebook, you are asked to create a voice tag for the number. Select Yes or No.

5. Select Record to store a voice tag for the speed dial entry.
   Using the button, follow the prompts to store a voice tag for the speed dial entry.

Speed Dial

When a voice tag is stored, press the button to call the number using the voice tag. Say “Call” and the voice tag name.
■ To add a voice tag to a stored speed dial number
1. Go to the Phone settings screen. [Phone settings screen p. 286]
2. Select Phone tab, then Edit Speed Dial.
3. Select an existing speed dial entry.
   ► From the pop-up menu, select Edit.
4. Select Voice Tag.
   ► From the pop-up menu, select Record.
5. Select Record to store the voice tag.
6. Using the button, follow the prompts to complete the voice tag.

■ To delete a voice tag
1. Go to the Phone settings screen. [Phone settings screen p. 286]
2. Select Phone tab, then Edit Speed Dial.
3. Select an existing speed dial entry.
   ► From the pop-up menu, select Edit.
4. Select Voice Tag.
   ► From the pop-up menu, select Clear.
5. A confirmation message appears on the screen. Select Yes.

Speed Dial
Avoid using duplicate voice tags.
Avoid using “home” as a voice tag.
It is easier for the system to recognize a longer name.
For example, use “John Smith” instead of “John.”

Avoid using “home” as a voice tag.
It is easier for the system to recognize a longer name.
For example, use “John Smith” instead of “John.”
■ To delete a speed dial
1. Go to the Phone settings screen.
   Phone settings screen P. 286
2. Select Phone tab, then Edit Speed Dial.
3. Select an existing speed dial entry.
   From the pop-up menu, select Delete.
4. A confirmation message appears on the screen. Select Yes.

■ Making a Call
You can make calls by inputting any phone number, or by using the imported phonebook, call history, speed dial entries, or redial.

Making Call
Any voice-tagged speed dial entry, phonebook name, or number can be dialed by voice from most screens.
Press the button and say “Call” and the stored voice tag name.

The maximum range between your phone and vehicles is 30 feet (10 meters).

Once a call is connected, you can hear the voice of the person you are calling through the audio speakers.
To make a call using the imported phonebook
1. Go to the Phone menu screen.
   - Phone menu screen P. 289
2. Select Phonebook.
3. Select a name.
   - You can also search by letter. Select Search.
   - Use the keyboard on the touch screen for entering letters.
4. Select a number.
   - Dialing starts automatically.

To make a call using a phone number
1. Go to the Phone menu screen.
   - Phone menu screen P. 289
2. Select Dial.
3. Select a number.
   - Use the keyboard on the touch screen for entering numbers.
4. Select .
   - Dialing starts automatically.

This function is disabled while the vehicle is moving. However, you can call a stored voice-tagged speed dial number using voice commands.

Limitations for Manual Operation P. 285
Speed Dial P. 298
To make a call using redial
1. Go to the Phone menu screen.
2. Select Redial.
   - Dialing starts automatically.

To make a call using the call history
Call history is stored by All, Dialed, Received, and Missed.
1. Go to the Phone menu screen.
2. Select Call History.
3. Select All, Dialed, Received, or Missed.
4. Select a number.
   - Dialing starts automatically.

To make a call using a speed dial entry
1. Go to the Phone menu screen.
2. Select Speed Dial.
3. Select a number.
   - Dialing starts automatically.

To make a call using redial
Press and hold the button to redial the last number dialed in your phone’s history.

To make a call using the call history
The call history displays the last 20 dialed, received, or missed calls.
(Approves only when a phone is connected to the system.)

To make a call using a speed dial entry
When a voice tag is stored, press the button to call the number using the voice tag.
Press the button and follow the prompts.

Any voice-tagged speed dial entry can be dialed by voice from any screen.
Receiving a Call

When there is an incoming call, an audible notification sounds and the Incoming call screen appears.

Press the button to answer the call. Press the button to decline or end the call.

Options During a Call

The available options appear on the screen during a call.

Mute: Mute your voice. The mute icon appears when Mute is selected. Select Mute again to turn it off.
Transfer: Transfer a call from the system to your phone.
Touch Tones: Send numbers during a call. This is useful when you call a menu-driven phone system.

Receiving a Call

Call Waiting
Press the button to put the current call on hold to answer the incoming call.
Press the button again to return to the current call.
Select Ignore to ignore the incoming call if you do not want to answer it.
Press the button if you want to hang up the current call.

You can select the icons on the touch screen instead of the and buttons.

Touch Tones: Available on some phones.

You can select the icons on the touch screen.
Receiving a Text/E-mail Message

HFL can display newly received text or e-mail messages as well as 20 of the most recently received messages on a linked cell phone. Each received message can be read aloud and replied to using a fixed common phrase.

1. A pop-up appears and notifies you of a new text or e-mail message.
2. Select Read to listen to the message.
   The text or e-mail message is displayed. The system automatically starts reading out the message.
3. To discontinue the message read-out, select Stop.

Receiving a Text/E-mail Message

The system does not display any received messages while you are driving. You can only hear them read aloud.

With some phones, you may be able to display up to 20 most recent text and e-mail messages.

State or local laws may limit your use of the HFL text/e-mail message feature. Only use the text/e-mail message feature when conditions allow you to do so safely.

When you receive a text or e-mail message for the first time since the phone is paired to HFL, you are asked to turn the New Message Notification setting to On.

To turn on or off the text/e-mail notice
P. 295
If a paired phone has text or mail message accounts, you can select one of them to be active and receive notifications.

1. Go to the **Phone settings** screen.  
   - **Phone settings screen** P. 286
2. Select **Text/Email** tab, then **Select Account**.  
   - A pop-up menu appears on the screen.
3. Select **Text Messages** or an e-mail account you want.

## Selecting a Mail Account

You can also select a mail account from the folder list screen or the message list screen.

You can only receive notifications from one text message or mail account at a time.
Displaying Messages

Displaying text messages
1. Go to the Phone menu screen.
   Phone menu screen P. 289
2. Select Text/Email.
   Select account if necessary.
3. Select a message.
   The text message is displayed. The system automatically starts reading the message aloud.

Displaying Messages
The icon appears next to an unread message. If you delete a message on the phone, the message is also deleted in the system. If you send a message from the system, the message goes to your phone’s outbox.

To see the previous or next message, select (previous) or (next) on the message screen.
Displaying e-mails

1. Go to the Phone menu screen.
2. Select Text/Email.
3. Select a folder.
4. Select a message.

The e-mail is displayed. The system automatically starts reading the message aloud.
Features

Bluetooth® HandsFreeLink® HFL Menus

Read or Stop reading a message
1. Go to the text or e-mail message screen.
   ➤ The system automatically starts reading the message aloud.
   ➤ Displaying Messages P. 306
2. Select Stop to stop reading.
   Select Read again to start reading the message from the beginning.

Reply to a message
1. Go to the text or e-mail message screen.
   ➤ The system automatically starts reading the message aloud.
   ➤ Displaying Messages P. 306
2. Select Reply.
3. Select the reply message.
   ➤ The pop-up menu appears on the screen.
4. Select Send to send the message.
   ➤ Complete appears on the screen when the reply message was successfully sent.

The available fixed reply messages are as follows:
• Talk to you later, I'm driving.
• I'm on my way.
• I'm running late.
• OK
• Yes
• No

You cannot add, edit, or delete reply messages.
Making a call to a sender
1. Go to the text message screen.
2. Select Call.
In Case of Emergency

Automatic collision notification

If your vehicle’s airbags deploy or if the unit detects that the vehicle is severely impacted, your vehicle automatically will attempt to connect to the HondaLink operator. If connected, information about your vehicle, its location, and its condition will be sent to the operator; you also can speak to the operator when connected.

IMPORTANT: For vehicles equipped with HondaLink Assist, owner activation constitutes authorization for Honda to collect information from your vehicle needed to provide the service, and agreement to the Terms of Use at www.hondalink.com/TermsAndConditions. In a crash, HondaLink Assist will attempt to notify emergency services but NEITHER HONDA NOR ITS SERVICE PROVIDERS GUARANTEE THAT SUCH NOTIFICATION WILL OCCUR.

Honda reserves the right to terminate HondaLink Assist services at any time or for any reason, and in the future may not be able to provide services due to changes in, or obsolescence of, technology integral to the service or changes in governmental regulation.

In Case of Emergency

Your vehicle may not be able to connect to the operator if the battery level is low, the line is disconnected, or you do not have adequate cellular coverage.

You cannot use this emergency services when:
• You travel outside the HondaLink service coverage areas.
• There is a problem with the connecting devices, such as the microphones, speakers, or the unit itself.

You cannot operate other phone-related functions using the screen while talking to the operator. Select Hang Up to terminate the connection to your vehicle.

Automatic collision notification

If the unit fails to connect to the operator, it repeatedly tries until it succeeds.
To enable notification

1. Go to the **Phone settings** screen.  
   - [Phone settings screen](P. 286)
2. Select **Phone** tab, then **HondaLink Assist**.  
   - A pop-up menu appears on the screen.
3. Select **On** or **Off**.

**Setting options:**
- **On:** Notification is available.
- **Off:** Disable the feature.
This chapter discusses driving, refueling, and information on items such as accessories.

Driving Preparation

Check the following items before you start driving.

**Exterior Checks**

- Make sure there are no obstructions on the windows, door mirrors, exterior lights, or other parts of the vehicle.
  - Remove any frost, snow, or ice.
  - Remove any snow on the roof, as this can slip down and obstruct your field of vision while driving. If frozen solid, remove ice once it has softened.
  - When removing ice from around the wheels, be sure not to damage the wheel or wheel components.
- Make sure the hood is securely closed.
  - If the hood opens while driving, your front view will be blocked.
- Make sure the tires are in good condition.
  - Check air pressure, check for damage and excessive wear.
  - **Checking and Maintaining Tires** P. 411
- Make sure there are no people or objects behind or around the vehicle.
  - There are blind spots from the inside.

**NOTICE**

When doors are frozen shut, use warm water around the door edges to melt any ice. Do not try to force them open, as this can damage the rubber trim around the doors. When done, wipe dry to avoid further freezing.

Do not pour warm water into the key cylinder. You will be unable to insert the key if the water freezes in the hole.

Heat from the engine and exhaust can ignite flammable materials left under the hood, causing a fire. If you’ve parked your vehicle for an extended period, inspect and remove any debris that may have collected, such as dried grass and leaves that have fallen or have been carried in for use as a nest by a small animal. Also check under the hood for leftover flammable materials after you or someone else has performed maintenance on your vehicle.

Driving Preparation

■ Interior Checks

• Store or secure all items on board properly.
  ► Carrying too much cargo, or improperly storing it, can affect your vehicle’s handling, stability, stopping distance, and tires, and make it unsafe.
  ➤ Maximum Load Limit P. 317

• Do not pile items higher than the seat height.
  ► They can block your view and may be thrown forward in the event of sudden braking.

• Do not place anything in the front seat footwells. Make sure to secure the floor mat.
  ► An object or unsecured floor mat can interfere with your brake and accelerator pedal operation while driving.

• If you have any animals on board, do not let them move around in the vehicle.
  ► They may interfere with driving and a crash could occur.

• Securely close and lock all doors and the tailgate.
  ➤ Locking/Unlocking the Doors from the Inside P. 105

• Adjust your seating position properly.
  ► Adjust the head restraint, too.
    ➤ Adjusting the Seats P. 140
    ➤ Adjusting the Head Restraints P. 142

• Adjust the mirrors and steering wheel properly for your driving.
  ► Adjust them while sitting in the proper driving position.
    ➤ Adjusting the Mirrors P. 138
    ➤ Adjusting the Steering Wheel P. 137

The headlight aim is set by the factory, and does not need to be adjusted. However, if you regularly carry heavy items in the cargo area, have the aiming readjusted at a dealer or by a qualified technician.
Before Driving

Driving Preparation

• Be sure items placed on the floor behind the front seats cannot roll under the seats.
  ► They can interfere with the driver’s ability to operate the pedals, the operation of the seats, or the operation of the sensors under the seats.
• Everyone in the vehicle must fasten their seat belt.
  ► Fastening a Seat Belt P. 38
• Make sure that the indicators in the instrument panel come on when you start the vehicle, and go off soon after.
  ► Always have a dealer check the vehicle if a problem is indicated.
  ► Indicators P. 72
Maximum Load Limit

The maximum load for your vehicle is 850 lbs (385 kg). See Tire and Loading Information label attached to the driver’s doorjamb.

This figure includes the total weight of all occupants, cargo, and accessories, and the tongue load if you are towing a trailer.

Steps for Determining Correct Load Limit -

(1) Locate the statement “The combined weight of occupants and cargo should never exceed XXX kg or XXX lbs.” on your vehicle’s placard.

(2) Determine the combined weight of the driver and passengers that will be riding in your vehicle.

(3) Subtract the combined weight of the driver and passengers from XXX kg or XXX lbs.

(4) The resulting figure equals the available amount of cargo and luggage load capacity. For example, if the “XXX” amount equals 1,400 lbs. and there will be five 150 lb. passengers in your vehicle, the amount of available cargo and luggage load capacity is 650 lbs.

\[
(1,400 - 750 \times 5) = 650 \text{ lbs.}
\]

WARNING

Overloading or improper loading can affect handling and stability and cause a crash in which you can be hurt or killed.

Follow all load limits and other loading guidelines in this manual.

Gross Vehicle Weight Rating (GVWR):
The maximum allowable weight of the vehicle, all occupants, all accessories, all cargo, and the tongue load.

Specifications P. 466

Gross Axle Weight Rating (GAWR):
The maximum allowable weight of the vehicle axle.

Specifications P. 466
Before Driving  Maximum Load Limit

(5) Determine the combined weight of luggage and cargo being loaded on the vehicle. That weight may not safely exceed the available cargo and luggage load capacity calculated in step 4.

(6) If your vehicle will be towing a trailer, load from your trailer will be transferred to your vehicle. Consult this manual to determine how this reduces the available cargo and luggage load capacity of your vehicle.

In addition, the total weight of the vehicle, all occupants, accessories, cargo, and trailer tongue load must not exceed the Gross Vehicle Weight Rating (GVWR) or the Gross Axle Weight Rating (GAWR). Both are on a label on the driver’s doorjamb.

Towing a Trailer

Your vehicle is not designed to tow a trailer. Attempting to do so can void your warranties.
Towing Your Vehicle

**Continuously variable transmission models**
Your vehicle is not designed to be towed behind a motorhome. If your vehicle needs to be towed in an emergency, refer to the emergency towing information.

[Emergency Towing P. 461]

**Manual transmission models**
Your vehicle can be towed behind a motorhome.

---

When Your Vehicle is Towed Behind a Motorhome

Perform the following procedure before towing your vehicle.

1. Shift to [N].
2. Release the parking brake.
3. Turn the ignition switch to ACCESSORY [1]*1.
   - Make sure the steering wheel does not lock.
4. Turn off all the electric devices. Do not use any accessory power sockets.
   - This can prevent the battery from running down.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

Consult your towing parts sales or rental agency if any other items are recommended or required for your towing situation.
### Extended towing

If you tow more than eight hours in one day, you should repeat the “before towing your vehicle procedure” at least every eight hours. You also need to perform the following procedure to prevent the battery from running down.

1. Remove the 20 A accessory power socket and 7.5 A ACC fuses. These fuses are located in the interior fuse box.
   - **Interior Fuse Boxes** P. 458
2. Remove the 10 A Back up fuse. This fuse is located in the engine compartment fuse box.
   - **Engine Compartment Fuse Box** P. 456
3. Store the fuses in a safe place so you do not lose them.
   - Make sure to reinstall the fuses before you start driving your vehicle.
4. Shift to N.
5. Turn the ignition switch to ACCESSORY I.
   - Make sure the steering wheel does not lock.

---

Models without smart entry system

- 1. Remove the 20 A accessory power socket and 7.5 A ACC fuses. These fuses are located in the interior fuse box.
  - **Interior Fuse Boxes** P. 458
- 2. Remove the 10 A Back up fuse. This fuse is located in the engine compartment fuse box.
  - **Engine Compartment Fuse Box** P. 456
- 3. Store the fuses in a safe place so you do not lose them.
  - Make sure to reinstall the fuses before you start driving your vehicle.
- 4. Shift to N.
- 5. Turn the ignition switch to ACCESSORY I.
  - Make sure the steering wheel does not lock.
Towing a Trailer

1. Remove the 20 A accessory power socket and 7.5 A ACC fuses. These fuses are located in the interior fuse box.

2. Remove the 10 A Back up fuse. This fuse is located in the engine compartment fuse box.

3. Store the fuses in a safe place so you do not lose them.

4. Push the ENGINE START/STOP button without depressing the clutch pedal.

5. Touch the center of the ENGINE START/STOP button with the H logo on the smart entry remote while the indicator is blinking.

6. Shift to [N].

7. Push the ENGINE START/STOP button once without depressing the clutch pedal.

Models with smart entry system

1. Remove the 20 A accessory power socket and 7.5 A ACC fuses. These fuses are located in the interior fuse box.

2. Remove the 10 A Back up fuse. This fuse is located in the engine compartment fuse box.

3. Store the fuses in a safe place so you do not lose them.

4. Make sure to reinstall the fuses before you start driving your vehicle.

5. Push the ENGINE START/STOP button without depressing the clutch pedal.

6. The indicator on the ENGINE START/STOP button blinks.

7. Touch the center of the ENGINE START/STOP button with the H logo on the smart entry remote while the indicator is blinking.

8. The indicator stop blinking, then stays on.

9. Make sure the steering wheel does not lock.
Off-Highway Driving Guidelines

General Information

Your vehicle has been designed primarily for use on pavement, however, its higher ground clearance allows you to occasionally travel on unpaved roads. It is not designed for trail-blazing, or other challenging off-road activities.

If you decide to drive on unpaved roads, you will find that it requires somewhat different driving skills and that your vehicle will handle somewhat differently than it does on pavement. Pay attention to the precautions and tips in this section, and get acquainted with your vehicle before leaving the pavement.

Important Safety Precautions

To avoid loss of control or rollover, be sure to follow all precautions and recommendations:

- Be sure to store cargo properly and do not exceed your cargo load limits. (Maximum Load Limit P. 317)
- Whenever you drive, make sure you and your passengers always wear seat belts.
- Keep your speed low, and never go faster than the conditions allow.
- It’s up to you to continually assess the situation and drive within the limits.

**WARNING**

Improperly operating this vehicle on or off pavement can cause a crash or rollover in which you and your passengers can be seriously injured or killed.

- Follow all instructions and guidelines in this owner’s manual.
- Keep your speed low, and don’t drive faster than conditions permit.

Failure to operate your vehicle correctly might result in a crash or a rollover.

- Important Handling Information P. 32
- Precautions While Driving P. 332
Avoiding Trouble

- **Check Out Your Vehicle** before you leave the pavement and make sure that all scheduled maintenance has been completed. Pay special attention to the condition of the tires, and check the tire pressures.

- **Remember** the route you choose presents limits (too steep or bumpy), you have limits (driving skill and comfort), and your vehicle has limits (traction, stability, and power). Failing to recognize these limits will likely put you and your passengers in a hazardous situation.

- **Accelerating and Braking** should be done slowly and gradually. Trying to start or stop too fast can cause a loss of traction and you could lose control.

- **Avoiding Obstacles and Debris** in the road reduces the likelihood of a rollover or damage to your suspension or other components.

- **Driving on Slopes** increases your risk of a rollover, particularly if you attempt to drive across a slope that is too steep. Going straight up or down a slope is usually the safest. If you can’t clearly see all conditions or obstacles on a slope, walk it before you drive it. If there is any doubt whether you can safely pass, don’t try it. Find another route. If you get stuck when climbing, do not try to turn around. Back down slowly following the same route you took up the hill.

- **Crossing a Stream** - Avoid driving through deep water. If you encounter water in your route (a small stream or large puddle, for example), evaluate it carefully before going ahead. Make sure it is shallow, flowing slowly, and has firm ground underneath. If you are not sure of the depth or the ground, turn around and find another route. Driving through deep water can also damage your vehicle. The water can get into the transmission and differential, diluting the lubricant and causing an eventual failure. It can also wash the grease out of the wheel bearings.

- **If You Get Stuck**, carefully go in the direction that you think will get you unstuck. Do not spin the tires as this will only make things worse and could damage the transmission. If you are unable to free yourself, your vehicle will need to be towed. Front and rear tow hooks are provided for this purpose.
When Driving

Models without smart entry system

Starting the Engine

1. Make sure the parking brake is applied.
   - The electric parking brake indicator comes on for 15 seconds when you pull up to electric parking brake switch.

2. Check that the shift lever is in \( P \), then depress the brake pedal.
   - Although it is possible to start the vehicle in \( N \), it is safer to start it in \( P \).

Continuously variable transmission models

3. [Diagram showing brake pedal and clutch pedal]

Manual transmission models

3. Check that the shift lever is in \( N \). Then depress the brake pedal with your right foot, and the clutch pedal with your left foot.
   - The clutch pedal must be fully depressed to start the engine.

* Not available on all models

Driving

Starting the Engine

Keep your foot firmly on the brake pedal when starting the engine.

The engine is harder to start in cold weather and in thinner air found at altitudes above 8,000 feet (2,400 meters).

When starting the engine in cold weather, turn off all electrical accessories such as the lights, heating and cooling system/*climate control system*", and rear defogger in order to reduce battery drain.

If you live in a region where winter is extremely cold, an engine block heater will improve starting and warming of the engine. If temperatures consistently below -22°F (-30°C) are expected, the coolant mixture should be changed to a higher concentration to prevent freezing. Consult a dealer for details.

If the exhaust system sounds abnormal or you can smell exhaust gas inside the vehicle, have your vehicle checked by a dealer. There may be a problem with the engine or exhaust system.
\.When Driving
\-Starting the Engine

**3. Turn the ignition switch to START without depressing the accelerator pedal.**

**Starting to Drive**

- **Continuously variable transmission models**
  1. Keeping your right foot on the brake pedal, put the shift lever in **D**. Select **R** when reversing.
  2. With the parking brake applied, release the brake pedal and gently depress the accelerator pedal.
  - Make sure the electric parking brake indicator goes off.
    - **Parking Brake** P. 363

**Starting the Engine**

- Do not hold the key in **START** for more than 15 seconds.
  - If the engine does not start right away, wait for at least 10 seconds before trying again.
  - If the engine starts, but then immediately stops, wait at least 10 seconds before repeating step 3 while gently depressing the accelerator pedal. Release the accelerator pedal once the engine starts.

- The immobilizer system protects your vehicle from theft. If an improperly coded device is used, the engine’s fuel system is disabled.
  - **Immobilizer System** P. 116

**Starting to Drive**

- You can also release the parking brake by pressing the electric parking brake switch while depressing the brake pedal.
- When facing downhill, you can start your vehicle more smoothly by manually releasing it with the electric parking brake switch than by releasing it with the accelerator pedal.
Hill start assist system

Hill start assist keeps the brake engaged briefly to help prevent the vehicle from rolling on inclines as you move your foot from the brake pedal to the accelerator.

**Manual transmission models**
Depress the clutch pedal, and shift to one of the forward gears when facing uphill, or **R** when facing downhill, then release the brake pedal.

**Continuously variable transmission models**
Move the shift lever to **D**, **S**, or **L** when facing uphill, or **R** when facing downhill, then release the brake pedal.
Starting the Engine

1. Make sure the parking brake is applied. The electric parking brake indicator comes on for 15 seconds when you pull up to electric parking brake switch.

2. Check that the shift lever is in (P), then depress the brake pedal.

   - Although it is possible to start the vehicle in (N), it is safer to start it in (P).

Models with smart entry system

Continuous variable transmission models

Keep your foot firmly on the brake pedal when starting the engine.

The engine is harder to start in cold weather and in thinner air found at altitudes above 8,000 feet (2,400 meters).

When starting the engine in cold weather, turn off all electrical accessories such as the lights, climate control system, and rear defogger in order to reduce battery drain.

If you live in a region where winter is extremely cold, an engine block heater will improve starting and warming of the engine. If temperatures consistently below -22°F (-30°C) are expected, the coolant mixture should be changed to a higher concentration to prevent freezing. Consult a dealer for details.

If the exhaust system sounds abnormal or you can smell exhaust gas inside the vehicle, have your vehicle checked by a dealer. There may be a problem with the engine or exhaust system.

The immobilizer system protects your vehicle from theft. If an improperly coded device is used, the engine’s fuel system is disabled.

Immobilizer System P. 116
3. Press the **ENGINE START/STOP** button without depressing the accelerator pedal.
When Driving  Starting the Engine

### Stopping the Engine

You can turn the engine off when the vehicle is completely stopped.

**Continuously variable transmission models**

1. Shift to \( P \).
2. Press the ENGINE START/STOP button.

**Manual transmission models**

- If the shift lever is in \( N \), press the ENGINE START/STOP button.
- If the shift lever is in any gear other than \( N \), depress the clutch pedal, then press the ENGINE START/STOP button.

### Starting to Drive

**Continuously variable transmission models**

1. Keeping your right foot on the brake pedal, put the shift lever in \( D \). Select \( R \) when reversing.
2. With the parking brake applied, release the brake pedal and gently depress the accelerator pedal.

   - Make sure the electric parking brake indicator goes off.

**Parking Brake** P. 363

**Starting to Drive**

You can also release the parking brake by pressing the electric parking brake switch while depressing the brake pedal.

When facing downhill, you can start your vehicle more smoothly by manually releasing it with the electric parking brake switch than by releasing it with the accelerator pedal.
When Driving

Starting the Engine

---

**Hill start assist system**

Hill start assist keeps the brake engaged briefly to help prevent the vehicle from rolling on inclines as you move your foot from the brake pedal to the accelerator.

**Manual transmission models**

Depress the clutch pedal, and shift to one of the forward gears when facing uphill, or R when facing downhill, then release the brake pedal.

**Continuously variable transmission models**

Move the shift lever to D or S when facing uphill, or R when facing downhill, then release the brake pedal.

---

Hill start assist system

Hill start assist may not prevent the vehicle from rolling downhill on a very steep or slippery slope, and does not operate on small inclines.

Hill start assist is not a replacement for the parking brake.
Precautions While Driving

Driving Guidelines for Your Utility Vehicle

Utility vehicles have a significantly higher rollover rate than other types of vehicles. To prevent rollovers or loss of control:

- Take corners at slower speeds than you would with a passenger vehicle.
- Avoid sharp turns and abrupt maneuvers whenever possible.
- Do not modify your vehicle in any way that you would raise the center of gravity.
- Never carry more than 165 lbs (75 kg) of cargo on the roof rack (Honda accessory).

In Rain

Avoid driving in deep water and on flooded roads. This can damage the engine or driveline, or cause electrical component failure.

NOTICE

Do not operate the shift lever while pressing the accelerator pedal. You could damage the transmission.

NOTICE

If you repeatedly turn the steering wheel at an extremely low speed, or hold the steering wheel on the full left or right position for a while, the electric power steering (EPS) system heats up. The system goes into a protective mode, and limits its performance. The steering wheel becomes harder and harder to operate. Once the system cools down, the EPS system is restored. Repeated operation under these conditions can eventually damage the system.

If the ignition switch is turned to ACCESSORY [1] or LOCK [0]*1 while driving, the engine will shut down and all steering and brake power assist functions will stop, making it difficult to control the vehicle.

Do not put the shift lever in [N], as you will lose engine braking (and acceleration) performance.

During the first 600 miles (1,000 km) of operation, avoid sudden acceleration or full throttle operation so as to not damage the engine or powertrain.

Avoid hard braking for the first 200 miles (300 km). You should also follow this when the brake pads are replaced.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
When Driving

Continuously Variable Transmission*

**Other Precautions**

If there is a strong impact with something under the vehicle, stop in a safe location. Check the underside of the vehicle for damage or any fluid leaks.

**Continuously Variable Transmission***

**Creeping**

The engine runs at a higher idle speed and creeping increases. Keep the brake pedal firmly depressed when stopped.

**Kickdown**

Quickly depressing the accelerator pedal while driving uphill may cause the transmission to drop to a lower gear, unexpectedly increasing vehicle speed. Depress the accelerator pedal carefully, especially on slippery roads and curves.

* Not available on all models

---

Driving Guidelines for Your Utility Vehicle

Failure to operate your vehicle correctly might result in a crash or a rollover.

- **Important Handling Information** P. 32
- **Precautions While Driving** P. 332

---
When Driving

Shifting

Change the shift position in accordance with your driving needs.

Shift lever positions

- **P** Park
  - Used when parking or starting the engine

- **R** Reverse
  - Used when reversing

- **N** Neutral
  - Used when idling

- **D** Drive
  - Used for normal driving

- **S** Drive (S)
  - Used:
    - For better acceleration
    - To increase engine braking
    - When going up or down hills

- **L** Low
  - Used to further increase engine braking
  - Used when going up or down hills

Continuously variable transmission models without paddle shifters

You cannot turn the ignition switch to LOCK (0) and remove the key unless the shift lever is in **P**.

The vehicle may move forward very slightly even in **N** while the engine is cold. Depress the brake pedal firmly and, when necessary, apply the parking brake.

When shifting positions in extremely low temperatures (-22°F/-30°C), there may be a short delay before the shift position is displayed. Always confirm you are in the correct shift position before driving.
### Shift Lever Operation

**NOTICE**

When you change the shift lever from **D** to **R** and vice versa, come to a complete stop and keep the brake pedal depressed. Operating the shift lever before the vehicle has come to a complete standstill can damage the transmission.

Use the shift lever position indicator to check the lever position before pulling away.

If the transmission indicator blinks when driving, in any shift position, there is a problem with the transmission. Avoid sudden acceleration and have the transmission checked by a dealer as soon as possible.

The fuel supply may be cut off if you drive at engine speeds in or over the tachometer red zone (engine speed limit). If this happens, you may experience a slight jolt.

It may not be possible to operate the shift lever if the brake pedal is applied while the shift lever release button is held down. Depress the brake pedal first.

1. **Depress the brake pedal and press the shift lever release button to shift.**
2. **Shift without pressing the shift lever release button.**
3. **Press the shift lever release button and shift.**
When Driving

Shifting

Change the shift position in accordance with your driving needs.

**Shift lever positions**

<table>
<thead>
<tr>
<th>Shift Position</th>

<td>S</td>
<td>Drive (S)</td>
</tr>
</tbody>
</table>

- **Park**
  - Used when parking or starting the engine

- **Reverse**
  - Used when reversing

- **Neutral**
  - Used when idling

- **Drive**
  - Used:
    - For normal driving
    - When temporarily driving in the 7-speed manual shift mode

- **Drive (S)**
  - Used for:
    - For better acceleration
    - To increase engine braking
    - When going up or down hills
    - When driving in the 7-speed manual shift mode

**Continuously variable transmission models with paddle shifters**

You cannot change the power mode from ON to VEHICLE OFF (LOCK) unless the shift lever is in P.

The vehicle may move forward very slightly even in N while the engine is cold. Depress the brake pedal firmly and, when necessary, apply the parking brake.

When shifting positions in extremely low temperatures (-22°F/-30°C), there may be a short delay before the shift position is displayed. Always confirm you are in the correct shift position before driving.
**When Driving**

**Shift Lever Operation**

**NOTICE**
When you change the shift lever from **D** to **R** and vice versa, come to a complete stop and keep the brake pedal depressed. Operating the shift lever before the vehicle has come to a complete standstill can damage the transmission.

Use the shift lever position indicator to check the lever position before pulling away.

If the transmission indicator blinks when driving, in any shift position, there is a problem with the transmission. Avoid sudden acceleration and have the transmission checked by a dealer as soon as possible.

The fuel supply may be cut off if you drive at engine speeds in or over the tachometer red zone (engine speed limit). If this happens, you may experience a slight jolt.

It may not be possible to operate the shift lever if the brake pedal is applied while the shift lever release button is held down. Depress the brake pedal first.

Depress the brake pedal and press the shift lever release button to shift.

Shift without pressing the shift lever release button.

Press the shift lever release button and shift.
7-Speed Manual Shift Mode

Use the paddle shifters to change between 1st and 7th speeds without removing your hands from the steering wheel. The transmission switches to the 7-speed manual shift mode when you pull a paddle shifter while driving. This mode is useful when engine braking is needed.

■ When the shift lever is in [D]:
The shift mode goes into the 7-speed manual shift mode temporarily, and the number is displayed in the shift indicator. The 7-speed manual shift mode is canceled automatically if you drive at constant speed or accelerate, and the number in the shift indicator goes off. You can cancel this mode by pulling the paddle shifter for a few seconds. The 7-speed manual shift mode is especially useful when reducing the vehicle speed temporarily before making a turn.

■ When the shift lever is in [S]:
The shift mode goes into the 7-speed manual shift mode. The M indicator and the speed number are displayed in the shift indicator. As the vehicle speed slows down, the transmission automatically shifts down accordingly. When the vehicle comes to a stop, it automatically shifts down into 1st.

If the vehicle speed increases and the engine speed reaches near the tachometer’s red zone, the transmission automatically shifts up.

You can only pull away in 1st speed.

When canceling the 7-speed manual shift mode, move the shift lever from [S] to [D]. When the 7-speed manual shift mode is canceled, the M indicator and shift indicator go off.

7-Speed Manual Shift Mode

To improve fuel economy, the transmission may shift up to a higher speed than the seventh under certain circumstances. In this case, the number in the shift indicator remains as 7.

In the 7-speed manual shift mode, the transmission shifts up or down by operating either paddle shifter under the following conditions:
- **Shift Up:** The engine speed reaches the lowest threshold of the higher speed position.
- **Shift Down:** The engine speed reaches the highest threshold of the lower speed position.

When the engine speed reaches near the tachometer’s red zone, the transmission shifts up automatically.

When the engine speed reaches the lowest threshold of the selected speed position, the transmission shifts down automatically.

Operating the paddle shifters on slippery surfaces may cause the tires to lock up. In this case, the 7-speed manual shift mode is canceled and goes back to the normal D driving mode.
**Driving**

### 7-Speed Manual Shift Mode Operation

Each paddle shift operation makes a single speed change. To change continuously, release the paddle shifter before pulling it again for the next speed.

**Recommended Shift Points**
Use this table as a guideline for efficient fuel economy and effective emission control.

<table>
<thead>
<tr>
<th>Shift Up</th>
<th>Normal Acceleration</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 to 2</td>
<td>15 mph (24 km/h)</td>
</tr>
<tr>
<td>2 to 3</td>
<td>25 mph (40 km/h)</td>
</tr>
<tr>
<td>3 to 4</td>
<td>40 mph (64 km/h)</td>
</tr>
<tr>
<td>4 to 5</td>
<td>47 mph (76 km/h)</td>
</tr>
<tr>
<td>5 to 6</td>
<td>52 mph (84 km/h)</td>
</tr>
<tr>
<td>6 to 7</td>
<td>57 mph (92 km/h)</td>
</tr>
</tbody>
</table>

The shift indicator blinks when you cannot shift up or down. It indicates that your vehicle speed is not in its allowable shifting range. Slightly accelerate to shift up and decelerate to shift down while the indicator is blinking.

The shift indicator may also blink when you cannot shift down while driving in low speed. This prevents the transmission from being damaged.
When Driving

Shifting

**Manual transmission models**

**Shifting**

**Shift Lever Operation**

Fully depress the clutch pedal to operate the shift lever and change gears, then slowly release the pedal.

Depress the clutch pedal, and pause for a few seconds before shifting into (R), or shift into one of the forward gears for a moment. This stops the gears so they do not “grind.”

**NOTICE**

Do not shift to (R) before the vehicle comes to a complete stop.

Shifting to (R) before stopping can damage the transmission.

**NOTICE**

Before downshifting, make sure the engine will not go into the tachometer’s red zone. Should this occur, it can severely damage your engine.
When you are not shifting, do not rest your foot on the clutch pedal. This can cause your clutch to wear out faster.

### Shifting

**Recommended Shift Points**

Driving in the highest gear that allows the engine to run and accelerate smoothly helps to optimize fuel economy and effective emissions control. The following shift points are recommended:

<table>
<thead>
<tr>
<th>Shift Up</th>
<th>Normal Acceleration</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st to 2nd</td>
<td>16 mph (25 km/h)</td>
</tr>
<tr>
<td>2nd to 3rd</td>
<td>26 mph (42 km/h)</td>
</tr>
<tr>
<td>3rd to 4th</td>
<td>35 mph (56 km/h)</td>
</tr>
<tr>
<td>4th to 5th</td>
<td>41 mph (66 km/h)</td>
</tr>
<tr>
<td>5th to 6th</td>
<td>43 mph (69 km/h)</td>
</tr>
</tbody>
</table>

If you exceed the maximum speed for the gear you are in, the engine speed will enter into the tachometer’s red zone. When this happens, you may experience a slight jolt.
When Driving

Shifting

Reverse Lockout

The manual transmission has a lockout mechanism that stops you from accidentally shifting into \textit{R} from a forward gear while the vehicle is moving above a certain speed.

If you cannot shift to \textit{R} when the vehicle is stopped, do the following:

\begin{enumerate}
\item Depress the clutch pedal, move the shift lever all the way to the left, and shift to \textit{R}.
\item If you still cannot shift into \textit{R}, apply the parking brake, and turn the ignition switch to ACCESSORY \textbullet or LOCK \textbullet.*1.
\item Depress the clutch pedal and shift into \textit{R}.
\item Keep depressing the clutch pedal and start the engine.
\end{enumerate}

Have your vehicle checked by a dealer if you have to go through this procedure repeatedly.

*1: Models with the smart entry system have an \textit{ENGINE START/STOP} button instead of an ignition switch.
The ECON button turns the ECON mode on and off. The ECON mode helps you improve your fuel economy by adjusting the performance of the engine, transmission, heating and cooling system, and cruise control.

* Not available on all models
When Driving

Cruise Control

Maintains a constant vehicle speed without having to keep your foot on the accelerator. Use cruise control on freeways or open roads where you can travel at a constant speed with little acceleration or deceleration.

### When to use

- **Vehicle speed for cruise control:**
  Desired speed in a range above roughly 25 mph (40 km/h) ~

- **Continuous variable transmission models**

- **Shift positions for cruise control:**
  In **D** or **S**

- **Always keep sufficient distance between you and the vehicle in front of you.**

### How to use

1. Use the cruise control only when traveling on open highways in good weather.
2. It may not be possible to maintain a constant speed when driving uphill or downhill.
3. When not using cruise control:
   Turn off cruise control by pressing the **CRUISE** button.

#### Models with ECON button

While in ECON mode, it may take relatively more time to accelerate to maintain the set speed.

#### Manual transmission models

1. When the engine speed slows down, try to downshift.
2. You can maintain the set speed if you change gear within five seconds.

---

**WARNING**

Improper use of the cruise control can lead to a crash.

**CRUISE MAIN** is on in the instrument panel. Cruise control is ready to use.

**CRUISE MAIN** is on in the instrument panel. Cruise control is ready to use.
### To Set the Vehicle Speed

Take your foot off the pedal and press the -/SET button when you reach the desired speed.

The moment you release the -/SET button, the set speed is fixed, and cruise control begins. The CRUISE CONTROL indicator comes on.
When Driving

Cruise Control

To Adjust the Vehicle Speed

Increase or decrease the vehicle speed using the RES/+ or SET buttons on the steering wheel.

- Each time you press the button, the vehicle speed is increased or decreased by about 1 mph (1.6 km/h).
- If you keep the button pressed, the vehicle speed increases or decreases until you release it. This speed is then set.

To Cancel

To cancel cruise control, do any of the following:

- Press the CANCEL button.
- Press the CRUISE button.
- Depress the brake pedal.

Manual transmission models

- Depress the clutch pedal for five seconds or more.

The CRUISE CONTROL indicator goes off.

To Adjust the Vehicle Speed

You can set the vehicle speed using the SET button on the steering wheel when adjusting the speed with the accelerator and brake pedals.

To Cancel

Resuming the prior set speed:
After cruise control has been canceled, you can still resume the prior set speed by pressing the RES/+ button while driving at a speed of at least 25 mph (40 km/h) or more.

You cannot set or resume in the following situations:

- When vehicle speed is less than 25 mph (40 km/h)
- When the CRUISE button is turned off

At vehicle speeds of 22 mph (35 km/h) or less, cruise control is canceled automatically.
When Driving
Forward Collision Warning (FCW)*

Alerts you when it determines there is a possibility of your vehicle colliding with the vehicle detected in front of yours.

If the system determines a collision is possible, it gives both visual and audible alerts. 
► Take appropriate action to prevent a collision (apply the brakes, change lanes, etc.).

■ How the system works
The system may give warnings of potential collisions when your vehicle speed is above 10 mph (15 km/h).

You can set Long, Normal or Short for when warnings start:

<table>
<thead>
<tr>
<th>Your Vehicle</th>
<th>Vehicle Ahead</th>
</tr>
</thead>
<tbody>
<tr>
<td>LONG</td>
<td></td>
</tr>
<tr>
<td>NORMAL</td>
<td></td>
</tr>
<tr>
<td>SHORT</td>
<td></td>
</tr>
</tbody>
</table>

* Not available on all models

Continued
When Driving

Forward Collision Warning (FCW)*

Never apply a film or attach any objects to the windshield that could obstruct the FCW camera’s field of vision. Scratches, nicks, and other damage to the windshield within the FCW camera’s field of vision can cause the system to operate abnormally. If this occurs, we recommend that you replace the windshield with a genuine Honda replacement windshield. Making even minor repairs within the camera’s field of vision or installing an aftermarket replacement windshield may also cause the system to operate abnormally. After replacing the windshield, have a dealer recalibrate the camera. Proper calibration of the FCW camera is necessary for the system to operate properly.

* Not available on all models
To change vehicle distance and to turn the system on and off

Press the \( \text{[FCW]} \) button to change FCW range.
Each time you press the button, the warning distance (the distance behind a vehicle detected ahead of you) setting cycles through FCW LONG, FCW NORMAL, and FCW SHORT warning distance.

Information Display Warning and Information Messages P. 85

To turn the system on and off, press and hold the button until you hear a beep.

Automatic shutoff

FCW may automatically shut itself off and the FCW indicator comes and stays on when:

- The temperature inside the system is high.
- The windshield is blocked by dirt, mud, leaves, wet snow, etc.

Once the conditions that caused FCW to shut off improve or are addressed (e.g., cleaning), the system comes back on.
When Driving Forward Collision Warning (FCW)∗

**FCW Limitations**

FCW may not activate or may not detect a vehicle in front of your vehicle, and may activate even when you are aware of a vehicle ahead of you, or when there is no vehicle ahead under the following conditions.

<table>
<thead>
<tr>
<th>Condition</th>
</tr>
</thead>
<tbody>
<tr>
<td>• The distance between your vehicle and the vehicle ahead of you is too short.</td>
</tr>
<tr>
<td>• A vehicle cuts in front of you at a slow speed, and it brakes suddenly.</td>
</tr>
<tr>
<td>• A vehicle suddenly crosses in front of you.</td>
</tr>
<tr>
<td>• When either your vehicle or the vehicle ahead of you accelerates rapidly.</td>
</tr>
<tr>
<td>• The vehicle ahead of you is a motorcycle, a small vehicle, or a unique vehicle such as a tractor.</td>
</tr>
<tr>
<td>• When you drive off-road or on a mountain road, or curved and winding road for an extended period that makes it difficult for the camera to properly detect a vehicle in front of you.</td>
</tr>
<tr>
<td>• When there are pedestrians or animals in front of your vehicle.</td>
</tr>
<tr>
<td>• When you drive in bad weather (rain, fog, etc.).</td>
</tr>
<tr>
<td>• A heavy load in the rear or modifications to the suspension tilts your vehicle.</td>
</tr>
<tr>
<td>• An abnormal tire condition is detected (wrong tire size, flat tire, etc.).</td>
</tr>
<tr>
<td>• When the windshield is blocked by dirt, mud, leaves, wet snow, etc.</td>
</tr>
<tr>
<td>• When the temperature inside the system is high.</td>
</tr>
<tr>
<td>• A sudden change between light and dark such as an entrance or exit of a tunnel.</td>
</tr>
<tr>
<td>• You drive into the sunlight (e.g. at dawn or dusk).</td>
</tr>
<tr>
<td>• When the windshield is dirty or cloudy.</td>
</tr>
<tr>
<td>• When streetlights are perceived as the taillight of a vehicle in front of yours.</td>
</tr>
<tr>
<td>• When driving at night, the vehicle ahead of you is running with either taillight bulb burned out.</td>
</tr>
<tr>
<td>• When you drive in the shadows of trees, buildings, etc.</td>
</tr>
</tbody>
</table>
Lane Departure Warning (LDW) *

Alerts you when the system determines it is possible of your vehicle unintentionally crossing over detected left or right side lane markings.

How the System Works

If your vehicle is getting too close to detected left or right side lane markings without a turn signal activated, LDW will give audible and visual alerts.

The beeper sounds and the LDW indicator blinks, letting you know that you need to take appropriate action.

Important Safety Reminder

Like all assistance systems, LDW has limitations. Over-reliance on LDW may result in a collision. It is always your responsibility to keep the vehicle within your driving lane.

LDW only alerts you when lane drift is detected without a turn signal in use. LDW may not detect all lane markings or lane departures; accuracy will vary based on weather, speed and lane marker condition. It is always your responsibility to safely operate the vehicle and avoid collisions.

* Not available on all models
When Driving

Lane Departure Warning (LDW)*

- The system begins to search for lane markings when all the following conditions are met:
  - The vehicle is traveling between 45-90 mph (72-145 km/h).
  - The vehicle is on a straight or slightly curved road.
  - The turn signals are off.
  - The brake pedal is not pressed.

- The camera is located behind the rearview mirror.

Press the LDW button to turn the system on and off.

- The indicator in the button comes on when the system is on.

How the System Activates

The system may automatically shut off and the LDW indicator comes and stays on.

Indicators P. 84

LDW Camera

Never apply a film or attach any objects to the windshield that could obstruct the LDW camera’s field of vision. Scratches, nicks, and other damage to the windshield within the LDW camera’s field of vision can cause the system to operate abnormally. If this occurs, we recommend that you replace the windshield with a genuine Honda replacement windshield. Making even minor repairs within the camera’s field of vision or installing an aftermarket replacement windshield may also cause the system to operate abnormally. After replacing the windshield, have a dealer recalibrate the camera. Proper calibration of the LDW camera is necessary for the system to operate properly.

To help reduce the likelihood that high interior temperatures will cause the camera system to shut off, when parking, find a shady area or face the front of the vehicle away from the sun. Also, do not use a reflective sunshade that can concentrate heat on the camera.

If the CAMERA HOT message appears:
- Use the climate control system to cool down the interior and, if necessary, the defroster mode when windows are fogged.
- Start driving the vehicle to lower the windshield temperature, which cools down the area around the LDW system.

LDW On and Off

Press the LDW button to turn the system on and off.

- The indicator in the button comes on when the system is on.
## LDW Limitations

LDW may not activate or may not recognize lanes, and may activate even when keeping in the middle of a lane under the following conditions.

### Condition

- When you drive in bad weather (rain, fog, etc.).
- A heavy load in the rear or modifications to the suspension tilts your vehicle.
- An abnormal tire condition is detected (wrong tire size, flat tire, etc.).
- When the windshield is blocked by dirt, mud, leaves, wet snow, etc.
- When the temperature inside the system is high.
- A sudden change between light and dark such as an entrance or exit of a tunnel.
- You drive into the sunlight (e.g. at dawn or dusk).
- When the windshield is dirty or cloudy.
- When you drive in the shadows of trees, buildings, etc.
- When you drive on a wet road surface following another vehicle.
  - The camera may perceive the tire tracks in the water as lane lines.
- When there is snow or wheel tracks on the side of the road.
- When the road has many repaired areas or an erased lane line.
- When the vehicle is running over painted signs or crosswalk markings.
- When you drive in a lane with worn-out lane markings.
Vehicle Stability Assist (VSA®), aka Electronic Stability Control (ESC), System

Helps to stabilize the vehicle during cornering if the vehicle turns more or less than what was intended. It also assists in maintaining traction on slippery surfaces. It does so by regulating engine output and selectively applying the brakes.

■ VSA® Operation

When VSA® activates, you may notice that the engine does not respond to the accelerator. You may also notice some noise from the hydraulic system. You will also see the indicator blink.
When Driving

Vehicle Stability Assist (VSA®), aka Electronic Stability Control (ESC), System

![VSA® OFF Button](image)

This button is on the driver side control panel. To partially turn the VSA features on and off, press and hold it until you hear a beep.

The traction control stops fully functioning, allows the wheels to spin more freely at low speed. The VSA® OFF indicator will also come on.

To turn it on again, press the (VSA® OFF) button until you hear a beep.

VSA® is turned on every time you start the engine, even if you turned it off the last time you drove the vehicle.

With the \( \text{VSA}^\text{®} \) button pressed, your vehicle will have normal braking and cornering ability, but VSA® traction and stability enhancement becomes less effective.

In certain unusual conditions when your vehicle gets stuck in shallow mud or fresh snow, it may be easier to free it with the VSA® temporarily switched off.

When the \( \text{VSA}^\text{®} \) button is pressed, the traction control function becomes less effective. This allows for the wheels to spin more freely at low speed. You should only attempt to free your vehicle with the VSA® off if you are not able to free it when the VSA® is on.

Immediately after freeing your vehicle, be sure to switch VSA® on again. We do not recommend driving your vehicle with the VSA® system switched off.

You may hear a motor sound coming from the engine compartment while system checks are being performed immediately after starting the engine or while driving. This is normal.
When Driving

**LaneWatch™**

Is an assistance system that allows you to check the passenger side rear areas displayed on the audio/information screen when the turn signal is activated to the passenger’s side. A camera in the passenger side door mirror monitors these areas and allows you to check for vehicles, in addition to your visual check and use of the passenger door mirror. You can also keep the system on for your convenience while driving.

**The system activates when you:**
- Move the turn signal lever to the passenger side.
- Press the LaneWatch button.

**The system deactivates when you:**
- Pull the turn signal lever back.
- Press the LaneWatch button again.

**WARNING**

Failure to visually confirm that it is safe to change lanes before doing so may result in a crash and serious injury or death.

Do not rely only on LaneWatch while driving.

Always look in your mirrors, to either side of your vehicle, and behind you for other vehicles before changing lanes.

**Important Safety Reminder**

Like all assistance systems, LaneWatch has limitations. Over reliance on LaneWatch may result in a collision.

The LaneWatch function can be affected by weather, lighting (including headlights and low sun angle), ambient darkness, camera condition, and loading.

The LaneWatch may not provide the intended display of traffic to the side and rear under the following conditions:
- Your vehicle’s suspension has been altered, changing the height of the vehicle.
- Your tires are over or under inflated.
- Your tires or wheels are of varied size or construction.

* Not available on all models
When Driving LaneWatch™*

■ Customizing the LaneWatch settings
You can customize the following items using the audio/information screen.

- **Show with Turn Signal**: Selects whether LaneWatch monitor comes on when you operate the turn signal light lever.

- **Display Time after Turn Signal Off**: Changes the length of time the LaneWatch display stays on after you pull the turn signal lever back.

- **Reference Line**: Selects whether the reference lines appear on the LaneWatch monitor.

- **Next Maneuver Pop up***: Selects whether a turn direction screen of the navigation system interrupts the LaneWatch display.

- **Display**: Adjusts display settings.

* Customized Features P. 238

■ Reference Lines

Three lines that appear on the screen can give an idea of how far the vehicles or objects on the screen are from your vehicle, respectively. If an object is near line 1 (in red), it indicates that it is close to your vehicle whereas an object near line 3 farther away.

* Not available on all models
When Driving

Real Time AWD with Intelligent Control System™*

Your vehicle is equipped with the AWD system. When the system senses a loss of front wheel traction, it automatically transfers some power to the rear wheels. This allows you to utilize all available traction and may increase mobility.

You still need to exercise the same care when accelerating, steering, and braking that you would in a two wheel drive vehicle.

If you excessively spin all four wheels and overheat the AWD system, only the front wheels receive power. Stop until the system cools down.

NOTICE

Do not continuously spin the front tires of your vehicle. Continuously spinning the front tires can cause transmission or rear differential damage.

The AWD system may not function properly if tire type and size are mixed. Make sure to use the same size and type of tire, and the air pressures as specified.

Tire and Wheel Replacement P. 417

* Not available on all models
When Driving

Tire Pressure Monitoring System (TPMS)

Instead of directly measuring the pressure in each tire, the TPMS on this vehicle monitors and compares the rolling radius and rotational characteristics of each wheel and tire while you are driving to determine if one or more tires are significantly under-inflated. This will cause the low tire pressure/TPMS indicator to come on.

TPMS Calibration

You must start TPMS calibration every time you:
- Adjust the pressure in one or more tires.
- Rotate the tires.
- Replace one or more tires.

Before calibrating the TPMS:
- Set the cold tire pressure in all four tires.

Make sure:
- The vehicle is at a complete stop.
- Manual transmission models
  The shift lever is in \( \text{N} \).
- Continuously variable transmission models
  The shift lever is in \( \text{P} \).
- All models
  The ignition switch is in ON \( \text{II} \) *1.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

Checking Tires P. 411

Checking and Maintaining Tires P. 411

The system does not monitor the tires when driving at low speed.

Conditions such as low ambient temperature and altitude change directly affect tire pressure and can trigger the low tire pressure/TPMS indicator to come on.

Tire pressure checked and inflated in:
- Warm weather can become under-inflated in colder weather.
- Cold weather can become over-inflated in warmer weather.
  The low tire pressure/TPMS indicator will not come on as a result of over inflation.

The TPMS may not function properly if tire type and size are mixed. Make sure to use the same size and type of tire.

The low tire pressure/TPMS indicator may come on with a delay or may not come on at all when:
- You rapidly accelerate, decelerate, or turn the steering wheel.
- You drive on snowy or slippery roads.
- Snow chains are used.

The low tire pressure/TPMS indicator may come on under the following conditions:
- A compact spare tire is used.
- There is a heavier and uneven load on the tires than the condition at calibration.
- Snow chains are used.
When Driving

Tire Pressure Monitoring System (TPMS)

Press and hold the TPMS button until the low tire pressure/TPMS indicator blinks twice, indicating the calibration process has begun.

- If the low tire pressure/TPMS indicator does not blink, confirm the above conditions then press and hold the TPMS button again.
- The calibration process finishes automatically.

TPMS Calibration

- TPMS cannot be calibrated if a compact spare tire is installed.
- The calibration process requires approximately 30 minutes of cumulative driving at speeds between 30-60 mph (48-97 km/h).
- During this period, if the ignition is turned on*1 and the vehicle is not moved within 45 seconds, you may notice the low tire pressure/TPMS indicator comes on briefly. This is normal and indicates that the calibration process is not yet complete.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

If the snow chains are installed, remove them before calibrating the TPMS.

If the low tire pressure/TPMS indicator comes on even when the properly inflated specified regular tires are installed, have your vehicle checked by a dealer.

We recommend that the tires be replaced with the same brand, model, and size as the originals. Ask a dealer for details.
Tire Pressure Monitoring System (TPMS) - Required Federal Explanation

Each tire, including the spare (if provided), should be checked monthly when cold and inflated to the inflation pressure recommended by the vehicle manufacturer on the vehicle placard or tire inflation pressure label.

(If your vehicle has tires of a different size than the size indicated on the vehicle placard or tire inflation pressure label, you should determine the proper tire inflation pressure for those tires.)

As an added safety feature, your vehicle has been equipped with a tire pressure monitoring system (TPMS) that illuminates a low tire pressure telltale when one or more of your tires is significantly under-inflated.

Accordingly, when the low tire pressure telltale illuminates, you should stop and check your tires as soon as possible, and inflate them to the proper pressure.

Driving on a significantly under-inflated tire causes the tire to overheat and can lead to tire failure. Under-inflation also reduces fuel efficiency and tire tread life, and may affect the vehicle’s handling and stopping ability.

Continued
Please note that the TPMS is not a substitute for proper tire maintenance, and it is the driver’s responsibility to maintain correct tire pressure, even if under-inflation has not reached the level to trigger illumination of the TPMS low tire pressure telltale.

Your vehicle has also been equipped with a TPMS malfunction indicator to indicate when the system is not operating properly. The TPMS malfunction indicator is combined with the low tire pressure telltale. When the system detects a malfunction, the telltale will flash for approximately one minute and then remain continuously illuminated. This sequence will continue upon subsequent vehicle start-ups as long as the malfunction exists.

When the malfunction indicator is illuminated, the system may not be able to detect or signal low tire pressure as intended.

TPMS malfunctions may occur for a variety of reasons, including the installation of replacement or alternate tires or wheels on the vehicle that prevent the TPMS from functioning properly.

Always check the TPMS malfunction telltale after replacing one or more tires or wheels on your vehicle to ensure that the replacement or alternate tires and wheels allow the TPMS to continue to function properly.
Braking

Brake System

■ Parking Brake

Use the parking brake to keep the vehicle stationary when parked. You can manually apply and release, or automatically release it.

■ Manual operations

Use the electric parking brake switch to apply or release the brake. Manually releasing the parking brake using the switch helps your vehicle start slowly and smoothly when facing down hill on steep hills.

■ To apply manually

Pull the electric parking brake switch up gently and securely.

- The electric parking brake indicator comes on.

■ To release manually

1. Depress the brake pedal.
2. Press the electric parking brake switch.

- The electric parking brake indicator goes off.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

Parking Brake

You may hear the electric parking brake system operating from the rear wheel area when you apply or release the parking brake, or turn the ignition switch to LOCK [0]*1. This is normal.

The brake pedal may slightly move due to the electric parking brake system operation when you apply or release the parking brake. This is normal.

You cannot apply or release the parking brake if the battery goes dead.

Jump Starting P. 446

If you pull up the electric parking brake switch while driving, the parking brake is applied.

In the following situations, the parking brake automatically operates.
- When the vehicle stops with the automatic brake hold system activated for more than 10 minutes.

Continued
To release automatically
Use the accelerator pedal to release the brake when you are starting the vehicle facing uphill, or in a traffic jam.

Continuous variable transmission models
Depressing the accelerator pedal releases the parking brake.

Manual transmission models
Depressing the accelerator pedal while releasing the clutch pedal releases the parking brake.

Gently depress the accelerator pedal.
 ► The electric parking brake indicator goes off.

Parking Brake
If the parking brake cannot be released automatically, release it manually.

The parking brake cannot be released automatically while the following indicators are on:
● Malfunction indicator lamp
● Transmission indicator

The parking brake may not be released automatically while the following indicators are on:
● Electric parking brake system indicator
● VSA® system indicator
● ABS indicator
● Supplemental restraint system indicator

Gently depress the accelerator pedal and release the clutch pedal.
 ► The electric parking brake indicator goes off.

Manual transmission models
The clutch pedal is fully depressed before gently depress the accelerator pedal and release the clutch pedal.
You can release the parking brake automatically when:
- You are wearing the driver’s seat belt.
- The engine is running.

**Continuously variable transmission models**
- The transmission is not in [P] or [N].

**Manual transmission models**
- The transmission is not in [N].

### Foot Brake

Your vehicle is equipped with disc brakes at all four wheels. A vacuum power assist helps to reduce the effort needed on the brake pedal. The brake assist system increases the stopping force when you depress the brake pedal hard in an emergency situation. The anti-lock brake system (ABS) helps you retain steering control when braking very hard.

- [Brake Assist System](P. 370)
- [Anti-lock Brake System (ABS)](P. 369)

---

**Foot Brake**

Check the brakes after driving through deep water, or if there is a buildup of road surface water. If necessary, dry the brakes by lightly depressing the pedal several times.

If you hear a continuous metallic friction sound when applying the brakes, the brake pads need to be replaced. Have your vehicle checked by a dealer.

Constantly using the brake pedal while going down a long hill builds up heat, which reduces the brake effectiveness. Apply engine braking by taking your foot off the accelerator pedal and downshifting to a lower gear/speed position. With manual transmission use a lower gear for greater engine braking.

Do not rest your foot on the brake pedal while driving, as it will lightly apply the brakes and cause them to lose effectiveness over time and reduce pad life. It will also confuse drivers behind you.
Braking
Brake System

Automatic Brake Hold

Continuously variable transmission models

Keeps the brake applied after releasing the brake pedal until the accelerator pedal is pressed. You can use this system while the vehicle is temporarily stopped, such as when you stop at a traffic light.

Turning on the system

Fasten your seat belt properly, then start the engine. Press the automatic brake hold button.

- The automatic brake hold system indicator comes on. The system is turned on.

Activating the system

Depress the brake pedal to come to a complete stop. The shift lever must be in other than P or R.
- The automatic brake hold indicator comes on. Braking is kept for up to 10 minutes.
- Release the brake pedal after the automatic brake hold indicator comes on.

Canceling the system

Depress the accelerator pedal while the shift lever is in other than P or N. The system is canceled and the vehicle starts to move.
- The automatic brake hold indicator goes off. The system releases the brake automatically.

WARNING

Activating the automatic brake hold system on steep hills or slippery roads may still allow the vehicle to move if you remove your foot from the brake pedal.

If a vehicle unexpectedly moves, it may cause a crash resulting in serious injury or death.

Never activate the automatic brake hold system or rely on it to keep a vehicle from moving when stopped on a steep hill or slippery roads.

WARNING

Using the automatic brake hold system to park the vehicle may result in the vehicle unexpectedly moving.

If a vehicle moves unexpectedly, it may cause a crash, resulting in serious injury or death.

Never leave the vehicle when braking is temporarily kept by automatic brake hold and always park the vehicle by putting the transmission in P and applying the parking brake.
Manual transmission models

Keeps the brake applied after releasing the brake pedal until you change a gear to a position other than N and:
  • Release the clutch pedal on a level road or when facing downhill.
  • Release the clutch pedal and depress the accelerator pedal when facing uphill.

You can use this system while the vehicle is temporarily stopped, such as when you stop at a traffic light.

Turning on the system

Fasten your seat belt properly, then start the engine. Press the automatic brake hold button.
  • The automatic brake hold system indicator comes on. The system is turned on.

Activating the system

Depress the brake pedal to come to a complete stop.
  • The automatic brake hold indicator comes on. Braking is kept for up to 10 minutes.
  • Release the brake pedal after the automatic brake hold indicator comes on.

Canceling the system

Shift into one of the gears other than N and:
  • Release the clutch pedal on a level road or when facing downhill.
  • Release the clutch pedal and depress the accelerator pedal when facing uphill.

The system is canceled and the vehicle starts to move.
  • The automatic brake hold indicator goes off. The system releases the brake automatically.

Continued
The system automatically cancels when:
- You engage the parking brake.
- You depress the brake pedal and move the shift lever to P or R.

Under the following conditions, the system automatically cancels, and the parking brake is applied:
- Braking is kept for more than 10 minutes.
- The driver’s seat belt is unfastened.
- The engine is turned off.
- There is a problem with automatic brake hold system.

Turning off the automatic brake hold system

While the system is on, press the automatic brake hold button again.
- The automatic brake hold system indicator goes off.

If you want to turn off automatic brake hold while the system is in operation, press the automatic brake hold button with the brake pedal depressed.
Anti-lock Brake System (ABS)

ABS

Helps prevent the wheels from locking up, and helps you retain steering control by pumping the brakes rapidly, much faster than you.

The electronic brake distribution (EBD) system, which is part of the ABS, also balances the front-to-rear braking distribution according to vehicle loading.

You should never pump the brake pedal. Let the ABS work for you by always keeping firm, steady pressure on the brake pedal. This is sometimes referred to as “stomp and steer.”

ABS operation

The brake pedal may pulsate slightly when the ABS is working. Keep holding the pedal firmly down. On dry pavement, you will need to press on the brake pedal very hard before the ABS activates. However, you may feel the ABS activate immediately if you are trying to stop on snow or ice.

When the vehicle speed goes under 6 mph (10 km/h), the ABS stops.

NOTICE

The ABS may not function correctly if you use an incorrect tire type and size.

When the ABS indicator comes on while driving, there may be a problem with the system. While normal braking is not affected, there is a possibility of the ABS not operating. Have your vehicle checked by a dealer immediately.

The ABS does not reduce the time or distance it takes to stop the vehicle. It only helps with steering control during hard braking.

In the following cases, your vehicle may need more stopping distance than a vehicle without the ABS:

• When driving on rough road surfaces, including when driving on uneven surfaces, such as gravel or snow.
• When tire chains are installed.

You may hear a motor sound coming from the engine compartment while system checks are being performed immediately after starting the engine or while driving. This is normal.
Brake Assist System

■ Brake Assist System
Designed to assist the driver by generating greater braking force when you depress the brake pedal hard during emergency braking.

■ Brake assist system operation
Press the brake pedal firmly for more powerful braking.

When brake assist operates, the pedal may wiggle slightly and an operating noise may be heard. This is normal. Keep holding the brake pedal firmly down.
Parking Your Vehicle

**When Stopped**

1. Depress the brake pedal firmly.
2. With the brake pedal depressed, pull up the electric parking brake switch slowly, but fully.

**Continuously variable transmission models**
3. Move the shift lever from **D** to **P**.

**Manual transmission models**
3. Move the shift lever to **R**.
4. Turn off the engine.
   - The electric parking brake indicator goes off in about 15 seconds.

Always confirm the electric parking brake is set, in particular if you are parked on an incline.

---

**NOTICE**

- Do not park your vehicle near flammable objects, such as dry grass, oil, or timber. Heat from the exhaust can cause a fire.

---

**NOTICE**

- Continuous variable transmission models
- The following can damage the transmission:
  - Depressing the accelerator and brake pedals simultaneously.
  - Holding the vehicle in place when facing uphill by depressing the accelerator pedal.
  - Moving the shift lever into **P** before the vehicle stops completely.

Raise the wiper arms when snow is expected.
Multi-View Rear Camera

Models with navigation system
See the Navigation System Manual.

Models without navigation system
About Your Multi-View Rear Camera
The audio/information screen can display your vehicle's rear view.
The display automatically changes to a rear view when the shift lever is moved to R.

Multi-View Rear Camera Display Area

About Your Multi-View Rear Camera
The rear camera view is restricted. You cannot see the corner ends of the bumper or what is underneath the bumper. Its unique lens also makes objects appear closer or farther than they actually are.

Visually confirm that it is safe to drive before backing up. Certain conditions (such as weather, lighting, and high temperatures) may also restrict the rear view. Do not rely on the rearview display which does not give you all information about conditions at the back of your vehicle.

If the camera lens is covered with dirt or moisture, use a soft, moist cloth to keep the lens clean and free of debris.

Models with display audio system
You can change the Fixed Guideline and Dynamic Guideline settings.

Customized Features P. 245
Fixed Guideline
On: Guidelines appear when you shift into R.
Off: Guidelines do not appear.

Dynamic Guidelines
On: Guidelines move according to the steering wheel direction.
Off: Guidelines do not move.
You can view three different camera angles on the rearview display.

**Models with color audio system**
Press the LIST/SELECT (selector) knob to switch the angle.

**Models with display audio system**
Touch the appropriate icon to switch the angle.

- [ ] Wide view
- [ ] Normal view
- [ ] Top down view

**All models**
If the last used viewing mode is Wide or Normal, the same mode is selected the next time you shift into [R]. If Top View is last used before you turned off the engine, Wide mode is selected next time you turn the ignition switch to ON [II] *1 and shift to [R].

---

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Refueling

Fuel Information

■ Fuel recommendation

**Unleaded gasoline, pump octane number 87 or higher**

Use of lower octane gasoline can cause a persistent, heavy metallic knocking noise that can lead to engine damage.

■ Top tier detergent gasoline

Because the level of detergency and additives in gasoline vary in the market, Honda endorses the use of "TOP TIER Detergent Gasoline" where available to help maintain the performance and reliability of your vehicle. TOP TIER Detergent Gasoline meets a new gasoline standard jointly established by leading automotive manufacturers to meet the needs of today’s advanced engines.

Qualifying gasoline retailers will, in most cases, identify their gasoline as having met "TOP TIER Detergent Gasoline" standards at the retail location. This fuel is guaranteed to contain the proper level of detergent additives and be free of metallic additives. The proper level of detergent additives, and absence of harmful metallic additives in gasoline, help avoid build-up of deposits in your engine and emission control system.

For further important fuel-related information for your vehicle, or on information on gasoline that does not contain MMT, visit [www.hondacars.com](http://www.hondacars.com). In Canada, visit [www.honda.ca](http://www.honda.ca) for additional information on gasoline. For more information on top tier gasoline, visit [www.toptiergas.com](http://www.toptiergas.com).

■ Fuel tank capacity: 13.2 US gal (50 liters)
How to Refuel

1. Stop your vehicle with the service station pump on the left side of the vehicle in the rear.
2. Turn off the engine.
3. Pull on the fuel fill door release handle under the lower left corner of the dashboard.
   - The fuel fill door opens.
4. Remove the fuel fill cap slowly. If you hear a release of air, wait until this stops, then turn the knob slowly to open the fuel fill cap.
5. Place the fuel fill cap in the holder.
6. Insert the filler nozzle fully.
   - When the tank is full, the fuel nozzle will click off automatically. This leaves space in the fuel tank in case the fuel expands with a change in the temperature.
7. After filling, replace the fuel fill cap, tightening it until you hear it click at least once.
   - Shut the fuel fill door by hand.

WARNING

Gasoline is highly flammable and explosive. You can be burned or seriously injured when handling fuel.

- Stop the engine, and keep heat, sparks, and flame away.
- Handle fuel only outdoors.
- Wipe up spills immediately.

The filler nozzle automatically stops to leave space in the fuel tank so that fuel does not overflow as a result of changes in air temperature.

If the filler nozzle keeps turning off when the tank is not full, there may be a problem with the pump’s fuel vapor recovery system. Try filling at another pump. If this does not fix the problem, consult a dealer.

Do not continue to add fuel after the nozzle has automatically stopped. Additional fuel can exceed the full tank capacity.

Fuel Economy

Improving Fuel Economy

Fuel economy depends on several conditions, including driving conditions, your driving habits, the condition of your vehicle, and loading. Depending on these and other conditions, you may or may not achieve the rated fuel economy of this vehicle.

Maintenance and Fuel Economy

You can optimize your fuel economy with proper maintenance of your vehicle. Always maintain your vehicle in accordance with the messages displayed on the information display.

- Use the recommended viscosity engine oil, displaying the API Certification Seal.
- Maintain the specified tire pressure.
- Do not load the vehicle with excess cargo.
- Keep your vehicle clean. A buildup of snow or mud on your vehicle’s underside adds weight and increases wind resistance.

Direct calculation is the recommended method to determine actual fuel consumed while driving.

<table>
<thead>
<tr>
<th>Miles driven</th>
<th>Gallons of fuel</th>

In Canada, posted fuel economy numbers are established following a simulated test. For more information on how this test is performed, please visit [http://oee.nrcan.gc.ca/](http://oee.nrcan.gc.ca/)
Accessories and Modifications

Accessories

When installing accessories, check the following:

• Do not install accessories on the windshield. They can obstruct your view and delay your reaction to driving conditions.

• Do not install accessories over areas marked SRS AIRBAG, on the sides or backs of the front seats, on front or side pillars, or near the side windows. Accessories installed in these areas may interfere with proper operation of the vehicle's airbags or may be propelled into you or another occupant if the airbags deploy.

• Be sure electronic accessories do not overload electrical circuits or interfere with proper operation of your vehicle.

  Fuses P. 456

• Before installing any electronic accessory, have the installer contact a dealer for assistance. If possible, have a dealer inspect the final installation.

Modifications

Do not modify your vehicle or use non-Honda components that can affect its handling, stability, and reliability.

Overall vehicle performance can be affected. Always make sure all equipment is properly installed and maintained, and that it meets federal, state, province, territory, and local regulations.

WARNING

Improper accessories or modifications can affect your vehicle's handling, stability, and performance, and cause a crash in which you can be seriously hurt or killed.

Follow all instructions in this owner’s manual regarding accessories and modifications.

Honda Genuine accessories are recommended to ensure proper operation on your vehicle.
This chapter discusses basic maintenance.

Before Performing Maintenance

Inspection and Maintenance

For your safety, perform all listed inspections and maintenance to keep your vehicle in good condition. If you become aware of any abnormality (noise, smell, insufficient brake fluid, oil residue on the ground, etc.), have your vehicle inspected by a dealer. (Note, however, that service at a dealer is not mandatory to keep your warranties in effect.) Refer to the separate maintenance booklet for detailed maintenance and inspection information.

Types of Inspection and Maintenance

Daily inspections
Perform inspections before long distance trips, when washing the vehicle, or when refueling.

Periodic inspections
- Check the brake fluid level monthly.  
  [Brake Fluid] P. 397
- Check the tire pressure monthly. Examine the tread for wear and foreign objects.
  [Checking and Maintaining Tires] P. 411
- Check the operation of the exterior lights monthly.
  [Replacing Light Bulbs] P. 399
- Check the condition of the wiper blades at least every six months.
  [Checking and Maintaining Wiper Blades] P. 407

Maintenance, replacement, or repair of emissions control devices and systems may be done by any automotive repair establishment or individuals using parts that are “certified” to EPA standards.

According to state and federal regulations, failure to perform maintenance on the maintenance main items marked with # will not void your emissions warranties. However, all maintenance services should be performed in accordance with the intervals indicated by the information display.

Maintenance Service Items P. 385

Authorized Manuals P. 475

If you want to perform complex maintenance tasks that require more skills and tools, you can purchase a subscription to the Service Express website at www.techinfo.honda.com.

If you want to perform maintenance yourself, make sure that you have the necessary tools and skills first. After performing maintenance, update the records in the separate maintenance booklet.
Safety When Performing Maintenance

Some of the most important safety precautions are given here. However, we cannot warn you of every conceivable hazard that can arise in performing maintenance. Only you can decide whether or not you should perform a given task.

**Maintenance Safety**

- To reduce the possibility of fire or explosion, keep cigarettes, sparks, and flames away from the battery and all fuel related parts.
- Never leave rags, towels, or other flammable objects under the hood.
  - Heat from the engine and exhaust can ignite them causing a fire.
- To clean parts, use a commercially available degreaser or parts cleaner, not gasoline.
- Wear eye protection and protective clothing when working with the battery or compressed air.
- Engine exhaust contains carbon monoxide, which is poisonous and can kill you.
  - Only operate the engine if there is sufficient ventilation.

**Vehicle Safety**

- The vehicle must be in a stationary condition.
  - Make sure your vehicle is parked on level ground, the parking brake is set, and the engine is off.
- Be aware that hot parts can burn you.
  - Make sure to let the engine and exhaust system cool thoroughly before touching vehicle parts.
- Be aware that moving parts can injure you.
  - Do not start the engine unless instructed, and keep your hands and limbs away from moving parts.

---

**WARNING**

Improperly maintaining this vehicle or failing to correct a problem before driving can cause a crash in which you can be seriously hurt or killed.

Always follow the inspection and maintenance recommendations according to the schedules in this owner’s manual.

**WARNING**

Failure to properly follow maintenance instructions and precautions can cause you to be seriously hurt or killed.

Always follow the procedures and precautions in this owner’s manual.
Parts and Fluids Used in Maintenance Service

The use of Honda genuine parts and fluids is recommended when maintaining and servicing your vehicle. Honda genuine parts are manufactured according to the same high quality standards used in Honda vehicles.
Maintenance Minder™

If the engine oil life is less than 15%, you will see the Maintenance Minder messages appear on the information display every time you turn the ignition switch to ON \(^1\). The messages notify you when to change the engine oil, or when to bring your vehicle to a dealer for indicated maintenance services.

To Use Maintenance Minder™

### Displaying the Engine Oil Life

1. Turn the ignition switch to ON \(\text{II}^1\).
2. Press the \(\downarrow\) (select/reset) knob repeatedly until the engine oil life appears on the information display.

The Maintenance Minder indicator \(\square\) stays on in the instrument panel after the engine oil life becomes 0%. Have the indicated maintenance done by a dealer immediately.

### Displaying the Engine Oil Life

Based on the engine operating conditions, the remaining engine oil life is calculated and displayed as a percentage.

<table>
<thead>
<tr>
<th>Displayed Engine Oil Life (%)</th>

\(^1\): Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
To switch the display, press the \( \text{select/reset} \) knob.

## Maintenance Minder Messages on the Information Display

<table>
<thead>
<tr>
<th>Oil Life Display</th>
<th>Explanation</th>
<th>Information</th>
<th>Maintenance Minder Indicator</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1" alt="Oil Life Display" /></td>
<td>The engine oil life indicator starts to appear along with other due soon maintenance item codes when the remaining oil life becomes 15 percent.</td>
<td>The engine oil is approaching the end of its service life.</td>
<td>Starts to come on when the remaining engine oil life becomes 15 percent. It goes off when the display is switched.</td>
</tr>
<tr>
<td><img src="image2" alt="SERVICE Message" /></td>
<td>The SERVICE message also starts to appear along with the engine oil life indicator and the maintenance item codes.</td>
<td>The engine oil has almost reached the end of its service life, and the maintenance items should be inspected and serviced as soon as possible.</td>
<td></td>
</tr>
<tr>
<td><img src="image3" alt="Remaining Engine Oil" /></td>
<td>The remaining engine oil life has passed its service life, and a negative distance appears after driving over 10 miles (U.S. models) or 10 km (Canadian models). The negative distance on the display blinks.</td>
<td>The engine oil life has passed. The maintenance items must be inspected and serviced immediately.</td>
<td>Stays on as a reminder even when the display is switched.</td>
</tr>
</tbody>
</table>
To Use Maintenance Minder™

Maintenance Service Items

- Independent of the Maintenance Minder information, replace the brake fluid every 3 years.
- Inspect idle speed every 160,000 miles (256,000 km).
- Adjust the valves during services A, B, 1, 2, or 3 if they are noisy.

Maintenance Main Items

<table>
<thead>
<tr>
<th>CODE</th>
<th>Maintenance Main Items</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Replace engine oil*1</td>
</tr>
</tbody>
</table>
| B    | Replace engine oil*1 and oil filter  
|      | Inspect front and rear brakes  
|      | Inspect tie rod ends, steering gearbox, and boots  
|      | Inspect suspension components  
|      | Inspect driveshaft boots  
|      | Inspect brake hoses and lines (Including ABS/VSA)  
|      | Inspect all fluid levels and condition of fluids  
|      | Inspect exhaust system*  
|      | Inspect fuel lines and connections* |

*1: If a message SERVICE does not appear more than 12 months after the display is reset, change the engine oil every year.

*2: If you drive in dusty conditions, replace the air cleaner element every 15,000 miles (24,000 km).

*3: If you drive primarily in urban areas that have high concentrations of soot in the air from industry and from diesel-powered vehicles, replace the dust and pollen filter every 15,000 miles (24,000 km).

*4: Driving in mountainous areas at very low vehicle speeds results in higher transmission temperatures. This requires transmission fluid changes more frequently than recommended by the Maintenance Minder. If you regularly drive your vehicle under these conditions, have the transmission fluid changed every 25,000 miles (40,000 km).

Maintenance Sub Items

<table>

| 4    | Replace spark plugs    |
|      | Inspect valve clearance |
| 5    | Replace engine coolant |
| 6    | Replace rear differential fluid* |

* Not available on all models

Continued
**Reseting the Display**

Reset the engine oil life display if you have performed the maintenance service.

1. Turn the ignition switch to ON \[\text{II}\]^1.
2. Display the engine oil life by repeatedly pressing the \(\text{\textbullet}\) (select/reset) knob.
3. Press and hold the \(\text{\textbullet}\) knob for ten seconds or more.
   - The engine oil life indicator and the maintenance item codes blink.
4. Press the \(\text{\textbullet}\) knob for five seconds or more.
   - The displayed maintenance items disappear, and the engine oil life display returns to 100%.

---

*1: Models with the smart entry system have an \textbf{ENGINE START/STOP} button instead of an ignition switch.
Maintenance Under the Hood

Maintenance Items Under the Hood

- Engine Oil Fill Cap (Orange)
- Washer Fluid (Blue Cap)
- Engine Oil Dipstick (Orange)
- Brake Fluid (Black Cap)
- Radiator Cap
- Battery
- Engine Coolant Reserve Tank
Maintenance Under the Hood

Opening the Hood

1. Park the vehicle on a level surface, and set the parking brake.
2. Pull the hood release handle under the lower left corner of the dashboard. The hood will pop up slightly.
3. Pull up the hood latch lever in the center of the hood to release the lock mechanism, and open the hood.
4. Remove the support rod from the clamp using the grip. Mount the support rod in the hood.

   When closing, remove the support rod, and stow it in the clamp, then gently lower the hood. Remove your hand at a height of approximately 12 inches (30 cm) and let the hood close.

NOTICE
Do not open the hood when the wiper arms are raised. The hood will strike the wipers, and may damage either the hood or the wipers.

When closing the hood, check that the hood is securely latched.

If the hood latch lever moves stiffly, or if you can open the hood without lifting the lever, the latch mechanism should be cleaned and lubricated.
Recommended Engine Oil

- Genuine Honda Motor Oil
- Premium-grade 0W-20 detergent oil with an API Certification Seal on the container.

Oil is a major contributor to your engine’s performance and longevity. If you drive the vehicle with insufficient or deteriorated oil, the engine may fail or be damaged.

This seal indicates the oil is energy conserving and that it meets the American Petroleum Institute’s latest requirements.

Use a Genuine Honda Motor Oil or another commercial engine oil of suitable viscosity for the ambient temperature as shown.

■ Synthetic oil
You may also use synthetic motor oil if it is labeled with the API Certification Seal and is the specified viscosity grade.

Recommended Engine Oil

Engine Oil Additives
Your vehicle does not require oil additives. In fact, they may adversely affect the engine performance and durability.
Maintenance Under the Hood

Oil Check

We recommend that you check the engine oil level every time you refuel. Park the vehicle on level ground. Wait approximately three minutes after turning the engine off before you check the oil.

1. Remove the dipstick (orange).
2. Wipe the dipstick with a clean cloth or paper towel.
3. Insert the dipstick back all the way into its hole.
4. Remove the dipstick again, and check the level. It should be between the upper and lower marks. Add oil if necessary.

If the oil level is near or below the lower mark, slowly add oil being careful not to overfill.
Adding Engine Oil

1. Unscrew and remove the engine oil fill cap.
2. Add oil slowly.
3. Reinstall the engine oil fill cap, and tighten it securely.
4. Wait for three minutes and recheck the engine oil dipstick.

NOTICE
Do not fill the engine oil above the upper mark. Overfilling the engine oil can result in leaks and engine damage.

If any oil spills, wipe it away immediately. Spilled oil may damage the engine compartment components.
Changing the Engine Oil and Oil Filter

You must change the engine oil and oil filter regularly in order to maintain the engine’s lubrication. The engine may be damaged if they are not changed regularly.

Change the oil and filter in accordance with the Maintenance Minder message on the information display.

1. Run the engine until it reaches normal operating temperature, and then turn the engine off.
2. Open the hood and remove the engine oil fill cap.
3. Remove the bolts and clips on the undercarriage and remove the under cover.

2WD models

3. Remove the bolts and clips on the undercarriage and remove the under cover.

All models

4. Remove the drain bolt and washer from the bottom of the engine, and drain the oil into a suitable container.

NOTICE
You may damage the environment if you do not dispose of the oil in a suitable way. If you are changing the oil by yourself, appropriately dispose of the used oil. Put the oil in a sealed container and take it to a recycling center. Do not throw the oil away into a garbage can or onto the ground.
5. Remove the oil filter and dispose of the remaining oil.
6. Check that the filter gasket is not stuck to the engine contact surface. If it is stuck, you must detach it.
7. Wipe away dirt and dust adhering to the contact surface of the engine block, and install a new oil filter. Apply a light coat of new engine oil to the oil filter gasket.
8. Put a new washer on the drain bolt, then reinstall the drain bolt. Tightening torque: 30 lbf·ft (40 N·m, 4.0 kgf·m)
9. Pour the recommended engine oil into the engine. Engine oil change capacity (including filter): 3.9 US qt (3.7 L)
10. Reinstall the engine oil fill cap securely and start the engine.
11. Run the engine for a few minutes, and then check that there is no leak from the drain bolt or oil filter.
12. Stop the engine, wait for three minutes, and then check the oil level on the dipstick. If necessary, add more engine oil.

**Changing the Engine Oil and Oil Filter**

You will need a special wrench to replace the oil filter. You can buy this wrench from a dealer.

When installing the new oil filter, follow the instructions supplied with the oil filter.

Reinstall the engine oil fill cap. Start the engine. The low oil pressure indicator should go off within five seconds. If it does not, turn off the engine, and check your work.
Engine Coolant

**Specified coolant: Honda Long Life Antifreeze/Coolant Type 2**

This coolant is premixed with 50% antifreeze and 50% water. Do not add any straight antifreeze or water.

We recommend you check the engine coolant level every time you refuel. Check the reserve tank first. If it is completely empty, also check the coolant level in the radiator. Add the engine coolant accordingly.

**Reserve Tank**

1. Check the amount of coolant in the reserve tank.

2. If the coolant level is below the MIN mark, add the specified coolant until it reaches the MAX mark.

3. Inspect the cooling system for leaks.

**NOTICE**

If Honda antifreeze/coolant is not available, you may use another major brand non-silicate coolant as a temporary replacement. Check that it is a high quality coolant recommended for aluminum engines. Continued use of any non-Honda coolant can result in corrosion, causing the cooling system to malfunction or fail. Have the cooling system flushed and refilled with Honda antifreeze/coolant as soon as possible.

Do not add rust inhibitors or other additives to your vehicle’s coolant system. They may not be compatible with the coolant or with the engine components.

If temperatures consistently below -22°F (-30°C) are expected, the coolant mixture should be changed to a higher concentration. Consult a dealer for more information.
**Maintenance Under the Hood**

**Engine Coolant**

1. Make sure the engine and radiator are cool.
2. Turn the radiator cap counterclockwise and relieve any pressure in the cooling system. Do not push the cap down when turning.
3. Push down and turn the radiator cap counterclockwise to remove it.
4. The coolant level should be up to the base of the filler neck. Add coolant if it is low.
5. Put the radiator cap back on, and tighten it fully.
6. Pour coolant into the reserve tank until it reaches the MAX mark. Put the cap back on the reserve tank.

---

**Radiator**

**WARNING**

Removing the radiator cap while the engine is hot can cause the coolant to spray out, seriously scalding you.

Always let the engine and radiator cool down before removing the radiator cap.

**NOTICE**

Pour the fluid slowly and carefully so you do not spill any. Clean up any spills immediately; they can damage components in the engine compartment.
Transmission Fluid

Continuously variable transmission models

■ Continuously Variable Transmission Fluid

Specified fluid: Honda HCF-2 Transmission Fluid

Have a dealer check the fluid level and replace if necessary.

NOTICE
Do not mix HCF-2 with other transmission fluids
Using a transmission fluid other than HCF-2 may adversely affect the operation and durability of your vehicle’s transmission, and damage the transmission. Any damage caused by using a transmission fluid that is not equivalent to HCF-2 is not covered by Honda’s new vehicle warranty.

Manual transmission models

■ Manual Transmission Fluid

Specified fluid: Honda Manual Transmission Fluid (MTF)

Have a dealer check the fluid level and replace if necessary.

If Honda MTF is not available, you may use the API certificated SAE 0W-20 or 5W-20 viscosity motor oil as a temporary measure. Replace with MTF as soon as possible. Motor oil does not contain the proper additives for the transmission and continued use can cause decreased shifting performance and lead to transmission damage.
**Brake Fluid**

**Specified fluid: Honda Heavy Duty Brake Fluid DOT 3**

### Checking the Brake Fluid

The fluid level should be between the MIN and MAX marks on the side of the reservoir.

**Manual transmission models**

The brake fluid reservoir is also used for your vehicle's clutch fluid. As long as you keep the brake fluid level as instructed above, there is no need for checking the clutch fluid level.

**NOTICE**

Brake fluid marked DOT 5 is not compatible with your vehicle's braking system and can cause extensive damage.

If the specified brake fluid is not available, you should use only DOT 3 or DOT 4 fluid from a sealed container as a temporary replacement.

Using any non-Honda brake fluid can cause corrosion and decrease the longevity of the system. Have the brake system flushed and refilled with Honda Heavy Duty Brake Fluid DOT 3 as soon as possible.

If the brake fluid level is at or below the MIN mark, have a dealer inspect for leaks or worn brake pads as soon as possible.
Refilling Window Washer Fluid

Models without washer level sensor
Check the amount of window washer fluid by looking at the reservoir. If the level is low, fill the washer reservoir.

Canadian models
If the washer fluid is low, the washer level indicator comes on.

Pour the washer fluid carefully. Do not overflow the reservoir.

NOTICE
Do not use engine antifreeze or a vinegar/water solution in the window washer reservoir. Antifreeze can damage your vehicle's paint. A vinegar/water solution can damage the window washer pump.
Replacing Light Bulbs

Headlight Bulbs

When replacing, use the following bulbs.

**High/Low beam headlight: 60/55 W (HB2 for halogen bulb type)**

### High/Low Beam Headlight

1. Remove the coupler.
2. Remove the rubber weather seal.
3. Remove the hold-down wire, then remove the bulb.
4. Insert a new bulb.
5. Reinstall the hold-down wire. Hook the end of the wire on the knob in the slot.
6. Reinstall the rubber weather seal.
7. Insert the coupler into the connector of the bulb.

**NOTICE**

Halogen bulbs get very hot when lit. Oil, perspiration, or a scratch on the glass can cause the bulb to overheat and shatter.

The headlight aim is set by the factory, and does not need to be adjusted. However, if you regularly carry heavy items in the cargo area, have the aiming readjusted at a dealer or by a qualified technician.

When replacing a halogen bulb, handle it by its base, and protect the glass from contact with your skin or hard objects. If you touch the glass, clean it with denatured alcohol and a clean cloth.
Front Turn Signal/Parking Light Bulbs

When replacing, use the following bulbs.

Front Turn Signal/Parking Light: 28/8 W (Amber)

1. Turn the socket to the left and remove it.
2. Remove the old bulb and insert a new bulb.
Front Side Marker Light Bulbs

When replacing, use the following bulbs.

Front Side Marker Light: 5 W

1. Turn the socket to the left and remove it.
2. Remove the old bulb and insert a new bulb.

Fog Light Bulbs*

When replacing, use the following bulbs.

Fog Light: 35 W (H8 for halogen bulb type)

1. Remove the clip using a flat-tip screwdriver, and push up the inner fender.

* Not available on all models

Not available on all models

** NOTICE **

Halogen bulbs get very hot when lit. Oil, perspiration, or a scratch on the glass can cause the bulb to overheat and shatter.

When replacing a halogen bulb, handle it by its plastic case, and protect the glass from contact with your skin or hard objects. If you touch the glass, clean it with denatured alcohol and a clean cloth.
Replacing Light Bulbs

Side Turn Signal/Emergency Indicator Light Bulbs

1. Push the tab to remove the coupler.
2. Rotate the old bulb to the left on driver side and to the right on passenger side to remove.
3. Insert a new bulb into the fog light assembly and turn it to the right on driver side and to the left on passenger side.
4. Insert the coupler into the connector of the bulb.

Side Turn Signal/Emergency Indicator Light Bulbs*

Door mirrors have the side turn lights. Have an authorized Honda dealer inspect and replace the light assembly.

Fog Light Bulbs*

Insert a flat-tip screwdriver, lift and remove the center pin to remove the clip.

Insert the clip with the center pin raised, and push until it is flat.

* Not available on all models
Rear Turn Signal Light Bulbs

When replacing, use the following bulbs.

**Rear Turn Signal Light: 21 W (Amber)**

1. Use a Phillips-head screwdriver to remove the bolts.
2. Pull the light assembly out of the rear pillar.
3. Turn the socket to the left and remove it.
4. Remove the old bulb.
5. Insert a new bulb.
6. Slide the light assembly onto the guide on the body.
Replacing Light Bulbs

Back-Up Light Bulbs

When replacing, use the following bulbs.

**Back-Up Light: 16 W**

1. Remove the cover by prying on the edge using a flat-tip screwdriver.
   - Wrap the flat-tip screwdriver with a cloth to prevent scratches.

2. Turn the socket to the left and remove it.
3. Remove the old bulb.
4. Insert a new bulb.
Brake/Tail/Rear Side Marker Light Bulbs

Brake/tail/rear side marker light bulbs are the LED type. Have an authorized Honda dealer inspect and replace the light assembly.

High-Mount Brake Light Bulb

High-mount brake light bulb is a LED type. Have an authorized Honda dealer inspect and replace the light assembly.
Relegating Light Bulbs

Rear License Plate Light Bulbs

When replacing, use the following bulbs.

| Rear License Plate Light: 5 W |

1. Push the lens on the left and pull out the lens and the socket attached to it.

2. Remove the license plate light assembly by squeezing the tabs on both sides of the socket.

3. Remove the old bulb and insert a new bulb.
Checking and Maintaining Wiper Blades

Checking Wiper Blades
If the wiper blade rubber has deteriorated, it will leave streaks and the hard surfaces of the blade may scratch the window glass.

Changing the Front Wiper Blade Rubber

1. Lift the driver side wiper arm first, then the passenger side.

2. Press and hold the tab, then slide the blade from the wiper arm.

NOTICE
Avoid dropping the wiper arm; it may damage the windshield.
3. Slide the wiper blade out from its holder by pulling the tabbed end out.

4. Slide the new wiper blade onto the holder from the bottom end.
   ▶️ The tab on the blade should fit in the indent of the top of the wiper holder.
5. Slide the wiper blade onto the wiper arm securely.
6. Lower the passenger side wiper arm first, then the driver side.
Changing the Rear Wiper Blade Rubber

1. Raise the wiper arm off.
2. Pivot up the bottom end of the wiper blade until it comes off from the wiper arm.
3. Slide the wiper blade out from the end with the indent.

**NOTICE**
Avoid dropping the wiper arm; it may damage the rear window.
Checking and Maintaining Wiper Blades

4. Remove the retainers from the rubber blade that has been removed, and mount to a new rubber blade.

5. Slide the wiper blade onto the holder. Make sure it is engaged correctly, then install the wiper blade assembly onto the wiper arm.
Checking and Maintaining Tires

Checking Tires

To safely operate your vehicle, your tires must be of the proper type and size, in good condition with adequate tread, and properly inflated.

■ Inflation guidelines

Properly inflated tires provide the best combination of handling, tread life, and comfort. Refer to the driver’s doorjamb label or specification’s page for the specified pressure.

Underinflated tires wear unevenly, adversely affect handling and fuel economy, and are more likely to fail from overheating.

Overinflated tires make your vehicle ride harshly, are more prone to road hazards, and wear unevenly.

Every day before you drive, look at each of the tires. If one looks lower than the others, check the pressure with a tire gauge.

At least once a month or before long trips, use a gauge to measure the pressure in all tires, including the spare. Even tires in good condition can lose 1 to 2 psi (10 to 20 kPa, 0.1 to 0.2 kgf/cm²) per month.

■ Inspection guidelines

Every time you check inflation, also examine the tires and valve stems.

Look for:
• Bumps or bulges on the side or in the tread. Replace the tire if you find any cuts, splits, or cracks in the side of the tire. Replace it if you see fabric or cord.
• Remove any foreign objects and inspect for air leaks.
• Uneven tread wear. Have a dealer check the wheel alignment.
• Excessive tread wear.
• Cracks or other damage around valve stem.

WARNING

Using tires that are excessively worn or improperly inflated can cause a crash in which you can be seriously hurt or killed.

Follow all instructions in this owner’s manual regarding tire inflation and maintenance.

Measure the air pressure when tires are cold. This means the vehicle has been parked for at least three hours, or driven less than 1 mile (1.6 km). If necessary, add or release air until the specified pressure is reached.

If checked when hot, tire pressure can be as much as 4–6 psi (30–40 kPa, 0.3–0.4 kgf/cm²) higher than if checked when cold.

Have a dealer check the tires if you feel a consistent vibration while driving. New tires and any that have been removed and reinstalled should be properly balanced.

U.S. models

Whenever tire pressure is adjusted, you must calibrate the TPMS.
Checking and Maintaining Tires

Tire and Loading Information Label

The label attached to the driver’s doorjamb provides necessary tire and loading information.

![Label Example]

Tire Labeling

The tires that came on your vehicle have a number of markings. Those you should be aware of are described below.

- Tire Sizes
  Whenever tires are replaced, they should be replaced with tires of the same size.

- Tire and Loading Information Label
  The tire and loading information label attached to the driver’s doorjamb contains:
  1. The number of people your vehicle can carry.
  2. The total weight your vehicle can carry. Do not exceed this weight.
  3. The original tire sizes for front, rear, and spare.
  4. The proper cold tire pressure for front, rear, and spare.
Checking and Maintaining Tires

Tire Identification Number (TIN)
The tire identification number (TIN) is a group of numbers and letters that look like the example in the side column. TIN is located on the sidewall of the tire.

Glossary of Tire Terminology

Cold Tire Pressure – The tire air pressure when the vehicle has been parked for at least three hours or driven less than 1 mile (1.6 km).
Load Rating – Means the maximum load that a tire is rated to carry for a given inflation pressure.
Maximum Inflation Pressure – The maximum tire air pressure that the tire can hold.
Maximum Load Rating – Means the load rating for a tire at the maximum permissible inflation pressure for that tire.
Recommended Inflation Pressure – The cold tire inflation pressure recommended by the manufacturer.
Treadwear Indicators (TWI) – Means the projections within the principal grooves designed to give a visual indication of the degrees of wear of the tread.

<table>

<tr>
<td>22 09: Date of manufacture.</td>
</tr>
</tbody>
</table>

Example:
DOT: This indicates that the tire meets all requirements of the U.S. Department of Transportation.
B97R: Manufacturer’s identification mark.
FW6X: Tire type code.
22 09: Date of manufacture.
DOT Tire Quality Grading (U.S. Vehicles)

The tires on your vehicle meet all U.S. Federal Safety Requirements. All tires are also graded for treadwear, traction, and temperature performance according to Department of Transportation (DOT) standards. The following explains these gradings.

- **Uniform Tire Quality Grading**

  Quality grades can be found where applicable on the tire sidewall between tread shoulder and maximum section width.

- **Treadwear**

  The treadwear grade is a comparative rating based on the wear rate of the tire when tested under controlled conditions on a specified government test course. For example, a tire graded 150 would wear one and one-half (1 1/2) times as well on the government course as a tire graded 100. The relative performance of tires depends upon the actual conditions of their use, however, and may depart significantly from the norm due to variations in driving habits, service practices and differences in road characteristics and climate.
Checking and Maintaining Tires

DOT Tire Quality Grading (U.S. Vehicles)

### Traction

The traction grades, from highest to lowest, are AA, A, B, and C. Those grades represent the tire’s ability to stop on wet pavement as measured under controlled conditions on specified government test surfaces of asphalt and concrete. A tire marked C may have poor traction performance.

### Temperature

The temperature grades are A (the highest), B, and C, representing the tire’s resistance to the generation of heat and its ability to dissipate heat when tested under controlled conditions on a specified indoor laboratory test wheel. Sustained high temperature can cause the material of the tire to degenerate and reduce tire life, and excessive temperature can lead to sudden tire failure. The grade C corresponds to a level of performance which all passenger car tires must meet under the Federal Motor Vehicle Safety Standard No. 109. Grades B and A represent higher levels of performance on the laboratory test wheel than the minimum required by law.

**Warning:** The traction grade assigned to this tire is based on straight-ahead braking traction tests, and does not include acceleration, cornering, hydroplaning, or peak traction characteristics.

**Temperature**

Warning: The temperature grade for this tire is established for a tire that is properly inflated and not overloaded. Excessive speed, underinflation, or excessive loading, either separately or in combination, can cause heat buildup and possible tire failure.
Checking and Maintaining Tires

Wear Indicators

The groove where the wear indicator is located is 1/16 inch (1.6 mm) shallower than elsewhere on the tire. If the tread has worn so that the indicator is exposed, replace the tire. **Worn out tires have poor traction on wet roads.**

Tire Service Life

The life of your tires is dependent on many factors, including driving habits, road conditions, vehicle loading, inflation pressure, maintenance history, speed, and environmental conditions (even when the tires are not in use).

In addition to regular inspections and inflation pressure maintenance, it is recommended that you have annual inspections performed once the tires reach five years old. All tires, including the spare, should be removed from service after 10 years from the date of manufacture, regardless of their condition or state of wear.
Tire and Wheel Replacement

Replace your tires with radials of the same size, load range, speed rating, and maximum cold tire pressure rating (as shown on the tire’s sidewall). Using tires of a different size or construction can cause the ABS, vehicle stability assist (VSA®) system, hill start assist, and the AWD* system to work incorrectly.

It is best to replace all four tires at the same time. If that isn’t possible, replace the front or rear tires in pairs.

Make sure that the wheel’s specifications match those of the original wheels.

* Not available on all models

**WARNING**

Installing improper tires on your vehicle can affect handling and stability. This can cause a crash in which you can be seriously hurt or killed.

Always use the size and type of tires recommended in this owner’s manual.

* Not available on all models
Tire Rotation

Rotating tires according to the Maintenance Minder message on the information display helps to distribute wear more evenly and increase tire life.

- **Tires without rotation marks**
  Rotate the tires as shown here.

- **Tires with rotation marks**
  Rotate the tires as shown here.

**Tires with directional tread patterns** should only be rotated front to back (not from one side to the other). Directional tires should be mounted with the rotation indication mark facing forward, as shown below.

Whenever tires are rotated, you must calibrate the TPMS.

**TPMS Calibration** P. 359
Winter Tires

If driving on snowy or frozen roads, mount all season marked M+S tires, snow tires, or tire chains; reduce speed; and maintain sufficient distance between vehicles when driving.

Be particularly careful when operating the steering wheel or brakes to prevent skidding.

Use tire chains, snow tires, or all season tires when necessary or according to the law.

When mounting, refer to the following points.

For winter tires:
- Select the size and load ranges that are the same as the original tires.
- Mount the tires to all four wheels.

For tire chains:
- Install them on the front tires only.
- Because your vehicle has limited tire clearance, we strongly recommend using the chains listed below:
  
  **Cable-type: SCC Radial Chain SC1034**
  
- Follow the chain manufacturer’s instruction when installing. Mount them as tightly as you can.
- Check that the chains do not touch the brake lines or suspension.
- Drive slowly.

**WARNING**

Using the wrong chains, or not properly installing chains, can damage the brake lines and cause a crash in which you can be seriously injured or killed.

Follow all instructions in this owner’s manual regarding the selection and use of tire chains.

**NOTICE**

Traction devices that are the wrong size or improperly installed can damage your vehicle’s brake lines, suspension, body, and wheels. Stop driving if they are hitting any part of the vehicle.

When tire chains are mounted, follow the chain manufacturer’s instructions regarding vehicle operational limits.

If your vehicle is equipped with summer tires, be aware that these tires are not designed for winter driving conditions. For more information, contact a dealer.
Battery

Checking the Battery

The battery condition is being monitored by the sensor on the negative terminal. If there is a problem with the sensor, the warning message on the information display will let you know. Have your vehicle checked by a dealer.

Check the battery terminals for corrosion monthly.

If your vehicle's battery is disconnected or goes dead:
- The audio system is disabled.
  
  Audio System Theft Protection P. 179
- The clock resets.
  
  Clock P. 94
- The navigation system* is disabled.
  
  Refer to the navigation system manual

WARNING

The battery gives off explosive hydrogen gas during normal operation.

A spark or flame can cause the battery to explode with enough force to kill or seriously hurt you.

When conducting any battery maintenance, wear protective clothing and a face shield, or have a skilled technician do it.

WARNING: Battery post, terminals, and related accessories contain lead and lead compounds.

Wash your hands after handling.

When replacing the battery, the replacement must be of the same specifications. Consult a dealer for more information.

* Not available on all models
Charging the Battery

Disconnect both battery cables to prevent damaging your vehicle’s electrical system. Always disconnect the negative (–) cable first, and reconnect it last.

When you find corrosion, clean the battery terminals by applying a baking powder and water solution. Clean the terminals with a damp towel. Cloth/towel dry the battery. Coat the terminals with grease to help prevent future corrosion.
Remote Transmitter Care

Replacing the Button Battery

If the indicator does not come on when the button is pressed, replace the battery.

1. Unscrew the cover with a small Phillips-head screwdriver.
2. Open the remote transmitter.
   - Wrap the small flat-tip screwdriver with a cloth to prevent scratching the transmitter.
3. Remove the button battery with the small flat-tip screwdriver.
4. Make sure to replace the battery with the correct polarity.

**NOTICE**
An improperly disposed of battery can damage the environment. Always confirm local regulations for battery disposal.

Replacement batteries are commercially available or at a dealer.

* Keys with Remote Transmitter*

Battery type: CR1620

* Not available on all models
Remote Transmitter Care

Replacing the Button Battery

1. Remove the built-in key.

2. Remove the upper half of the cover by carefully prying on the edge with a coin. 
   - Remove carefully to avoid losing the buttons.
   - Wrap a coin with a cloth to prevent scratching the smart entry remote.

3. Make sure to replace the battery with the correct polarity.

---

**Smart Entry Remote**

**Battery type: CR2032**

1. Remove the built-in key.

- Not available on all models
Dust and Pollen Filter

The heating and cooling system*/climate control system* is equipped with a dust and pollen filter that collects pollen, dust, and other debris in the air. The Maintenance Minder™ messages will let you know when to replace the filter.

We recommend that you replace the dust and pollen filter sooner when using your vehicle in areas with high concentrations of dust.

*Not available on all models.
Cleaning

Interior Care

Use a damp cloth with a mixture of mild detergent and warm water to remove dirt.
Use a clean cloth to remove detergent residue.

Cleaning Seat Belts

Use a soft brush with a mixture of mild soap and warm water to clean the seat belts.
Let the belts air dry. Wipe the loop of the seat belt anchors using a clean cloth.

Cleaning the Window

Wipe using a glass cleaner.
Cleaning

**Interior Care**

**Floor Mats**

The driver’s floor mat hooks over the floor anchors, which keep the mat from sliding forward. To remove a mat for cleaning, turn the anchor knobs to the unlock position. When reinstalling the mat after cleaning, turn the knobs to the lock position.

*Do not put additional floor mats on top of the anchored mat.*

**Maintaining Genuine Leather***

Vacuum dirt and dust from the leather frequently. Pay close attention to the pleats and seams. Clean the leather with a soft cloth dampened with a 90% water and 10% neutral soap solution. Then buff it with a clean, dry cloth. Remove any dust or dirt on leather surfaces immediately.

**Floor Mats**

If you use any floor mats that were not originally provided with your vehicle, make sure they are designed for your specific vehicle, fit correctly, and are securely anchored by the floor anchors. Position the rear seat floor mats properly. If they are not properly positioned, the floor mats can interfere with the front seat functions.

* *Not available on all models*
Exterior Care

Dust off the vehicle body after you drive. Regularly inspect your vehicle for scratches on painted surfaces. A scratch on a painted surface can result in body rust. If you find a scratch, promptly repair it.

Washing the Vehicle

Wash the vehicle regularly. Wash more frequently when driving in the following conditions:

- If driving on roads with road salt.
- If driving in coastal areas.
- If tar, soot, bird droppings, insects, or tree sap are stuck to painted surfaces.

Using an Automated Car Wash

Fold in the door mirrors. Make sure to follow the instructions indicated on the automated car wash.

Using High Pressure Cleaners

- Keep sufficient distance between the cleaning nozzle and the vehicle body.
- Take particular care around the windows. Standing too close may cause water to enter the vehicle interior.
- Do not spray high pressure water directly into the engine compartment. Instead, use low pressure water and a mild detergent.

Continued
Cleaning
Exterior Care

■ Applying Wax
A good coat of automotive body wax helps protect your vehicle’s paint from the elements. Wax will wear off over time and expose your vehicle’s paint to the elements, so reapply as necessary.

■ Maintaining the Bumpers and Other Resin Coated Parts
If you get gasoline, oil, engine coolant, or battery fluid on resin coated parts, they may be stained or the coating may peel. Promptly wipe it away using a soft cloth and clean water.

■ Cleaning the Window
Wipe using a glass cleaner.

■ Maintaining Aluminum Wheels
Aluminum is susceptible to deterioration caused by salt and other road contaminants. Use a sponge and mild detergent to wipe away promptly. Be careful not to use harsh chemicals (including some commercial wheel cleaners) or a stiff brush. They can damage the clear coat of the aluminum alloy wheels that helps keep the aluminum from corroding and tarnishing.

NOTICE
Chemical solvents and strong cleaners can damage the paint, metal, and plastic on your vehicle. Wipe up spills immediately.

Maintaining the Bumpers and Other Resin Coated Parts
Ask a dealer about the correct coating material when you want to repair the painted surface of the parts made of resin.
Fogged Exterior Light Lenses

The inside lenses of exterior lights (headlights, brake lights etc.) may fog temporarily if you have driven in the rain, or after the vehicle has been run through a car wash. Dew condensation also may build up inside the lenses when there is a significant enough difference between the ambient and inside lens temperatures (similar to vehicle windows fogging up in rainy conditions). These conditions are natural processes, not structural design problems in the exterior lights. Lens design characteristics may result in moisture developing on the light lens frame surfaces. This also is not a malfunction. However, if you see large amounts water accumulation, or large water drops building up inside the lenses, have your vehicle inspected by a dealer.

If a Tire Goes Flat

Changing a Flat Tire

If a tire goes flat while driving, grasp the steering wheel firmly, and brake gradually to reduce speed. Then, stop in a safe place. Replace the flat tire with a compact spare tire. Go to a dealer as soon as possible to have the full-size tire repaired or replaced.

1. Park the vehicle on firm, level, and non-slippery surface and apply the parking brake.

   **Continuously variable transmission models**

2. Move the shift lever to **P**.

   **Manual transmission models**

2. Move the shift lever to **R**.

   **All models**

3. Turn on the hazard warning lights and turn the ignition switch to **LOCK 0**.*1.

   *1: Models with the smart entry system have an **ENGINE START/STOP** button instead of an ignition switch.

   **Changing a Flat Tire**

   Periodically check the tire pressure of the compact spare. It should be set to the specified pressure. Specify Pressure: 60 psi (420 kPa, 4.2 kgf/cm²)

   When driving with the compact spare tire, keep the vehicle speed under 50 mph (80 km/h). Replace with a full-size tire as soon as possible.

   The compact spare tire and wheel in your vehicle are specifically for this model. Do not use them with another vehicle. Do not use another type of compact spare tire or wheel with your vehicle.

   Do not mount tire chains on a compact spare tire. If a chain-mounted front tire goes flat, remove one of the full-size rear tires and replace it with the compact spare tire. Remove the flat front tire and replace it with the full-size tire that was removed from the rear. Mount the tire chains on the front tire.
**Getting Ready to Replace the Flat Tire**

1. Open the cargo area floor lid.

2. Take the tool case out of the cargo area.
   - **2WD models**
     Take the wheel nut wrench, jack handle bar and jack out of the tool case.
   - **AWD models**
     Take the wheel nut wrench and jack handle bar out of the tool case.
   - **All models**
     3. Unscrew the wing bolt, and remove the spacer cone. Then, remove the spare tire.
If a Tire Goes Flat

4. Turn the jack’s end bracket anti-clockwise to loosen it, then remove the jack.

5. Place a wheel block or rock in front and rear of the wheel diagonal to the flat tire.
6. Place the compact spare tire (wheel side up) under the vehicle body, near the tire that needs to be replaced.

7. Loosen each wheel nut about one turn using the wheel nut wrench.
If a Tire Goes Flat

Changing a Flat Tire

1. Place the jack under the jacking point closest to the tire to be changed.

2. Turn the end bracket as shown in the image until the top of the jack contacts the jacking point.
   - Make sure that the jacking point tab is resting in the jack notch.

3. Raise the vehicle, using the jack handle bar and the jack handle, until the tire is off the ground.

How to Set Up the Jack

1. Place the jack under the jacking point closest to the tire to be changed.

2. Turn the end bracket as shown in the image until the top of the jack contacts the jacking point.
   - Make sure that the jacking point tab is resting in the jack notch.

3. Raise the vehicle, using the jack handle bar and the jack handle, until the tire is off the ground.

WARNING

The vehicle can easily roll off the jack, seriously injuring anyone underneath.

Follow the directions for changing a tire exactly, and never get under the vehicle when it is supported only by the jack.

Do not use the jack with people or luggage in the vehicle.

Use the jack provided in your vehicle. Other jacks may not support the weight (“load”) or may not fit the jacking point.

The following instructions must be followed to use the jack safely:
- Do not use while the engine is running.
- Use only where the ground is firm and level.
- Use only at the jacking points.
- Do not get in the vehicle while using the jack.
- Do not put anything on top of or underneath the jack.
If a Tire Goes Flat

Changing a Flat Tire

Handling the Unexpected

1. Remove the wheel nuts and flat tire.

2. Wipe the mounting surfaces of the wheel with a clean cloth.

3. Mount the compact spare tire.

4. Screw the wheel nuts until they touch the lips around the mounting holes, then stop rotating.

5. Lower the vehicle and remove the jack. Tighten the wheel nuts in the order indicated in the image. Go around, tightening the nuts, two to three times in this order.

Wheel nut torque:
80 lbf-ft (108 N·m, 11 kgf·m)

Replacing the Flat Tire

Do not over tighten the wheel nuts by applying extra torque using your foot or a pipe.
If a Tire Goes Flat

Changing a Flat Tire

1. Remove the center cap.
2. Place the flat tire face down in the spare tire well.
3. Remove the spacer cone from the wing bolt, flip it over, and insert it back on the bolt. Secure the flat tire with the wing bolt.
4. Securely store the wheel nut wrench, jack handle bar and jack back in the tool case. Store the case in the cargo area under the cargo floor lid.

Storing the Flat Tire

**WARNING**
Loose items can fly around the interior in a crash and can seriously injure the occupants.

Store the wheel, jack, and tools securely before driving.
If a Tire Goes Flat

Changing a Flat Tire

1. Put the flat tire in the storage bag provided with your vehicle.
   - The storage bag is in the tool case.
2. Knot the top of the storage bag.
3. Store the jack in its holder. Turn the jack’s end bracket to lock it in place.
4. Securely put the wheel nut wrench and jack handle bar back in the tool case.
5. Bore through the bag, and pass the holding belt through the hole of the bag and the wheel of the flat tire as shown.
6. Place the flat tire in the cargo area, and thread the belt through the rear anchor as shown.
7. Pass the belt through the ring, and tighten the belt to secure the flat tire in place.

AWD models

■ Storing the Flat Tire

1. Put the flat tire in the storage bag provided with your vehicle.
   - The storage bag is in the tool case.
2. Knot the top of the storage bag.
3. Store the jack in its holder. Turn the jack’s end bracket to lock it in place.
4. Securely put the wheel nut wrench and jack handle bar back in the tool case.
5. Bore through the bag, and pass the holding belt through the hole of the bag and the wheel of the flat tire as shown.

Storing the Flat Tire

WARNING

Loose items can fly around the interior in a crash and can seriously injure the occupants.

Store the wheel, jack, and tools securely before driving.
U.S. models

TPMS and the Spare Tire

If you replace a flat tire with the spare tire, the low tire pressure/TPMS indicator comes on while you are driving. After driving for a few miles (kilometers), the indicator will start blinking for a short time and then stay on, but this is normal.

Calibrate the TPMS when you replace the tire with a specified regular tire.

TPMS Calibration P. 359
### Engine Does Not Start

#### Checking the Engine

If the engine does not start, check the starter.

</tbody>
</table>
If the Smart Entry Remote Battery is Weak

If the beeper sounds, the indicator on the ENGINE START/STOP button flashes, and the engine won’t start.

Start the engine as follows.

1. Touch the center of the ENGINE START/STOP button with the H logo on the smart entry remote while the indicator on the ENGINE START/STOP button is flashing. The buttons on the smart entry remote should be facing you.
   - The indicator flashes for about 30 seconds.

2. Depress the brake pedal (continuously variable transmission) or clutch pedal (manual transmission) and press the ENGINE START/STOP button within 10 seconds after the beeper sounds and the indicator stays on.
   - If you don’t depress the pedal, the mode will change to ACCESSORY.
Emergency Engine Stop

The ENGINE START/STOP button may be used to stop the engine due to an emergency situation even while driving. If you must stop the engine, do either of the following operations:

- Press and hold the ENGINE START/STOP button for about two seconds.
- Firmly press the ENGINE START/STOP button twice.

The steering wheel will not lock. However, because turning off the engine disables the power assist the engine provides to the steering and braking systems, it will require significantly more physical effort and time to steer and slow the vehicle. Use both feet on the brake pedal to slow down the vehicle and stop immediately in a safe place. With manual transmission models you can also downshift the transmission to utilize engine braking.

Continuous variable transmission models

The power mode is in ACCESSORY when the engine is stopped. To change the mode to VEHICLE OFF, move the shift lever to P after the vehicle comes to a complete stop.

Canadian continuously variable transmission models

Then press the ENGINE START/STOP button twice without depressing the brake pedal.

Manual transmission models

The power mode changes to VEHICLE OFF.
Jump Starting

Jump Starting Procedure

Turn off the power to electric devices, such as audio and lights. Turn off the engine, then open the hood.

1. Connect the first jumper cable to your vehicle’s battery + terminal.
   - Remove the cover from the under-hood fuse box.
   - Engine Compartment Fuse Box P. 456
2. Connect the other end of the first jumper cable to the booster battery + terminal.
   - Use a 12-volt booster battery only.
   - Connect when using the automotive battery charger to boost your 12-volt battery, select a lower charging voltage than 15-volt. Check the charger manual for the proper setting.
3. Connect the second jumper cable to the booster battery − terminal.
4. Connect the other end of the second jumper cable to the stud bolt as shown. Do not connect this jumper cable to any other part.
5. If your vehicle is connected to another vehicle, start the assisting vehicle’s engine and increase its rpm slightly.
6. Attempt to start your vehicle’s engine. If it turns over slowly, check that the jumper cables have good metal-to-metal contact.

WARNING

A battery can explode if you do not follow the correct procedure, seriously injuring anyone nearby.
Keep all sparks, open flames, and smoking materials away from the battery.

Securely attach the jumper cables clips so that they do not come off when the engine vibrates. Also be careful not to tangle the jumper cables or allow the cable ends to touch each other while attaching or detaching the jumper cables.

Battery performance degrades in cold conditions and may prevent the engine from starting.
### What to Do After the Engine Starts

Once your vehicle’s engine has started, remove the jumper cables in the following order.

1. Disconnect the jumper cable from your vehicle’s stud bolt.
2. Disconnect the other end of the jumper cable from the booster battery terminal.
3. Disconnect the jumper cable from your vehicle’s battery terminal.
4. Disconnect the other end of the jumper cable from the booster battery terminal.

Have your vehicle inspected by a nearby service station or a dealer.
Shift Lever Does Not Move

Continuously variable transmission models
Follow the procedure below if you cannot move the shift lever out of the P position.

### Releasing the Lock

1. Set the parking brake.
   - Models without smart entry system
2. Remove the key from the ignition switch.
   - Models with smart entry system
3. Remove the built-in key from the smart entry remote.
   - All models
4. Wrap a cloth around the tip of a small flat-tip screwdriver. Put it into the shift lock release slot as shown in the image, and remove the cover.
5. Insert the key into the shift lock release slot.
6. While pushing the key down, press the shift lever release button and place the shift lever into N.
   - The lock is now released. Have the shift lever checked by a dealer as soon as possible.
Overheating

How to Handle Overheating

Overheating symptoms are as follows:
- The high temperature indicator (red) comes on or the engine suddenly loses power.
- Steam or spray comes out of the engine compartment.

First thing to do
1. Immediately park the vehicle in a safe place.
2. Turn off all accessories and turn on the hazard warning lights.
   - No steam or spray present: Keep the engine running and open the hood.
   - Steam or spray is present: Turn off the engine and wait until it subsides. Then open the hood.

WARNING
Steam and spray from an overheated engine can seriously scald you.
Do not open the hood if steam is coming out.

NOTICE
Continuing to drive with the high temperature indicator on may damage the engine.
Overheating

How to Handle Overheating

Next thing to do

1. Check that the cooling fan is operating and stop the engine once the high temperature indicator goes off.
   ▶ If the cooling fan is not operating, immediately stop the engine.

2. Once the engine has cooled down, inspect the coolant level and check the cooling system components for leaks.
   ▶ If the coolant level in the reserve tank is low, add coolant until it reaches the MAX mark.
   ▶ If there is no coolant in the reserve tank, check that the radiator is cool. Cover the radiator cap with a heavy cloth and open the cap. If necessary, add coolant up to the base of the filler neck, and put the cap back on.

Last thing to do

Once the engine has cooled sufficiently, restart it and check the high temperature indicator.
If the high temperature indicator is off, resume driving. If it stays on, contact a dealer for repairs.

WARNING

Removing the radiator cap while the engine is hot can cause the coolant to spray out, seriously scalding you.

Always let the engine and radiator cool down before removing the radiator cap.

If the coolant is leaking, contact a dealer for repairs.

Use water as an emergency/temporary measure only. Have a dealer flush the system with proper antifreeze as soon as possible.
If the Low Oil Pressure Indicator Comes On

- **Reasons for the indicator to come on**
  Comes on when the engine oil pressure is low.

- **What to do as soon as the indicator comes on**
  1. Immediately park the vehicle on level ground in a safe place.
  2. If necessary, turn the hazard warning lights on.

- **What to do after parking the vehicle**
  1. Stop the engine and let it sit for about three minutes.
  2. Open the hood and check the oil level.
     - Add oil as necessary.
     - Oil Check P. 390
  3. Start the engine and check the low oil pressure indicator.
     - The indicator goes off: Start driving again.
     - The indicator does not go off within 10 seconds: Stop the engine and contact a dealer for repairs immediately.

If the Charging System Indicator Comes On

- **Reasons for the indicator to come on**
  Comes on when the battery is not being charged.

- **What to do when the indicator comes on**
  Turn off the heating and cooling system/`climate control system`, rear defogger, and other electrical systems, and immediately contact a dealer for repairs.

* Not available on all models
Indicator, Coming On/Blinking

If the Malfunction Indicator Lamp Comes On or Blinks

■ Reasons for the indicator lamp to come on or blink
  • Comes on when there is a problem with the engine emissions control system, or the fuel fill cap is missing, or loose.
  • Blinks when engine misfiring is detected.

■ What to do when the indicator lamp comes on
  Avoid high speeds and immediately get your vehicle inspected at a dealer.

■ What to do when the indicator lamp blinks
  Park the vehicle in a safe place with no flammable items and wait at least ten minutes or more with the engine stopped until it cools.

Check Fuel Cap Message

■ The message appears on when:
  An evaporative system leak is detected. This may be caused by the fuel fill cap being loose or not being installed.

■ What to do when the message appears:
  1. Stop the engine.
  2. Check if the fuel fill cap is fully installed.
     ▶ If not, loosen the cap, and then retighten it until it clicks at least once.
  3. Drive for several days of normal driving.
     ▶ The message should go off.

■ When the malfunction indicator lamp comes on
  The malfunction indicator lamp comes on if the system continues to detect a leak of gasoline vapor. If this happens, follow the procedures described earlier to check the fuel fill cap.

NOTICE

If you drive with the malfunction indicator lamp on, the emissions control system and the engine could be damaged.

If the malfunction indicator lamp blinks again when restarting the engine, drive to the nearest dealer at 31 mph (50 km/h) or less. Have your vehicle inspected.
If the Brake System Indicator (Red) Comes On

■ Reasons for the indicator to come on
- The brake fluid is low.
- There is a malfunction in the brake system.

■ What to do when the indicator comes on while driving
Press the brake pedal lightly to check pedal pressure.
- If normal, check the brake fluid level the next time you stop.
- If abnormal, take immediate action. If necessary, downshift the transmission to slow the vehicle using engine braking.

If the Electric Power Steering (EPS) System Indicator Comes On

■ Reasons for the indicator to come on
- Comes on when there is a problem with the EPS system.
- If you depress the accelerator pedal repeatedly to increase the engine speed while the engine is idling, the indicator comes on, and sometimes the steering wheel becomes harder to operate.

■ What to do when the indicator comes on
Stop the vehicle in a safe place and restart the engine.
If the indicator comes on and stays on, immediately have your vehicle inspected by a dealer.
If the Electric Parking Brake System Indicator Comes On

- **Reasons for the indicator to come on**
  Comes on when there is a problem with the electric parking brake system.

- **What to do when the indicator comes on**
  Avoid using the parking brake and immediately get your vehicle inspected at a dealer.

- **What to do when the electric parking brake indicator comes on or blinks at the same time.**
  - Release the parking brake. If you cannot release it, immediately stop the vehicle in a safe place and call a dealer.
  - If only the electric parking brake indicator goes off, immediately get your vehicle inspected at a dealer.
  - If the electric parking brake indicator remains on or blinks even after releasing the parking brake, immediately stop the vehicle in a safe place and call a dealer.
If the Low Tire Pressure/TPMS Indicator Comes On or Blinks

■ Reasons for the indicator to come on or blink
A tire pressure is significantly low, or the TPMS has not been calibrated. If there is a problem with the TPMS or the compact spare tire is installed, the indicator blinks for about one minute, and then stays on.

■ What to do when the indicator comes on
Drive carefully and avoid abrupt cornering and hard braking. Stop your vehicle in a safe place. Check the tire pressure and adjust the pressure to the specified level. The specified tire pressure is on a label on the driver side doorjamb.

   ✔ Calibrate the TPMS after the tire pressure is adjusted.

■ What to do when the indicator blinks, then remains on
Have the tire inspected by a dealer as soon as possible. If the compact spare tire causes the indicator to blink, change the tire to a full-size tire. The indicator goes off after driving for a few miles (kilometers).

   ✔ Calibrate the TPMS after a full-size tire is reinstalled.

NOTICE
Driving on an extremely underinflated tire can cause it to overheat. An overheated tire can fail. Always inflate your tires to the prescribed level.

U.S. models

If the Low Tire Pressure/TPMS Indicator Comes On or Blinks

NOTICE
Driving on an extremely underinflated tire can cause it to overheat. An overheated tire can fail. Always inflate your tires to the prescribed level.
Fuses

Fuse Locations

If any electrical devices are not working, turn the ignition switch to LOCK [0]*1 and check to see if any applicable fuse is blown.

■ Engine Compartment Fuse Box

■ Fuse box A

Located near the brake fluid reservoir. Push the tabs to open the box. Fuse locations are shown on the fuse box cover. Locate the fuse in question by the fuse number and box cover number.

* Not available on all models
Inspecting and Changing Fuses

1. Turn the ignition switch to LOCK [0]\textsuperscript{*1}. Turn headlights and all accessories off.
2. Check the fuses on the battery in the engine compartment. 
   ▶ If the fuse is blown, have it replaced by a dealer.
3. Remove the fuse box cover.
4. Inspect the small fuses in the engine compartment and the vehicle interior.
   ▶ If there is a burned out fuse, remove it with the fuse puller and replace it with a new one.
5. Check the large fuse in the vehicle interior.
   ▶ If the fuse is blown, use a Phillips-head screwdriver to remove the screw and replace it with a new one.

\textbf{NOTICE}
Replacing a fuse with one that has a higher rating greatly increases the chances of damaging the electrical system.
Replace fuse with a new one of the same specified amperage.
Confirm the specified amperage using the charts on \textit{Fuse Locations}.
There is a fuse puller on the back of the engine compartment fuse box cover.

\textsuperscript{*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.}
Emergency Towing

Call a professional towing service if you need to tow your vehicle.

**All models**

- **Flat bed equipment**
The operator loads your vehicle on the back of a truck. **This is the best way to transport your vehicle.**

**2WD models**

- **Wheel lift equipment**
The tow truck uses two pivoting arms that go under the front tires and lift them off the ground. The rear tires remain on the ground. **This is an acceptable way to tow your vehicle.**

### NOTICE

Trying to lift or tow your vehicle by the bumpers will cause serious damage. The bumpers are not designed to support the vehicle’s weight.

Improper towing such as towing behind a motorhome or other motor vehicle can damage the transmission.

Never tow your vehicle with just a rope or chain. It is very dangerous since ropes or chains may shift from side to side or break.

**2WD models**

Make sure the parking brake is released. If you cannot release the parking brake, your vehicle must be transported by the flat bed equipment.

**Parking Brake** P. 363
When You Cannot Open the Tailgate

**What to Do When Unable to Open the Tailgate**

If you cannot open the tailgate, use the following procedure.

1. Wrap a cloth around the flat-tip screwdriver. Put it into the cover as shown in the image, and open it.

2. Wrap a cloth around the flat-tip screwdriver. Put it into the lid as shown in the image, and open the lid.

When You Cannot Open the Tailgate

After taking these steps, contact a dealer to have your vehicle checked.

When you open the tailgate from inside, make sure there is enough space around the tailgate, and it does not hit anyone or any object.
3. To open the tailgate, push the tailgate while sliding the lever to the right.

</tr>
</tbody>
</table>

Each of the above complies with the appropriate requirements or the required standards of FCC (Federal Communications Commission) and Industry Canada Standard, described below:

As required by the FCC:
This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

This device complies with Industry Canada Standard RSS-Gen/210/310. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.
Reporting Safety Defects

In the U.S.
If you believe that your vehicle has a defect which could cause a crash or could cause injury or death, you should immediately inform the National Highway Traffic Safety Administration (NHTSA) in addition to notifying American Honda Motor Co., Inc.

If NHTSA receives similar complaints, it may open an investigation, and if it finds that a safety defect exists in a group of vehicles, it may order a recall and remedy campaign. However, NHTSA cannot become involved in individual problems between you, your dealer, or American Honda Motor Co., Inc.

To contact NHTSA, you may call the Vehicle Safety Hotline toll-free at 1-888-327-4236 (TTY: 1-800-424-9153); go to http://www.safercar.gov; or write to: Administrator, NHTSA, 1200 New Jersey Avenue, SE., Washington, DC 20590. You can also obtain other information about motor vehicle safety from http://www.safercar.gov.

In Canada
If you believe that your vehicle has a defect which could cause a crash or could cause injury or death, you should immediately inform Honda Canada Inc. and you may also inform Transport Canada.

If Transport Canada receives similar complaints, it may open an investigation, and if it finds that a safety defect exists in a group of vehicles, it may lead to a recall and remedy campaign. However, Transport Canada cannot become involved in individual problems between you, your dealer, or Honda Canada Inc.

To contact Transport Canada’s Defect Investigations and Recalls Division, you may call 1-800-333-0510. For more information on reporting safety defects or about motor vehicle safety, go to http://www.tc.gc.ca/roadsafety.
Testing of Readiness Codes

Your vehicle has “Readiness Codes,” as part of the onboard self diagnostic system. Some states use these codes as a test to see if your vehicle’s emissions components are working properly. The codes may not be read properly if testing is performed just after the battery has gone dead or been disconnected.

To check if they are set, turn the ignition switch to ON *1, without starting the engine. The malfunction indicator lamp will come on for several seconds. If it then goes off, the readiness codes are set. If it blinks five times, the readiness codes are not set.

If you are required to have your vehicle tested before the readiness codes are ready, prepare the vehicle for retesting by doing the following:

1. Fill the gas tank to approximately 3/4 full.
2. Park the vehicle and leave the engine off for 6 hours or more.
3. Make sure the ambient temperature is between 40°F and 95°F (4°C and 35°C).
4. Start the engine without touching the accelerator pedal, and let it idle for 20 seconds.
5. Keep the vehicle in P (continuously variable transmission) or N (manual transmission). Increase the engine speed to 2,000 rpm, and hold it there for about three minutes.
6. Let the engine idle with your foot off the accelerator for 20 seconds.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Emissions Testing
Testing of Readiness Codes

7. Select a nearby, lightly traveled major highway where you can maintain a speed of 50 to 60 mph (80 to 97 km/h) for at least 20 minutes. Drive on the highway in D (continuously variable) or 5th (manual). Do not use cruise control. When traffic allows, drive for 90 seconds without moving the accelerator pedal. (Vehicle speed may vary slightly; this is okay.) If you cannot do this for a continuous 90 seconds because of traffic conditions, drive for at least 30 seconds, then repeat it two more times (for a total of 90 seconds).

8. Drive in city/suburban traffic for at least 10 minutes. When traffic conditions allow, let the vehicle coast for several seconds without using the accelerator pedal or the brake pedal.

9. Park the vehicle and leave the engine off for 30 minutes.
Warranty Coverages

■ U.S. Owners
Your new vehicle is covered by these warranties:

*New Vehicle Limited Warranty* – covers your new vehicle, except for the emissions control systems and accessories, against defects in materials and workmanship.

*Emissions Control Systems Defects Warranty and Emissions Performance Warranty* – these two warranties cover your vehicle's emissions control systems. Time, mileage, and coverage are conditional. Please read your warranty booklet for exact information.

*Seat Belt Limited Warranty* – a seat belt that fails to function properly is covered by a limited warranty. Please read your warranty booklet for details.

*Rust Perforation Limited Warranty* – all exterior body panels are covered for rust-through from the inside for the specified time period with no mileage limit.

*Accessory Limited Warranty* – Honda accessories are covered under this warranty. Time and mileage limits depend on the type of accessory and other factors. Please read your warranty booklet for details.

*Replacement Parts Limited Warranty* – covers all Honda replacement parts against defects in materials and workmanship.
**Warranty Coverages**

*Replacement Battery Limited Warranty* – provides prorated coverage for a replacement battery purchased from a dealer.

*Replacement Muffler Lifetime Limited Warranty* – provides coverage for as long as the purchaser of the muffler owns the vehicle.

Restrictions and exclusions apply to all these warranties. Please read the Honda warranty information booklet that came with your vehicle for precise information on warranty coverages. Your vehicle’s original tires are covered by their manufacturer. Tire warranty information is in a separate booklet.

■ Canadian Owners

Please refer to the warranty manual that came with your vehicle.
Authorized Manuals

■ Service Express
For electronic copies of service publications, you can purchase a subscription to Service Express. Visit www.techinfo.honda.com for pricing and options.

■ For U.S. Owners:
Manuals be purchased from Helm Incorporated. You can order a manual by phone at (800) 782-4356 (credit card orders only), or online at www.helminc.com.

■ For Canadian Owners:
Please contact a dealer to order any manuals that you may require.
Honda dealership personnel are trained professionals.

They should be able to answer all your questions. If you encounter a problem that your dealership does not solve to your satisfaction, please discuss it with the dealership’s service manager or general manager. If you are dissatisfied with the decision made by the dealership’s management, contact Honda Customer Services.

Customer Service Information

When you call or write, please give us the following information:
- Vehicle Identification Number
- Date of purchase
- Odometer reading of your vehicle
- Your name, address, and telephone number
- A detailed description of the problem
- Name of the dealer who sold the vehicle to you
**Disclaimer of Pandora®**

Requirements to access Pandora®

- Latest version of the Pandora application installed on your mobile device. (Visit the Apple iTunes store or Google Play Marketplace to download the latest version.)
- Registered Pandora account (you can create a free account at www.pandora.com or on your smartphone)
- Connection to the internet via WiFi or cellular data network.
- Android devices must be connected to the vehicle via Bluetooth, iPhone devices may be connected via Bluetooth or USB.

Limitations

- Access to Pandora requires an active internet connection
- Ability to access Pandora through this system is subject to change without notice
- Certain functionality of Pandora service is not available when accessing the service through this system including, but not limited to, creating new stations, deleting stations, emailing current stations, buying songs, viewing additional text information, logging in to Pandora, and adjusting Cell Network Audio Quality.

Pandora internet radio is a music service not affiliated with HONDA. More information is available at http://www.pandora.com. Pandora, the Pandora logo, and the Pandora trade dress are trademarks or registered trademarks of Pandora Media, Inc., used with permission.

- Mobile access requires a smartphone with an active data plan. Standard data rates may apply.
- Pandora is only available in the United States.

* Not available on all models
