Event Data Recorders

This vehicle is equipped with an event data recorder (EDR). The main purpose of an EDR is to record, in certain crash or near crash-like situations, such as an air bag deployment or hitting a road obstacle, data that will assist in understanding how a vehicle's systems performed. The EDR is designed to record data related to vehicle dynamics and safety systems for a short period of time, typically 30 seconds or less. The EDR in this vehicle is designed to record such data as:

- How various systems in your vehicle were operating;
- Whether or not the driver and passenger safety belts were buckled/fastened;
- How far (if at all) the driver was depressing the accelerator and/or brake pedal; and,
- How fast the vehicle was traveling.

These data can help provide a better understanding of the circumstances in which crashes and injuries occur. NOTE: EDR data are recorded by your vehicle only if a non-trivial crash situation occurs; no data are recorded by the EDR under normal driving conditions and no personal data (e.g., name, gender, age, and crash location) are recorded. However, other parties, such as law enforcement, could combine the EDR data with the type of personally identifying data routinely acquired during a crash investigation.

To read data recorded by an EDR, special equipment is required, and access to the vehicle or the EDR is needed. In addition to the vehicle manufacturer, other parties, such as law enforcement, that have the special equipment, can read the information if they have access to the vehicle or the EDR.

The data belongs to the vehicle owner and may not be accessed by anyone else except as legally required or with the permission of the vehicle owner.

Service Diagnostic Recorders

This vehicle is equipped with service-related devices that record information about powertrain performance. The data can be used to verify emissions law requirements and/or help technicians diagnose and solve service problems. It may also be combined with data from other sources for research purposes, but it remains confidential. Some diagnostic and maintenance information is uploaded to Honda upon vehicle start up.
California Perchlorate Contamination Prevention Act
The airbags, seat belt tensioners, and CR type batteries in this vehicle may contain perchlorate materials - special handling may apply. See www.dtsc.ca.gov/hazardouswaste/perchlorate/

As you read this manual, you will find information that is preceded by a NOTICE symbol. This information is intended to help you avoid damage to your vehicle, other property, or the environment.

Software End User License Agreement
Your vehicle comes equipped with software, which is governed by the End User License Agreement in Owner’s Manual, and which contains a binding arbitration clause. Please refer to the End User License Agreement for the terms and conditions governing your use of the installed software, as well as the applications, services, functions, and content provided through the software. Your use of the installed software will serve as your consent to the terms and conditions of the End User License Agreement.
You may opt out within 30 days of your initial use of the Software by sending a signed, written notice to HONDA at American Honda Motor Co., Inc. Honda Automobile Customer Services Mail Stop 100-5E-8A, 1919 Torrance Blvd. Torrance, CA 90501-2746.

Privacy Notice
This vehicle may share location and usage information. To manage this setting, visit www.hondalink.com/vehicle-data-choices.

A Few Words About Safety
Your safety, and the safety of others, is very important. And operating this vehicle safely is an important responsibility.

To help you make informed decisions about safety, we have provided operating procedures and other information on labels and in this manual. This information alerts you to potential hazards that could hurt you or others.

Of course, it is not practical or possible to warn you about all the hazards associated with operating or maintaining your vehicle. You must use your own good judgment.

You will find this important safety information in a variety of forms, including:

- Safety Labels - on the vehicle.
- Safety Messages - preceded by a safety alert symbol ▲ and one of three signal words: DANGER, WARNING, or CAUTION. These signal words mean:
  - ▲ DANGER You WILL be KILLED or SERIOUSLY HURT if you don’t follow instructions.
  - ▲ WARNING You CAN be KILLED or SERIOUSLY HURT if you don’t follow instructions.
  - ▲ CAUTION You CAN be HURT if you don’t follow instructions.
- Safety Headings - such as Important Safety Precautions.
- Safety Section - such as Safe Driving.
- Instructions - how to use this vehicle correctly and safely.

This entire book is filled with important safety information - please read it carefully.
This owner’s manual should be considered a permanent part of the vehicle and should remain with the vehicle when it is sold.

This owner’s manual covers all models of your vehicle. You may find descriptions of equipment and features that are not on your particular model.

Images throughout this owner’s manual (including the front cover) represent features and equipment that are available on some, but not all, models. Your particular model may not have some of these features.

This owner’s manual is for vehicles sold in the United States and Canada.

The information and specifications included in this publication were in effect at the time of approval for printing. Honda Motor Co., Ltd. reserves the right, however, to discontinue or change specifications or design at any time without notice and without incurring any obligation.

Safe Driving **P.33**

**Airbags** **P.49**
- Your vehicle is fitted with airbags to help protect you and your passengers during a moderate-to-severe collision.

**Child Safety** **P.63**
- All children 12 and younger should be seated in the rear seat.
- Smaller children should be properly restrained in a forward-facing child seat.
- Infants must be properly restrained in a rear-facing child seat.

**Exhaust Gas Hazard** **P.76**
- Your vehicle emits dangerous exhaust gases that contain carbon monoxide. Do not run the engine in confined spaces where carbon monoxide gas can accumulate.

**Seat Belts** **P.40**
- Fasten your seat belt and sit upright well back in the seat.
- Check that your passengers are wearing their seat belts correctly.

**Before Driving Checklist** **P.446**
- Before driving, check that the front seats, head restraints, steering wheel, and mirrors have been properly adjusted.

- : Low Sensitivity*1
- : Lower speed, fewer sweeps*2
- +: High Sensitivity*1
- +: Higher speed, more sweeps*2

*1: Models with automatic intermittent wipers
*2: Models without automatic intermittent wipers

**Steering Wheel**

- AUTO should always be turned OFF before the following situations in order to prevent severe damage to the wiper system:
  - Cleaning the windshield
  - Driving through a car wash
  - No rain present

- To adjust, pull the adjustment lever towards you, adjust to the desired position, then lock the lever back in place.
Unlocking the Front Doors from the Inside

- Pull either front door inner handle to unlock and open it at the same time.

Tailgate [P.148]

- Models without smart entry system:
  - With all the doors unlocked, press the tailgate outer handle, and lift open the tailgate.

- Models with smart entry system:
  - Press the tailgate outer handle to unlock and open the tailgate when you have the smart entry remote on you.

- Models with power tailgate:
  - Press the power tailgate button on the driver side control panel, or press the remote transmitter to unlock and open the tailgate when you have the smart entry remote on you.

Models with Hands Free Access:

Use a forward and back kicking motion under the center of the rear bumper to open or close the power tailgate while carrying the smart entry remote.
Power Door Mirrors

- With the ignition switch in ON [II]*1, move the selector switch to L or R.
- Push the appropriate edge of the adjustment switch to adjust the mirror.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

Power Windows  P.162

- With the ignition switch in ON [II]*1, open and close the power windows.
- If the power window lock button is in the off position, each passenger's window can be opened and closed with its own switch.
- If the power window lock button is in the on position (indicator on), each passenger's window switch is disabled.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Climate Control System

- Press the **AUTO** button to activate the climate control system.
- Press the **ON/OFF** button to turn the system on or off.
- Press the **Windshield Defroster** button to defrost the windshield.

**Models without SYNC button**

- Air flows from floor and windshield defroster vents.
- Air flows from floor vents.
- Air flows from floor and dashboard vents.
- Air flows from dashboard vents.

- **Press the release button to move the shift lever.**

- **Move the shift lever without pressing the release button.**

*Not available on all models*
VSA® On and Off  p.508
- The Vehicle Stability Assist® (VSA®) system helps stabilize the vehicle during cornering, and helps maintain traction while accelerating on loose or slippery road surfaces.
- VSA® comes on automatically every time you start the engine.
- To partially disable VSA® functionality/features, press and hold it until you hear a beep.

Cruise Control* p.470, 473
- Cruise control allows you to maintain a set speed without keeping your foot on the accelerator pedal.
- To use cruise control, press the CRUISE button, then press –/SET once you have achieved the desired speed (above 25 mph or 40 km/h).

Tire Pressure Monitoring System (TPMS) p.516
- Detects a change in tire conditions and overall dimensions due to decrease in tire pressures.
- The TPMS is turned on automatically every time you start the engine.
- A calibration procedure must be performed when certain conditions arise.

CMBS™* On and Off  p.534
- When a possible collision is likely unavoidable, the CMBS™ can help you to reduce the vehicle speed and the severity of the collision.
- The CMBS™ is turned on every time you start the engine.
- To turn the CMBS™ on or off, press and hold the button until you hear a beep.
Refueling  

Fuel recommendation: Unleaded gasoline, pump octane number 87 or higher
Fuel tank capacity: 14 US gal (53 L)

1. Pull the fuel fill door release handle.

2. After refueling, wait for about five seconds before removing the filler nozzle.
Honda Sensing®

Honda Sensing® is a driver support system which employs the use of two distinctly different kinds of sensors, a radar sensor located in the front grille and a front sensor camera mounted to the interior side of the windshield, behind the rear view mirror.

Adaptive Cruise Control (ACC) with Low Speed Follow (LSF) \(\rightarrow P.479\)

Helps maintain a constant vehicle speed and a set following-interval behind a vehicle detected ahead of yours and, if the detected vehicle comes to a stop, can decelerate and stop your vehicle, without you having to keep your foot on the brake or the accelerator.

Road Departure Mitigation (RDM) System \(\rightarrow P.495\)

Alerts and helps to assist you when the system detects a possibility of your vehicle unintentionally crossing over detected lane markings and/or leaving the roadway altogether.

Lane Keeping Assist System (LKAS) \(\rightarrow P.499\)

Provides steering input to help keep the vehicle in the middle of a detected lane and provides tactile and visual alerts if the vehicle is detected drifting out of its lane.

Collision Mitigation Braking System™ (CMBS™) \(\rightarrow P.530\)

Can assist you when there is a possibility of your vehicle colliding with a vehicle or a pedestrian detected in front of yours. The CMBS™ is designed to alert you when a potential collision is determined, as well as to reduce your vehicle speed to help minimize collision severity when a collision is deemed unavoidable.
Maintenance  ▶ P.553

Under the Hood  ▶ P.567

- Check engine oil, engine coolant, and windshield washer fluid. Add when necessary.
- Check brake fluid.
- Check the battery condition monthly.

1 Pull the hood release handle under the corner of the dashboard.

2 Locate the hood latch lever, push it to the side, and then raise the hood. Once you have raised the hood slightly, you can release the lever.

3 When finished, close the hood and make sure it is firmly locked in place.

Wiper Blades  ▶ P.591

- Replace blades if they leave streaks across the windshield.

Tires  ▶ P.595

- Inspect tires and wheels regularly.
- Check tire pressures regularly.
- Install snow tires for winter driving.

Lights  ▶ P.584

- Inspect all lights regularly.

* Not available on all models
Handling the Unexpected  ➤P.615

**Flat Tire ➤P.617**
- Park in a safe location and replace the flat tire with the compact spare tire in the cargo area.

**Engine Won't Start ➤P.624**
- If the battery is dead, jump start using a booster battery.

**Overheating ➤P.631**
- Park in a safe location. If you do not see steam under the hood, open the hood, and let the engine cool down.

**Indicators Come On ➤P.634**
- Identify the indicator and consult the owner's manual.

**Blown Fuse ➤P.640**
- Check for a blown fuse if an electrical device does not operate.

**Emergency Towing ➤P.644**
- Call a professional towing service if you need to tow your vehicle.
What to Do If

**Q** The ignition switch does not turn from **0** to **1**.

**Why?**

- **U.S. models without smart entry system**
- **Canadian models**

The power mode does not change from VEHICLE OFF (LOCK) to ACCESSORY.

**Why?**

**A**

- The steering wheel may be locked.
- **U.S. models without smart entry system**
- **Try to turn the steering wheel left and right while turning the ignition key.**
- **Canadian models**
- **Move the steering wheel left and right after pressing the ENGINE START/STOP button.**

---

**Q** The ignition switch does not turn from **1** to **0** and I cannot remove the key.

**Why?**

- **Models without smart entry system**
- **Models with smart entry system**

The power mode does not change from ACCESSORY to VEHICLE OFF (LOCK).

**Why?**

**A**

- The shift lever should be moved to **P**.
Why does the brake pedal pulsate slightly when applying the brakes?

This can occur when the ABS activates and does not indicate a problem. Apply firm, steady pressure on the brake pedal. Never pump the brake pedal.

Anti-lock Brake System (ABS) P.528

The rear door cannot be opened from inside the vehicle. Why?

Check if the childproof lock is in the lock position. If so, open the rear door with the outside door handle. To cancel this function, slide the lever up to the unlock position.

Why do the doors lock after I unlocked the doors?

If you do not open the doors within 30 seconds, the doors are relocked automatically for security.

Why does the beeper sound when I open the driver's door?

The beeper sounds when:
- The exterior lights are left on.
- The key is left in the ignition switch.
- The power mode is in ACCESSORY.

Quick Reference Guide

Q I'm seeing an amber indicator of a tire with an exclamation point. What is that?

A The Tire Pressure Monitoring System (TPMS) needs attention. If you recently inflated or changed a tire, you have to recalibrate the system.

For Safe Driving

The following pages explain your vehicle's safety features and how to use them properly. The safety precautions below are ones that we consider to be among the most important.

**Important Safety Precautions**

■ **Always wear your seat belt**
A seat belt is your best protection in all types of collisions. Airbags are designed to supplement seat belts, not replace them. So even though your vehicle is equipped with airbags, make sure you and your passengers always wear your seat belts, and wear them properly.

■ **Restrain all children**
Children ages 12 and under should ride properly restrained in a back seat, not the front seat. Infants and small children should be restrained in a child seat. Larger children should use a booster seat and a lap/shoulder seat belt until they can use the belt properly without a booster seat.

■ **Be aware of airbag hazards**
While airbags can save lives, they can cause serious or fatal injuries to occupants who sit too close to them, or are not properly restrained. Infants, young children, and short adults are at the greatest risk. Be sure to follow all instructions and warnings in this manual.

■ **Don't drink and drive**
Alcohol and driving don't mix. Even one drink can reduce your ability to respond to changing conditions, and your reaction time gets worse with every additional drink. So don't drink and drive, and don't let your friends drink and drive, either.
■ Pay appropriate attention to the task of driving safely
Engaging in cell phone conversation or other activities that keep you from paying close attention to the road, other vehicles, and pedestrians could lead to a crash. Remember, situations can change quickly, and only you can decide when it is safe to divert some attention away from driving.

■ Control your speed
Excessive speed is a major factor in crash injuries and deaths. Generally, the higher the speed, the greater the risk, but serious injuries can also occur at lower speeds. Never drive faster than is safe for current conditions, regardless of the maximum speed posted.

■ Keep your vehicle in safe condition
Having a tire blowout or a mechanical failure can be extremely hazardous. To reduce the possibility of such problems, check your tire pressures and condition frequently, and perform all regularly scheduled maintenance.

■ Do not leave children unattended in the vehicle
Children, pets and people needing assistance left unattended in the vehicle may be injured if they activate one or more of the vehicle controls. They may also cause the vehicle to move, resulting in a crash in which they and/or another person(s) can be injured or killed. Also, depending on the ambient temperature, the temperature of the interior may reach extreme levels, which can result in harm or death. Even if the climate control system is on, never leave them in the vehicle unattended as the climate control system can shut off at any time.
Important Handling Information

Your vehicle has higher ground clearance than a passenger vehicle designed for use only on pavement. Higher ground clearance has many advantages for off-highway driving. It allows you to travel over bumps, obstacles, and rough terrain. It also provides good visibility so you can anticipate problems earlier.

These advantages come at some cost. Because your vehicle is taller and rides higher off the ground, it has a higher center gravity making it more susceptible to tipping or roll over if you make abrupt turns. Utility vehicles have a significantly higher rollover rate than other types of vehicles. In a rollover crash, an unbelted person is significantly more likely to die than a person wearing a seat belt. As a reminder, make sure you and your passengers always wear seat belts.

For information on how to reduce the risk of rollover, read:
- Precautions While Driving P. 465
- Off-Highway Driving Guidelines P. 456

Failure to operate your vehicle correctly might result in a crash or a rollover.
Your Vehicle's Safety Features

The following checklist will help you take an active role in protecting yourself and your passengers.

1. Safety Cage
2. Crush Zones
3. Seats and Seat-Backs
4. Head Restraints
5. Collapsible Steering Column
6. Seat Belts
7. Front Airbags
8. Side Airbags
9. Side Curtain Airbags
10. Door Locks
11. Seat Belt Tensioners

For Safe Driving

Your Vehicle's Safety Features

Your vehicle is equipped with many features that work together to help protect you and your passengers during a crash.

Some features do not require any action on your part. These include a strong steel framework that forms a safety cage around the passenger compartment, front and rear crush zones, a collapsible steering column, and tensioners that tighten the front seat belts in a sufficient crash.

However, you and your passengers cannot take full advantage of these features unless you remain seated in the correct position and always wear your seat belts. In fact, some safety features can contribute to injuries if they are not used properly.
Safety Checklist

For the safety of you and your passengers, make a habit of checking these items each time before you drive.

- After everyone has entered the vehicle, be sure all doors and the tailgate are closed and locked. Locking the doors and the tailgate helps prevent an occupant from being ejected and an outsider from unexpectedly opening a door or the tailgate.
  - Locking/Unlocking the Doors from the Inside P. 142
- Adjust your seat to a position suitable for driving. Be sure the front seats are adjusted as far to the rear as possible while allowing the driver to control the vehicle. Sitting too close to a front airbag can result in serious or fatal injury in a crash.
  - Adjusting the Seats P. 195
- Adjust head restraints to the proper position. Head restraints are most effective when the center of the head restraint aligns with the center of your head. Taller persons should adjust their head restraint to the highest position.
  - Adjusting the Front Head Restraints P. 201
- Always wear your seat belt, and make sure you wear it properly. Confirm that any passengers are properly belted as well.
  - Fastening a Seat Belt P. 44
- Protect children by using seat belts or child seats according to a child’s age, height and weight.
  - Child Safety P. 63

Models with information display

If the door and/or the tailgate open indicator is on, a door and/or the tailgate is not completely closed. Close all doors and the tailgate tightly until the indicator goes off.

- Door Open Indicator* P. 87
- Tailgate Open Indicator* P. 87

* Not available on all models
For Safe Driving

Safety Checklist

1. If the door and/or tailgate open message appears on the driver information interface, a door and/or the tailgate is not completely closed. Close all doors and the tailgate tightly until the message disappears.

Driver Information Interface Warning and Information Messages* P. 102

* Not available on all models
About Your Seat Belts

Seat belts are the single most effective safety device because they keep you connected to the vehicle so that you can take advantage of many built-in safety features. They also help keep you from being thrown against the inside of the vehicle, against any passengers, or out of the vehicle. When worn properly, seat belts also keep your body properly positioned in a crash so that you can take full advantage of the additional protection provided by the airbags.

In addition, seat belts help protect you in almost every type of crash, including:
- frontal impacts
- side impacts
- rear impacts
- rollovers

Lap/shoulder seat belts
All five seating positions are equipped with lap/shoulder seat belts with emergency locking retractors. In normal driving the retractor lets you move freely while keeping some tension on the belt. During a collision or sudden stop the retractor locks to restrain your body.

The front passenger’s and rear seat belts also have a lockable retractor for use with child seats.

Installing a Child Seat with a Lap/Shoulder Seat Belt P. 71

WARNING
Not wearing a seat belt properly increases the chance of serious injury or death in a crash, even though your vehicle has airbags.

Be sure you and your passengers always wear seat belts and wear them properly.

If you extend the seat belt too quickly, it will lock in place. If this happens, slightly retract the seat belt, then extend it slowly.

Seat belts cannot completely protect you in every crash. But in most cases, seat belts can reduce your risk of serious injury.

Most states and all Canadian provinces and territories require you to wear seat belts.
Proper use of seat belts

Follow these guidelines for proper use:

- All occupants should sit upright, well back in the seat, and remain in that position for the duration of the trip. Slouching and leaning reduce the effectiveness of the belt and can increase the chance of serious injury in a crash.
- Never place the shoulder part of a lap/shoulder seat belt under your arm or behind your back. This could cause very serious injuries in a crash.
- Two people should never use the same seat belt. If they do, they could be very seriously injured in a crash.
- Do not put any accessories on the seat belts. Devices intended to improve comfort or reposition the shoulder part of a seat belt can reduce the protective capability and increase the chance of serious injury in a crash.

About Your Seat Belts

If a rear seat passenger moves around and extends the seat belt, the lockable retractor may activate. If this happens, release the retractor by unfastening the seat belt and allow the belt to retract completely. Then refasten the belt.
The seat belt system includes an indicator on the instrument panel to remind the driver or a front passenger or both to fasten their seat belts. If the ignition switch is turned to ON and a seat belt is not fastened, a beeper will sound and the indicator will blink. After a few seconds, the beeper will stop and the indicator will come on and remain illuminated until the seat belt is fastened.

The beeper will periodically sound and the indicator will blink while the vehicle is moving until the seat belt is fastened.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

The indicator will also come on if a front passenger does not fasten their seat belt within six seconds after the ignition switch is turned to ON.

When no one is sitting in the front passenger’s seat, the indicator will not come on and the beeper will not sound. The indicator also may not come on and the beeper may not sound when the occupant is not heavy enough to trigger the weight sensor. Such occupants (e.g., infants and smaller children) should be moved to the rear seat as a deploying front airbag likely will injure or kill them.

Protecting Child Passengers P. 63
Automatic Seat Belt Tensioners

The front seats are equipped with automatic seat belt tensioners to enhance safety.

The tensioners automatically tighten the front seat belts during a moderate-to-severe frontal collision, sometimes even if the collision is not severe enough to inflate the front airbags.

The seat belt tensioners can only operate once. If a tensioner is activated, the SRS indicator will come on. Have a dealer replace the tensioner and thoroughly inspect the seat belt system as it may not offer protection in a subsequent crash.

During a moderate-to-severe side impact, the tensioner on that side of the vehicle also activates.
Fastening a Seat Belt

After adjusting a front seat to the proper position, and while sitting upright and well back in the seat:

1. Pull the seat belt out slowly.
2. Insert the latch plate into the buckle, then tug on the belt to make sure the buckle is secure.

Make sure that the belt is not twisted or caught on anything.

No one should sit in a seat with an inoperative seat belt or one that does not appear to be working correctly. Using a seat belt that is not working properly may not protect the occupant in a crash. Have a dealer check the belt as soon as possible.

Never insert any foreign objects into the buckle or retractor mechanism.
3. Position the lap part of the belt as low as possible across your hips, then pull up on the shoulder part of the belt so the lap part fits snugly. This lets your strong pelvic bones take the force of a crash and reduces the chance of internal injuries.

4. If necessary, pull up on the belt again to remove any slack, then check that the belt rests across the center of your chest and over your shoulder. This spreads the forces of a crash over the strongest bones in your upper body.

**WARNING**

Improperly positioning the seat belts can cause serious injury or death in a crash. Make sure all seat belts are properly positioned before driving.

To release the belt, push the red PRESS button and then guide the belt by hand until it has retracted completely. When exiting the vehicle, be sure the belt is properly stowed so that it will not get caught in the closing door.

**Adjusting the Shoulder Anchor**

The front seats have adjustable shoulder anchors to accommodate taller and shorter occupants.

1. Move the anchor up and down while pulling the shoulder anchor outward.
2. Position the anchor so that the belt rests across the center of your chest and over your shoulder.

After an adjustment, make sure that the shoulder anchor position is secure.
Fastening a Seat Belt

1. Pull out the seat belt’s small latch plate and the latch plate from each holding slot in the ceiling.

2. Line up the triangle marks on the small latch plate and anchor buckle. Make sure the seat belt is not twisted. Attach the belt to the anchor buckle.

3. Insert the latch plate into the buckle. Properly fasten the seat belt the same way you fasten the lap/shoulder seat belt.

**WARNING**

Using the seat belt with the detachable anchor unlatched increases the chance of serious injury or death in a crash.

Before using the seat belt, make sure the detachable anchor is correctly latched.

To unlatch the detachable anchor, insert the latch plate into the slot on the side of the anchor buckle.
If you are pregnant, the best way to protect yourself and your unborn child when driving or riding in a vehicle is to always wear a seat belt and keep the lap part of the belt as low as possible across the hips.

Advice for Pregnant Women

- Wear the shoulder belt across the chest avoiding the abdomen.
- Wear the lap part of the belt as low as possible across the hips.

Each time you have a checkup, ask your doctor if it is okay for you to drive.

To reduce the risk of injuries to both you and your unborn child that can be caused by an inflating front airbag:
- When driving, sit upright and adjust the seat as far back as possible while allowing full control of the vehicle.
- When sitting in the front passenger’s seat, adjust the seat as far back as possible.
Seat Belt Inspection

Regularly check the condition of your seat belts as follows:

- Pull each belt out fully, and look for frays, cuts, burns, and wear.
- Check that the latch plates and buckles work smoothly and the belts retract easily.
- If a belt does not retract easily, cleaning the belt may correct the problem. Only use a mild soap and warm water. Do not use bleach or cleaning solvents. Make sure the belt is completely dry before allowing it to retract.

Any belt that is not in good condition or working properly will not provide proper protection and should be replaced as soon as possible.

A belt that has been worn during a crash may not provide the same level of protection in a subsequent crash. Have your seat belts inspected by a dealer after any collision.

WARNING

Not checking or maintaining seat belts can result in serious injury or death if the seat belts do not work properly when needed.

Check your seat belts regularly and have any problem corrected as soon as possible.
Airbags

Airbag System Components

Continued
The front, side, and curtain airbags are deployed according to the direction and severity of impact. Both side curtain airbags are deployed in a rollover.

The airbag system includes:

1. Two SRS (Supplemental Restraint System) front airbags. The driver's airbag is stored in the center of the steering wheel; the front passenger's airbag is stored in the dashboard. Both are marked SRS AIRBAG.

2. Two side airbags, one for the driver and one for a front passenger. The airbags are stored in the outer edges of the seatbacks. Both are marked SIDE AIRBAG.

3. Two side curtain airbags, one for each side of the vehicle. The airbags are stored in the ceiling, above the side windows. The front and rear pillars are marked SIDE CURTAIN AIRBAG.

4. An electronic control unit that, when the vehicle is on, continually monitors information about the various impact sensors, seat and buckle sensors, rollover sensor, airbag activators, seat belt tensioners, and other vehicle information. During a crash event the unit can record such information.

5. Automatic front seat belt tensioners. In addition, the driver's and front passenger's seat belt buckles incorporate sensors that detect whether or not the belts are fastened.

6. A driver's seat position sensor. This sensor determines the optimal force at which the airbag will deploy in a crash.

7. Weight sensors in the front passenger's seat. The front passenger's airbag will be turned off if the weight on the seat is approximately 65 lbs (29 kg) or less (the weight of an infant or small child).

8. Impact sensors that can detect a moderate-to-severe front or side impact.

9. An indicator on the dashboard that alerts you that the front passenger's front airbag has been turned off.

10. An indicator on the instrument panel that alerts you to a possible problem with your airbag system or seat belt tensioners.

11. A rollover sensor that can detect if your vehicle is about to roll over and signal the control unit to deploy both side curtain airbags.

12. Pressure sensors inside each front door that control side airbag deployment.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
**Important Facts About Your Airbags**

Airbags can pose serious hazards. To do their job, airbags must inflate with tremendous force. So, while airbags help save lives, they can cause burns, bruises, and other minor injuries, sometimes even fatal ones if occupants are not wearing their seat belts properly and sitting correctly.

**What you should do:** Always wear your seat belt properly, and sit upright and as far back from the steering wheel as possible while allowing full control of the vehicle. A front passenger should move their seat as far back from the dashboard as possible.

Remember, however, that no safety system can prevent all injuries or deaths that can occur in a severe crash, even when seat belts are properly worn and the airbags deploy.

**Do not place hard or sharp objects between yourself and a front airbag.** Carrying hard or sharp objects on your lap, or driving with a pipe or other sharp object in your mouth, can result in injuries if your front airbag inflates.

**Do not attach or place objects on the front airbag covers.** Objects on the covers marked SRS AIRBAG could interfere with the proper operation of the airbags or be propelled inside the vehicle and hurt someone if the airbags inflate.

**Do not attempt to deactivate your airbags.** Together, airbags and seat belts provide the best protection.

When driving, keep hands and arms out of the deployment path of the front airbag by holding each side of the steering wheel. Do not cross an arm over the airbag cover.
Types of Airbags

Your vehicle is equipped with three types of airbags:

- **Front airbags**: Airbags in front of the driver’s and front passenger’s seats.
- **Side airbags**: Airbags in the driver’s and front passenger’s seat-backs.
- **Side curtain airbags**: Airbags above the side windows.

Each is discussed in the following pages.

Front Airbags (SRS)

The front SRS airbags inflate in a moderate-to-severe frontal collision to help protect the head and chest of the driver and/or front passenger.

*SRS* (Supplemental Restraint System) indicates that the airbags are designed to supplement seat belts, not replace them. Seat belts are the occupant’s primary restraint system.

**Housing Locations**

The front airbags are housed in the center of the steering wheel for the driver, and in the dashboard for the front passenger. Both airbags are marked **SRS AIRBAG**.

The airbags can inflate whenever the ignition switch is in ON **(1)**.

After an airbag inflates in a crash, you may see a small amount of smoke. This is from the combustion process of the inflator material and is not harmful. People with respiratory problems may experience some temporary discomfort. If this occurs, get out of the vehicle as soon as it is safe to do so.

During a frontal crash severe enough to cause one or both front airbags to deploy, the airbags can inflate at different rates, depending on the severity of the crash, whether or not the seat belts are latched, and/or other factors. Frontal airbags are designed to supplement the seat belts to help reduce the likelihood of head and chest injuries in frontal crashes.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.*
Operations

Front airbags are designed to inflate during moderate-to-severe frontal collisions. When the vehicle decelerates suddenly, the sensors send information to the control unit which signals one or both front airbags to inflate.

A frontal collision can be either head-on or angled between two vehicles, or when a vehicle crashes into a stationary object, such as a concrete wall.

How the Front Airbags Work

While your seat belt restrains your torso, the front airbag provides supplemental protection for your head and chest.

The front airbags deflate immediately so that they won’t interfere with the driver’s visibility or the ability to steer or operate other controls.

The total time for inflation and deflation is so fast that most occupants are not aware that the airbags deployed until they see them lying in front of them.

Continued
When front airbags should not deploy

Minor frontal crashes: Front airbags were designed to supplement seat belts and help save lives, not to prevent minor scrapes, or even broken bones that might occur during a less than moderate-to-severe frontal crash.

Side impacts: Front airbags can provide protection when a sudden deceleration causes a driver or front passenger to move toward the front of the vehicle. Side airbags and side curtain airbags have been specifically designed to help reduce the severity of injuries that can occur during a moderate-to-severe side impact which can cause the driver or passenger to move toward the side of the vehicle.

Rear impacts: Head restraints and seat belts are your best protection during a rear impact. Front airbags cannot provide any significant protection and are not designed to deploy in such collisions.

Rollovers: In a rollover, your best form of protection is a seatbelt or, if your vehicle is equipped with a rollover sensor, both a seatbelt and a side curtain airbag. Front airbags, however, are not designed to deploy in a rollover as they would provide little if any protection.

When front airbags deploy with little or no visible damage

Because the airbag system senses sudden deceleration, a strong impact to the vehicle framework or suspension might cause one or more of the airbags to deploy. Examples include running into a curb, the edge of a hole, or other low fixed object that causes a sudden deceleration in the vehicle chassis. Since the impact is underneath the vehicle, damage may not be readily apparent.

When front airbags may not deploy, even though exterior damage appears severe

Since crushable body parts absorb crash energy during an impact, the amount of visible damage does not always indicate proper airbag operation. In fact, some collisions can result in severe damage but no airbag deployment because the airbags would not have been needed or would not have provided protection even if they had deployed.
The airbags have advanced features to help reduce the likelihood of airbag related injuries to smaller occupants.

The driver’s advanced airbag system includes a seat position sensor.

Based on information from this sensor and the severity of the impact, the advanced airbag system determines the optimal deployment of the driver’s airbag.

The front passenger’s advanced airbag system has weight sensors.

We advise against allowing a child age 12 or under to ride in the front passenger’s seat. However, if you do allow a child age 12 or under to ride in the front passenger's seat, note that the system will automatically turn off the front passenger’s airbag if the sensors detect that the child is approximately 65 lbs (29kg) or less.
Side Airbags

The side airbags help protect the torso and pelvis of the driver or a front passenger during a moderate-to-severe side impact.

■ Housing Locations

The side airbags are housed in the outside edge of the driver’s and passenger’s seatbacks.

Both are marked SIDE AIRBAG.

■ Operation

When the sensors detect a moderate-to-severe side impact, the control unit signals the side airbag on the impact side to immediately inflate.

Side Airbags

Do not attach accessories on or near the side airbags. They can interfere with the proper operation of the airbags, or hurt someone if an airbag inflates.

If the impact is on the passenger’s side, the airbag may not deploy when there is no passenger in the front passenger seat.

Do not cover or replace the front seat-back covers without consulting a dealer. Improperly replacing or covering front seat-back covers can prevent your side airbags from properly deploying during a side impact.

Side airbag deployment is controlled by a pressure sensor inside each front door. Damage or changes to the inside or outside of the doors may negatively affect side airbag deployment. Contact an authorized dealer before changing or repairing a front door.
When a side airbag deploys with little or no visible damage
Because the airbag system senses sudden acceleration, a strong impact to the side of the vehicle's framework can cause a side airbag to deploy. In such cases, there may be little or no damage, but the side impact sensors detected a severe enough impact to deploy the airbag.

When a side airbag may not deploy, even though visible damage appears severe
It is possible for a side airbag to not deploy during an impact that results in apparently severe damage. This can occur when the point of impact was toward the far front or rear of the vehicle, or when the vehicle's crushable body parts absorbed most of the crash energy. In either case, the side airbag would not have been needed nor provided protection even if it had deployed.
Side Curtain Airbags

The side curtain airbags help protect the heads of the driver and passengers in the outer seating positions during a moderate-to-severe side impact. The side curtain airbags equipped in this vehicle are also designed to help reduce the likelihood of partial and complete ejection of vehicle occupants through side windows in crashes, particularly rollover crashes.

Housing Locations

The side curtain airbags are located in the ceiling above the side windows on both sides of the vehicle.

Side Curtain Airbag Storage

If the SRS control unit senses that your vehicle is about to rollover, it immediately deploys both side curtain airbags and activates both front seat belt tensioners.

If the impact is on the passenger’s side, the passenger’s side curtain airbag deploys even if there are no occupants on that side of the vehicle.

To get the best protection from the side curtain airbags, occupants should wear their seat belts properly and sit upright and well back in their seats.

Do not attach any objects to the side windows or roof pillars as they can interfere with the proper operation of the side curtain airbags.
The side curtain airbag is designed to deploy in a rollover or a moderate-to-severe side impact.

When side curtain airbags deploy in a frontal collision
One or both side curtain airbags may also inflate in a moderate-to-severe angled frontal collision.
Airbag System Indicators

If a problem occurs in the airbag system, the SRS indicator will come on and a message appears on the driver information interface*.

### Supplemental Restraint System (SRS) Indicator

**When the ignition switch is turned to ON**

The indicator comes on for a few seconds, then goes off. This tells you the system is working properly.

If the indicator comes on at any other time, or does not come on at all, have the system checked by a dealer as soon as possible. If you don’t, your airbags and seat belt tensioners may not work properly when they are needed.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
Passenger Airbag Off Indicator

When the passenger airbag off indicator comes on
The indicator comes on to alert you that the passenger’s front airbag has been turned off. This occurs when the weight sensors detect about 65 lbs (29 kg) or less, the weight of an infant or small child, on the seat.

Children age 12 or under should always ride properly restrained in a back seat. **Child Safety** P. 63

If the front passenger's seat is empty, the passenger's front airbag will not deploy and the indicator will come on.

Passenger Airbag Off Indicator

To ensure the passenger is detected properly, confirm that:

- There is no child seat or other object pressing against the rear of the seat-back.
- There is no rear passenger pushing or pulling on the back of the front passenger’s seat.
- The front seat or seat-back is not forced back against an object on the seat or floor behind it.
- There is no object placed under or beside the front passenger’s seat.
- The occupant is sitting in an upright position and the seat back is not excessively reclined.
- The occupant is not leaning against the door or center console.
- The occupant’s feet are placed on the floor in front of them.
- There are no objects hanging from the front passenger’s seat.
- Only small, lightweight objects are in the seat-back pocket.

The passenger airbag off indicator may come on and go off periodically if the total weight on the seat is near the airbag cutoff threshold.

Have your vehicle checked by a dealer as soon as possible if:

- All of the above conditions are met, and the indicator comes on with an adult seated in the front passenger seat.
- The seat is empty and the indicator is off.

Do not allow an adult passenger to ride in the front seat when the indicator is on.
Airbag Care

You do not need to, and should not, perform any maintenance on or replace any airbag system components yourself. However, you should have your vehicle inspected by a dealer in the following situations:

■ When the airbags have deployed
If an airbag has inflated, the control unit and other related parts must be replaced. Similarly, once an automatic seat belt tensioner has been activated, it must be replaced.

■ When the vehicle has been in a moderate-to-severe collision
Even if the airbags did not inflate, have your dealer inspect the following: the driver’s seat position sensor, weight sensors in the passenger’s seat, front seat belt tensioners, and each seat belt that was worn during the crash.

■ Do not remove or modify a front seat without consulting a dealer
This would likely disable or affect the proper operation of the driver’s seat position sensor or the weight sensors in the passenger’s seat. If it is necessary to remove or modify a front seat to accommodate a person with disabilities, contact a Honda dealer, or for U.S. vehicles, American Honda Automobile Customer Service at 1-800-999-1009 and for Canadian vehicles, Honda Canada Customer Relations at 1-888-9-HONDA-9.

We recommend against the use of salvaged airbag system components, including the airbag, tensioners, sensors, and control unit.
Child Safety

Protecting Child Passengers

Each year, many children are injured or killed in vehicle crashes because they are either unrestrained or not properly restrained. In fact, vehicle crashes are the number one cause of death of children ages 12 and under.

To reduce the number of child deaths and injuries, every state, Canadian province and territory requires that infants and children be properly restrained when they ride in a vehicle.

Children should sit properly restrained in a rear seat. This is because:

- An inflating front or side airbag can injure or kill a child sitting in the front seat.
- A child in the front seat is more likely to interfere with the driver’s ability to safely control the vehicle.
- Statistics show that children of all sizes and ages are safer when they are properly restrained in a rear seat.

WARNING

Children who are unrestrained or improperly restrained can be seriously injured or killed in a crash.

Any child too small for a seat belt should be properly restrained in a child seat. A larger child should be properly restrained with a seat belt, using a booster seat if necessary.

The National Highway Traffic Safety Administration and Transport Canada recommend that all children ages 12 and under be properly restrained in a rear seat. Some states or provinces/territories have laws restricting where children may ride.
Protecting Child Passengers

- Any child who is too small to wear a seat belt correctly must be restrained in an approved child seat that is properly secured to the vehicle using either the seat belt or the lower anchors of the LATCH system.

- Never hold a child on your lap because it is impossible to protect them in the event of a collision.

- Never put a seat belt over yourself and a child. During a crash, the belt would likely press deep into the child and cause serious or fatal injuries.

- Never let two children use the same seat belt. Both children could be very seriously injured in a crash.

- Do not allow children to operate the doors, windows or seat adjustments.

- Do not leave children in the vehicle unattended, especially in hot weather when the inside of the vehicle can get hot enough to kill them. They could also activate vehicle controls causing it to move unexpectedly.

**WARNING**

Allowing a child to play with a seat belt or wrap one around their neck can result in serious injury or death.

Instruct children not to play with any seat belt and make sure any unused seat belt a child can reach is buckled, fully retracted, and locked.

To deactivate a lockable retractor, release the buckle and allow the seat belt to wind up all the way.

To remind you of the passenger’s front airbag hazards and child safety, your vehicle warning came with a label on the dashboard (U.S. models) and has labels on the front visors. Please read and follow the instructions on these labels.

**Safety Labels** P. 77
Safety of Infants and Small Children

Protecting Infants

An infant must be properly restrained in a rear-facing, reclining child seat until the infant reaches the seat manufacturer’s weight or height limit for the seat, and the infant is at least one year old.

- Positioning a rear-facing child seat
  Child seats must be placed and secured in a rear seating position.

When properly installed, a rear-facing child seat may prevent the driver or a front passenger from moving their seat all the way back, or from locking their seat-back in the desired position. Make sure that there is no contact between the child seat and the seat in front of it.

It can also interfere with proper operation of the passenger’s advanced front airbag system.

- Airbags P. 49

If this occurs, we recommend that you install the child seat directly behind the front passenger’s seat, move the seat as far forward as needed, and leave it unoccupied. Or, you may wish to get a smaller rear-facing child seat.

WARNING

Placing a rear-facing child seat in the front seat can result in serious injury or death during a crash.

Always place a rear-facing child seat in the rear seat, not the front.

Many experts recommend use of a rear-facing seat for a child up to two years old if the child’s height and weight are appropriate for a rear-facing seat.

Rear-facing child seats should never be installed in a forward facing position.

Always refer to the child seat manufacturer’s instructions before installation.

Do not allow a front seat to rest against a child seat installed in a rear seating position: The weight sensor in the front seat may not correctly detect the actual weight of the occupant.
If a child is at least one year old and within the weight range indicated by the child seat manufacturer, the child should be properly restrained in a firmly secured forward-facing child seat.

**Forward-facing child seat placement**
We strongly recommend placing a forward-facing child seat in a rear seating position.

Placing a forward-facing child seat in the front seat can be hazardous, even with advanced front airbags that automatically turn the passenger’s front airbag off. A rear seat is the safest place for a child.

**WARNING**
Placing a forward-facing child seat in the front seat can result in serious injury or death if the front airbag inflates.

If you must place a forward-facing child seat in front, move the vehicle seat as far back as possible, and properly restrain the child.

Educate yourself about the laws and regulations regarding child seat use where you are driving, and follow the child seat manufacturer’s instructions.

Many experts recommend use of a rear-facing seat for a child up to two years old if the child’s height and weight are appropriate for a rear-facing seat.
Most child seats are LATCH-compatible (Lower Anchors and Tethers for Children). Some have a rigid-type connector while others have a flexible-type connector. Both are equally easy to use. Some existing and previously owned child seats can only be installed using the seat belt. Whichever type you choose, follow the child seat manufacturer's use and care instructions including recommended expiration dates as well as the instructions in this manual. Proper installation is key to maximizing your child's safety.

In seating positions and vehicles not equipped with LATCH, a LATCH-compatible child seat can be installed using the seat belt and a top tether for added security. This is because all child seats are required to be designed so that they can be secured with a lap belt or the lap part of a lap/shoulder belt. In addition, the child seat manufacturer may advise that a seat belt be used to attach a LATCH-compatible seat once a child reaches a specified weight. Please read the child seat owner's manual for proper installation instructions.

Important consideration when selecting a child seat
Make sure the child seat meets the following three requirements:
• The child seat is the correct type and size for the child.
• The child seat is the correct type for the seating position.
• The child seat is compliant with Federal Motor Vehicle Safety Standard 213 or Canadian Motor Vehicle Safety Standard 213.
Installing a LATCH-Compatible Child Seat

A LATCH-compatible child seat can be installed in rear seats. A child seat is attached to the lower anchors with either the rigid or flexible type of connectors.

1. Locate the lower anchors under the marks.

2. Place the child seat on the vehicle seat, then attach the child seat to the lower anchors according to the instructions that came with the child seat.

When installing the child seat, make sure that the lower anchors are not obstructed by the seat belt or any other object.
1. Installing a LATCH-Compatible Child Seat

**WARNING**

Never attach two child seats to the same anchor. In a collision, one anchor may not be strong enough to hold two child seat attachments and may break, causing serious injury or death.

For your child’s safety, when using a child seat installed using the LATCH system, make sure that the child seat is properly secured to the vehicle. A child seat that is not properly secured will not adequately protect a child in a crash and may cause injury to the child or other vehicle occupants.

3. **Outer position**
   - Put the head restraint to its upper-most position, then route the tether strap between the head restraint legs, and secure the tether strap hook to the anchor.
   - Go to step 7.

4. **Center position**
   - Put the head restraint to its upper-most position.
   - Open the anchor cover.

Continued...
5. Route the tether strap through the head restraint legs. Make sure the strap is not twisted.
6. Secure the tether strap hook to the anchor.
7. Tighten the tether strap as instructed by the child seat manufacturer.
8. Make sure the child seat is firmly secured by rocking it forward and back and side to side; little movement should be felt.
9. Make sure any unused seat belt that a child can reach is buckled, the lockable retractor is activated, and the belt is fully retracted and locked.
Installing a Child Seat with a Lap/Shoulder Seat Belt

A child seat can be installed with a lap/shoulder belt in any rear seat or, if absolutely necessary, the front passenger seat.

1. Place the child seat on the vehicle seat.
2. Route the seat belt through the child seat according to the seat manufacturer’s instructions, and insert the latch plate into the buckle.
   ► Insert the latch plate fully until it clicks.

3. Slowly pull the shoulder part of the belt all the way out until it stops. This activates the lockable retractor.
4. Let the seat belt if it is completely retracted it unlocks wind up into the retractor, then try to pull it out to make sure the retractor is locked.
   ► If you are able to pull the shoulder belt out, the lockable retractor is not activated. Pull the seat belt all the way out, and repeat steps 3 – 4.
5. Grab the shoulder part of the seat belt near the buckle, and pull up to remove any slack from the lap part of the belt. When doing this, place your weight on the child seat and push it into the vehicle seat.

6. Make sure the child seat is firmly secured by rocking it forward and back and side to side; less than one inch of movement should occur near the seat belt.

7. Make sure any unused seat belt that a child can reach is buckled, the lockable retractor is activated, and the belt is fully retracted and locked.

Adding Security with a Tether

A tether anchorage point is provided behind each rear seating position. If you have a child seat that comes with a tether but can be installed with a seat belt, the tether may be used for additional security.

Installing a Child Seat with a Lap/Shoulder Seat Belt

To deactivate a lockable retractor, release the buckle and allow the seat belt to wind up all the way.

Adding Security with a Tether

Since a tether can provide additional security to the lap/shoulder seat belt installation, we recommend using a tether whenever one is available.
**Child Safety**

**Safety of Infants and Small Children**

- **Using an outer anchor**
  1. Put the head restraint to its upper-most position, then route the tether strap through the head restraint legs. Make sure the strap is not twisted.
  2. Secure the tether strap hook to the anchor.
  3. Tighten the tether strap as instructed by the child seat manufacturer.

- **Using the center anchor**
  1. Put the head restraint to its upper-most position.
  2. Open the anchor cover.
  3. Route the tether strap through the head restraint legs. Make sure the strap is not twisted.
  4. Secure the tether strap hook to the anchor.
  5. Tighten the tether strap as instructed by the child seat manufacturer.
Safety of Larger Children

Protecting Larger Children

The following pages give instructions on how to check proper seat belt fit, what kind of booster seat to use if one is needed, and important precautions for a child who must sit in front.

Checking Seat Belt Fit

When a child is too big for a child seat, secure the child in a rear seat using the lap/shoulder seat belt. Have the child sit upright and all the way back, then answer the following questions.

- Do the child’s knees bend comfortably over the edge of the seat?
- Does the shoulder belt cross between the child’s neck and arm?
- Is the lap part of the seat belt as low as possible, touching the child’s thighs?
- Will the child be able to stay seated like this for the whole trip?

If you answer yes to all these questions, the child is ready to wear the lap/shoulder seat belt correctly. If you answer no to any question, the child needs to ride on a booster seat until the seat belt fits properly without a booster seat.

WARNING

Allowing a child age 12 or under to sit in front can result in injury or death if the passenger’s front airbag inflates.

If a larger child must ride in front, move the vehicle seat as far to the rear as possible, have the child sit up properly and wear the seat belt properly, using a booster seat if needed.
If a lap/shoulder seat belt cannot be used properly, position the child in a booster seat in the rear seat. For the child’s safety, check that the child meets the booster seat manufacturer’s recommendations.

---

Your vehicle has a rear seat where children can be properly restrained. If you ever have to carry a group of children, and a child must ride in front:

- Make sure you read and fully understand the instructions and safety information in this manual.
- Move the front passenger seat as far back as possible.
- Have the child sit upright and well back in the seat.
- Check that the seat belt is properly positioned so that the child is secure in the seat.

---

We strongly recommend that you keep an eye on child passengers. Even older, more mature children sometimes need to be reminded to fasten their seat belts and sit up properly.
Exhaust Gas Hazard

Carbon Monoxide Gas

The engine exhaust from this vehicle contains carbon monoxide, a colorless, odorless, and highly toxic gas. As long as you properly maintain your vehicle, carbon monoxide gas will not get into the interior.

- **Have the exhaust system inspected for leaks whenever**
  - The exhaust system is making an unusual noise.
  - The exhaust system may have been damaged.
  - The vehicle is raised for an oil change.

When you operate a vehicle with the tailgate open, airflow can pull exhaust gas into the interior and create a hazardous condition. If you must drive with the tailgate open, open all the windows and set the climate control system as shown below.

1. Select the fresh air mode.
2. Select the mode.
3. Set the fan speed to high.
4. Set the temperature control to a comfortable setting.

Adjust the climate control system in the same manner if you sit in your parked vehicle with the engine running.

**WARNING**

Carbon monoxide gas is toxic.

Breathing it can cause unconsciousness and even kill you.

Avoid any enclosed areas or activities that expose you to carbon monoxide.

An enclosed area such as a garage can quickly fill up with carbon monoxide gas. Do not run the engine with the garage door closed. Even when the garage door is open, drive out of the garage immediately after starting the engine.
Safety Labels

Label Locations

These labels are in the locations shown. They warn you of potential hazards that can cause serious injury or death. Read these labels carefully.

If a label comes off or becomes hard to read (except for the U.S. dashboard label which may be removed by the owner), contact a dealer for a replacement.

Gauges and Displays

Gauges

Gauges include the speedometer, tachometer, fuel gauge, and related indicators. They are displayed when the ignition switch is in ON [II]*1.

- **Speedometer**
  Displays your driving speed in mph (U.S.) or km/h (Canada).

- **Tachometer**
  Shows the number of engine revolutions per minute.

- **Fuel Gauge**
  Displays the amount of fuel left in the fuel tank.

- **Temperature Gauge**
  Displays the temperature of the engine coolant.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

---

**Models with information display**
Press and hold the mile (U.S.)/km (Canada) change knob until you hear a beep. The speedometer reading and the displayed measurements switch between mph (U.S.) and km/h (Canada).

**Models with driver information interface**
Press the (display/information) button repeatedly until the icon is shown on the driver information interface. Press ENTER, then press and hold it again. The speedometer reading and the displayed measurements will switch between mph (U.S.) and km/h (Canada).

**Fuel Gauge**

**NOTICE**
You should refuel when the reading approaches 1. Running out of fuel can cause the engine to misfire, damaging the catalytic converter.

The actual amount of remaining fuel may differ from the fuel gauge reading.

**Temperature Gauge**

**NOTICE**
Driving with the temperature gauge pointer in the upper zone can cause serious engine damage. Pull safely to the side of the road and allow engine temperature to return to normal. See Overheating P. 631
Information Display*

The information display shows the odometer, trip meter, engine oil life and maintenance service item codes, and other gauges.

Switching the Display

Press the (TRIP) knob to change the display.

Odometer

Shows the total number of miles (U.S.) or kilometers (Canada) that your vehicle has accumulated.

Trip Meter

Shows the total number of miles (U.S.) or kilometers (Canada) driven since the last reset. Meters A and B can be used to measure two separate trips.

Switching the Display

Each time you press the knob, the information display changes as follows:

- Instant Fuel Economy, Odometer, Trip Meter A, Outside Temperature
- Instant Fuel Economy, Range, Trip Meter A, Outside Temperature
- Instant Fuel Economy, Average Fuel Economy A, Trip Meter A, Outside Temperature
- Instant Fuel Economy, Average Fuel Economy B, Trip Meter B, Outside Temperature
- Engine Oil Life

* Not available on all models
■ Resetting a trip meter
To reset a trip meter, display it, then press and hold the knob. The trip meter is reset to 0.0.

■ Average Fuel Economy
Shows the estimated average fuel economy of each trip meter in mpg or l/100 km. The display is updated at set intervals. When a trip meter is reset, the average fuel economy is also reset.

■ Instant Fuel Economy Gauge
Shows the instant fuel economy as a bar graph in mpg or l/100km.

■ Engine Oil Life
Shows the remaining oil life and Maintenance Minder™.
  ➤ Maintenance Minder™ P. 557

■ Range
Shows the estimated distance you can travel on the remaining fuel. This distance is estimated from the fuel economy of your previous trips.
**Outside Temperature**

Shows the outside temperature in Fahrenheit (U.S.) or Celsius (Canada).

- **Adjusting the outside temperature indicator**
  Adjust the temperature reading up to ± 5°F or ± 3°C if the temperature reading seems incorrect.

1. Turn the ignition switch to ON **1**.
2. Press and hold the **TRIP** knob for 10 seconds or more while the outside temperature is shown on the information display.
   - The information display goes into temperature adjustment mode. The display starts showing from -5°F to +5°F (U.S.) or -3°C to +3°C (Canada).
3. Release the **TRIP** knob when the right adjustment amount is shown.
   - The adjustment is complete.

---

*1: Models with the smart entry system have an **ENGINE START/STOP** button instead of an ignition switch.
**Driver Information Interface**

The driver information interface shows the odometer, trip meter, outside temperature indicator, and other gauges. It also displays important messages such as warnings and other helpful information.

### Switching the Display

#### Main displays

Press the (display/information) button and press ▼ or ▲ to change the display. Press ENTER to see detailed information.
Trip computer
Press the \( \text{TRIP} \) knob to change the display.

- Odometer
  Shows the total number of miles (U.S.) or kilometers (Canada) that your vehicle has accumulated.

- Trip Meter
  Shows the total number of miles (U.S.) or kilometers (Canada) driven since the last reset. Meters A and B can be used to measure two separate trips.

Trip Meter
Switch between trip meter A and trip meter B by pressing the \( \text{TRIP} \) knob, or by using the customized features on the audio/information display.

Customized Features P. 349
Resetting a trip meter
To reset a trip meter, display it, then press and hold the knob. The trip meter is reset to 0.0.

Average Fuel Economy
Shows the estimated average fuel economy of each trip meter in mpg or l/100 km. The display is updated at set intervals. When a trip meter is reset, the average fuel economy is also reset.

Range
Shows the estimated distance you can travel on the remaining fuel. This distance is estimated from the fuel economy of your previous trips.

Elapsed Time
Shows the time elapsed since Trip A or Trip B was reset.

Average Speed
Shows the average speed in mph (U.S.) or km/h (Canada) since Trip A or Trip B was reset.

Engine Oil Life
Shows the remaining oil life and Maintenance Minder™.

Average Fuel Economy
You can change when to reset the average fuel economy.

Customized Features P. 349

Elapsed Time
You can change when to reset the elapsed time.

Customized Features P. 349

Average Speed
You can change when to reset the average speed.

Customized Features P. 349
The Driver Attention Monitor analyzes steering inputs to determine if the vehicle is being driven in a manner consistent with drowsy or inattentive driving. If it determines that the vehicle is being driven in such a manner, it will display the degree of the driver's attention in the Driver Information Interface.

When the (display/information) button is pressed, bars in the Driver Information Interface light up in white to indicate the degree of the driver's attention.

When the (display/information) button is pressed, bars in the Driver Information Interface light up in white to indicate the degree of the driver's attention.

When the (display/information) button is pressed, bars in the Driver Information Interface light up in white to indicate the degree of the driver's attention.

When the (display/information) button is pressed, bars in the Driver Information Interface light up in white to indicate the degree of the driver's attention.

When the (display/information) button is pressed, bars in the Driver Information Interface light up in white to indicate the degree of the driver's attention.

When the (display/information) button is pressed, bars in the Driver Information Interface light up in white to indicate the degree of the driver's attention.

When the (display/information) button is pressed, bars in the Driver Information Interface light up in white to indicate the degree of the driver's attention.

When the (display/information) button is pressed, bars in the Driver Information Interface light up in white to indicate the degree of the driver's attention.

When the (display/information) button is pressed, bars in the Driver Information Interface light up in white to indicate the degree of the driver's attention.

When the (display/information) button is pressed, bars in the Driver Information Interface light up in white to indicate the degree of the driver's attention.

When the (display/information) button is pressed, bars in the Driver Information Interface light up in white to indicate the degree of the driver's attention.

When the (display/information) button is pressed, bars in the Driver Information Interface light up in white to indicate the degree of the driver's attention.

When the (display/information) button is pressed, bars in the Driver Information Interface light up in white to indicate the degree of the driver's attention.

When the (display/information) button is pressed, bars in the Driver Information Interface light up in white to indicate the degree of the driver's attention.

When the (display/information) button is pressed, bars in the Driver Information Interface light up in white to indicate the degree of the driver's attention.

When the (display/information) button is pressed, bars in the Driver Information Interface light up in white to indicate the degree of the driver's attention.

When the (display/information) button is pressed, bars in the Driver Information Interface light up in white to indicate the degree of the driver's attention.
If two bars light up, the Driver Attention Level Low message will appear.

If one bar lights up, the Driver Attention Level Low. Time For A Break message will appear, a beep will sound, and the steering wheel will vibrate. If this message appears, stop in a safe location and rest for as long as needed. The message will disappear when the ENTER button is pressed or when the system has determined that the driver is driving normally. If the driver does not take a break and the monitor continues to detect that the driver is very tired, the message will appear again after approximately 15 minutes, accompanied by a beep and steering wheel vibrations. The message does not appear when the traveling time is 30 minutes or less.

- The Driver Attention Monitor resets when
  - the engine is turned off.
  - the driver unfastens the seat belt and opens the door while the vehicle is stopped.
For the Driver Attention Monitor to function
- the vehicle must be traveling above 25 mph (40 km/h).
- the electric power steering (EPS) system indicator must be off.

Depending on driving conditions or other factors, the Driver Attention Monitor may not function in the following circumstances.
- the steering assist function of the Lane Keeping Assist System (LKAS)* is active.
  - Lane Keeping Assist System (LKAS)* P. 499
- the condition of the road is poor, e.g. the surface is unpaved or bumpy.
- it is windy.
- the driver is frequently operating the vehicle in an assertive manner such as changing lanes or accelerating.

Customizing
You can change the Driver Attention Monitor settings. Select Tactile And Audible Alert, Tactile Alert, or OFF.
- Customized Features P. 349

* Not available on all models
Gauges and Displays

Driver Information Interface*

- **Outside Temperature**
  Shows the outside temperature in Fahrenheit (U.S.) or Celsius (Canada).

- **Adjusting the outside temperature display**
  Adjust the temperature reading up to ±5°F or ±3°C if the temperature reading seems incorrect.
  Use the customized features in the audio/information screen to correct the temperature.

  - **Customized Features** P. 349

- **Instant Fuel Economy**
  Shows the instant fuel economy as a bar graph in mpg or l/100 km.

- **AWD Torque Distribution Monitor***
  The indicators on the display show the amount of torque being transferred to the right front, left front, right rear, and left rear wheels.

  - **Real Time AWD with Intelligent Control System™** P. 515

Clock

Adjusting the Clock

Models without navigation system
You can adjust the time in the clock display with the ignition switch in ON Ⅱ*1.

■ Adjusting the Time

Models with color audio system

■ Using the MENU/CLOCK button
1. Press and hold the MENU/CLOCK button. Adjust Clock is selected.
2. Rotate to change hour, then press.
3. Rotate to change minute, then press .
4. To enter the selection, rotate and select Set, then press .

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Adjusting the Clock

Controls

Using the Settings menu on the audio/information screen
1. Select Settings.
2. Select Clock.
3. Select Clock Adjustment.
4. Select ▲ or ▼ to change hour.
5. Select ▲ or ▼ to change minute, then select OK.

Models with Display Audio

Using the Settings menu on the audio/information screen
Models with Display Audio
You can customize the clock display to show the 12 hour clock or 24 hour clock and turn the clock display on and off.
Customized Features P. 349

Models with Display Audio
The clock is automatically updated when your smartphone is connected to the audio system.
You can also adjust the clock by touching the clock displayed on the upper right corner of the display.
1. Touch the clock on the display for a few seconds.
2. Select Clock Adjustment.
3. Select ▲ or ▼ to change hour.
4. Select ▲ or ▼ to change minute, then select OK.
Locking and Unlocking the Doors

Key Types and Functions

This vehicle comes with the following keys:

**Keys**

- **Ignition Keys with Remote Transmitter**
- **Smart Entry Remote**

Use the key to start and stop the engine, and to lock and unlock the doors and tailgate. You can also lock and unlock the doors and tailgate pressing the buttons on remote transmitter.

**Built-in Key**

The built-in key can be used to lock/unlock the doors when the smart entry remote battery becomes weak and the power door lock/unlock operation is disabled.

To remove the built-in key, slide the release knob and then pull out the key. To reinstall the built-in key, push the built-in key into the smart entry remote until it clicks.

* Not available on all models
Locking and Unlocking the Doors

Key Types and Functions

- **Valet Key***
  - Can be used to start and stop the engine, and lock and unlock driver's door.
  - Gray

- **Key Number Tag**
  - Contains a number that you will need if you purchase a replacement key.

* Not available on all models

---

**Valet Key***

- When you need to leave a key with a third party, leave the valet key.

**Key Number Tag**

- Keep the key number tag separate from the key in a safe place outside of your vehicle.
- If you wish to purchase an additional key, contact a dealer.
- If you lose your key and you cannot start the engine, contact a dealer.
Low Smart Entry Remote Signal Strength*

The vehicle transmits radio waves to locate the smart entry remote when locking/unlocking the doors, opening the tailgate, or to start the engine.

In the following cases, locking/unlocking the doors, opening the tailgate, or starting the engine may be inhibited or operation may be unstable:
- Strong radio waves are being transmitted by nearby equipment.
- You are carrying the smart entry remote together with telecommunications equipment, laptop computers, cell phones, or wireless devices.
- A metallic object is touching or covering the smart entry remote.

Communication between the smart entry remote and the vehicle consumes the smart entry remote’s battery. Battery life is about two years, but this varies depending on regularity of use. The battery is consumed whenever the smart entry remote is receiving strong radio waves. Avoid placing it near electrical appliances such as televisions and personal computers.

* Not available on all models
Locking/Unlocking the Doors from the Outside

Using the Smart Entry with Push Button Start System*

When you carry the smart entry remote, you can lock/unlock the doors and open the tailgate.
You can lock/unlock the doors within a radius of about 32 inches (80 cm) of the outside door handle. You can open the tailgate within about 32 inches (80 cm) radius from the tailgate outer handle.

Locking the doors and tailgate

Touch the door lock sensor on a front door or press the lock button on the tailgate.

- Some exterior lights flash; the beeper sounds; all the doors and tailgate lock; and the security system sets.

* Not available on all models

Locking/Unlocking the Doors from the Outside

If the interior light switch is in the door activated position, the interior light comes on when you unlock the doors and tailgate.
No doors opened: The light fades out after 30 seconds.
Doors and tailgate relocked: The light goes off immediately.

Interior Lights P. 205

Using the Smart Entry with Push Button Start System*

If you do not open a door or the tailgate within 30 seconds of unlocking the vehicle with the smart entry system, the doors and tailgate will automatically relock.
You can lock or unlock doors using the smart entry system only when the power mode is in VEHICLE OFF.
Locking the vehicle (Walk away auto lock®)

When you walk away from the vehicle while carrying the smart entry remote, the doors will automatically lock. The auto lock function activates when all doors are closed, and the smart entry remote is within about 5 feet (1.5 m) radius of the outside door handle.

Exit vehicle while carrying smart entry remote and close door(s).

1. While within about 5 feet (1.5 m) radius of the vehicle.
   - The beeper sounds; the auto lock function will be activated.

2. Carry the smart entry remote beyond about 5 feet (1.5 m) from the vehicle and remain outside this range for 2 or more seconds.
   - Some exterior lights flash; the beeper sounds; all doors will then lock.

Customized Features

P. 349

After the auto lock function has been activated, when you stay within the locking/unlocking operation range, the indicator on the smart entry remote will continue to flash until the doors are locked.

When you stay beside the vehicle within the operation range, the doors will automatically lock approximately 30 seconds after the auto lock function activating beeper sounds.

When you open a door after the auto lock function activating beeper sounds, the auto lock function will be canceled.

When all doors have been closed and the smart entry remote is inside the vehicle, or if the smart entry remote is not detected within about 5 feet (1.5 m) of the vehicle, auto lock function will not be activated.
To temporarily deactivate the function:
1. Set the power mode to OFF.
2. Open the driver’s door.
3. Using the master door lock switch, operate the lock as follows:
   Lock → Unlock → Lock → Unlock.
   ► The beeper sounds and the function is deactivated.

To restore the function:
• Set the power mode to ON.
• Lock the vehicle without using the auto lock function.
• Walk away at least more than about 5 feet (1.5 m) away from the vehicle while carrying the smart entry remote.

The auto lock function does not operate when any of the following conditions are met.
• The smart entry remote is inside the vehicle.
• A door or the hood is not closed.
• The power mode is set to any mode other than OFF.
• The smart entry remote is not located within a radius of about 5 feet (1.5 m) from the vehicle when you get out of the vehicle and close the doors.

Auto lock function operation stop beeper
After the auto lock function has been activated, the auto lock operation stop beeper sounds for approximately two seconds in the following cases.
• The smart entry remote is put inside the vehicle through a window.
• You are located too close to the vehicle.
• The smart entry remote is put inside the tailgate.
If the warning beeper sounds, check that you are carrying the smart entry remote. Then, open/close a door and confirm the auto lock activation beeper sounds once.
Locking and Unlocking the Doors

Unlocking the doors and tailgate
Grab the driver's door handle:
- The driver's door unlocks.
- Some exterior lights flash twice and the beeper sounds twice.
Grab the front passenger's door handle:
- All the doors and tailgate unlock.
- Some exterior lights flash twice and the beeper sounds twice.
Press the tailgate outer handle:
- The tailgate unlocks.
- Some exterior lights flash twice and the beeper sounds twice.

Using the Smart Entry with Push Button Start System *
- Do not leave the smart entry remote in the vehicle when you get out. Carry it with you.
- Even if you are not carrying the smart entry remote, you can lock/unlock the doors and tailgate while someone else with the remote is within range.
- The door may be locked or unlocked if the door handle is covered with water in heavy rain or in a car wash if the smart entry remote is within range.
- If you grip a front door handle or touch a door lock sensor wearing gloves, the door sensor may be slow to respond or may not respond by locking or unlocking the doors.
- After locking the door, you have up to 2 seconds during which you can pull the door handle to confirm whether the door is locked. If you need to unlock the door immediately after locking it, wait at least 2 seconds before gripping the handle, otherwise the door will not unlock.
- The door might not open if you pull it immediately after gripping the door handle. Grip the handle again and confirm that the door is unlocked before pulling the handle.
- Even within the 32 inches (80 cm) radius, you may not be able to lock/unlock the doors with the smart entry remote if it is above or below the outside handle.
- The smart entry remote may not operate if it is too close to the door and door glass.
- The light flashes, and beeper sounds and unlock settings can be customized on the audio/information screen.

Customized Features P. 349

* Not available on all models
Locking and Unlocking the Doors

Locking/Unlocking the Doors from the Outside

Controls

- **Locking the doors**
  - Press the lock button.
  - **Once:**
    - Some exterior lights flash, all the doors and tailgate lock, and the security system* sets.
  - **Twice (within five seconds after the first push):**
    - The beeper sounds and verifies the security system* is set.

- **Unlocking the doors**
  - Press the unlock button.
  - **Once:**
    - Some exterior lights flash twice, and the driver’s door unlocks.
  - **Twice:**
    - The remaining doors and tailgate unlock.

---

* Not available on all models

Using the Remote Transmitter

If you do not open a door or the tailgate within 30 seconds of unlocking the vehicle with the remote transmitter, the doors and tailgate will automatically relock.

**Models with Display Audio**
You can change the relock timer setting.

**Customized Features** P. 349

The remote transmitter will not work when:

- **Ignition keys with remote transmitter**
  - The key is in the ignition switch.
- **Models with smart entry remote**
  - The power mode is not in VEHICLE OFF.

The remote transmitter uses low-power signals, so the operating range may vary depending on the surroundings.

The remote will not lock the vehicle when a door is open.

If the distance at which the remote transmitter works varies, the battery is probably low.
If the LED does not come on when you press a button, the battery is dead.

**Replacing the Button Battery** P. 606

**Models with Display Audio**
You can customize the door unlock mode setting.

**Customized Features** P. 349

---

* Not available on all models

Continued
Locking and Unlocking the Doors from the Outside

Locking/Unlocking the Doors Using a Key

If the smart entry remote battery or the vehicle battery is dead, use the key instead of the smart entry remote.

Fully insert the key and turn it.

When you lock the driver's door with a key, all the other doors and tailgate lock at the same time. When unlocking, the driver's door unlocks first. Turn the key a second time within a few seconds to unlock the remaining doors and the tailgate.

You can customize the door unlock mode setting.

Models with Display Audio

You can customize the door unlock mode setting.
Locking and Unlocking the Doors

Locking/Unlocking the Doors from the Outside

Controls

- **Locking the driver's door**
  Push the lock tab forward 1 or push the master door lock switch in the lock direction 2, and close the door.

- **Locking the passenger's doors**
  Push the lock tab forward and close the door.

Lockout prevention system

- **Ignition keys with remote transmitter**
  The doors and tailgate cannot be locked when the key is in the ignition switch.

- **Models with smart entry remote**
  The doors and tailgate cannot be locked when the smart entry remote is inside the vehicle.

Locking a Door Without Using a Key

- When you lock the driver's door, all the other doors and tailgate lock at the same time.
  Make sure you have the key in your hand when you lock the driver's door, any of the other doors or the tailgate, otherwise you may end up locking the key inside the vehicle.
Locking/Unlocking the Doors from the Inside

■ Using the Lock Tab

- **To Lock**: Push the lock tab forward.
- **Locking a door**

- **To Unlock**: Pull the lock tab rearward.
- **Unlocking a door**

■ Unlocking Using the Front Door Inner Handle

Pull the front door inner handle.
- The door unlocks and opens in one motion.

Unlocking and opening the driver's door from the inner handle unlocks all the other doors.

To avoid all the doors to be unlocked, use the lock tab on the driver's door to unlock, then lock again before opening the door. This setting works for one time only. If you do not want all the doors to be unlocked all the time, customize the Auto Door Unlock setting to Off using the master door lock switch or Display Audio*.

- **Using the Lock Tab**

  When you lock the door using the lock tab on the driver's door, all of the other doors and tailgate lock at the same time.

  When you unlock the door using the lock tab on the driver's door, only the driver's door will unlock.

- **Unlocking Using the Front Door Inner Handle**

  The front door inner handles are designed to allow front seat occupants to open the door in one motion. However, this feature requires that front seat occupants never pull a front door inner handle while the vehicle is in motion.

  Children should always ride in a rear seat where childproof door locks are provided.

  - **Childproof Door Locks** P. 143

* Not available on all models
Locking and Unlocking the Doors

Childproof Door Locks

Press the master door lock switch in as shown to lock or unlock all doors and the tailgate.

Using the Master Door Lock Switch

Slide the lever in the rear door to the lock position, and close the door.

Setting the Childproof Door Locks

To open the door from the inside when the childproof door lock is on, put the lock tab in the unlock position, lower the rear window, put your hand out of the window, and pull the outside door handle.

When opening the door
Open the door using the outside door handle.
Auto Door Locking/Unlocking

Your vehicle locks all doors and unlocks the all doors automatically when a certain condition is met.

Auto Door Locking

■ Drive lock mode
All doors and tailgate lock when the vehicle’s speed reaches about 10 mph (15 km/h).

Auto Door Unlocking

■ Driver’s door open mode
All doors unlock when the driver’s door is opened.
Customizing the Auto Door Locking/Unlocking Setting

You can customize the auto door locking/unlocking setting to your liking using the master door lock switch.

*2: Default setting
Opening and Closing the Tailgate

Precautions for Opening/Closing the Tailgate

Always make sure individuals and objects are clear of the tailgate before opening or closing it.

**Models without power tailgate**
- Open the tailgate all the way.
  - If it is not fully opened, the tailgate may begin to close under its own weight.
  - Be careful when it is windy. The wind may cause the tailgate to close.

**All models**

Keep the tailgate closed while driving to:
- Avoid possible damage.
- Prevent exhaust gas from leaking into the vehicle.

*Carbon Monoxide Gas* P. 76

**WARNING**

Anyone caught in the path of a tailgate that is being opened or closed can be seriously injured.

Make sure that all people are clear of the tailgate before opening or closing it.

Be careful not to hit your head on the tailgate or to put your hands between the tailgate and the cargo area when closing the tailgate.

When you are storing or picking up cargo from the cargo area, or by using a forward and back kicking motion under the center of the rear bumper for hands free access*, while the engine is idling, do not stand in front of the exhaust pipe. You may get burned.

Do not allow any passenger in the cargo space. They may get hurt during hard braking, a sudden acceleration, or a crash.

*Not available on all models
Opening and Closing the Tailgate

Precautions for Opening/Closing the Tailgate

Controls

The power tailgate can be operated by pressing the power tailgate button on the remote transmitter, pressing the power tailgate button in the driver side control panel, pressing the button on the tailgate, or by raising and lowering your foot under the center of the rear bumper for hands free access*.

The power tailgate can be opened/closed when the transmission is in P.

Models with power tailgate

Do not push or pull on the power tailgate when it is being automatically opened or closed. Forcibly opening or closing the power tailgate while in operation can deform the tailgate frame.

When operating the power tailgate, make sure there is enough space around your vehicle. People near the tailgate may be seriously hurt if the tailgate hits or closes on their heads. Be especially cautious if children are around.

The power tailgate may not open or close under the following conditions:
- You start the engine while the tailgate is automatically opening or closing.
- The vehicle is parked on a steep hill.
- The vehicle is swayed in a strong wind.
- The tailgate or the roof is covered with snow or ice.

If you close the power tailgate with all the doors locked, the power tailgate locks automatically.

NOTICE

Do not push or pull on the power tailgate when it is being automatically opened or closed. Forcibly opening or closing the power tailgate while in operation can deform the tailgate frame.

When operating the power tailgate, make sure there is enough space around your vehicle. People near the tailgate may be seriously hurt if the tailgate hits or closes on their heads. Be especially cautious if children are around.

The power tailgate may not open or close under the following conditions:
- You start the engine while the tailgate is automatically opening or closing.
- The vehicle is parked on a steep hill.
- The vehicle is swayed in a strong wind.
- The tailgate or the roof is covered with snow or ice.

If you close the power tailgate with all the doors locked, the power tailgate locks automatically.

* Not available on all models
Opening/Closing the Power Tailgate

Using the Hands Free Access

Use a forward and back kicking motion under the center of the rear bumper to open or close the power tailgate while carrying the smart entry remote.

Some exterior lights flash twice and a beeper sounds once, then the tailgate begins to move.

Using the Hands Free Access

During rain or in other instances when the vehicle becomes wet, the sensor may not properly detect your foot motion.

When performing work on or around the rear section of the vehicle, you may inadvertently open or close the tailgate.

To prevent this from happening, select Customized Features on the audio/information screen and then select OFF for the feature.

If you hold your foot under the bumper for too long, the power tailgate does not open or close.

This function will not operate if you don’t have the smart entry remote on you. Please make sure you have the smart entry remote on you.

The duration of the kicking motion should be approximately one second.

* Not available on all models
### Opening and Closing the Tailgate

#### Opening/Closing the Power Tailgate

Press the power tailgate button for more than one second to operate when the power mode is in VEHICLE OFF (LOCK).

- Some exterior lights flash and the beeper sounds.

If you press the button again while the power tailgate is moving, it will stop.

Press the button for more than one second, and the power tailgate will reverse direction.

#### Customizing when to open the tailgate

- **Anytime:** The power tailgate unlocks and opens at the same time. This is the default setting.
- **When Unlocked:** The tailgate opens when all doors are unlocked.

**Customized Features** P. 349

#### Using the Remote Transmitter

Press the power tailgate button for more than one second to operate when the power mode is in VEHICLE OFF (LOCK).

- Some exterior lights flash and the beeper sounds.

If you press the button again while the power tailgate is moving, it will stop.

Press the button for more than one second, and the power tailgate will reverse direction.

#### Installing aftermarket components other than genuine Honda accessories on the power tailgate may prevent it from fully opening or closing.

- Make sure the power tailgate is fully open before you get your cargo in and out.
- Make sure the power tailgate is fully closed before you start the vehicle.
- The beeper sounds when you start driving while the power tailgate is still open, or closing.

* Not available on all models

* Continued
Opening and Closing the Tailgate

Using the Power Tailgate Button

To open or close the power tailgate, press the power tailgate button for about one second. Some exterior lights flash and the beeper sounds.

If you press the button again while the power tailgate is moving, it will stop. Press the button for about one second, and the power tailgate will reverse direction.

Opening/Closing the Power Tailgate

If the power tailgate meets resistance while opening or closing, the auto reverse feature reverses the direction. The beeper sounds three times.

The auto reverse function stops sensing when the tailgate is almost closed to make sure that it fully closes.

Do not touch the sensors located on both sides of the tailgate. The power tailgate does not close if you touch either sensor when you are trying to close the tailgate.

Be careful not to scratch the sensors with a sharp object. If scratched, they can be damaged, and the power tailgate closing feature malfunctions.

* Not available on all models
**Opening and Closing the Tailgate**

If you press the outer handle of the tailgate for no longer than one second, the tailgate opens automatically.

- The beeper sounds.
- If you want to open the tailgate manually, press the button for more than one second.

**Opening and Closing the Tailgate**
P. 148

If you are carrying the smart entry remote, you do not have to unlock the tailgate before opening it.

To close the tailgate, press the outer handle again while the tailgate opening.

If you press the outer handle again while the power tailgate is moving, it will stop. Press the outer handle, and the power tailgate will reverse direction.

---

**Using the Tailgate Outer Handle**

If you press the outer handle of the tailgate for no longer than one second, the tailgate opens automatically.

- The beeper sounds.
- If you want to open the tailgate manually, press the button for more than one second.

**Opening and Closing the Tailgate**
P. 148

If you are carrying the smart entry remote, you do not have to unlock the tailgate before opening it.

To close the tailgate, press the outer handle again while the tailgate opening.

If you press the outer handle again while the power tailgate is moving, it will stop. Press the outer handle, and the power tailgate will reverse direction.

---

**Opening/Closing the Power Tailgate**

Do not leave the key, remote transmitter*, or smart entry remote* in the cargo area before closing the tailgate.

Even if you are not carrying the smart entry remote, you can lock/unlock the tailgate while someone else with the remote is within range.

You can change the power tailgate operation setting on and off.

**Customized Features** P. 349

---

* Not available on all models
Opening and Closing the Tailgate

### Using the Tailgate Inner Button

Press the button on the tailgate to close the power tailgate.

- The beeper sounds.

If you press the button again while the power tailgate is moving, it will stop. Press and release the button again, and the power tailgate will reverse direction.
Opening and Closing the Tailgate

**Opening/Closing the Power Tailgate**

---

### Programming Tailgate Position

The extent to which the power tailgate automatically opens can be programmed.

To program:

1. **Open the tailgate to the desired position.**
   - If you want to reprogram the power tailgate to open all the way, manually raise the tailgate to its upper most position and follow the next step.

2. **Press and hold the tailgate inner button until you hear short two beeps following one long buzzer.**

---

### Programming Tailgate Position

If the tailgate is only slightly opened, the position cannot be programmed, even if you push the inner button.

---

Continued
Opening and Closing the Tailgate

Auto-Closer
If you manually close the power tailgate, it latches automatically.

Power Tailgate Fall Detection
Automatically lowers the power tailgate when there is a possibility that the fully opened power tailgate can fall down by its own weight (for example, by snow on the tailgate). The beeper sounds while the power tailgate lowers.

Auto-Closer
The auto-closer feature does not activate if you press the tailgate outer handle while the power tailgate is closing.

Do not put any force on the tailgate while the power tailgate is latching.

Keep your hands away from the tailgate when you manually close the tailgate and let it latch automatically. It is dangerous to put your hands around the tailgate as it starts to latch itself.

Power Tailgate Fall Detection
If you try to manually close the power tailgate immediately after it fully opens, the power tailgate fall detection may be activated.

Once the power tailgate fall detection activates, wait until the power tailgate fully closes. Keep away from the power tailgate when it is in motion.

If the power tailgate fall detection constantly activates, consult at a dealer.
Opening/Closing the Tailgate

Using the Outer Handle

When all the doors are unlocked or press the tailgate unlock button on the remote transmitter, the tailgate is unlocked.
Press the outer handle and lift open the tailgate.

Models with smart entry system
If you are carrying the smart entry remote, you do not have to unlock the tailgate before opening it.
To close the tailgate, grab the inner handle, pull the tailgate down, and push it closed from outside.

Using the Outer Handle

Do not leave the key, remote transmitter*, or smart entry remote* in the cargo area before closing the tailgate.

Models with smart entry system
Even if you are not carrying the smart entry remote, you can lock/unlock the tailgate while someone else with the remote is within range.

* Not available on all models

Continued
Using the Remote Transmitter*

Press the tailgate unlock button to unlock the tailgate.

If you have unlocked and opened the tailgate using the remote transmitter or smart entry remote*, when closing, the tailgate locks automatically.

* Not available on all models
Security System

Immobilizer System

The immobilizer system prevents a key that has not been pre-registered from starting the engine. Each key contains electronic transmitters that use electronic signals to verify the key.

Pay attention to the following when inserting the key into the ignition switch* or pressing the ENGINE START/STOP button*:
• Do not allow objects that emit strong radio waves near the ignition switch* or the ENGINE START/STOP button*.
• Make sure the key is not covered by or touching a metal object.
• Do not bring a key from another vehicle’s immobilizer system near the ignition switch* or the ENGINE START/STOP button*.

Security System Alarm*

The security system alarm activates when the tailgate, hood or doors are forcibly opened. The alarm does not go off if the tailgate or doors are opened with the key, remote transmitter or smart entry system.

However, the alarm goes off if a door is opened with the key, then the shift lever is moved out of P or the hood is opened before the power mode is set to ON.

■ When the security system alarm activates
The horn sounds intermittently and all the exterior lights flash.

* Not available on all models

CONTINUED
**To deactivate the security system alarm**
Unlock the vehicle using the key, remote transmitter or smart entry system. The system, along with the horn and flashing lights, is deactivated.

**Setting the security system alarm**
The security system alarm automatically sets when the following conditions have been met:
- The power mode is set to VEHICLE OFF (LOCK).
- The hood and tailgate are closed.
- All doors and tailgate are locked with the key, the remote transmitter, or smart entry system.

**When the security system alarm sets**
The security system alarm indicator in the instrument panel blinks and the blinking interval changes after about 15 seconds.

**To cancel the security system alarm**
The security system alarm is canceled when the vehicle is unlocked using the remote transmitter or smart entry system, or when the power mode is set to ON. The security system alarm indicator goes off at the same time.

*Not available on all models*
■ Panic Mode

■ The panic button on the remote transmitter
If you press the panic button for approximately one second, the following will occur for about 30 seconds:
• The horn sounds.
• Some exterior lights flash.

■ Canceling panic mode
Press any button on the remote transmitter, or turn the ignition switch to ON [II]*1.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Opening and Closing the Windows

Opening/Closing the Power Windows

The power windows can be opened and closed when the ignition switch is in ON, using the switches on the doors. The driver side switches can be used to open and close all the windows.

The power window lock button on the driver side must be switched off (not pushed in, indicator off) to open and close the windows from anywhere other than the driver's seat.

When the power window lock button is switched on (pushed in, indicator on), you can only operate the driver's window. Turn the power window lock button on if a child is in the vehicle.

Automatic operation
To open: Push the switch down firmly.
To close: Pull the switch up firmly.

The window opens or closes completely. To stop the window at any time, push or pull the switch briefly.

Manual operation
To open: Push the switch down lightly, and hold it until the desired position is reached.
To close: Pull the switch up lightly, and hold it until the desired position is reached.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

**WARNING**

Closing a power window on someone's hands or fingers can cause serious injury.

Make sure your passengers are away from the windows before closing them.

The power windows can be operated for up to 10 minutes after you turn the ignition switch off*1. Opening either front door cancels this function.

Auto Reverse
If a power window senses resistance when closing automatically, it stops closing and reverse direction.

The driver's window auto reverse function is disabled when you continuously pull up the switch.

The auto reverse function stops sensing when the window is almost closed to ensure that it fully closes.

You cannot fully open the rear windows.
Opening/Closing Windows without Auto-Open/Close Function

To open: Push the switch down.
To close: Pull the switch up.

Release the switch when the window reaches the desired position.

Opening Windows and the Moonroof* or Panoramic Roof*1 with the Remote

To open: Press the unlock button, and then within 10 seconds, press it again and keep it pressed. If the windows and moonroof* or panoramic roof*1 stop midway, repeat the procedure.

*1: Canadian models only, if equipped
* Not available on all models
Opening and Closing the Windows

Opening/Closing the Power Windows

Controls

To open: Unlock the driver’s door with the key. Within 10 seconds of returning the key to the central position, turn the key in the unlock direction and hold it there.

To close: Lock the driver’s door with the key. Within 10 seconds of returning the key to the central position, turn the key in the lock direction and hold it there.

Release the key to stop the windows/moonroof* or panoramic roof*1 at the desired position. If you want further adjustment, repeat the same operation.

*1: Canadian models only, if equipped
* Not available on all models
Moonroof*

Opening and Closing the Moonroof

You can operate the moonroof when the power mode is in ON. Use the switch in the front of the ceiling to open and close the moonroof.

- **Using the Moonroof Switch**
  - **Automatic operation**
    - **To open:** Pull the switch back firmly.
    - **To close:** Push the switch forward firmly.

  The moonroof automatically opens or closes all the way. To stop the moonroof midway, touch the switch briefly.

- **Manual operation**
  - **To open:** Pull the switch back lightly, and hold it until the desired position is reached.
  - **To close:** Push the switch forward lightly, and hold it until the desired position is reached.

- **Tilting the moonroof up**
  - **To tilt:** Push on the center of the moonroof switch.
  - **To close:** Push the switch forward firmly, then release.

- **NOTICE**
  - Opening the moonroof in below freezing temperature or when it is covered with snow or ice can damage the moonroof panel or motor.
  - The power moonroof can be operated for up to 10 minutes after you set the power mode to VEHICLE OFF (LOCK).
  - Opening either front door cancels this function.
  - When resistance is detected, the auto reverse function causes the moonroof to change directions, then stop. Auto reverse stops sensing when the moonroof is almost closed to ensure that it fully closes. Make sure that all objects, including fingers, are clear of the moonroof.
  - You can use the remote transmitter or the key to operate the moonroof.

- **WARNING**
  - Opening or closing the moonroof on someone’s hands or fingers can cause serious injury.
  - Make sure all hands and fingers are clear of the moonroof before opening or closing it.

*1: Canadian models only, if equipped
* Not available on all models
Panoramic Roof*1

Opening/Closing the Panoramic Roof
You can operate the panoramic roof when the power mode is in ON. Use the switch in the front of the ceiling to open and close the panoramic roof.

NOTICE
Opening the panoramic roof in below freezing temperature or when it is covered with snow or ice can damage the panoramic roof panel or motor.

The panoramic roof and sunshade can be operated for up to 10 minutes after you set the power mode to VEHICLE OFF (LOCK). Opening either front door cancels this function.

When resistance is detected, the auto reverse function causes the panoramic roof to change directions, then stop. Auto reverse stops sensing when the panoramic roof is almost closed to ensure that it fully closes. Make sure that all objects, including fingers, are clear of the panoramic roof.

*1: Canadian models only, if equipped

WARNING
Opening or closing the panoramic roof or sunshade on someone’s hands or fingers can cause serious injury.

Make sure all hands and fingers are clear of the panoramic roof and sunshade before opening or closing it.
### Using the Sunshade Switch

#### Automatic operation
- **To open:** Pull the switch back firmly.
- **To close:** Push the switch forward firmly.

The sunshade automatically opens or closes all the way. To stop the sunshade midway, touch the switch briefly.

#### Manual operation
- **To open:** Pull the switch back lightly, and hold it until the desired position is reached.
- **To close:** Push the switch forward lightly, and hold it until the desired position is reached.

*1: Canadian models only, if equipped
* Not available on all models

---

---

#### Opening/Closing the Panoramic Roof

You can use the remote transmitter or the key to operate the panoramic roof.

- **Opening Windows and the Moonroof* or Panoramic Roof*1 with the Remote** P. 163
- **Opening/Closing Windows and the Moonroof* or Panoramic Roof*1 with the Key** P. 164

---

### Using the Sunshade Switch

The sunshade can be opened or closed to adjust the amount of light that enters the cabin.

When you use the sunshade switch to open the sunshade, the panoramic roof does not move.

The sunshade cannot be fully closed if the panoramic roof is open. When you close the sunshade with the panoramic roof open, the sunshade stops slightly ahead of the panoramic roof glass. When you push the switch forward again, the sunshade and the panoramic roof close together.
Panoramic Roof*1

Opening/Closing the Panoramic Roof

Using the Panoramic Roof Switch

■ Automatic operation
To open: Pull the switch back firmly.
To close: Push the switch forward firmly.

The panoramic roof automatically opens or closes all the way. To stop the panoramic glass midway, touch the switch briefly.

■ Manual operation
To open: Pull the switch back lightly, and hold it until the desired position is reached.
To close: Push the switch forward lightly, and hold it until the desired position is reached.

■ Tilting the panoramic roof up
To tilt: Push on the center of the panoramic roof switch.
To close: Push the switch forward firmly.

Using the Panoramic Roof Switch

The panoramic roof cannot be fully opened in a single operation. The panoramic roof has a "comfort" position or wind noise reduction position at which the roof first stops. To open fully, pull the switch back again after the roof has stopped at this position.

Whenever the panoramic roof is opening, the sunshade moves along with it. However, when the panoramic roof is closing, the sunshade does not move.

When you tilt open the panoramic roof, the sunshade opens slightly to let in fresh air. When you close the panoramic roof from this position, the sunshade returns to its closed position.
Operating the Switches Around the Steering Wheel

**Ignition Switch**

- **LOCK**: Insert and remove the key in this position.
- **ACCESSORY**: Operate the audio system and other accessories in this position.
- **ON**: This is the position when driving.
- **START**: This position is for starting the engine. The switch returns to ON when you let go of the key.

*Ignition Switch*

You cannot take the key out unless the shift lever is in **P**.

If you open the driver’s door when the key is in LOCK or ACCESSORY, a warning buzzer will sound to remind you to take the key out.

When this happens, the following messages appear on the driver information interface:
- In **LOCK**: or the symbol with a **Remove Key From Ignition**
- In **ACCESSORY**: or the symbol with a **Return Ignition Switch To Lock (0) Position**

The buzzer will stop when you take the key out.

If the key won’t turn from LOCK to ACCESSORY, turn the key while moving the steering wheel left and right. The steering wheel will unlock, allowing the key to turn.

* Not available on all models
**ENGINE START/STOP Button**

### Changing the Power Mode

- **VEHICLE OFF (LOCK)**
  *The button is off.*
  *The steering wheel is locked*.1.
  *The power to all electrical components is turned off.*

- **ACCESSORY**
  *The button blinks (in red).*
  *Operate the audio system and other accessories in this position.*

- **ON**
  *The button blinks (in red).*
  *All electrical components can be used.*

Without pressing the brake pedal

- Press the button without the shift lever in **P**.
- Shift to **P** then press the button.
- Press the button.
- U.S. models
  - Shift to **P**.

*1: Except U.S. models

---

**ENGINE START/STOP Button Operating Range**

You can start the engine when the smart entry remote is inside the vehicle.
The engine may also run if the smart entry remote is close to the door or window, even if it is outside the vehicle.

If the battery of the smart entry remote is getting low, the engine may not start when you push the **ENGINE START/STOP** button. If the engine does not start, refer to the following link.

*If the Smart Entry Remote Battery is Weak*

P. 625

The power system may also start if the smart entry remote is close to the door or window, even if it is outside the vehicle.
### Automatic Power Off

If you leave the vehicle for 30 to 60 minutes with the shift lever in [P] and the power mode in ACCESSORY, the vehicle automatically goes into the mode similar to VEHICLE OFF (LOCK) to avoid the battery drain.

**Canadian models**

When in this mode:
- The steering wheel does not lock.
- You cannot lock or unlock doors with the remote transmitter or the smart entry system.
- Press the ENGINE START/STOP button three times to switch the mode to VEHICLE OFF (LOCK).

If the power mode does not change from VEHICLE OFF to ACCESSORY, press the ENGINE START/STOP button while moving the steering wheel left and right. The steering wheel will unlock, allowing the mode to change.

Do not leave the power mode in ACCESSORY or ON when you get out.

* Not available on all models
Operating the Switches Around the Steering Wheel

Power Mode Reminder
If you open the driver’s door when the power mode is set to ACCESSORY, a warning buzzer sounds.

Smart Entry Remote Reminder
Warning buzzers may sound from inside or/and outside the vehicle to remind you that the smart entry remote is out of the vehicle. If the buzzer continues even after the remote is put back inside, place it within its operational range.

When the power mode is in ON
If the smart entry remote is taken out of the vehicle, and the driver’s door is closed, warning buzzers sound from both inside and outside the vehicle. A warning message on the driver information interface notifies the driver inside that the remote is out.

When the power mode is in ACCESSORY
If the smart entry remote is taken out of the vehicle, and all the doors are closed, a warning buzzer sounds from outside the vehicle.

Smart Entry Remote Reminder
When the smart entry remote is within the system’s operational range, and the driver’s door is closed, the warning function cancels.

If the smart entry remote is taken out of the vehicle after the engine has been started, you can no longer change the ENGINE START/STOP button mode or restart the engine. Always make sure if the remote is in your vehicle when you operate the ENGINE START/STOP button.

Removing the smart entry remote from the vehicle through a window does not activate the warning buzzer.

Do not put the smart entry remote on the dashboard or in the glove box. It may cause the warning buzzer to go off. Under some other conditions that can prevent the vehicle from locating the remote, the warning buzzer may also go off even if the remote is within the system’s operational range.

*1: Canadian models*
Operating the Switches Around the Steering Wheel

Turn Signals

The turn signals can be used when the ignition switch is in ON (II)*1.

■ One-touch turn signal
When you lightly push up or down and release the turn signal lever, the exterior turn signals and turn signal indicator blink three times.

This feature can be used when signaling for a lane change.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Light Switches

■ Manual Operation

Rotating the light switch turns the lights on and off, regardless of the power mode setting or position of the ignition switch.

■ High beams
Push the lever forward until you hear a click.

■ Low beams
When in high beams, pull the lever back to return to low beams.

■ Flashing the high beams
Pull the lever back, and release it.

Light Switches

Models without smart entry system
If you remove the key from the ignition switch with the lights on, a light on reminder chime sounds when you open the driver’s door.

Models with smart entry system
If you leave the power mode in VEHICLE OFF (LOCK) while the lights are on, a chime sounds when the driver’s door is opened.

All models
When the lights are on, the lights on indicator in the instrument panel will be on.

Indicators P. 80

Do not leave the lights on when the engine is off because it will cause the battery to discharge.

Continued
Operating the Switches Around the Steering Wheel  Light Switches

**Automatic Operation (automatic lighting control)**

*Automatic Operation (automatic lighting control)*

Automatic lighting control can be used when the power mode is in ON.

When you turn the light switch to AUTO, the headlights and other exterior lights will switch on and off automatically depending on the ambient brightness.

- You can change the auto light sensitivity setting.

**Customized Features** P. 349

We recommend that you turn on the lights manually when driving at night, in a dense fog, or in dark areas such as long tunnels or parking facilities.

The light sensor is in the location shown below. Do not cover this light sensor with anything; otherwise, the automatic lighting system may not work properly.

*Not available on all models*
Headlight Integration with Wipers*

The headlights automatically come on when the wipers are used several times within a certain number of intervals with the headlight switch in AUTO. The headlights automatically go off a few minutes later if the wipers are stopped.

* Not available on all models

---

Automatic Operation (automatic lighting control) *

Adjust the auto light sensitivity as follows:

<table>
<thead>
<tr>
<th>Setting</th>
<th>The exterior lights come on when the ambient light is at</th>
</tr>
</thead>
<tbody>
<tr>
<td>Max</td>
<td>Bright</td>
</tr>
<tr>
<td>High</td>
<td></td>
</tr>
<tr>
<td>Mid</td>
<td></td>
</tr>
<tr>
<td>Low</td>
<td>Dark</td>
</tr>
<tr>
<td>Min</td>
<td></td>
</tr>
</tbody>
</table>

Headlight Integration with Wipers*

This feature activates while the headlights are off in AUTO. The instrument panel brightness does not change when the headlights come on.

At dark ambient light levels, the automatic lighting control feature turns on the headlights, regardless of the number of wiper sweeps.

* Not available on all models
Operating the Switches Around the Steering Wheel

Fog Lights*

Automatic Lighting Off Feature

The headlights, all other exterior lights, and the instrument panel lights turn off 15 seconds after you set the power mode to VEHICLE OFF (LOCK), take the remote with you, and close the driver’s door.

- You can change the headlight auto off timer setting.

Customized Features P. 349

If you turn the ignition switch to LOCK [0]*1 with the headlight switch on, but do not open the door, the lights turn off after 10 minutes (3 minutes, if the switch is in the AUTO position).

The lights turn on again when you unlock or open the driver’s door. If you unlock the door, but do not open it within 15 seconds, the lights go off. If you open the driver’s door, you will hear a lights on reminder chime.

Fog Lights*

Can be used when the low beam headlights are on.

Rotate the switch up from the OFF position to the [Fog Light Switch] position.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models

Fog Lights*

When the fog lights are on, the indicator in the instrument panel will be on. They go off when the headlights turn off, or when the daytime running lights are on.

Daytime Running Lights P. 182
Auto High-Beam System*

Using a camera mounted to the inside of the windshield, this system detects light sources ahead of the vehicle. Depending on the light source, the system automatically switches the headlights to high beam for optimal visibility at night.

The system operates when:
- The headlight switch is in AUTO.
- The lever is in the low beam position.
- The low beams are on and the system recognizes that you are driving at night.
- The vehicle speed is above 25 mph (40 km/h).

How it works:
When the camera detects lights coming from a preceding or oncoming vehicle, the headlights remain in low beam.

When the camera detects no lights coming from a preceding or oncoming vehicle, the headlights change to high beam.

The view angle or distance that the camera can detect lights ahead differs depending on conditions, such as the brightness of the lights and the weather.

The auto high-beam system determines when to change the headlight beams by responding to the brightness of the lights ahead of your vehicle. In the following cases, the system may not respond to the lights properly:
- The brightness of the lights from the preceding or oncoming vehicle is intense or poor.
- Visibility is poor due to the weather (rain, snow, fog, windshield frost, etc.).
- Other light sources, such as streetlights and electric billboards are illuminating the road ahead.
- The brightness level of the road ahead constantly changes.
- The road is bumpy or has many curves.
- A vehicle cuts in front of you, or a vehicle in front of you is not in the preceding or oncoming direction.
- Your vehicle is tilted with a heavy load in the rear.

If you find the timing of beam changes inconvenient for driving, change the headlight beams manually.

If you do not want the system to be activated at any time when the headlight switch is in AUTO, consult a dealer.

If you do not want the system to be activated at any time when the headlight switch is in AUTO, consult a dealer or disable the system.

Disabling or Re-enabling the System P. 181
Operating the Switches Around the Steering Wheel

Auto High-Beam System

To activate the system, turn the headlight switch to AUTO and then set the headlights to low beam. The auto high-beam indicator will come on.

Light Switches P. 175

The high beams remain on unless:
• You have been driving below 15 mph (24 km/h) for an extended amount of time.
• The speed of the vehicle drops below 6 mph (10 km/h).
• The windshield wipers have been running at a high speed for more than a few seconds.
• You enter a well lit location.

The high beams come back on once the condition that caused them to turn off no longer exists.

If needed, you can temporarily turn the high-beams off manually. Turn on the high-beams by pushing the lever forward until you hear a click, or flash the high beams once by pulling the lever towards you. To turn the high beams back on, repeat one of the procedures.

To Operate the System

For the auto high-beam system to work properly:
• Do not place an object that reflects light on the dashboard.
• Keep the windshield around the camera clean.
• Do not attach an object, sticker or film in the area around the camera.

If the camera receives a strong impact, or repairing of the area near the camera is required, consult a dealer.

If the Some Driver Assist Systems Cannot Operate: Camera Temperature Too High message appears:
• Use the climate control system to cool down the interior and, if necessary, also use defroster mode with the air flow directed towards the camera.
• Start driving the vehicle to lower the windshield temperature, which cools down the area around the camera.

If the Some Driver Assist Systems Cannot Operate: Clean Front Windshield message appears:
• Park your vehicle in a safe place, and clean the windshield. If the message does not disappear after you have cleaned the windshield and driven for a while, have your vehicle checked by a dealer.
Disabling or Re-enabling the System

Disable or re-enable the system when the vehicle is parked and the power mode is in ON and the light switch is in the AUTO position.

**Disabling the system:** Pull the light switch lever towards you and hold it for at least 40 seconds.

**Re-enabling the system:** Pull the light switch lever towards you and hold it for at least 30 seconds.

The auto high-beam system will remain in the selected disabled or re-enabled setting each time you start the engine.
Daytime Running Lights

The parking/daytime running lights come on when the following conditions have been met:

- The ignition switch is in ON [II]*1.
- The headlight switch is AUTO* or OFF or .
- The parking brake is released.

The lights remain on even if you set the parking brake. Turning off the ignition switch or setting the power mode to VEHICLE OFF will turn off the daytime running lights.

The daytime running lights are off once the headlight switch is turned on, or when the headlight switch is in AUTO* and it is getting darker outside.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
Wipers and Washers

Windshield Wipers/Washers

The windshield wipers and washers can be used when the ignition switch is in ON [II]*1.

■ MIST
The wipers run at high speed until you release the lever.

■ Wiper switch (OFF, INT*2/AUTO*3, LO, HI)
Move the lever up or down to change the wiper settings.

■ Adjusting wiper operation*
Turn the adjustment ring to adjust the wiper operation.

■ Washer
Sprays while you pull the lever toward you. When you release the lever for more than one second, the spray stops, the wipers sweep two or three more times to clear the windshield, then stop.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
*2: Models with manual intermittent operation
*3: Models with automatic intermittent operation

* Not available on all models

NOTICE
Do not use the wipers when the windshield is dry. The windshield will get scratched, or the rubber blades will get damaged.

NOTICE
In cold weather, the blades may freeze to the windshield. Operating the wipers in this condition may damage the wipers. Use the defogger to warm the windshield, then turn the wipers on.

Turn the washers off if no washer fluid comes out. The pump may get damaged.

Models with intermittent time adjustment ring
If the vehicle speeds up while the wipers are operating intermittently, the length of the wipe interval shortens.
When the vehicle speeds up, the wiper operation’s shortest delay setting [4] and the LO setting become the same.
If the wiper stops operating due to an obstacle such as the build-up of snow, park the vehicle in a safe place. Rotate the wiper switch to OFF, and turn the ignition switch to ACCESSORY [1] or LOCK [0]*1, then remove the obstacle.
When you push the lever down to AUTO, the windshield wipers sweep once, and go into the automatic mode.

The wipers operate intermittently, at low speed, or at high speed and stops in accordance with the amount of rainfall the rainfall sensor detects.

**AUTO sensitivity adjustment**
When the wiper function is set to AUTO, you can adjust the sensitivity of the rainfall sensor (using the adjustment ring) so that wipers will operate in accordance with your preference.

**Sensor sensitivity**

- Low Sensitivity
- High Sensitivity

---

*Automatic Intermittent Wipers*

The wiper motor may stop motor operation temporarily to prevent an overload. Wiper operation will return to normal within a few minutes, once the circuit has returned to normal.

*Automatic Intermittent Wipers*

The rainfall sensor is in the location shown below.

**Wipers and Washers**

AUTO should always be turned OFF before the following situations in order to prevent severe damage to the wiper system:
- Cleaning the windshield
- Driving through a car wash
- No rain present

* Not available on all models
Rear Wiper/Washer

The rear wiper and washer can be used when the ignition switch is in ON.[1]

Wiper switch (OFF, INT, ON)
Change the wiper switch setting according to the amount of rain.

Washer ( )
Sprays while you rotate the switch to this position. Hold it to activate the wiper and to spray the washer. Once released, it stops operating after a few more sweeps.

Operating in reverse
When you shift the transmission to R with the windshield wipers activated, the rear wiper operates automatically as follows even if its switch is off.

<table>
<thead>
<tr>
<th>Front Wiper Position</th>
<th>Rear Wiper Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>INT (Intermittent)</td>
<td>Intermittent</td>
</tr>
<tr>
<td>LO (Low speed wipe)</td>
<td>Continuous</td>
</tr>
<tr>
<td>HI (High speed wipe)</td>
<td></td>
</tr>
</tbody>
</table>

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Brightness Control

With the parking lights are turned on and the ignition switch is in ON [11], you can use the brightness control knob to adjust instrument panel brightness.

**Brighten:** Turn the knob to the right.

**Dim:** Turn the knob to the left.

You will hear a beeper when the brightness reaches minimum or maximum. Several seconds after adjusting the brightness, you will be returned to the previous screen.

---

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Brightness level indicator

The brightness level is shown on the information display while you are adjusting it.
Defogger/Heated Door Mirror*

Rear Defogger/Heated Door Mirror * Button

Press the rear defogger and heated door mirror button to defog the rear window and mirrors when the ignition switch is in ON [II] *1.

Models with heated door mirror

The rear defogger automatically switches off after 10-30 minutes depending on the outside temperature. However, if the outside temperature is 32°F (0°C) or below, it does not automatically switch off.

Models without heated door mirror

The rear defogger automatically switches off after 10-30 minutes depending on the outside temperature. However, if the outside temperature is 32°F (0°C) or below, it does not automatically switch off.

Models with heated door mirror

When the outside temperature is below 41°F (5°C), the heated door mirror may activate automatically for 10 minutes when you set the power mode to ON.

Defogger/Heated Door Mirror*  

This system consumes a lot of power, so turn it off when the window has been defogged or deiced. Also, do not use the system for a long period when the engine is idling. This may weaken the battery, making it difficult to start the engine.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
Press the heated windshield button to deice the windshield when the power mode is in ON.

This system consumes a lot of power, so turn it off when the window has been defogged or deiced. Also, do not use the system for a long period when the engine is idling. This may weaken the battery, making it difficult to start the engine.
Operating the Switches Around the Steering Wheel

Driving Position Memory System*

You can store two driver's seat positions (except for power lumbar) with the driving position memory system.

When you unlock and open the driver's door with a remote transmitter or the smart entry system, the seat adjusts automatically to one of the two preset positions.

- **DRIVER 1** transmitter is linked to memory button 1.
- **DRIVER 2** transmitter is linked to memory button 2.

Using the audio/information screen, you can disable the automatic seat adjustment function.

*Not available on all models*
**Storing a Position in Memory**

1. Set the power mode to ON. Adjust the driver’s seat to the desired position.
2. Press the **SET** button.
   - You will hear a beep, and the memory button indicator light will blink.
3. Press and hold memory button 1 or 2 within five seconds of pressing the **SET** button.
   - Once the seat position has been memorized, the indicator light on the button you pressed stays on.

**Recalling the Stored Position**

1. Move the shift lever to **P**.
2. Apply the parking brake.
3. Press a memory button (1 or 2).
   - You will hear a beep, and the indicator light will blink.

The seat will automatically move to the memorized position. When it has finished moving, you will hear a beeper, and the indicator light stays on.

---

**Storing a Position in Memory**

After you press the **SET** button, the storing operation will be canceled when:
- You do not press the memory button within five seconds.
- You readjust the seat position before the double-beep.
- You set the power mode to any position except ON.

**Recalling the Stored Position**

The seat will stop moving if you:
- Press the **SET** button, or a memory button (1 or 2).
- Adjust the seat position.
- Shift into any position except **P**.
Operating the Switches Around the Steering Wheel

Adjusting the Steering Wheel

The steering wheel height and distance from your body can be adjusted so that you can comfortably grip the steering wheel in an appropriate driving posture.

1. Pull the steering wheel adjustment lever up. The steering wheel adjustment lever is under the steering column.
2. Move the steering wheel up or down, and in or out. Make sure you can see the instrument panel gauges and indicators.
3. Push the steering wheel adjustment lever down to lock the steering wheel in position. After adjusting the position, make sure you have securely locked the steering wheel in place by trying to move it up, down, in, and out.

WARNING

Adjusting the steering wheel position while driving may cause you to lose control of the vehicle and be seriously injured in a crash.
Adjust the steering wheel only when the vehicle is stopped.

Make any steering wheel adjustments before you start driving.
Adjusting the Mirrors

Interior Rearview Mirror
Adjust the angle of the rearview mirror when you are sitting in the correct driving position.

- **Rearview Mirror with Day and Night Positions***
  Flip the tab to switch the position. The night position will help reduce the glare from headlights behind you when driving after dark.

- **Automatic Dimming Rearview Mirror***
  When driving after dark, the automatic dimming rearview mirror reduces the glare from headlights behind you. This feature is always active.

* Not available on all models
Power Door Mirrors

You can adjust the door mirrors when the ignition switch is in ON \(^1\).

- **Mirror position adjustment**
  - **L/R selector switch**: Select the left or right mirror. After adjusting the mirror, return the switch to the center position.
  - **Mirror position adjustment switch**: Press the switch left, right, up, or down to move the mirror.

*1: Models with the smart entry system have an **ENGINE START/STOP** button instead of an ignition switch.
Adjusting the Seats

Front Seats

Adjust the driver's seat as far back as possible while allowing you to maintain full control of the vehicle. You should be able to sit upright, well back in the seat and be able to adequately press the pedals without leaning forward, and grip the steering wheel comfortably. The passenger's seat should be adjusted in a similar manner, so that it is as far back from the front airbag in the dashboard as possible.

Adjusting the Seat Positions

- Adjusting the front power seat *

* Not available on all models

WARNING

Sitting too close to a front airbag can result in serious injury or death if the front airbags inflate.

Always sit as far back from the front airbags as possible while maintaining control of the vehicle.

The National Highway Traffic Safety Administration and Transport Canada recommend that drivers allow at least 10 inches (25 cm) between the center of the steering wheel and the chest.

Always make seat adjustments before driving.
Adjusting the Seats ▶ Front Seats

■ Lumbar Support Adjustment Switch *

Press the top: To move the lumbar support up.

Press the bottom: To move the lumbar support down.

Press the front: To increase the entire lumbar support.

Press the rear: To decrease the entire lumbar support.

* Not available on all models
Adjusting the front manual seat(s)*

Height Adjustment
(Driver’s seat only)
Pull up or push down the lever to raise or lower the seat.

Horizontal Position Adjustment
Pull up on the bar to move the seat, then release the bar.

Seat-back Angle Adjustment
Pull up the lever to change the angle.

* Not available on all models

Continued
Adjusting the Seats

Front Seats

Controls

Adjust the driver's seat-back to a comfortable, upright position, leaving ample space between your chest and the airbag cover in the center of the steering wheel.

The front seat passenger should also adjust their seat-back to a comfortable, upright position.

Reclining a seat-back so that the shoulder part of the belt no longer rests against the occupant's chest reduces the protective capability of the belt. It also increases the chance of sliding under the belt in a crash and being seriously injured. The farther a seat-back is reclined, the greater the risk of injury.

WARNING

Reclining the seat-back too far can result in serious injury or death in a crash.

Adjust the seat-back to an upright position, and sit well back in the seat.

Do not put a cushion, or other object, between the seat-back and your back.

Doing so may interfere with proper seat belt or airbag operation.

If you cannot get far enough away from the steering wheel and still reach the controls, we recommend that you investigate whether some type of adaptive equipment may help.
Rear Seats

Adjusting the Seat Positions

1. Store the center seat belt first. Insert the latch plate into the slot on the side of the anchor buckle.
2. Retract the seat belt into the holder on the ceiling.
3. Lower the rear seat head restraint to its lowest position. Put the armrest back into the seat-back.

Folding Down the Rear Seats

1. Store the center seat belt first. Insert the latch plate into the slot on the side of the anchor buckle.
2. Retract the seat belt into the holder on the ceiling.
3. Lower the rear seat head restraint to its lowest position. Put the armrest back into the seat-back.

Continued

Folding Down the Rear Seats

The rear seat-backs can be folded down to accommodate bulkier items in the cargo area.

Remove any items from the rear seat cushion and floor before you fold down the rear seat.

Never drive with the seat-back folded down and the tailgate open.

Exhaust Gas Hazard P. 76

When returning the seat-back to its original position, push it firmly back. Also, make sure all rear shoulder belts are positioned in front of the seat-back.

Make sure all items in the cargo area or items extending through the opening into the rear seats are properly secured. Loose items can fly forward if you have to brake hard.
Adjusting the Seats

Rear Seats

1. Make sure the seat-back, head restraints and seat cushion are securely latched back into place before driving.

Folding Down the Rear Seats

Make sure that the folded seat-back does not press against the front passenger seat, as this can cause the weight sensors in the front passenger seat to work improperly.

Passenger Airbag Off Indicator P. 61

Make sure the seat-back, head restraints and seat cushion are securely latched back into place before driving.
Head Restraints

Your vehicle is equipped with head restraints in all seating positions.

Adjusting the Front Head Restraints

Head restraints are most effective for protection against whiplash and other rear-impact crash injuries when the center of the back of the occupant’s head rests against the center of the restraint. The tops of the occupant’s ears should be level with the center height of the restraint.

To raise the head restraint: Pull it upward.
To lower the head restraint: Push it down while pressing the release button.

WARNING

Improperly positioning head restraints reduces their effectiveness and increases the likelihood of serious injury in a crash.

Make sure head restraints are in place and positioned properly before driving.

In order for the head restraint system to work properly:
• Do not hang any items on the head restraints, or from the restraint legs.
• Do not place any objects between an occupant and the seat-back.
• Install each restraint in its proper location.
A passenger sitting in the rear seat should adjust the height of their head restraint to an appropriate position before the vehicle begins moving.

**To raise the head restraint:**
Pull it upward.

**To lower the head restraint:**
Push it down while pressing the release button.

Head restraints can be removed for cleaning or repair.

**To remove a head restraint:**
Pull the restraint up as far as it will go. Then push the release button, and pull the restraint up and out.

**To reinstall a head restraint:**
Insert the legs back in place, then adjust the head restraint to an appropriate height while pressing the release button. Pull up on the restraint to make sure it is locked in position.

**WARNING**
Failure to reinstall, or correctly reinstall, the head restraints can result in severe injury during a crash.

Always replace the head restraints before driving.
Maintain a Proper Sitting Position

After all occupants have adjusted their seats and head restraints, and put on their seat belts, it is very important that they continue to sit upright, well back in their seats, with their feet on the floor, until the vehicle is safely parked and the engine is off.

Sitting improperly can increase the chance of injury during a crash. For example, if an occupant slouches, lies down, turns sideways, sits forward, leans forward or sideways, or puts one or both feet up, the chance of injury during a crash is greatly increased.

In addition, an occupant who is out of position in the front seat can be seriously or fatally injured in a crash by striking interior parts of the vehicle or being struck by an inflating front airbag.

**WARNING**

Sitting improperly or out of position can result in serious injury or death in a crash.

Always sit upright, well back in the seat, with your feet on the floor.
Armrest

■ Using the Front Seat Armrest

The console lid can be used as an armrest.
To adjust:
Slide the armrest to a desired position.

■ Using the Rear Seat Armrest

Pull down the armrest in the center seat-back.
Interior Lights

Interior Light Switches

■ ON
The interior lights come on regardless of whether the doors are open or closed.

■ Door activated
The interior lights come on in the following situations:
• When any doors are opened.
• You unlock the driver’s door.

■ OFF
The interior lights remain off regardless of whether the doors are open or closed.

Interior Light Switches

In the door activated position, the interior lights fade out and go off about 30 seconds after the doors are closed. The lights go off after 30 seconds in the following situations:
• When you unlock the driver’s door but do not open it.
• When you remove the key from the ignition switch but do not open a door.
• When you set the power mode to VEHICLE OFF (LOCK) but do not open a door.

The interior lights go off immediately in the following situations:
• When you lock the driver’s door.
• When you close the driver’s door with the key in the ignition switch.
• When you set the power mode to ACCESSORY mode.
• When you set the power mode to ON.

To avoid draining the battery, do not leave the interior light on for an extended length of time when the engine or power system is off.

If you leave any doors open in VEHICLE OFF (LOCK) mode, or without the key in the ignition switch, the interior lights go off after about 15 minutes.
Interior Lights/Interior Convenience Items

Controls
■ Map Lights

■ Front
Models without panoramic roof
The map lights can be turned on and off by pressing the lens.

Models with panoramic roof
The map lights can be turned on and off by pressing the button.

Map Lights

Models without panoramic roof
When the interior light switch is in the door activated position and any door is open, the map light will not go off when you press the lens.

Models with panoramic roof
When the interior light switch is in the door activated position and a door is opened or interior light switch is in the ON position, the rear map light will not go off when you press the button.

Continued
Rear

Models without panoramic roof
The map lights can be turned on and off by sliding the switch.

Models with panoramic roof
The map lights can be turned on and off by pressing the button.

Cargo Area Lights

ON
The light comes on when you open the tailgate, and goes off when closed.

OFF
The light stays off with or without opening the tailgate.
Interior Convenience Items

Glove Box

Pull the handle to open the glove box. You can lock the glove box with the master key or the built-in key.

**WARNING**

An open glove box can cause serious injury to your passenger in a crash, even if the passenger is wearing the seat belt.

Always keep the glove box closed while driving.

Continued
### Center Console Box

To open, pull the knob. You can change the position of the tray by sliding it forward or back.

#### Removing the tray

1. Slide the tray back.

2. Lift the edge of the tray up slightly, then pull it out.
Storing the tray:
Line the tray up with the slots located at the rear section of the console box, and then push it down all the way until it is in the locked position.
Under-floor Storage Area

Pull the strap to open the cargo floor lid.

Storing items on the lid at the bottom position
This is convenient when storing a tall item.
1. Pull the strap upwards to lift the lid.
2. Pull the lid towards you until it disengages from the support rods.
3. Push the far end of the lid down to the bottom under the support rod, then lower the other end.
### Beverage Holders

**Front seat beverage holders**

Are located in the console between the front seats.

**Rear seat beverage holders**

Fold the armrest down to use the rear seat beverage holders.

---

**NOTICE**

Spilled liquids can damage the upholstery, carpeting, and electrical components in the interior.

Be careful when you are using the beverage holders. Hot liquid can scald you.
Interior Lights/Interior Convenience Items

Controls

■ Door side beverage holders

Are located on the both of front and rear door side pockets.
Accessory Power Sockets

The accessory power sockets can be used when the ignition switch is in ACCESSORY [I] or ON [II].

**Accessory power socket on the console panel**
Open the cover to use it.

**Accessory power socket in the console compartment**
Open the console lid and the cover to use it.

---

**NOTICE**

Do not insert an automotive type cigarette lighter element.
This can overheat the power socket.

The accessory power socket is designed to supply power for 12-volt DC accessories that are rated 180 watts or less (15 amps).

To prevent battery drain, only use the power socket with the engine running.

---

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

Continued
Accessories power socket (cargo area)*1
Open the cover to use it.

*1: Canadian models only, if equipped
There is a coat hook on the rear left grab handle. Pull it down to use it.

The tie-down anchors on the cargo area floor can be used to install a net for securing items.

Do not let anyone access items in the cargo area while driving. Loose items can cause injury if you have to brake hard.
Cargo Hooks

The cargo hooks on the driver’s side of the cargo area can be used to hang a light item.

NOTICE
Do not hang a large object or an object that weighs more than 6 lbs (3 kg) on the side cargo hooks. Hanging heavy or large objects may damage the hooks.
To open the sunglasses holder, press and release the indent. To close, press it again until it latches.

You can store eyeglasses and other small items in this holder.

**Conversation mirror**

The sunglasses holder comes with a mirror. Open the sunglasses holder fully, then push it back to the first detent.

You can use the mirror to view the rear seats.

Keep the holder closed while driving except when accessing stored items.
Interior Convenience Items

- **Heated Steering Wheel*1**

  The power mode must be in ON to use the heated steering wheel.

  Press the button on the right side of the steering wheel.

  When a comfortable temperature is reached, press the button again to turn it off.

  The heated steering wheel is turned off every time you start the engine, even if you turned it on the last time you drove the vehicle.

  *1: Canadian models only, if equipped
The power mode must be in ON to use the seat heaters.

Press the seat heater button:
Once - The HI setting (three indicators on)
Twice - The MID setting (two indicators on)
Three times - The LO setting (one indicator on)
Four times - The OFF setting (no indicators on)

When the power mode is turn on after it is turned off, the previous setting of seat heaters is maintained.

**WARNING**

Heat induced burns are possible when using seat heaters.

Persons with a diminished ability to sense temperature (e.g., persons with diabetes, lower-limb nerve damage, or paralysis) or with sensitive skin should not use seat heaters.

Do not use the seat heaters even in LO when the engine is off. Under such conditions, the battery may be weakened, making the engine difficult to start.

After a certain period of time, the strength setting for the front seat heater will automatically be reduced by one level at a time until the seat heater shuts off. The elapsed time varies according to the interior environment.

* Not available on all models
■ Rear Seat Heaters*1

There is no heater in the rear center seating position.
Press the seat heater button:
Once - The HI setting (three indicators on)
Twice - The MID setting (two indicators on)
Three times - The LO setting (one indicator on)
Four times - The OFF setting (no indicators on)

The rear seat heaters is turned off every time you start the engine, even if you turned it on the last time you drove the vehicle.

*1: Canadian models only, if equipped

**WARNING**

Heat induced burns are possible when using seat heaters.

Persons with a diminished ability to sense temperature (e.g., persons with diabetes, lower-limb nerve damage, or paralysis) or with sensitive skin should not use seat heaters.

Do not use the seat heaters even in LO when the engine is off. Under such conditions, the battery may be weakened, making the engine difficult to start.

The rear seat heater is turned off every time you start the engine, even if you turned it on the last time you drove the vehicle.

When the power mode is turned on after it is turned off, the previous setting of front seat heaters is maintained.
Rear Cargo Cover*

The rear cargo cover can be used to conceal items in the cargo area and protect them from direct sunlight.

■ To extend:
Slightly lift up on the handle at the center edge of the cover to unhook each end, then pull the cover rearward and clip the mounting rods in the hooks at both sides of the tailgate opening.

■ To retract:
Slip the rods out of the hooks, then slowly roll it back until it is completely retracted.

■ To remove:
Push either end of the housing inward, then lift it out of its position.

* Not available on all models

Do not let anyone access items in the cargo area while driving. Loose items can cause injury if you have to brake hard.

Do not stack objects higher than the top of the seat in the cargo area. They could block your view and be thrown about the vehicle during a sudden stop.

To prevent rear cargo cover damage:
• Do not place items on the rear cargo cover.
• Do not put weight on the rear cargo cover.

Be sure that each mounting rod sets in its respective retention groove when you retract the rear cargo cover. If they are not set in the grooves, the rods may rattle as they contact the surrounding surfaces.
Using Automatic Climate Control

The automatic climate control system maintains the interior temperature you select. The system also selects the proper mix of heated or cooled air that raises or lowers the interior temperature to your preference as quickly as possible.

Use the system when the engine is running.
1. Press the AUTO button.

2. Adjust the interior temperature using the temperature control dial.

3. Press the (on/off) button to cancel.

Press the CLIMATE button to display A/C, MODE, fan control information on the audio/information screen to operate manually. Select icon to turn on or off A/C, change the vent mode, or change the fan speed.

If any buttons are pressed while using the climate control system in auto, the function of the button that was pressed will take priority.

The AUTO indicator will go off, but functions unrelated to the button that were pressed will be controlled automatically.

To prevent cold air from blowing in from outside, the fan may not start immediately when the AUTO button is pressed.

If the interior is very warm, you can cool it down more rapidly by partially opening the windows, turning the system on auto, and setting the temperature to low. Change the fresh mode to recirculation mode until the temperature cools down.

When you set the temperature to the lower or upper limit, Lo or Hi is displayed.

Pressing the (on/off) button switches the climate control system between on and off. When turned on, the system returns to your last selection.

While ECON mode is active, the climate control system may have reduced cooling performance.
Switching between the recirculation and fresh air modes
Press the (recirculation) or (fresh air) button to switch the mode depending on environmental conditions.

- Recirculation mode (indicator on): Recirculates air from the vehicle’s interior through the system.
- Fresh air mode (indicator on): Maintains outside ventilation. Keep the system in fresh air mode in normal situations.

Defrosting the Windshield and Windows
Pressing the (windshield defroster) button turns the air conditioning system on and automatically switches the system to fresh air mode.

Press the button again to turn off, the system returns to the previous settings.

For your safety, make sure you have a clear view through all the windows before driving.

Do not set the temperature near the upper or lower limit.
When cold air hits the windshield, the outside of the windshield may fog up.

If the side windows fog up, adjust the vents so that the air hits the side windows.

Continued
To rapidly defrost the windows

1. Press the button.
2. Press the button.

After defrosting the windows, switch over to fresh air mode. If you keep the system in recirculation mode, the windows may fog up from humidity. This impedes visibility.
You can set the temperature synchronously for the driver’s side and the passenger’s side in synchronization mode.

1. Press the SYNCH button.
   - The system switches to synchronization mode.
2. Adjust the temperature using the driver’s side temperature control dial.

Press the SYNCH button to return to dual mode.

* Not available on all models
The automatic climate control system is equipped with sensors. Do not cover or spill any liquid on them.
Features

This chapter describes how to operate technology features.
Audio System

About Your Audio System

The audio system features AM/FM radio and SiriusXM® Radio service*. It can also play USB flash drives, and iPod, iPhone and Bluetooth® devices.

You can operate the audio system from the buttons and switches on the panel, the remote controls on the steering wheel, or the icons on the touchscreen interface*.

About Your Audio System

SiriusXM® Radio* is available on a subscription basis only. For more information on SiriusXM® Radio*, contact a dealer.

General Information on the Audio System

P. 332

SiriusXM® Radio* is available in the United States and Canada, except Hawaii, Alaska, and Puerto Rico.

SiriusXM®* is a registered trademark of SiriusXM Radio, Inc.

iPod, iPhone and iTunes are trademarks of Apple Inc.

State or local laws may prohibit the operation of handheld electronic devices while operating a vehicle.

* Not available on all models
USB Port(s)

Install the iPod USB connector or the USB flash drive to the USB port.
- The USB port (1.0A) is for playing audio files on a USB flash drive, connecting a cellular phone, and charging devices.
- The USB port (1.5A) is for charging devices, playing audio files and connecting compatible phones with Apple CarPlay™ or Android Auto™.
- To prevent any potential issues, be sure to use an Apple MFi Certified Lightning Connector for Apple CarPlay, and for Android Auto, the USB cables should be certified by USB-IF to be compliant with USB 2.0 Standard.

On the back of the center console compartment
The USB ports (2.5A) are only for charging devices.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models

USB Port(s)

- Do not leave the iPod or USB flash drive in the vehicle. Direct sunlight and high temperatures may damage it.
- We recommend using an extension cable with the USB port.
- Do not connect the iPod or USB flash drive using a hub.
- Do not use a device such as a card reader or hard disk drive, as the device or your files may be damaged.
- We recommend backing up your data before using the device in your vehicle.
- Displayed messages may vary depending on the device model and software version.

If the audio system does not recognize the iPod, try reconnecting it a few times or reboot the device. To reboot, follow the manufacturer’s instructions provided with the iPod or visit www.apple.com/ipod.

The USB port can supply up to 1.0A/1.5A/2.5A of power. It does not output 1.0A/1.5A/2.5A unless the device requests.
For amperage details, read the operating manual of the device that needs to be charged.
Turn the ignition switch to ACCESSORY [q] or ON [w] first.

USB Port (2.5A)
This port is for battery charge only. You cannot play music even if you have connected a music player to it.

Under certain conditions, a device connected to the port may generate noise in the radio you are listening to.
Audio System Theft Protection

The audio system is disabled when it is disconnected from the power source, such as when the battery is disconnected or goes dead. In certain conditions, the system may display a code entry screen. If this occurs, reactivate the audio system.

■ Reactivating the audio system
1. Turn the ignition switch to ON 1.
2. Turn on the audio system.
3. Press and hold the audio system power button for more than two seconds.

The audio system is reactivated when the audio control unit establishes a connection with the vehicle control unit. If the control unit fails to recognize the audio unit, you must go to a dealer and have the audio unit checked.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Audio Remote Controls

- Display Setup P. 243
- Scan P. 245, 253
- Play Mode P. 248, 253
- RDS Settings P. 245
- Bluetooth P. 254

Press the SOURCE, \( \text{ } \), or \( \text{ } \) button on the steering wheel to change any audio setting.

Audio Remote Controls P. 233
Audio/Information Screen
Displays the audio status and wallpaper. From this screen, you can go to various setup options.

Switching the Display
■ Audio
Shows the current audio information.

■ Clock/Wallpaper
Shows a clock screen or an image you import.

■ Change display
1. Press the MENU/CLOCK button.
2. Rotate  to select Settings, then press .
3. Rotate  to select Display Change, then press .
4. Rotate  to select Wallpaper, then press .
   ▶ If you want to return to the audio/information screen, select Audio.
Audio System Basic Operation

Audio/Information Screen

■ Wallpaper Setup
You can change, store, and delete the wallpaper on the audio/information screen.

■ Import wallpaper
You can import up to three images, one at a time, for wallpaper from a USB flash drive.

1. Connect the USB flash drive to the USB port.
2. Press the MENU/CLOCK button.
3. Rotate \( \Leftarrow \) to select Settings, then press \( \Rightarrow \).
4. Rotate \( \Leftarrow \) to select Wallpaper, then press \( \Rightarrow \).
5. Rotate \( \Leftarrow \) to select Import, then press \( \Rightarrow \).
6. Rotate \( \Leftarrow \) to select a desired picture, then press \( \Rightarrow \).
7. Press \( \Rightarrow \) to save the picture.
8. Press \( \Rightarrow \) to select OK.
9. Rotate \( \Leftarrow \) to select a location to save the picture, then press \( \Rightarrow \).

■ Wallpaper Setup
- When importing wallpaper files, the image must be in the USB flash drive’s root directory. Images in a folder cannot be imported.
- The file name must be fewer than 64 characters.
- The file format of the image that can be imported is BMP (bmp) or JPEG (jpg).
- The individual file size limit is 2 MB.
- The maximum image size is 1,920 x 936 pixels. If the image size is less than 480 x 234 pixels, the image is displayed in the middle of the screen with the extra area appearing in black.
- Up to 255 files can be selected.
- If the USB flash drive does not have any pictures, the error message appears.
- The wallpaper setup is limited while driving.
■ Select wallpaper
2. Rotate ? to select Settings, then press .
3. Rotate ? to select Wallpaper, then press .
4. Rotate ? to select Select, then press .
   ?The screen changes to the wallpaper list.
5. Rotate ? to select a desired wallpaper, then press .

■ To view wallpaper once it is set
2. Rotate ? to select Settings, then press .
3. Rotate ? to select Display Change, then press .
4. Rotate ? to select Wallpaper, then press .
5. Press the ? (Back) button until the top screen is displayed.

■ Delete wallpaper
2. Rotate ? to select Settings, then press .
3. Rotate ? to select Wallpaper, then press .
4. Rotate ? to select Delete, then press .
   ?The screen changes to the wallpaper list.
5. Rotate ? to select a wallpaper that you want to delete, then press .
6. Rotate ? to select Yes, then press .
   ?The display will return to the wallpaper setting screen.

Wallpaper Setup
To go back to the previous screen, press the ? (Back) button.

When the file size is large, it takes a while to be previewed.
Audio System Basic Operation

Adjusting the Sound

Press the \( \text{(sound)} \) button, and rotate \( \text{\textbullet} \) to scroll through the following choices:

- **BAS**: Bass
- **MID**: Middle
- **TRE**: Treble
- **FAD**: Fader
- **BAL**: Balance
- **SVC**: Speed-sensitive Volume Compensation

Rotate \( \text{\textbullet} \) to adjust the sound setting, then press \( \text{\textbullet} \).

The SVC has four modes: **Off**, **Low**, **Mid**, and **High**. SVC adjusts the volume level based on the vehicle speed. As you go faster, audio volume increases. As you slow down, audio volume decreases.
Display Setup
You can change the brightness or color theme of the audio/information screen.

### Changing the Screen Brightness

1. Press the MENU/CLOCK button.
2. Rotate to select **Settings**, then press .
3. Rotate to select **Display Adjustment**, then press .
4. Rotate to select **Brightness**, then press .
5. Rotate to adjust the setting, then press .

### Changing the Screen’s Color Theme

1. Press the MENU/CLOCK button.
2. Rotate to select **Settings**, then press .
3. Rotate to select **Color Theme**, then press .
4. Rotate to select the setting you want, then press .
Playing AM/FM Radio

- **RADIO Button**: Press to select a band.
- **VOL/ (Volume/Power) Knob**: Press to turn the audio system on and off. Turn to adjust the volume.
- **(Seek/Skip) Buttons**: Press to search up and down the selected band for a station with a strong signal.
- **Preset Buttons (1-6)**: To store a station:
  1. Tune to the selected station.
  2. Pick a preset button and hold it until you hear a beep.
To listen to a stored station, select a band, then press the preset button.
- **Selector Knob**: Turn to tune the radio frequency. Press, and then turn to select an item. After that, press again to make your selection.
- **MENU/CLOCK Button**: Press to display the menu items.
- **(Back) Button**: Press to go back to the previous display or cancel a setting.
Radio Data System (RDS)

Provides text data information related to your selected RDS capable FM station.

- **To find an RDS station from Station List**
  1. Press 🎧 while listening to an FM station.
  2. Rotate 🎧 to select the station, then press 🎧.

- **Update List**
  Updates your available station list at any time.
  1. Press 🎧 while listening to an FM station.
  2. Rotate 🎧 to select Update List, then press 🎧.

- **Radio text**
  Displays the radio text information of the selected RDS station.
  1. Press the MENU/CLOCK button.
  2. Rotate 🎧 to select Settings, then press 🎧.
  3. Rotate 🎧 to select RDS Settings, then press 🎧.
  4. Rotate 🎧 to select Radio Text, then press 🎧.

- **Scan**
  Samples each of the strongest stations on the selected band for 10 seconds.
  1. Press the MENU/CLOCK button.
  2. Rotate 🎧 to select Scan, then press 🎧.

To turn off scan, press 🎧.
Playing an iPod

Connect the iPod using your dock connector to the USB port, then press the MEDIA button.

USB Indicator
Appears when an iPod is connected.

MEDIA Button
Press to select iPod (if connected).

VOL/\ (Volume/Power) Knob
Press to turn the audio system on and off. Turn to adjust the volume.

\ [\ ] (Seek/Skip) Buttons
Press \ or \ to change songs. Press and hold to move rapidly within a song.

Play Button
Press to resume a song.

Pause Button
Press to pause a song.

Play Mode Buttons
Press to select a play mode.

Selector Knob
Turn to change songs. Press, and then turn to select an item. After that, press again to make your selection.

MENU/CLOCK Button
Press to display the menu items.

\ (Back) Button
Press to go back to the previous display or cancel a setting.
How to Select a Song from the iPod Music List with the Selector Knob

1. Press \( \text{ } \) to display the iPod music list.

2. Rotate \( \text{ } \) to select a category.

3. Press \( \text{ } \) to display a list of items in the category.

4. Rotate \( \text{ } \) to select an item, then press \( \text{ } \).
   - Press \( \text{ } \) and rotate \( \text{ } \) repeatedly until a desired item you want to listen is displayed.

Playing an iPod

Available operating functions vary on models or versions. Some functions may not be available on the vehicle’s audio system.

If there is a problem, you may see an error message on the audio/information screen.

iPod/USB Flash Drive P. 327
You can select repeat and shuffle modes when playing a song. Available mode icons appear above the play mode buttons. Press the button corresponding to the mode you want to select.

To turn off a play mode
Press the selected button.
Playing Pandora®

Your audio system allows you to listen to music from the Pandora® app on a compatible smartphone. This function is available when the phone is paired and connected to the vehicle’s Bluetooth® HandsFreeLink® (HFL) system, or with an iPhone, you can connect using your USB cable to the USB port.

Features

- Pandora®, the Pandora logo, and the Pandora trade dress are trademarks or registered trademarks of Pandora Media, Inc., used with permission. Pandora is only available in certain countries. Visit the Pandora website for more information.
- To find out if your phone is compatible with this feature, visit automobiles.honda.com/handsfreelink/, or call 1-888-528-7876.
- To use this service in your vehicle, the Pandora® app must first be installed on your phone. Visit www.pandora.com for more information.
- Pandora® is free, personalized radio that plays music and comedy you’ll love. Just start with the name of one of your favorite artists, tracks, comedians or composers and Pandora® will create a custom station that plays similar tracks. Pandora® also features hundreds of genre stations ranging from Dubstep to Smooth Jazz to Power Workout.

If you cannot operate Pandora® through the audio system, it may be streaming through Bluetooth® Audio. Make sure Pandora® mode on your audio system is selected.

Continued
How to Create a Station

You can create a station when playing Pandora®.

1. Press the MENU/CLOCK button.

2. Rotate the dial to select New Station, then press the dial.

3. Rotate the dial to select an item, then press the dial. 
   - You can select Genre, Current Artist, or Current Track.

How to Create a Station

Available operating functions vary on software versions. Some functions may not be available on the vehicle's audio system.

If there is a problem, you may see an error message on the audio/information screen.

Pandora® may limit the total number of skips allowed on the service. If you dislike a track after the skip limit has been reached, your feedback will be saved but the current track will continue to play.

To change stations, press the dial on the main Pandora® screen, and rotate the dial to select Station List, and then select a new station.

* Not available on all models
Playing a USB Flash Drive

Your audio system reads and plays sound files on a USB flash drive in either MP3, WMA, AAC*1 or WAV format.

Connect your USB flash drive to the USB port, then press the MEDIA button.

*1: Only AAC format files recorded with iTunes are playable on this unit.
How to Select a File from a Folder with the Selector Knob

1. Press 🎵 to display a folder list.

2. Rotate 🎵 to select a folder.

3. Press 🎵 to display a list of files in that folder.

4. Rotate 🎵 to select a file, then press 🎵.

Playing a USB Flash Drive

Use the recommended USB flash drives.

Files in WMA format protected by digital rights management (DRM) cannot be played. The audio system displays Unplayable File, and then skips to the next file.

If there is a problem, you may see an error message on the audio/information screen.

iPod/USB Flash Drive P. 327
Audio System Basic Operation

Playing a USB Flash Drive

Features

You can select repeat, random, and scan modes when playing a file.

How to Select a Play Mode

You can select repeat, random, and scan modes when playing a file.

Available mode icons appear above the play mode buttons.

Press the button corresponding to the mode you want to select.

To turn off a play mode

Press the selected button.

How to Select a Play Mode

Play Mode Menu Items

Repeat

- Repeat One Folder: Repeats all files in the current folder.
- Repeat One Track: Repeats the current file.

Random

- Random in Folder: Plays all files in the current folder in random order.
- Random All: Plays all files in random order.

Scan

- Scan Folders: Provides 10-second sampling of the first file in each of the main folders.
- Scan Tracks: Provides 10-second sampling of all files in the current folder.

You can also select a play mode by pressing the MENU/CLOCK button.

Rotate to select Play Mode, then press .

Rotate to select a mode, then press .

To turn it off, rotate to select Normal Play, then press .
Playing Bluetooth® Audio

Your audio system allows you to listen to music from your Bluetooth-compatible phone. This function is available when the phone is paired and connected to the vehicle’s Bluetooth® HandsFreeLink® (HFL) system.

Phone Setup P. 391

Not all Bluetooth-enabled phones with streaming audio capabilities are compatible with the system. For a list of compatible phones:
• U.S.: Visit automobiles.honda.com/handsfreelink/, or call 1-888-528-7876.
• Canada: For more information on smartphone compatibility, call 1-855-490-7351.

In some states, it may be illegal to perform some data device functions while driving.

Only one phone can be used with HFL at a time. When there are more than two paired phones in the vehicle, the first paired phone the system finds is automatically connected.

If more than one phone is paired to the HFL system, there will be a delay before the system begins to play.

In some cases, the name of the artist, album, or track may not appear correctly.

Some functions may not be available on some devices.
To Play Bluetooth® Audio Files

1. Make sure that your phone is paired and connected to HFL.

2. Press the MEDIA button until the Bluetooth® Audio mode is selected.

If the phone is not recognized, another HFL-compatible phone, which is not compatible for Bluetooth® Audio, may already be connected.

To pause or resume a file
Press the Play or Pause button to select a mode.

To play the audio files, you may need to operate your phone. If so, follow the phone maker’s operating instructions.

The pause function may not be available on some phones.

If any audio device is connected to the USB port, you may need to press the MEDIA button repeatedly to select the Bluetooth® Audio system.

Switching to another mode pauses the music playing from your phone.

Audio/Information Screen

■ HondaLink
Displays the HondaLink® screen.
HondaLink® P. 312

■ Smartphone Connection
Displays the Apple CarPlay™ or Android Auto™.
Apple CarPlay™ P. 320
Android Auto™ P. 323

■ App List ( )
Adds or removes apps or widgets on the home screen.
Home Screen P. 270

■ Instrument Panel
Selects from three customizable settings for the driver information interface.
Changing the Home Screen Icon Layout

1. Select 🏠.
2. Select and hold an icon.
   ▶ The screen switches to the customization screen.
3. Drag and drop the icon to where you want it to be.
4. Select OK.
   ▶ The screen will return to the home screen.
Customizing the Meter

You can edit, add, or delete the meter contents on the driver information interface.

1. Home
2. Settings
3. System
4. Configuration of Instrument Panel

Customizing the Meter

You can store up to three customized configurations. To select or customize a configuration, select Swap Config.

When you select Swap Config. during customization, the settings you changed will be saved.

When you select during customization, the settings you changed will not be saved and you will be returned to the Instrument Panel screen.
Audio System Basic Operation
Audio/Information Screen

■ Editing order
To change the order of the icons on the driver information interface, first select:

1. Edit Order

2. Select the icon you want to move.
   ▶ You will see arrows on both sides of the selected icon.

3. Select the left or right arrow repeatedly to move the icon to your desired position.

4. Select OK.
   ▶ The screen will return to the Instrument Panel screen.

You can use an alternative method to change the order of the icons. First select:

1. Edit Order
2. Select and hold the icon you want to move.
3. Drag and drop the icon to where you want it to be.
4. Select OK.
   ▶ The screen will return to the Instrument Panel screen.
# Adding contents

You can add icons to the driver information interface. To add icons, first select:

1. Add

   ![Add icon](Image)

   Add

   ![Select icon](Image)

   Select

2. Select an icon you want to add.

   - You will see a plus mark on the upper right hand corner of the selected icon.

   ![Add icon with plus mark](Image)

3. Select OK.

   - The screen will return to the Instrument Panel screen.

   ![Ok icon](Image)

   OK

Icons that are grayed out cannot be selected.

If an icon has a plus mark in the upper-right corner, it means that the icon has already been added.
**Deleting contents**

To delete contents on the driver information interface, first select:

1. **Delete**

2. Select an icon you want to delete.
   - The icon with an X on the upper right hand corner can be deleted.

3. Select **OK**.
   - The screen will return to the **Instrument Panel** screen.

You can also delete contents by selecting:

1. **Delete** or **Edit Order**
2. Select and hold an icon you want to delete.
3. Drag and drop the icon to the trash icon.
4. Select **OK**.
   - The screen will return to the **Instrument Panel** screen.
Audio System Basic Operation

Audio/Information Screen

Wallpaper Setup
You can change, store, and delete the wallpaper on the audio/information screen.

Import wallpaper
You can import up to five images, one at a time, for wallpaper from a USB flash drive.

1. Connect the USB flash drive to the USB port.
2. Select Settings.
3. Select Clock.
4. Select Clock/Wallpaper Type, select Next, then open the Wallpaper tab.
5. Select Add New.
   - The picture name is displayed on the list.
6. Select a desired picture.
   - The preview is displayed on the left side on the screen.
7. Select Start Import to save the data.
   - The display will return to the wallpaper list.

Wallpaper Setup
The wallpaper you set up on Clock/Wallpaper Type cannot be displayed on the driver information interface.

• When importing wallpaper files, the image must be in the USB flash drive's root directory.
• Images in a folder cannot be imported.
• The file name must be fewer than 64 characters.
• The file format of the image that can be imported is BMP (bmp) or JPEG (jpg).
• The individual file size limit is 5 MB.
• The maximum image size is 4,096 x 4,096 pixels. If the image size is less than 800 x 480 pixels, the image is displayed in the middle of the screen with the extra area appearing in black.
• If the USB flash drive does not have any pictures, the No files detected message appears.

After changing the screen interface design, you can change the wallpaper by following procedure.
1. Select .
2. Select .
3. Select and hold empty space on the home screen.
   - The pop-up menu appears on the screen.
4. Select Change wallpaper.
5. Select Gallery, Live wallpapers, or Wallpapers.
Audio System Basic Operation

Song By Voice™ (SBV)

Use SBV to search for and play music from your USB flash drive or iPod using voice commands.

■ To enable SBV

1. Select  
2. Select Settings.
3. Select System.
4. Select the Voice Recog. tab.
5. Select Song by Voice.
6. Select Next, then select On or Off.

Setting options:
- **On** (factory default): Song By Voice™ commands are available.
- **Off**: Disable the feature.
• Searching for music using SBV

1. Set the **Song by Voice** setting to **On**.
2. Press the **(Talk)** button and say “**Music Search**” to activate the SBV feature for the USB flash drive and iPod.
3. Then, say a next command.
   - Example 1: Say “**List’Artist A**” to view a list of songs by that artist. Select the desired song to start playing.
   - Example 2: Say “**Play ’Artist A**” to start playing songs by that artist.
4. To cancel SBV, press the **(hang-up/back)** button on the steering wheel. The selected song continues playing.

Once you have canceled this mode, you need to press the **(Talk)** button and say “**Music Search**” again to re-activate this mode.

**NOTE:**
Song By Voice™ commands are available for tracks stored on the USB flash drive or iPod.

You can add phonetic modifications of difficult words so that it is easier for SBV to recognize artists, songs, albums, and composers in voice commands.

SBV is not available when using Apple CarPlay™. Use Siri® Eyes Free instead.
Audio System Basic Operation

Song By Voice™ (SBV)

■ Phonetic Modification

Add phonetic modifications of difficult or foreign words so that it is easier for SBV to recognize artists, songs, albums, and composers in voice commands when searching for music on the USB flash drive or iPod.

1. Select .
2. Select Settings.
3. Select System.
4. Select the Voice Recog. tab.
5. Select Song by Voice Phonetic Modification.
6. Select New Modification.
7. Select USB or iPod.

Song by Voice Phonetic Modification is grayed out when Song By Voice is set to Off.

You can store up to 2,000 phonetic modification items.
Audio System Basic Operation

Song By Voice™ (SBV)

8. Select the item to modify (e.g., Artist).
   ►The list of the selected item appears on the screen.

9. Select an entry to modify.
   ►The pop-up menu appears on the screen.
   ►To listen to the current phonetic modification, select Play.
   ►To delete the current phonetic modification, select Delete.

10. Select Modify.

11. Select the phonetic spelling you want to use (e.g., “Artist A”) when prompted.

12. Select Done.
   ►The artist “No Name” is phonetically modified to “Artist A.” When in the SBV mode, you can press the [Talk] button and use the voice command “Play ‘Artist A’” to play songs by the artist “No Name.”
Playing Pandora®

Your audio system allows you to listen to music from the Pandora® app on a compatible smartphone. This function is available when the phone is paired and connected to the vehicle’s Bluetooth® HandsFreeLink® (HFL) system, or with an iPhone, you can connect using your USB cable to the USB port.

- Phone Setup P. 416
- USB Port(s) P. 231

Pandora®, the Pandora logo, and the Pandora trade dress are trademarks or registered trademarks of Pandora Media, Inc., used with permission. Pandora is only available in certain countries. Visit the Pandora website for more information.

To find out if your phone is compatible with this feature, visit automobiles.honda.com/handsfreelink/, or call 1-888-528-7876.

To use this service in your vehicle, the Pandora® app must first be installed on your phone. Visit www.pandora.com for more information.

Pandora® is free, personalized radio that plays music and comedy you’ll love. Just start with the name of one of your favorite artists, tracks, comedians or composers and Pandora® will create a custom station that plays similar tracks. Pandora® also features hundreds of genre stations ranging from Dubstep to Smooth Jazz to Power Workout.

If you cannot operate Pandora® through the audio system, it may be streaming through Bluetooth® Audio. Make sure Pandora® mode on your audio system is selected.

If your phone is connected to Android Auto™, Pandora® is only available through the Android Auto™ interface. Visit the Android Auto™ website to check compatibility.

*1: Some or all of the lists may not be displayed.

Repeat Track: Repeats the current file.
Playing Bluetooth® Audio

Your audio system allows you to listen to music from your Bluetooth-compatible phone. This function is available when the phone is paired and connected to the vehicle’s Bluetooth® HandsFreeLink® (HFL) system.

1 Phone Setup P. 416

Not all Bluetooth®-enabled phones with streaming audio capabilities are compatible. To check if your phone is compatible, visit http://www.handsfreelink.com/Honda.

It may be illegal to perform some data device functions while driving.

Only one phone can be used with HFL at a time. When there are more than two paired phones in the vehicle, the first paired phone the system finds is automatically connected.

The connected phone for Bluetooth® Audio can be different.

If more than one phone is paired to the HFL system, there may be a delay before the system begins to play.

In some cases, the name of the artist, album, or track may not appear correctly.

Some functions may not be available on some devices.

If a phone is currently connected via Apple CarPlay™ or Android Auto™, Bluetooth® Audio from that phone is unavailable. However, a second previously paired phone can stream Bluetooth® Audio by selecting Connect from the Bluetooth Device List screen.

*1: Depending on the Bluetooth® device you connect, some or all of the lists may not be displayed.
Audio System Basic Operation

Playing Bluetooth® Audio Features

1. Make sure that your phone is paired and connected to the system.

   - **Phone Setup** P. 416

2. Select the Bluetooth® Audio mode.

   If the phone is not recognized, another HFL-compatible phone, which is not compatible for Bluetooth® Audio, may already be connected.

To pause or resume a file
Select the play icon or pause icon.

Searching for Music

1. Select **MENU**.
2. Select **Music Search**.
3. Select a search category (e.g., Albums).
4. Select an item.

   - The selection begins playing.

To Play Bluetooth® Audio Files

To play the audio files, you may need to operate your phone. If so, follow the phone maker’s operating instructions.

Switching to another mode pauses the music playing from your phone.

You can change the connected phone in the Bluetooth® settings on the Audio Menu screen by the following procedure.
1. Select **MENU**.
2. Select **Setting**.

Searching for Music

Depending on the Bluetooth® device you connect, some or all of the lists may not be displayed.
HondaLink®

HondaLink® connects you to the latest information from Honda. You can connect your phone wirelessly through Wi-Fi or Bluetooth®.

- **Wi-Fi Connection** P. 317
- **Phone Setup** P. 416

### HondaLink® Menu

#### Places*
Displays restaurants, gas stations, Honda dealers, etc. and provides navigation instructions to those locations via the navigation system.

#### Vehicle
Displays instruction messages when the vehicle needs service.

#### Help & Support
Displays tips on vehicle usage and provides information on roadside assistance and the customer service center.

*Not available on all models
■ Messages from Honda
Displays helpful and important information from Honda.

■ Weather*
Displays a weekly five-day weather forecast for any location you want. You can change the ZIP Code at any time.

■ To Set Up to Connect HondaLink® Service
Use the following procedure to connect to the HondaLink® service.

■ To enable the HondaLink® service
1. Select 📩.
2. Select Settings.
3. Select Info.
4. Select the HondaLink tab.
5. Select Diagnostics & Location Data.

To complete the procedure, you must consent to the collection and transmission of data pertaining to your vehicle.

Enable once: Allows only one time. (Prompt shows again next time.)
Always Enable: Allows anytime. (Prompt does not show again.)
Cancel: Does not allow this consent.

* Not available on all models

Continued
■ To link with HondaLink®

You can see this screen after launching HondaLink®.
■ Vehicle Information and Message from Honda Tips

Using the shortcut operation, you can quickly gain access to new messages.

1. In the header area, a message appears to notify you of a new message.
   ▶ When the message is received, a notification ring can be heard.

2. The notification message is replaced by an icon which remains displayed until the new message is read.
3. From the top of the screen, swipe down to see the messages.

4. Select a new message to open.
   - If you have selected the update option for HondaLink®, follow the directions on the screen to complete the process.

Vehicle Information and Message from Honda Tips

When you update HondaLink®, you must keep the engine running and maintain a constant connection with HondaLink®.
If the update is interrupted, the system will automatically resume the process. If, however, a week has elapsed since the process was first interrupted, you must repeat the process from the beginning.

You can update HondaLink® by selecting Message from Honda on the HondaLink® menu.
Wi-Fi Connection

You can connect the Display Audio to the Internet using Wi-Fi and browse websites or use online services on the audio/information screen. If your phone has wireless hotspot capabilities, the system can be tethered to the phone. Use the following steps to setup.

**Wi-Fi mode (setting for the first time)**

1. Select 音量
2. Select Settings.
3. Select Bluetooth / Wi-Fi.
4. Select the Wi-Fi tab.
5. Select Wi-Fi On/Off Status, select Next, then On.
6. Select Yes.
7. Select Wi-Fi Device List.
   - Make sure your phone’s Wi-Fi setting is in access point (tethering) mode.
   - Select the phone you want to connect to the system.
   - If you do not find the phone you want to connect in the list, select Scan.
8. Select Add.
   - If needed, enter a password for your phone and select Done.
   - When the connection is successful, the icon is displayed on the top of the screen.
9. Select 音量 to go back to the home screen.

---

**Wi-Fi mode (setting for the first time)**

You cannot go through the setting procedure while a vehicle is moving. Park in a safe place to set up the Wi-Fi connection.

Some cell phone carriers charge for tethering and smartphone data use. Check your phone’s data subscription package.

Check your phone manual to find out if the phone has Wi-Fi connectivity.

You can confirm whether Wi-Fi connection is on or off with the icon on the Wi-Fi Device List screen. Network speed will not be displayed on this screen.
Wi-Fi mode (after the initial setting has been made)

Make sure your phone's Wi-Fi setting is in access point (tethering) mode.

iPhone users

You may need to go through an initial setup for Wi-Fi connection again after you boot your phone.
Siri® Eyes Free
You can talk to Siri using the (Talk) button on the steering wheel when your iPhone is paired to the Bluetooth® HandsFreeLink® (HFL) system.

Phone Setup P. 416

Using Siri® Eyes Free

(Talk) Button
Press and hold until the display changes as shown.

(Hang-up/back) Button
Press to deactivate Siri® Eyes Free.

While in Siri® Eyes Free:
The display remains the same. No feedback or commands appear.

Siri® Eyes Free
Siri is a trademark of Apple Inc.

Check Apple Inc. website for features available for Siri.

We recommend against using Siri other than in Siri® Eyes Free while operating a vehicle.

Using Siri® Eyes Free
Some commands work only on specific phone features or apps.
Apple CarPlay™

If you connect an Apple CarPlay™-compatible iPhone to the system via the 1.5A USB port, you can use the audio/information screen, instead of the iPhone display, to make a phone call, listen to music, view maps (navigation), and access messages.

Only iPhone 5 or newer versions with iOS 8.4 or later are compatible with Apple CarPlay™.

Park in a safe place before connecting your iPhone to Apple CarPlay™ and when launching any compatible apps.

To use Apple CarPlay™, connect the USB cable to the 1.5A USB port. The USB port located on the back of the center console compartment will not enable Apple CarPlay™ operation.

To directly access the Apple CarPlay™ phone function, select Phone on the home screen. While connected to Apple CarPlay™, calls are only made through Apple CarPlay™. If you want to make a call with Bluetooth® HandsFreeLink®, turn Apple CarPlay™ OFF or detach the USB cable from your iPhone.

When your iPhone is connected to Apple CarPlay™, it is not possible to use the Bluetooth® Audio or Bluetooth® HandsFreeLink®. However, other previously paired phones can stream audio via Bluetooth® while Apple CarPlay™ is connected.

For details on countries and regions where Apple CarPlay™ is available, as well as information pertaining to function, refer to the Apple homepage.

■ Phone
Access the contact list, make phone calls, or listen to voice mail.

■ Messages
Check and reply to text messages, or have messages read to you.

■ Music
Play music stored on your iPhone.
Audio System Basic Operation

Apple CarPlay™

Features

Maps
Display Apple Maps and use the navigation function just as you would on your iPhone.

Models with navigation system
Only one navigation system (pre-installed navigation or Apple CarPlay™) can give directions at a time. When you are using one system, directions to any prior destination set on the other system will be canceled, and the system you are currently using will direct you to your destination.

Setting Up Apple CarPlay™
After you have connected your iPhone to the system via the 1.5A USB port, use the following procedure to set up Apple CarPlay™. Use of Apple CarPlay™ will result in the transmission of certain user and vehicle information (such as vehicle location, speed, and status) to your iPhone to enhance the Apple CarPlay™ experience. You will need to consent to the sharing of this information on the Display Audio Screen.

Enabling Apple CarPlay™

Enable once: Allows only once. (Prompt shows again next time.)
Always Enable: Allows anytime. (Prompt does not show again.)
Cancel: Does not allow this consent.

You may change the consent settings under the Smartphone settings menu.

Apple CarPlay™ Operating Requirements & Limitations
Apple CarPlay™ requires a compatible iPhone with an active cellular connection and data plan. Your carrier’s rate plans will apply.

Changes in operating systems, hardware, software, and other technology integral to providing Apple CarPlay™ functionality, as well as new or revised governmental regulations, may result in a decrease or cessation of Apple CarPlay™ functionality and services. Honda cannot and does not provide any warranty or guarantee of future Apple CarPlay™ performance or functionality.

It is possible to use 3rd party apps if they are compatible with Apple CarPlay™. Refer to the Apple homepage for information on compatible apps.

Setting Up Apple CarPlay™
You can also use the method below to set up Apple CarPlay™:
Select HOME→Settings→Smartphone→Apple CarPlay

Use of user and vehicle information
The use and handling of user and vehicle information transmitted to/from your iPhone by Apple CarPlay™ is governed by the Apple iOS terms and conditions and Apple’s Privacy Policy.
Audio System Basic Operation

Operating Apple CarPlay™ with Siri®

Press and hold the (Talk) button to activate Siri®.

(Talk) button:
Press and hold to activate Siri®.
Press again to deactivate Siri®.
Press and release to activate standard voice recognition system.

Below are examples of questions and commands for Siri®.

• What movies are playing today?
• Call dad at work.
• What song is this?
• How’s the weather tomorrow?

Android Auto™

When you connect an Android phone to the Display Audio system via the 1.5A USB port, Android Auto™ is automatically initiated. When connected via Android Auto™, you can use the audio/information screen to access the Phone, Google Maps (Navigation), Google Play Music, and Google Now functions. When you first use Android Auto™, a tutorial will appear on the screen. We recommend that you complete this tutorial while safely parked before using Android Auto™.

- **USB Port(s)** P. 231
- **Auto Pairing Connection** P. 325

Android Auto™

To use Android Auto™, you need to download the Android Auto™ app from Google Play to your smartphone.

Only Android 5.0 (Lollipop) or later versions are compatible with Android Auto™.

Blueltooth® Audio cannot be used with Android Auto™.

Park in a safe place before connecting your Android phone to Android Auto™ and when launching any compatible apps.

To use Android Auto™, connect the USB cable to the 1.5A USB port. The USB port on the back of the center console compartment will not enable Android Auto™ operation.

- **USB Port(s)** P. 231

When your Android phone is connected to Android Auto™, it is not possible to use the Blueltooth® Audio. However, other previously paired phones can stream audio via Blueltooth® while Android Auto™ is connected.

- **Phone Setup** P. 416
Audio System Basic Operation

Android Auto™ Menu

Maps (Navigation)
Display Google Maps and use the navigation function just as you would with your Android phone. When the vehicle is in motion, it is not possible to make keyboard entries. Stop the vehicle in a safe location to undertake a search or provide other inputs.

Phone (Communication)
Make and receive phone calls as well as listen to voicemail.

Google Now (Home screen)
Display useful information organized by Android Auto™ into simple cards that appear just when they’re needed.

Android Auto™ Operating Requirements & Limitations
Android Auto™ requires a compatible Android phone with an active cellular connection and data plan. Your carrier’s rate plans will apply.

Changes in operating systems, hardware, software, and other technology integral to providing Android Auto™ functionality, as well as new or revised governmental regulations, may result in a decrease or cessation of Android Auto™ functionality and services. Honda cannot and does not provide any warranty or guarantee of future Android Auto™ performance or functionality.

It is possible to use 3rd party apps if they are compatible with Android Auto™. Refer to the Android Auto™ homepage for information on compatible apps.
Music and audio
Play Google Play Music and music apps that are compatible with Android Auto™. To switch between music apps, press this icon.

Go back to the Home Screen.

Voice
Operate Android Auto™ with your voice.

Auto Pairing Connection
When you connect an Android phone to the unit via the 1.5A USB port, Android Auto™ is automatically initiated.

Enabling Android Auto™

Enable once: Allows only once. (Prompt shows again next time.)
Always Enable: Allows anytime. (Prompt does not show again.)
Cancel: Does not allow this consent.

You may change the consent settings under the Smartphone settings menu.

Enabling Android Auto™

Only initialize Android Auto™ when you safely parked. When Android Auto™ first detects your phone, you will need to set up your phone so that auto pairing is possible. Refer to the instruction manual that came with your phone.

You can use the method below to change Android Auto™ settings after you have completed the initial setup:
Select HOME → Settings → Smartphone → Android Auto

Use of user and vehicle information
The use and handling of user and vehicle information transmitted to/from your phone by Android Auto™ is governed by the Google’s Privacy Policy.
### Operating Android Auto™ with Voice Recognition

Press and hold the (Talk) button to operate Android Auto™ with your voice.

#### (Talk) button:
Press and hold to operate Android Auto™ with your voice. Press and release to activate standard voice recognition system.

#### (Hang-up/back) button:
Press to deactivate voice recognition.

Below are examples of commands you can give with voice recognition:

- Reply to text.
- Call my wife.
- Navigate to Honda.
- Play my music.
- Send a text message to my wife.
- Call flower shop.

For more information, please refer to the Android Auto™ homepage.

You can also activate the voice recognition function by pressing the icon in the upper-right corner of the screen.
## Audio Error Messages

### iPod/USB Flash Drive

If an error occurs while playing an iPod or USB flash drive, you may see the following error messages. If you cannot clear the error message, contact a dealer.

<table>
<thead>
<tr>
<th>Error Message</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>USB Error*1, *2</td>
<td>Appears when there is a problem with the audio system. Check if the device is compatible with the audio system.</td>
</tr>
<tr>
<td>The connected USB device has a problem. See Owner’s Manual*2</td>
<td>Appears when an incompatible device is connected. Disconnect the device. Then turn the audio system off, and turn it on again. Do not reconnect the device that caused the error.</td>
</tr>
<tr>
<td>Unsupported Ver*1</td>
<td>Appears when an unsupported iPod is connected. If it appears when a supported iPod is connected, update the iPod software to the newer version.</td>
</tr>
<tr>
<td>Unsupported Version*2</td>
<td>Appears when the system does not acknowledge the iPod. Reconnect the iPod.</td>
</tr>
<tr>
<td>Connect Retry*1, *2</td>
<td>Appears when the files in the USB flash drive are copyright protected or an unsupported format. This error message appears for about three seconds, then plays the next song.</td>
</tr>
<tr>
<td>Unplayable File*1, *2</td>
<td>iPod&lt;br&gt;Appears when the iPod is empty. &lt;br&gt;USB flash drive &lt;br&gt;Appears when the USB flash drive is empty or there are no MP3, WMA, AAC, or WAV*1 files in the USB flash drive. &lt;br&gt;iPod and USB flash drive &lt;br&gt;Check that compatible files are stored on the device.</td>
</tr>
<tr>
<td>No Song*1</td>
<td>No Data*2 &lt;br&gt;Appears when an unsupported device is connected. If it appears when a supported device is connected, reconnect the device.</td>
</tr>

General Information on the Audio System

SiriusXM® Radio Service*

■ Subscribing to SiriusXM® Radio

1. You need your radio ID ready before registering for subscription. To see the ID on the screen, select Channel 0.
2. Have your radio ID ready, and either call SiriusXM® or visit the SiriusXM® website to subscribe.

■ Receiving SiriusXM® Radio

Switch to the SiriusXM® mode by using the ENTER button on the steering wheel, or through the audio/information screen, and stay in this mode for about 30 minutes until the service is activated. Make sure your vehicle is in an open area with good reception.

■ SiriusXM® Radio Display Messages

Channel Not Subscribed:
You are not subscribed to the channel selected.
Subscription Update:
SiriusXM® radio is receiving information update from the network.
Channel Not Available:
No such channel exists, or the artist or title information is unavailable.
No Signal:
The signal is too weak in the current location.
Antenna Disconnected:
The SiriusXM® antenna is disconnected. Contact a dealer.

### USB Flash Drives

- A USB flash drive of 256 MB or higher is recommended.
- Some digital audio players may not be compatible.
- Some USB flash drives (e.g., a device with security lockout) may not work.
- Some software files may not allow for audio play or text data display.
- Some versions of MP3, WMA, AAC, or WAV* formats may be unsupported.

* Not available on all models
END USER LICENSE AGREEMENT

PLEASE CAREFULLY READ THIS END USER LICENSE AGREEMENT (THIS “AGREEMENT”) WHICH GOVERNS YOUR USE OF THE SOFTWARE INSTALLED ON YOUR HONDA OR ACURA VEHICLE (YOUR “VEHICLE”) AS WELL AS THE APPLICATIONS, SERVICES, FUNCTIONS, AND CONTENT PROVIDED THROUGH THE SOFTWARE (COLLECTIVELY, THE “SERVICES”). YOUR USE OF THE SOFTWARE OR SERVICES WILL SERVE AS YOUR CONSENT TO THE TERMS OF THIS AGREEMENT. THE SOFTWARE IS OWNED (OR LICENSED), PROVIDED, AND/OR OPERATED BY AMERICAN HONDA MOTOR CO. INC., (“HONDA,” “US,” “WE,” OR “OUR”), WITH ITS BUSINESS ADDRESS AT 1919 TORRANCE BLVD., TORRANCE, CA 90501. REFERENCE TO “HONDA” IN THIS AGREEMENT INCLUDES HONDA’S PARENT COMPANY AND ITS AFFILIATES AND DESIGNATED AGENTS. THE SERVICES ARE OWNED (OR LICENSED), PROVIDED, AND/OR OPERATED BY HONDA OR A THIRD-PARTY SERVICE PROVIDER (A “PROVIDER”). REFERENCE TO A “PROVIDER” IN THIS AGREEMENT INCLUDES SUCH PROVIDER’S PARENT COMPANY, AFFILIATES, AND DESIGNATED AGENTS.

A. Description of the Software. The SOFTWARE includes the software, firmware and the like, installed and executing on your VEHICLE during manufacture, and thereafter updated from time to time by HONDA, you or an authorized HONDA dealer (a “DEALER”). The SOFTWARE allows you to access and use a variety of SERVICES, including but not limited to: (a) HONDA applications, services, and content provided through the SOFTWARE (together, “HONDA SERVICES”); and (b) PROVIDER applications, services, and content provided through the SOFTWARE (together, “PROVIDER SERVICES”), each of which may provide access to various information, media, content, and services.

B. SOFTWARE Licensing and Intellectual Property.

1. SOFTWARE. This AGREEMENT grants you a non-exclusive, limited, and revocable license to use the SOFTWARE and SERVICES solely (a) as installed on your VEHICLE by HONDA, (b) as updated on your Vehicle by HONDA, you (but only as and when directed by HONDA), or a DEALER and (c) as permitted under the terms of this AGREEMENT.

2. HONDA Services. The SOFTWARE may provide you with access to various HONDA SERVICES. Installation, activation, or use of HONDA SERVICES may require your consent to additional terms, conditions, and privacy policies applicable to those HONDA SERVICES (the “HONDA TERMS”). You acknowledge and agree that any collection, use, sharing of data generated by your VEHICLE or your use of your VEHICLE, and your use of the HONDA SERVICES shall be subject to this AGREEMENT and any additional HONDA TERMS that may be specifically applicable to such HONDA SERVICES or data generation. The HONDA SERVICES may collect, use, and share such data while you are using the SOFTWARE.
3. **Open-Source Software.** The SOFTWARE and SERVICES may incorporate software licensed to HONDA under free or open-source licenses which govern HONDA’s distribution and your use of such software. HONDA and the third-party authors, licensors, and distributors of such software disclaim all warranties and all liability arising from any and all use or distribution of the software. To the extent such software is provided under terms that differ from the applicable free or open-source licenses, those terms are offered by HONDA alone. Additional information regarding free and open-source software incorporated in the SOFTWARE and SERVICES is available in this manual or within the SOFTWARE.

4. **Provider Services.** The SOFTWARE may provide you with access to various PROVIDER SERVICES. Installation or use of such PROVIDER SERVICES may require your consent to additional terms, conditions, and privacy policies of the applicable PROVIDER (the “PROVIDER TERMS”). This AGREEMENT restricts the manner in which you can install and use PROVIDER SERVICES but does not grant you a license or permission to use such PROVIDER SERVICES. Your permission to use PROVIDER SERVICES is limited and subject to any license grants, conditions, and limitations included in the PROVIDER TERMS. You acknowledge that any collection, use, sharing of your information, targeted advertising practices by PROVIDERS, and your use of the PROVIDER SERVICES shall be subject to both this AGREEMENT and any applicable PROVIDER TERMS. The PROVIDER SERVICES may collect, use, and share such information while you are using the SOFTWARE.

5. **License Limitations and Restrictions on Use.**
(a) Limited License. You understand and agree that the SOFTWARE and SERVICES are licensed, not sold, to you solely for use in accordance with this AGREEMENT and any applicable PROVIDER TERMS, and any documentation for the VEHICLE made available to you by HONDA (any “DOCUMENTATION”). HONDA and its licensors reserve all rights in the SOFTWARE and HONDA SERVICES not expressly granted to you under this AGREEMENT. PROVIDERS and their licensors reserve all rights in the PROVIDER SERVICES not expressly granted to you under the applicable PROVIDER TERMS.
General Information on the Audio System  
Honda App License Agreement

(b) Restrictions on Use. The licenses granted under this AGREEMENT do not permit you to use the SOFTWARE or SERVICES on a device other than your VEHICLE. As a condition of using the SOFTWARE and SERVICES, you agree that you may not and will not:

1. copy, download, distribute, modify, publish, sell, rent, lease, lend, license, sublicense, reuse, or create derivative works of the SOFTWARE or SERVICES or any of the content or other material within the SOFTWARE or SERVICES, including without limitation, HONDA or PROVIDER names, logos, or any other trademarks of HONDA or PROVIDERS or used in association with the SOFTWARE or any SERVICES, except as required to use the SOFTWARE or SERVICES in accordance with this AGREEMENT, any applicable PROVIDER TERMS, and the DOCUMENTATION;
2. access or use the SOFTWARE or SERVICES in any manner intended to damage or impair the operation of the SOFTWARE or SERVICES or interfere with anyone else’s use and enjoyment of the SOFTWARE or SERVICES;
3. access or attempt to access any system or server on which the SOFTWARE or SERVICES is hosted or modify or alter the SOFTWARE or SERVICES in any way;
4. use the SOFTWARE or SERVICES for any unlawful purpose, or in violation of any third party rights;
5. use the SOFTWARE or SERVICES in violation of any applicable traffic regulations, rules or laws, including but not limited to any driver distraction laws, rules or regulations;
6. violate the terms of this AGREEMENT, any HONDA TERMS, any PROVIDER TERMS or other applicable third-party terms, conditions, and privacy policies; or
7. reverse engineer, decompile, disassemble, attempt to derive the source code of, or permit others to reverse engineer, decompile, or disassemble, or attempt to derive the source code of the SOFTWARE or SERVICES, except and only to the extent that such activity is expressly permitted (a) by applicable law notwithstanding this limitation or (b) the terms of applicable free or opensource software licenses.

6. Intellectual Property Rights. All title and intellectual property rights in and to the SOFTWARE and SERVICES, the accompanying DOCUMENTATION, and all copies of the SOFTWARE or SERVICES are owned by HONDA, PROVIDERS, or their suppliers or licensors. This AGREEMENT does not grant you any rights in connection with any trademarks or service marks of HONDA, PROVIDERS, or their licensors, affiliates, or suppliers.
7. Export Restrictions: You acknowledge that the SOFTWARE and SERVICES are subject to U.S., European Union, and other export jurisdictions. You agree to comply with all applicable international and national laws that apply to the SOFTWARE and SERVICES, including the U.S. Export Administration Regulations, as well as end-user, end-use, and destination restrictions issued by the U.S. and other governments.

C. SOFTWARE Operation

1. HONDА reserves the right to suspend or terminate your access to and use of the SOFTWARE or SERVICES if you are found to be in violation of this AGREEMENT or as reasonably deemed necessary by HONDА.

2. Eligibility/Registration/Activation. The SOFTWARE is intended for and available to individuals who (a) are of legal age of majority in their jurisdiction of residence (and at least 18 years of age), or are younger than 18 years of age and possess a valid driver’s license issued by their jurisdiction of residence, and (b) own or have permissive access to a compatible VEHICLE. We do not knowingly collect any information, including personal information, from children under 13. If we learn or are notified that we have collected personal information of a child under 13, we will immediately take steps to delete such information.

3. Use of PROVIDER SERVICES through the SOFTWARE. Certain PROVIDER SERVICES made available through the SOFTWARE may require that you register or otherwise have an account with the PROVIDER and agree to PROVIDER TERMS. Any use of any of such PROVIDER SERVICES within the SOFTWARE is subject to this AGREEMENT and the applicable PROVIDER TERMS. HONDА does not exercise control over such PROVIDER SERVICES and is not responsible or liable for the availability, security, or content of such PROVIDER SERVICES, and the inclusion of any PROVIDER SERVICES does not imply a referral from, the approval of, or the endorsement by HONDА of such PROVIDER SERVICES. HONDА is not responsible or liable, directly or indirectly, for any damage relating to or resulting from your use of the PROVIDER SERVICES.

4. Links to Third Party Sites: The SOFTWARE may provide you with the ability to access third-party sites and content through the use of the SOFTWARE or SERVICES. The third-party sites and content are not under the control of HONDА. HONDА is not responsible or liable, directly or indirectly, for such third-party websites and their content or for any damage relating to or resulting from your access or use of such websites and content.
5. Unauthorized Use and Abuse. You are responsible for ensuring your (and any authorized third parties') use of the SOFTWARE and SERVICES remains in compliance with this AGREEMENT and all other applicable HONDA TERMS and PROVIDER TERMS. You acknowledge and agree that any use of the SOFTWARE or SERVICES occurring through your VEHICLE will be deemed your actions and that HONDA and PROVIDERS may rely upon such actions. You agree to immediately notify us if you suspect fraudulent or abusive activity involving the SOFTWARE or SERVICES. If you so notify us or if we otherwise suspect fraudulent or abusive activity, you agree to cooperate with us in any fraud investigation and to use any fraud prevention measures we prescribe. Your failure to immediately notify us or cooperate to use such measures will result in your liability for all fraudulent usage or abusive activity associated with your VEHICLE.

6. SOFTWARE Updates. The SOFTWARE and SERVICES may be updated when your VEHICLE is serviced by a DEALER or remotely, over-the-air, by HONDA from time to time; such updates may occur with or without further notice or your future consent. The SOFTWARE may be updated at HONDA’s discretion and for any purpose including, without limitation, to patch or otherwise improve the SOFTWARE or SERVICES functionality, security, or stability. All updates to the SOFTWARE and SERVICES are subject to this AGREEMENT and any other applicable HONDA TERMS and PROVIDER TERMS.

7. Uninstalling, Removing, and Replacing the SOFTWARE. Replacing SOFTWARE or HONDA SERVICES with software or firmware not provided and installed by HONDA or a DEALER will render all representations and warranties for the SOFTWARE, HONDA SERVICES, and VEHICLE functionality reliant upon the SOFTWARE or HONDA SERVICES null and void.

D. SOFTWARE Operational Notices and Warnings

1. Vehicle Geolocation Information. You acknowledge that your VEHICLE may be equipped with certain traffic and map features. The traffic feature will automatically collect and transmit, through GPS technology, your Vehicle’s current location (longitude and latitude), travel direction and speed (“VEHICLE GEOLOCATION INFORMATION”) to HONDA and PROVIDERS. The VEHICLE GEOLOCATION INFORMATION is used by HONDA and PROVIDERS to provide traffic and navigation-related information to you, but may also be used to provide other SERVICES or offers to you. HONDA will not use such VEHICLE GEOLOCATION INFORMATION for its own marketing efforts, or provide such information to unaffiliated third parties for their own purposes, without your express consent.
2. Potential Map Inaccuracy and Route Safety. Maps used by this system may be inaccurate because of changes in roads, traffic controls, routing, or driving conditions. Always use good judgment and common sense when following suggested routes. Do not follow the route suggestions if doing so would result in an unsafe or illegal driving maneuver, if you would be placed in an unsafe situation, or if you would be directed into an area that you consider unsafe. Do not rely on any navigation features included in the system to route you to emergency services. Not all emergency services such as police, fire stations, hospitals, or clinics are likely to be contained in the map database for such navigation features. Ask local authorities or an emergency services operator for such locations and routes. The driver is ultimately responsible for the safe operation of the vehicle and therefore, must evaluate whether it is safe to follow the suggested directions. Any navigation features are provided only as an aid. Make your driving decisions based on your observations of local conditions and existing traffic regulations. Navigation features are not a substitute for your personal judgment. Any route suggestions made by the SOFTWARE or SERVICES should never replace any local traffic regulations or your personal judgment or knowledge of safe driving practices.

3. Speech Recognition: You acknowledge and understand that HONDA and PROVIDERS may record, retain, and use voice commands when you use the speech recognition components of the SOFTWARE or SERVICES. You and all VEHICLE operators and passengers (a) consent to the recording and retention of voice commands in support of providing speech recognition components and (b) release HONDA and PROVIDERS from all claims, liabilities, and losses that may result from any use of such recorded voice commands. Recognition errors are inherent in speech recognition. It is your responsibility to monitor any speech recognition functions included in the system and address any errors. Neither HONDA nor PROVIDERS will be liable for any damages arising out of errors in the speech recognition process.

4. Distraction Hazards. Navigation features may require manual (non-verbal) input or setup. Attempting to perform such set-up or insert data while driving can seriously distract your attention and could cause a crash or other serious consequences; the ability to undertake such interactions may also be limited by state or local law, which laws you are responsible to know and follow. Even occasional short scans of the screen may be hazardous if your attention has been diverted away from your driving at a critical time. Pull over and stop the vehicle in a safe and legal manner before attempting to access a function of the system requiring prolonged attention. Do not raise the volume excessively. Keep the volume at a level where you can still hear outside traffic and emergency signals while driving. Driving while unable to hear these sounds could result in a crash.
E. Information Collection and Storage

1. Information Collection, Use, Transmission and Storage of Data. Consent to Use of Data: You agree that HONDA and PROVIDERS may collect and use your information gathered in any manner as part of product support services related to the SOFTWARE or related services. HONDA may share such information with third parties, including, without limitation, PROVIDERS, third party software and services suppliers, their affiliates and/or their designated agents, solely to improve their products or to provide services or technologies to you. HONDA, third party software and systems suppliers, their affiliates and/or their designated agent may disclose this information to others, but not in a form that personally identifies you.

2. Information Storage. Depending on the type of multimedia system you have in your VEHICLE, certain information may be stored for ease of use of the SOFTWARE including, without limitation, search history, location history in certain applications, previous and saved destinations, map locations within certain applications, and device numbers and contact information.

(a) Vehicle Health Information. Your VEHICLE may remotely transmit information regarding the status and health of your VEHICLE (“VEHICLE INFORMATION”) to HONDA without notification to you. VEHICLE INFORMATION may contain VEHICLE maintenance and malfunction status that is derived from VEHICLE diagnostic data and includes, but is not limited to, status of powered doors and windows, battery life data, battery charging data, VEHICLE speed, coolant temperature, air compressor revolution, output power, warning codes, diagnostic trouble codes, fuel injection volume, and engine rotations per minute. VEHICLE HEALTH INFORMATION may be used by HONDA for research and development, to deliver HONDA SERVICES and information to you, and to contact you, and is retained only for a period of time necessary to fulfill these goals.

(b) VEHICLE Geolocation Data (non-navigation/map based). If you opt-in to geolocation-based SERVICES, your vehicle’s geolocation data (latitude and longitude) will be automatically sent from your VEHICLE to HONDA and PROVIDERS.

(c) You understand that the inputting or uploading of information to your VEHICLE’s multimedia system or the SOFTWARE or SERVICES is at your own risk and that HONDA is not responsible for unauthorized access to or use of any personal or other information. All information uploaded to the SOFTWARE and SERVICES may be stored on your VEHICLE’s multimedia system and you understand that the security and safety of your VEHICLE’s multimedia system is your sole responsibility.
F. NO WARRANTY. You understand and agree that your use of the SOFTWARE and SERVICES are solely at your own risk and that you will be solely responsible for any damage to your VEHICLE's multimedia system or any other equipment or any loss of data that may result from your use of the SOFTWARE or SERVICES. THE SOFTWARE AND SERVICES ARE PROVIDED ON AN “AS IS” AND “AS AVAILABLE” BASIS WITHOUT ANY WARRANTY OF ANY KIND, EXPRESSED, IMPLIED OR STATUTORY. WE SPECIFICALLY DISCLAIM ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT. HONDA makes no warranties that the SOFTWARE or SERVICES will meet your requirements, or that the SOFTWARE or SERVICES will be uninterrupted, timely, secure, non-infringing or error free. You understand and agree that you are responsible for any and all charges, costs or expenses associated with your use of the SOFTWARE or SERVICES. Advice or information, whether oral or written, obtained by you from us or through the SOFTWARE or SERVICES are provided for informational purposes only and will not create any warranty not expressly made herein. You should not rely on any such information or advice. We assume no liability or responsibility for any errors or omissions in the SOFTWARE or SERVICES. We do not make any warranty or representation that your use of the material displayed on, or obtained through, the SOFTWARE or SERVICES is non-infringing of any rights of any third party. Any decision or action taken by you on the basis of information or content provided via the application is at your sole discretion and risk. HONDA and PROVIDERS are not responsible or liable for any such decision, or for the accuracy, completeness, usefulness, or availability of any content or information displayed, transmitted, or otherwise made available via the SOFTWARE or SERVICES. To the extent jurisdictions do not allow the exclusion of certain warranties, some of the above exclusions may not apply to you.

G. LIMITATIONS ON LIABILITY. You and HONDA are each waiving important rights.

1. Limitations on YOUR liability. HONDA cannot recover from you any consequential, indirect, incidental, or special damages, or attorney’s fees in connection with your use of the SOFTWARE or HONDA SERVICES. HONDA WAIVES TO THE FULLEST EXTENT ALLOWED BY LAW ANY CLAIM FOR DAMAGES OTHER THAN DIRECT, COMPENSATORY DAMAGES AS LIMITED IN THIS AGREEMENT.
2. Limitation on HONDA and PROVIDER liability. Neither HONDA nor PROVIDERS will be liable to you or any other party for consequential, indirect, incidental, special, or punitive damages (including without limitation lost profits) in connection with your use of the SOFTWARE or SERVICES, even if HONDA or PROVIDERS are aware of the possibility of such damages. These limitations apply to all claims, including, without limitation, claims in contract and tort (such as negligence, product liability and strict liability). To the extent that a jurisdiction does not permit the exclusion or limitation of liability as set forth herein our liability is limited to the maximum extent permitted by law in such states. If HONDA or PROVIDERS are found liable to you for any reason, you agree that the aggregate liability of all these parties to you for any claim is limited to ten U.S. dollars (US $10.00). Neither HONDA nor any PROVIDER would have agreed to provide the SOFTWARE or SERVICES to you if you did not agree to this limitation. This amount is the sole and exclusive liability of HONDA and PROVIDERS to you, and is payable as liquidated damages and not as a penalty. Except where prohibited by law, you may not bring any claim against HONDA or any third-party beneficiary more than two (2) years after the claim arises. We do not have any liability for SOFTWARE or SERVICES interruptions of any length.

(a) Release of HONDA and PROVIDERS For yourself and anyone else claiming under you, you agree to release and discharge HONDA, PROVIDERS, their respective officers, directors, and employees, and each third-party beneficiary from all claims, liabilities and losses in connection with the SOFTWARE or SERVICES, including, but not limited to claims for personal injury or property damage arising from the total or partial failure of performance of the SOFTWARE or SERVICES, even if caused by or based upon the negligence, gross negligence, strict products liability, Deceptive Trade Practices Act violations, bad faith, or breach of warranty of us or the malfunction of the SOFTWARE or SOFTWARE SERVICES. YOU AGREE TO WAIVE TO THE FULLEST EXTENT ALLOWED BY LAW, ANY CLAIM FOR DAMAGES OTHER THAN DIRECT, COMPENSATORY DAMAGES AS LIMITED IN THIS AGREEMENT. YOU HEREBY RELEASE AND DISCHARGE HONDA AND ITS LICENSORS AND CONTRACTORS (INCLUDING ANY THIRD PARTIES PROVIDING ALL OR PART OF THE SOFTWARE OR SERVICES) FROM AND AGAINST ANY CLAIMS, DAMAGES, EXPENSES AND LIABILITY ARISING FROM OR RELATED TO ANY INJURIES, DAMAGES, OR LOSSES TO ANY PERSON (INCLUDING DEATH) OR PROPERTY OF ANY KIND RESULTING IN WHOLE OR PART, DIRECTLY OR INDIRECTLY, FROM YOUR USE OF THE SOFTWARE OR SERVICES.

H. Survival. You agree that the limitations of liability and indemnities in this AGREEMENT will survive even after the AGREEMENT has ended. These limitations of liability apply not only to you, but to anyone using the SOFTWARE or SERVICES via your VEHICLE, to anyone making a claim on your behalf, and to any claims made by your family, employees, customers, or others arising out of or relating to your VEHICLE, the SOFTWARE, or SERVICES.
I. Availability/Interruption. The SOFTWARE and certain SERVICES are made available through your VEHICLE's compatible multimedia system when the VEHICLE is turned on. Certain SERVICES may be available only through your compatible mobile device when it is within the operating range of the VEHICLE and a wireless carrier. The availability of the SOFTWARE and SERVICES may be subject to transmission limitation or interruption, including but not limited to technical obsolesce or sunsetting of the hardware, software or firmware, inside or external to the Vehicle, required for data transmission or receipt. HONDA does not guarantee that the SOFTWARE, SERVICES, or any portion thereof will be available at all times or in all areas. You acknowledge and agree that HONDA is not responsible for performance degradation, interruption or delays. You acknowledge that HONDA shall not be liable to you if the SOFTWARE or SERVICES in a given location are not available. If the SOFTWARE or SERVICES are not available within your intended location, you agree that your sole remedy shall be to cease using the SOFTWARE and SERVICES.

J. PRODUCT SUPPORT: Product support for the SOFTWARE is provided by HONDA. For product support, please refer to HONDA instructions provided in the DOCUMENTATION. Should you have any questions concerning this AGREEMENT, or if you desire to contact HONDA for any other reason, please refer to the HONDA contact information provided in the DOCUMENTATION.

K. Termination and Transfer.
1. Termination. This AGREEMENT is effective until terminated by you or US. WE may terminate this AGREEMENT for any or no reason, and with or without notice to you. Your rights under this AGREEMENT will terminate automatically without notice from US if you fail to comply with any term of this AGREEMENT. Upon termination of this AGREEMENT, you shall cease all use of the SOFTWARE and SERVICES.

2. Transfer: You may permanently transfer your rights under this AGREEMENT only as part of a sale or transfer of the VEHICLE, provided you retain no copies, you transfer all of the SOFTWARE and HONDA SERVICES (including all component parts, the media and printed materials, and any upgrades), and the recipient agrees to the terms of this AGREEMENT. You agree to notify HONDA upon the sale or transfer of the VEHICLE. To contact HONDA, please refer to the HONDA contact information provided in the DOCUMENTATION.
L. Changes to the SOFTWARE or SERVICES. WE may change, modify, or update the SOFTWARE or SERVICES from time to time. Unless explicitly stated otherwise, any new features or services that augment or enhance the SOFTWARE or SERVICES in the future shall respectively be considered part of the SOFTWARE or SERVICES and subject to this AGREEMENT. WE reserve the right at any time and from time to time to interrupt, restrict, modify, suspend, discontinue, temporarily or permanently, the SOFTWARE or SERVICES (or any portion thereof), with or without notice to you, and you agree that HONDA shall not be liable to you or to any third party for any modification, suspension or discontinuance of the SOFTWARE or SERVICES.

M. ARBITRATION:
PLEASE READ THIS ARBITRATION PROVISION CAREFULLY TO UNDERSTAND YOUR RIGHTS. YOU AGREE THAT ANY CLAIM THAT YOU MAY HAVE IN THE FUTURE MUST BE RESOLVED THROUGH BINDING ARBITRATION. YOU WAIVE THE RIGHT TO HAVE YOUR DISPUTE HEARD IN COURT AND WAIVE THE RIGHT TO BRING CLASS CLAIMS. YOU UNDERSTAND THAT DISCOVERY AND APPEAL RIGHTS ARE MORE LIMITED IN ARBITRATION.

Arbitration is a method of resolving a claim, dispute or controversy without filing a lawsuit. By agreeing to arbitrate, the right to go to court is waived and instead claims, disputes or controversies are submitted to binding arbitration. This provision sets forth the terms and conditions of our agreement. YOU and HONDA agree and acknowledge that this Agreement affects interstate commerce and the Federal Arbitration Act ("FAA") applies. By using the Software, Vehicle, or Services, YOU elect to have disputes resolved by arbitration. YOU, HONDA or any involved third party may pursue a Claim. “Claim” means any dispute between YOU, HONDA, or any involved third party relating to your use of the Software, the Vehicle, or the Services, this Agreement, or our relationship, including any representations, omissions or warranties. “Claim” does not include personal injury or wrongful death claims. YOU or HONDA may seek remedies in small claims court or provisional judicial remedies without arbitrating. In addition, notwithstanding anything herein to the contrary, YOU or HONDA may seek equitable relief in a court of competent jurisdiction.

YOU or HONDA may select arbitration with American Arbitration Association, JAMS or National Arbitration and Mediation. Contact these sponsors for their rules. The hearing will be in the federal district where YOU reside. If agreed, it may be by telephone or written submissions. Filing and arbitrator fees to be paid per the sponsor rules. You may contact the sponsor for a fee waiver. If no fee waivers, HONDA will pay filing and arbitrator fees up to $5,000, unless law requires more. Each party is responsible for other fees. Arbitrator may award costs or fees to prevailing party, if permitted by law. HONDA will not seek fees, unless the claims are frivolous.
Arbitrator shall be an attorney or current or retired judge familiar with automotive or consumer software. The arbitrator shall follow substantive law, statute of limitations and decide all issues relating to the interpretation, construction, enforceability and applicability of this provision. The arbitrator may order relief permitted by law. This provision is governed and enforceable by the FAA. An award shall include a written opinion and be final, subject to appeal by the FAA.

This provision survives termination of this Agreement or relationship, bankruptcy, assignment or transfer. If part of this provision is unenforceable, the remainder remains in effect. If unenforceability allows arbitration as a class action, then this provision is entirely unenforceable. YOU may opt out within 30 days of your initial use of the Software by sending a signed, written notice to HONDA at Honda Financial Services, P.O. Box 165007, Irving, TX 75016. HONDA reserves the right to make changes to this provision after providing written notice and an opportunity to opt out.

N. Miscellaneous: You may not assign this AGREEMENT without HONDA’s prior written consent. This AGREEMENT and any additional HONDA TERMS and PROVIDER TERMS represents the entire agreement between you and US. HONDA may amend the terms of this AGREEMENT by providing you with notices of such updated terms. If you do not consent to be bound by the updated terms, your sole remedy will be to cease using the SOFTWARE and SERVICES. If any part of this AGREEMENT is found invalid, void, or unenforceable, the balance of the AGREEMENT will remain valid and enforceable according to its terms. To the fullest extent permitted by law, and except as explicitly provided otherwise, this AGREEMENT and any disputes arising out of or relating to it will be governed by the laws of the State of California, except that California laws concerning choice of law or conflicts shall not apply if they would cause the substantive law of another jurisdiction to apply. Notwithstanding the foregoing, Section M shall be governed by the Federal Arbitration Act and the laws of the State of California, as applicable, as set forth therein. The failure to enforce any term of this AGREEMENT on one occasion shall not prevent enforcement on any other occasion or the enforcement of any other term. Headings and captions shall not be considered included for purposes of interpretation or application hereof, but are for convenience only.
Legal Information on Apple CarPlay™/Android Auto™

Models with Display Audio

USE OF APPLE CARPLAY IS SUBJECT TO YOUR AGREEMENT TO THE CARPLAY TERMS OF USE, WHICH ARE INCLUDED AS PART OF THE APPLE iOS TERMS OF USE. IN SUMMARY, THE CARPLAY TERMS OF USE DISCLAIM APPLE AND ITS SERVICE PROVIDERS’ LIABILITY IF THE SERVICES FAIL TO PERFORM CORRECTLY OR ARE DISCONTINUED, STRICTLY LIMIT APPLE AND ITS SERVICE PROVIDERS’ OTHER LIABILITIES, DESCRIBE THE KINDS OF USER INFORMATION (INCLUDING, FOR EXAMPLE, VEHICLE LOCATION, VEHICLE SPEED, AND VEHICLE STATUS) BEING GATHERED AND STORED BY APPLE AND ITS SERVICE PROVIDERS, AND DISCLOSE CERTAIN POSSIBLE RISKS ASSOCIATED WITH THE USE OF CARPLAY, INCLUDING THE POTENTIAL FOR DRIVER DISTRACTION. SEE APPLE’S PRIVACY POLICY FOR DETAILS REGARDING APPLE’S USE AND HANDLING OF DATA/uploaded by CARPLAY.

USE OF ANDROID AUTO IS SUBJECT TO YOUR AGREEMENT TO THE ANDROID AUTO TERMS OF USE WHICH MUST BE AGREED TO WHEN THE ANDROID AUTO APPLICATION IS DOWNLOADED TO YOUR ANDROID PHONE. IN SUMMARY, THE ANDROID AUTO TERMS OF USE DISCLAIM GOOGLE AND ITS SERVICE PROVIDERS’ LIABILITY IF THE SERVICES FAIL TO PERFORM CORRECTLY OR ARE DISCONTINUED, STRICTLY LIMIT GOOGLE AND ITS SERVICE PROVIDERS’ OTHER LIABILITIES, DESCRIBE THE KINDS OF USER INFORMATION (INCLUDING, FOR EXAMPLE, VEHICLE LOCATION, VEHICLE SPEED, AND VEHICLE STATUS) BEING GATHERED AND STORED BY GOOGLE AND ITS SERVICE PROVIDERS, AND DISCLOSE CERTAIN POSSIBLE RISKS ASSOCIATED WITH THE USE OF ANDROID AUTO, INCLUDING THE POTENTIAL FOR DRIVER DISTRACTION. SEE GOOGLE’S PRIVACY POLICY FOR DETAILS REGARDING GOOGLE’S USE AND HANDLING OF DATA/uploaded by ANDROID AUTO.
DISCLAIMER OF WARRANTIES; LIMITATION ON LIABILITY

YOU EXPRESSLY ACKNOWLEDGE AND AGREE THAT USE OF APPLE CARPLAY OR ANDROID AUTO ("THE APPLICATIONS") IS AT YOUR SOLE RISK AND THAT THE ENTIRE RISK AS TO SATISFACTORY QUALITY, PERFORMANCE, ACCURACY AND EFFORT IS WITH YOU TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, AND THAT THE APPLICATIONS AND INFORMATION ON THE APPLICATIONS IS PROVIDED "AS IS" AND "AS AVAILABLE," WITH ALL FAULTS AND WITHOUT WARRANTY OF ANY KIND, AND HONDA HEREBY DISCLAIMS ALL WARRANTIES AND CONDITIONS WITH RESPECT TO THE APPLICATIONS AND INFORMATION ON THE APPLICATIONS, EITHER EXPRESS, IMPLIED OR STATUTORY, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES AND/OR CONDITIONS OF MERCHANTABILITY, SATISFACTORY QUALITY, FITNESS FOR A PARTICULAR PURPOSE, ACCURACY, QUIET ENJOYMENT, AND NON-INFRINGEMENT OF THIRD PARTY RIGHTS. NO ORAL OR WRITTEN INFORMATION OR ADVICE GIVEN BY HONDA OR AN AUTHORIZED REPRESENTATIVE SHALL CREATE A WARRANTY. AS EXAMPLES, AND WITHOUT LIMITATION, HONDA DISCLAIMS ANY WARRANTY REGARDING THE ACCURACY OF DATA PROVIDED BY THE APPLICATIONS, SUCH AS THE ACCURACY OF DIRECTIONS, ESTIMATED TRAVEL TIME, SPEED LIMITS, ROAD CONDITIONS, NEWS, WEATHER, TRAFFIC, OR OTHER CONTENT PROVIDED BY APPLE, GOOGLE, THEIR AFFILIATES, OR THIRD PARTY PROVIDERS; HONDA DOES NOT GUARANTEE AGAINST LOSS OF APPLICATION DATA, WHICH MAY BE LOST AT ANY TIME; HONDA DOES NOT GUARANTEE THAT THE APPLICATIONS OR ANY SERVICES PROVIDED THROUGH THEM WILL BE PROVIDED AT ALL TIMES OR THAT ANY OR ALL SERVICES WILL BE AVAILABLE AT ANY PARTICULAR TIME OR LOCATION. FOR EXAMPLE, SERVICES MAY BE SUSPENDED OR INTERRUPTED WITHOUT NOTICE FOR REPAIR, MAINTENANCE, SECURITY FIXES, UPDATES, ETC., SERVICES MAY BE UNAVAILABLE IN YOUR AREA OR LOCATION, ETC. IN ADDITION, YOU UNDERSTAND THAT CHANGES IN THIRD PARTY TECHNOLOGY OR GOVERNMENT REGULATION MAY RENDER THE SERVICES AND/OR APPLICATIONS OBSOLETE AND/OR UNUSABLE.

TO THE EXTENT NOT PROHIBITED BY LAW, IN NO EVENT SHALL HONDA OR ITS AFFILIATES BE LIABLE FOR PERSONAL INJURY, OR ANY INCIDENTAL, SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES WHATSOEVER, INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF PROFITS, CORRUPTION OR LOSS OF DATA, FAILURE TO TRANSMIT OR RECEIVE ANY DATA, BUSINESS INTERRUPTION OR ANY OTHER COMMERCIAL DAMAGES OR LOSSES, ARISING OUT OF OR RELATED TO THE APPLICATIONS OR YOUR USE OF OR INABILITY TO USE THE APPLICATIONS OR INFORMATION ON THE APPLICATIONS, HOWEVER CAUSED, REGARDLESS OF THE THEORY OF LIABILITY (CONTRACT, TORT OR OTHERWISE) AND EVEN IF HONDA WERE ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. SOME STATES AND JURISDICTIONS DISALLOW THE EXCLUSION OR LIMITATION OF LIABILITY FOR DAMAGES, SO THESE LIMITATIONS AND EXCLUSIONS MAY NOT APPLY TO YOU. IN NO EVENT SHALL HONDA’S TOTAL LIABILITY TO YOU FOR ALL DAMAGES (OTHER THAN AS MAY BE REQUIRED BY APPLICABLE LAW IN CASES INVOLVING PERSONAL INJURY) EXCEED THE AMOUNT OF FIVE DOLLARS ($5.00). THE FOREGOING LIMITATIONS WILL APPLY EVEN IF THE ABOVE STATED REMEDY FAILS OF ITS ESSENTIAL PURPOSE.

Models with Display Audio

Defaulting All the Settings

Reset all the menu and customized settings as the factory defaults.

1. Select 
2. Select Settings.
3. Select System.
4. Select the Others tab.
5. Select Factory Data Reset.
   - A confirmation message appears on the screen.
6. Select Next, then select Yes to reset the settings.
7. Select Yes again to reset the settings.
   - A confirmation message appears on the screen. Select OK.
   - After selecting OK, the system will reboot.

HondaLink®

When you transfer the vehicle to a third party, reset all settings to default and delete all personal data.

If you perform Factory Data Reset, it will reset the preinstalled apps to their factory default.

If you perform Factory Data Reset, you cannot use the HondaLink® because it becomes off line.
HomeLink® Universal Transceiver*

The HomeLink® Universal Transceiver can be programmed to operate up to three remote controlled devices around your home, such as garage doors, lighting, or home security systems.

**Important Safety Precautions**

Refer to the safety information that came with your garage door opener to test that the safety features are functioning properly. If you do not have the safety information, contact the manufacturer.

Before programming HomeLink, make sure that people and objects are out of the way of the garage or gate to prevent potential injury or damage.

When programming a garage door opener, park just outside the garage door’s path.

---

*Not available on all models*
Training HomeLink

If it is necessary to erase a previously entered learned code:

- Press and hold the two outside buttons for about 20 seconds, until the red indicator blinks. Release the buttons, and proceed to step 1.
- If you are training the second or third button, go directly to step 1.

The instructions on the next page should work for most gate or garage openers, but may not work for all. For detailed instructions about your specific remote opener, visit http://www.homelink.com or call (800)355-3515.
Features

### Training a Button

1. Position the remote transmitter you wish to link 1 to 3 inches (3 - 8 cm) from the HomeLink button you want to program.

2. Press and hold the desired HomeLink button. Hold the button on the remote transmitter. Does the HomeLink indicator (LED) change from slowly blinking to constantly on or rapidly blinking? The process should take less than 60 seconds.

   - **YES**: Press and release the HomeLink button. Press and release the button on the remote every 2 secs. Does the HomeLink indicator (LED) change from slowly blinking to **constantly on** or rapidly blinking? The process should take less than 60 seconds.
   - **NO**: **NO**

3. Press and hold the programmed HomeLink button for about a sec. Does the device (garage door opener) work?

   - **YES**: **YES**
   - **NO**: **NO**

4. **Training Complete**

5. **Training Complete**

   - The remote has a rolling code. Press the "learn" button on the remote-controlled device (e.g. garage door opener).

   - Within 30 secs, press and hold the programmed HomeLink button for 2 secs.

### Retraining a Button

If you want to retrain a programmed button for a new device, you do not have to erase all button memory. You can replace the existing memory code using this procedure:

1. Press and hold the desired HomeLink button until the HomeLink indicator begins to blink.

   - **Standard transmitter**: Indicator remains on for about 25 secs.
   - **Rolling code transmitter**: Indicator remains on for about 25 secs.

2. Quickly release the HomeLink button and follow steps 1 - 3 under "Training a Button." You do not need to press and release the HomeLink button again in step 2.

### Erasing Codes

To erase all the codes, press and hold the two outside buttons until the HomeLink indicator begins to blink (about 10 to 20 secs). You should erase all codes before selling the vehicle.

If you have any problems, see the device’s instructions, visit [www.homelink.com](http://www.homelink.com), or call HomeLink at (800) 355-3515.

HomeLink® is a registered trademark of Gentex Corporation.
**Bluetooth® HandsFreeLink®**

Models with color audio system

*Bluetooth® HandsFreeLink® (HFL)* allows you to place and receive phone calls using your vehicle’s audio system, without handling your cell phone.

### Using HFL

#### HFL Buttons

- **(Pick-up) Button**
  - Volume up

- **Volume down**

- **(Talk) Button**

- **(Phone) Button**

- **Selector Knob**: Rotate to select an item on the screen, then press .

- **(Hang-up/Back) Button**

#### Voice control tips

- Place your phone where you can get good reception.

- To use HFL, you need a *Bluetooth*-compatible cell phone. For a list of compatible phones, pairing procedures, and special feature capabilities:
  - U.S.: Visit automobiles.honda.com/handsfreelink/, or call 1-888-528-7876.
  - Canada: For more information on smartphone compatibility, call 1-855-490-7351.

- **Aim the vents away from the ceiling and close the windows, as noise coming from them may interfere with the microphone.**

- **Press and release the button when you want to call a number using a stored voice tag. Speak clearly and naturally after a beep.**

- **If the microphone picks up voices other than yours, the command may be misinterpreted.**

- **To change the volume level, use the audio system’s volume knob or the remote audio controls on the steering wheel.**

- **State or local laws may prohibit the operation of handheld electronic devices while operating a vehicle.**

- **If you receive a call while using the audio system, the system resumes its operation after ending the call.**

- Up to 20 speed dial entries can be stored. If there is no entry in the system, Speed Dial is disabled.

- **Speed Dial P. 399**

- Up to 20 call histories can be stored. If there is no call history, Call History is disabled.
Bluetooth® HandsFreeLink®

Using HFL

**HFL Status Display**

The audio/information screen notifies you when there is an incoming call.

- **Battery Level Status**
- **Signal Strength**
- **Roam Status**
  - **Bluetooth Indicator**
  - Appears when your phone is connected to HFL.
- **Call Name**

**Limitations for Manual Operation**

Certain manual functions are disabled or inoperable while the vehicle is in motion. You cannot select a grayed-out option until the vehicle is stopped.

Only previously stored speed dial entries can be called using voice commands while the vehicle is in motion.

  Prioritize the caller’s phone number as the caller ID.

**System Clear**
Clear the system of all paired phones, phonebook entries, and security codes.
Phone Setup

To pair a cell phone (No phone has been paired to the system)
1. Press the button or the button.
2. Rotate \( \mathbb{R} \) to select Yes, then press \( \mathbb{R} \).
3. Press \( \mathbb{R} \) to select OK.
4. Make sure your phone is in search or discoverable mode.
   - HFL automatically searches for a Bluetooth\textsuperscript{®} device.
5. When your phone appears on the list, select it by pressing \( \mathbb{R} \).
   - If your phone doesn’t appear, select Phone Not Found? and search for Bluetooth\textsuperscript{®} devices using your phone.
   - From your phone, select HandsFreeLink\textsuperscript{®}.
6. The system gives you a pairing code on the audio/information screen.
   - Confirm if the pairing code on the screen and your phone match.
   - This may vary by phone.
7. A notification appears on the screen if pairing is successful.

Phone Setup

Your Bluetooth-compatible phone must be paired to HFL before you can make and receive hands-free calls.

Phone Pairing Tips:
- You cannot pair your phone while the vehicle is moving.
- Up to six phones can be paired.
- Your phone’s battery may drain faster when it is paired to HFL.
- If your phone is not ready for pairing or not found by the system within 30 seconds, the system will time out and return to idle.

Once you have paired a phone, you can see it displayed on the screen with one or two icons on the right side. These icons indicate the following:
- \( \mathbb{R} \): The phone can be used with HFL.
- \( \mathbb{R} \): The phone is compatible with Bluetooth\textsuperscript{®} Audio.
To pair a cell phone (when a phone has already been paired to the system)

1. Press the [ ] button or the [ ] button.
2. Rotate [ ] to select Yes, then press [ ]
3. Rotate [ ] to select Add New Device, then press [ ]
4. Press [ ] to select OK.
   ▶ The screen changes to device list.
5. Make sure your phone is in search or discoverable mode, then press [ ]
   ▶ HFL automatically searches for a Bluetooth® device.
6. When your phone appears on the list, select it by pressing [ ]
   ▶ If your phone does not appear, select Phone Not Found? and search for Bluetooth® devices using your phone. From your phone, select HandsFreeLink®.
7. The system gives you a pairing code on the audio/information screen.
   ▶ Confirm if the pairing code on the screen and your phone match.
This may vary by a phone.
To change the currently paired phone
1. Press the button or the button.
2. Rotate to select Phone Setup, then press .
3. Rotate to select Bluetooth Setup, then press .
4. Rotate to select Connect a Phone, then press .
   - The screen changes to a device list.
5. Rotate to select a desired device name, then press .
   - HFL disconnects the connected phone and starts searching for another paired phone.
To change the pairing code setting
1. Press the button or the button.
2. Rotate to select Phone Setup, then press.
3. Rotate to select Bluetooth Setup, then press.

4. Rotate to select Pass-Key, then press.

5. Input a new pairing code, then press.
■ To delete a paired phone
1. Press the button or the button.
2. Rotate to select Phone Setup, then press .
3. Rotate to select Bluetooth Setup, then press .
4. Rotate to select Delete Device, then press .
   - The screen changes to a device list.
5. Rotate to select a phone you want to delete, then press .
6. A confirmation message appears on the screen. Rotate to select Yes, then press .
### Ring Tone

You can change the ring tone setting.

1. Press the button or the button.
2. Rotate to select Phone Setup, then press .
3. Rotate to select Ringtone, then press .
4. Rotate to select Mobile Phone or Fixed, then press .

### Caller’s ID Information

You can select a caller’s information to be displayed when you have an incoming call.

1. Press the button or the button.
2. Rotate to select Phone Setup, then press .
3. Rotate to select Caller ID Info, then press .
4. Rotate to select a mode you want, then press .

**Ring Tone**

**Mobile Phone:** For certain connected phones, the ring tone stored in the phone sounds from the speakers.

**Fixed:** The fixed ring tone sounds from the speakers.

**Caller’s ID Information**

**Name Priority:** A caller’s name is displayed if it is stored in the phonebook.

**Number Priority:** A caller’s phone number is displayed.
To Clear the System

Pairing codes, paired phones, all stored voice tags, all speed dial entries, all call history data, and all imported phonebook data are erased.

1. Press the button or the button.
2. Rotate to select Phone Setup, then press .
3. Rotate to select System Clear, then press .
4. Rotate to select Yes, then press .
5. A confirmation message appears on the screen. Rotate to select Yes, then press .

Continued
When your phone is paired, the contents of its phonebook and call history are automatically imported to HFL.

When you select a person from the list in the cellular phonebook, you can see up to three category icons. The icons indicate what types of numbers are stored for that name.

If a name has four or more numbers, ... appears instead of category icons.

On some phones, it may not be possible to import the category icons to HFL.

The phonebook is updated after every connection. Call history is updated after every connection or call.
Speed Dial

Up to 20 speed dial numbers can be stored per phone.

To store a speed dial number:
1. Press the button or the button.
2. Rotate to select Speed Dial, then press .
3. Rotate to select Add New, then press .
4. Rotate to select a place to choose a number from, then press .
   From Call History:
   ▶ Select a number from the call history.
   From Phonebook:
   ▶ Select a number from the connected cell phone’s imported phonebook.
   From Phone Number:
   ▶ Input the number manually.

5. When the speed dial is successfully stored, you are asked to create a voice tag for the number. Rotate to select Yes or No, then press .
6. Using the button, follow the prompts to say the name for the speed dial entry.
Features

Bluetooth® HandsFreeLink® HFL Menus

■ To edit a speed dial
1. Press the button or the button.
2. Rotate to select Phone Setup, then press .
3. Rotate to select Speed Dial, then press .
4. Select an existing speed dial entry.
5. Rotate to select Change Speed Dial, then press .
6. Select a new speed dial number, then press .

■ To delete a speed dial number
1. Press the button or the button.
2. Rotate to select Phone Setup, then press .
3. Rotate to select Speed Dial, then press .
4. Select an existing speed dial entry.
5. Rotate to select Delete Speed Dial, then press .
   ▶ A confirmation message appears on the screen. Rotate to select Yes, then press .
To add a voice tag to a stored speed dial number
1. Press the \button or the \button.
2. Rotate \ to select Phone Setup, then press \.
3. Rotate \ to select Speed Dial, then press \.
4. Select an existing speed dial entry.
5. Rotate \ to select Store Voice Tag, then press \.
6. Using the \ button, follow the prompts to complete the voice tag.

To change a voice tag
1. Press the \ button or the \ button.
2. Rotate \ to select Phone Setup, then press \.
3. Rotate \ to select Speed Dial, then press \.
4. Select an existing speed dial entry.
5. Rotate \ to select Change Voice Tag, then press \.
6. Using the \ button, follow the prompts to complete the voice tag.

Avoid using duplicate voice tags.
Avoid using “home” as a voice tag.
It is easier for HFL to recognize a longer name. For example, use “John Smith” instead of “John.”
To delete a voice tag
1. Press the button or the button.
2. Rotate to select Phone Setup, then press .
3. Rotate to select Speed Dial, then press .
4. Select an existing speed dial entry.
5. Rotate to select Delete Voice Tag, then press .
   - A confirmation message appears on the screen. Rotate to select Yes, then press .

Making a Call
You can make calls by inputting any phone number, or by using the imported phonebook, call history, speed dial entries, or redial.

Making a Call
Any voice-tagged speed dial entry can be dialed by voice from any screen.
Press the button and follow the prompts.

Once a call is connected, you can hear the voice of the person you are calling through the audio speakers.
■ To make a call using the imported phonebook
When your phone is paired, the contents of its phonebook are automatically imported to HFL.
1. Press the button or the button.
2. Rotate to select Phonebook, then press .
3. The phonebook is stored alphabetically.
   Rotate to select the initial, then press .
4. Rotate to select a name, then press .
5. Rotate to select a number, then press .
   ►Dialing starts automatically.

■ To make a call using a phone number
1. Press the button or the button.
2. Rotate to select Dial, then press .
3. Rotate to select a number, then press .
4. Rotate to select then press .
   ►Dialing starts automatically.
To make a call using redial
1. Press the button or the button.
2. Rotate to select Redial, then press .
   ➤Dialing starts automatically.

To make a call using the call history
Call history is stored by Dialed Calls, Received Calls, and Missed Calls.
1. Press the button or the button.
2. Rotate to select Call History, then press .
3. Rotate to select Dialed Calls, Received Calls, or Missed Calls, then press .
4. Rotate to select a number, then press .
   ➤Dialing starts automatically.
To make a call using a speed dial entry

1. Press the button or the button.
2. Rotate  to select Speed Dial, then press .
3. Rotate  to select a number, then press .
   Dialing starts automatically.

To make a call using a speed dial entry

When any preset button is pressed, the Speed Dial screen is displayed.

Select Others to view another paired phone’s speed dial list.

When a voice tag is stored, press the button and call the number using voice commands.

Speed Dial P. 399

Any voice-tagged speed dial entry can be dialed by voice from any screen. Press the button and follow the prompts.
Receiving a Call

When there is an incoming call, an audible notification sounds and the **Incoming Call** screen appears.

Press the † button to answer the call. Press the † button to decline or end the call.
### Options During a Call

The following options are available during a call.

**Swap Call:** Put the current call on hold to answer the incoming call.

**Mute:** Mute your voice.

**Transfer Call:** Transfer a call from HFL to your phone.

**Dial Tones:** Send numbers during a call. This is useful when you call a menu-driven phone system.

1. To view the available options, press the ▼ button.
2. Rotate ◄ to select the option, then press ◄.
   - The check box is checked when Mute is selected. Select Mute again to turn it off.

**Dial Tones:** Available on some phones.
Bluetooth® HandsFreeLink®

Models with Display Audio

Bluetooth® HandsFreeLink® (HFL) allows you to place and receive phone calls using your vehicle’s audio system, without handling your cell phone.

Using HFL

HFL Buttons

To use HFL, you need a Bluetooth®-compatible cell phone. For a list of compatible phones, pairing procedures, and special feature capabilities:
• U.S.: Visit automobiles.honda.com/handsfreelink/, or call 1-888-528-7876.
• Canada: For more information on smartphone compatibility, call 1-855-490-7351.

To use the system, the Bluetooth On/Off Status setting must be On. If there is an active connection to Apple CarPlay™ or Android Auto™, HFL is unavailable.

Voice control tips
• Aim the vents away from the ceiling and close the windows, as noise coming from them may interfere with the microphone.
• Press the button when you want to call a number using a stored voice tag. Speak clearly and naturally after a beep.
• If the microphone picks up voices other than yours, the command may be misinterpreted.
• To change the volume level, select the audio system’s VOL (Volume) or use the remote audio controls on the steering wheel.

Up to three speed dial entries can be displayed among a total of 20 that can be entered.

Up to three previous calls can be displayed at a time among a total of 20 that can be entered. If there is no call history, Call History is disabled.

Place your phone where you can get good reception.

> How to customize P. 349
(Pick-up) button: Press to go directly to the phone menu on the driver information interface, or to answer an incoming call.

(Hang-up/back) button: Press to end a call, go back to the previous command, or cancel a command.

(Talk) button: Press to access Voice Portal.

buttons: Press to select an item displayed on the phone menu in the driver information interface.

ENTER button: Press to call a number listed in the selected item on the phone menu in the driver information interface.

(display/information) button: Select and press ENTER to display Speed Dial, Call History, or Phonebook on the phone menu in the driver information interface.

To go to the Phone Menu screen:
1. Select \( \text{Disp} \) to switch the display to the phone screen.
2. Select MENU.

\textbf{Bluetooth® Wireless Technology}

An incoming call on HFL will interrupt the audio system when it is playing. It will resume when the call is ended.
The audio/information screen notifies you when there is an incoming call.

Only previously stored speed dial entries with voice tags, phonebook names, or numbers can be called using voice commands while the vehicle is in motion.

■ To pair a cell phone (when there is no phone paired to the system)

1. Select [ ].
2. Select Yes.
3. Make sure your phone is in search or discoverable mode, then select Continue.
   HFL automatically searches for a Bluetooth® device.
4. Select your phone when it appears on the list.
   If your phone does not appear, you can select Refresh to search again.
   If your phone still does not appear, select Phone Not Found and search for Bluetooth® devices using your phone.
   From your phone, search for HandsFreeLink.
5. The system gives you a pairing code on the audio/information screen.
   Confirm if the pairing code on the screen and your phone match.
   This may vary by phone.

Phone Setup

Your Bluetooth-compatible phone must be paired to the system before you can make and receive hands-free calls.

Phone Pairing Tips:
• You cannot pair your phone while the vehicle is moving.
• Up to six phones can be paired.
• Your phone’s battery may drain faster when it is paired to the system.
• If your phone is not ready for pairing or not found by the system within three minutes, the system will time out and return to idle.

Once you have paired a phone, you can see it displayed on the screen with one or two icons on the right side. These icons indicate the following:

- The phone can be used with HFL.
- The phone is compatible with Bluetooth® Audio.

If there is an active connection to Apple CarPlay™, pairing of additional Bluetooth-compatible devices is unavailable and Add Bluetooth Device is grayed out from the Bluetooth Device List screen.
To change the currently paired phone
1. Go to the phone settings screen. [*Phone Settings screen* P. 411]
2. Select Bluetooth Device List.
3. Select a phone to connect.
   - HFL disconnects the connected phone and starts searching for another paired phone.
4. Select Connect, Connect, or Connect.

To change the pairing code setting
1. Select .
2. Select Settings.
3. Select Bluetooth / Wi-Fi.
4. Select the Bluetooth tab.
5. Select Edit Pairing Code.
6. Select Random or Fixed.

To change the currently paired phone
If no other phones are found or paired when trying to switch to another phone, HFL will inform you that the original phone is connected again.

To pair other phones, select Add Bluetooth Device from the Bluetooth Device List screen.

To change the pairing code setting
The default pairing code is 0000 until you change the setting.
To create your own, select Fixed, and delete the current code, then enter a new one.

For a randomly generated pairing code each time you pair a phone, select Random.
To delete a paired phone
1. Go to the phone settings screen. [Phone Settings screen] P. 411
2. Select Bluetooth Device List.
3. Select a phone you want to delete.
4. Select Delete.
5. A confirmation message appears on the screen. Select Yes.
To Set Up Text Message/E-mail Options

■ To turn on or off the text/e-mail function
1. Go to the Phone Settings screen.
2. Select the Text/Email tab, then Enable Text/Email.
3. Select Next.
4. A pop-up menu appears on the screen.
5. Select On or Off.

■ To turn on or off the text/e-mail notice
1. Go to the Phone Settings screen.
2. Select the Text/Email tab, then New Message Notification.
3. Select Next.
4. A pop-up menu appears on the screen.
5. Select On or Off.

To use the text message/e-mail function, it may be necessary to set up on your phone.

On: A pop-up notification comes on every time you receive a new message.
Off: The message you receive is stored in the system without notification.
You can change the ring tone setting.

1. Go to the **Phone Settings** screen.
   - Phone Settings screen P. 411
2. Select **Ring Tone**.
3. Select **Next**, then select **Fixed** or **Mobile Phone**.

**Ring Tone**

- **Fixed**: The fixed ring tone sounds from the speakers.
- **Mobile Phone**: For certain connected phones, the ring tone stored in the phone sounds from the speakers.

### Automatic Import of Cellular Phonebook and Call History

#### When Automatic Phone Sync is set to On:
When your phone is paired, the contents of its phonebook and call history are automatically imported to the system.

#### Changing the Automatic Phone Sync setting

1. Go to the Phone Settings screen.
2. Select Automatic Phone Sync.
3. Select On or Off.

When you select a name from the list in the cellular phonebook, you can see up to three category icons. The icons indicate what types of numbers are stored for that name.

On some phones, it may not be possible to import the category icons to the system.

The phonebook is updated after every connection. Call history is updated after every connection or call.
Speed Dial

Up to 20 speed dial numbers can be stored per phone.

To store a speed dial number:
1. Go to the Phone Menu screen.
   - Phone Menu screen P. 414
2. Select Speed Dial.
3. Select New Entry.
   - From Import from Call History:
     - Select a number from the call history.
   - From Manual Input:
     - Input the number manually.
   - From Import from Phonebook:
     - Select a number from the connected cell phone’s imported phonebook.
4. When the speed dial is successfully stored, you are asked to create a voice tag for the number. Select Yes or No.
5. Select Record, or use the $ button and follow the prompts to complete the voice tag.

When a voice tag is stored, press the $ button to call the number using the voice tag. Say the voice tag name.
■ To add a voice tag to a stored speed dial number
1. Go to the Phone Settings screen.  
   Phone Settings screen P. 411
2. Select Edit Speed Dial.
3. Select an existing speed dial entry.
   ▶ From the pop-up menu, select Edit.
4. Select Voice Tag.
   ▶ From the pop-up menu, select Record.
5. Select Record, or use the [8] button and follow the prompts to complete the voice tag.

■ To delete a voice tag
1. Go to the Phone Settings screen.  
   Phone Settings screen P. 411
2. Select Edit Speed Dial.
3. Select an existing speed dial entry.
   ▶ From the pop-up menu, select Edit.
4. Select Voice Tag.
   ▶ From the pop-up menu, select Clear.
5. A confirmation message appears on the screen. Select Yes.

Speed Dial
Avoid using duplicate voice tags.
Avoid using “home” as a voice tag.
It is easier for the system to recognize a longer name.
For example, use “John Smith” instead of “John.”
**Bluetooth® HandsFreeLink® HFL Menus**

### To edit a speed dial
1. Go to the **Phone Settings** screen.
   - **Phone Settings screen** P. 411
2. Select **Edit Speed Dial**.
3. Select an existing speed dial entry.
   - From the pop-up menu, select **Edit**.
4. Select a setting you want.

### To delete a speed dial
1. Go to the **Phone Settings** screen.
   - **Phone Settings screen** P. 411
2. Select **Edit Speed Dial**.
3. Select an existing speed dial entry.
   - From the pop-up menu, select **Delete**.
4. A confirmation message appears on the screen. Select **Yes**.
Add phonetic modifications or a new voice tag to the phone’s contact name so that it is easier for HFL to recognize voice commands.

To add a new voice tag
1. Select the icon.
2. Select Settings.
3. Select System.
4. Select the Voice Recog. tab.
5. Select Phonebook Phonetic Modification.
6. Select the phone you want to add phonetic modification to.
7. Select **New Voice Tag**.

8. Select a contact name you want to add to. The pop-up menu appears on the screen.

9. Select **Modify**.

10. Using **Record** or the button, follow the prompts to complete the voice tag.

11. You will receive a confirmation message on the screen, then select **OK**.
To modify a voice tag

1. Select .
2. Select Settings.
3. Select System.
4. Select the Voice Recog. tab.
5. Select Phonebook Phonetic Modification.

6. Select the phone you want to modify phonetic modification.
7. Select a contact name you want to modify.
   ▶ The pop-up menu appears on the screen.

8. Select Modify.
9. Using Record or the button, follow the prompts to complete the voice tag.
10. You will receive a confirmation message on the screen, then select OK.
■ To delete a modified voice tag

1. Select Bluetooth® HandsFreeLink®
2. Select Settings.
3. Select System.
4. Select the Voice Recog. tab.
5. Select Phonebook Phonetic Modification.

6. Select the phone for which you want to delete phonetic modification.
7. Select a contact name you want to delete.
   ▶ The pop-up menu appears on the screen.

8. Select Delete.
   ▶ The selected contact name has been selected.
9. Select OK.
To delete all modified voice tags
1. Select .
2. Select Settings.
3. Select System.
4. Select the Voice Recog. tab.
5. Select Phonebook Phonetic Modification.
6. Select the phone you want to delete phonetic modification.
   ➤ The contact name list appears.
7. Select Delete All.
8. You will receive a confirmation message on the screen, then select Yes.

Making a Call
You can make calls by inputting any phone number, or by using the imported phonebook, call history, speed dial entries, or redial.

Making a Call
Any voice-tagged speed dial entry can be dialed by voice from most screens.
Press the button and say the voice tag name.

Once a call is connected, you can hear the voice of the person you are calling through the audio speakers.

While there is an active connection with Apple CarPlay™, phone calls can be made only from Apple CarPlay™.
To make a call using the imported phonebook
1. Select \text{ }.
2. Select Phonebook.
3. Select a name.
   - You can also search by letter. Select Search.
   - Use the keyboard on the touch screen for entering name, if multiple numbers exist select a number.
4. Select a number.
   - Dialing starts automatically.

You can also select Phonebook on the Phone Menu screen.
To make a call using a phone number
1. Go to the Phone Menu screen.
   - Phone Menu screen P. 414
2. Select Dial.
3. Select a number.
   - Use the keyboard on the touch screen for entering numbers.
4. Select \( \) .
   - Dialing starts automatically.

To make a call using redial
1. Go to the Phone Menu screen.
   - Phone Menu screen P. 414
2. Select Redial.
   - Dialing starts automatically.

To make a call using the Call History
Call history is stored by All, Dialed, Received, and Missed.
1. Go to the Phone Menu screen.
   - Phone Menu screen P. 414
2. Select Call History.
3. Select All, Dialed, Received, or Missed.
4. Select a number.
   - Dialing starts automatically.

To make a call using the Call History
The call history displays the last 20 all, dialed, received, or missed calls.
(Appears only when a phone is connected to the system.)
To make a call using a Speed Dial entry

1. Go to the Phone Menu screen.
   - Phone Menu screen P. 414
2. Select Speed Dial.
3. Select a number.
   - Dialing starts automatically.

Receiving a Call

When there is an incoming call, an audible notification sounds (if activated) and the Incoming call screen appears.

Press the Answer button to answer the call.
Press the Ignore button to decline or end the call.

To make a call using a Speed Dial entry

When a voice tag is stored, press the button to call the number using the voice tag.
   - Speed Dial P. 422
Any voice-tagged speed dial entry can be dialed by voice from any screen.
Press the button and follow the prompts.

Receiving a Call

Call Waiting
Press the button to put the current call on hold to answer the incoming call.
Press the button again to return to the current call.
Select Ignore to ignore the incoming call if you do not want to answer it.
Press the button if you want to hang up the current call.

You can select the icons on the audio/information screen instead of the Answer and Ignore buttons.
The following options are available during a call.

**Mute**: Mute your voice.

**Transfer**: Transfer a call from the system to your phone.

**Touch Tones**: Send numbers during a call. This is useful when you call a menu-driven phone system.

The available options are shown on the lower half of the screen.

Select the option.

- The mute icon appears when **Mute** is selected. Select **Mute** again to turn it off.
Receiving a Text Message/E-mail

HFL can display newly received text or e-mail messages as well as 20 of the most recently received messages on a linked cell phone. Each received message can be read aloud and replied to using a fixed common phrase.

1. A pop-up appears and notifies you of a new text message or e-mail.
2. Select Read to listen to the message.
   - The text message or e-mail is displayed.
   - The system automatically starts reading out the message.
3. To discontinue the message read-out, select Stop.

Receiving a Text Message/E-mail

The system does not display any received messages while you are driving. You can only hear them read aloud.

The system can only receive messages that are sent as text (SMS) messages. Messages sent using the data services will not be displayed in the list.

With some phones, you may be able to display up to 20 most recent text messages and e-mails.

State or local laws may limit your use of the HFL text message/e-mail feature. Only use the text message/e-mail feature when conditions allow you to do so safely.

When you receive a text message or e-mail for the first time since the phone is paired to HFL, you are asked to turn the New Message Notification setting to On.

To turn on or off the text/e-mail notice

P. 419
Selecting a Mail Account

If a paired phone has text message or mail accounts, you can select one of them to be active and receive notifications.

1. Go to the Phone Settings screen.
2. Select the Text/Email tab, then Select Account.
   - A pop-up menu appears on the screen.
3. Select Text Messages or an e-mail account you want.

You can also select a mail account from the folder list screen or the message list screen.

You can only receive notifications from one text message or mail account at a time.
### Displaying Messages

#### Displaying text messages

1. Go to the **Phone Menu** screen.
   - Phone Menu screen P. 414
2. Select **Text/Email**.
   - Select account if necessary.
3. Select a message.
   - The text message is displayed. The system automatically starts reading the message aloud.

#### Displaying Messages

The icon appears next to an unread message.

If you delete a message on the phone, the message is also deleted in the system. If you send a message from the system, the message goes to your phone’s outbox.

To see the previous or next message, select (previous) or (next) on the message screen.
■ Displaying e-mails
1. Go to the Phone Menu screen.
  - Phone Menu screen P. 414
2. Select Text/Email.
   - Select Select Account if necessary.
3. Select a folder.
4. Select a message.
   - The e-mail is displayed. The system automatically starts reading the message aloud.
■ Read or Stop reading a message
1. Go to the text or e-mail message screen. The system automatically starts reading the message aloud.
2. Select Stop to stop reading. Select Read again to start reading the message from the beginning.

■ Reply to a message
1. Go to the text or e-mail message screen. The system automatically starts reading the message aloud.
2. Select Reply.
3. Select the reply message.
4. Select Send to send the message. Complete appears on the screen when the reply message was successfully sent.

The available fixed reply messages are as follows:
- Talk to you later, I'm driving.
- I'm on my way.
- I'm running late.
- OK
- Yes
- No

You cannot add, edit, or delete reply messages.

Only certain phones receive and send messages when paired and connected. For a list of compatible phones:
- U.S.: Visit automobiles.honda.com/handsfreelink/, or call 1-888-528-7876.
- Canada: For more information on smartphone compatibility, call 1-855-490-7351.
Making a call to a sender
1. Go to the text message screen.
2. Select Dial.
In Case of Emergency

Automatic collision notification

If your vehicle’s airbags deploy or if the unit detects that the vehicle is severely impacted, your vehicle automatically will attempt to connect to the HondaLink operator. If connected, information about your vehicle, its location, and its condition can be sent to the operator*1; you also can speak to the operator when connected.

IMPORTANT: For vehicles equipped with HondaLink Assist, owner activation constitutes authorization for Honda to collect information from your vehicle needed to provide the service, and agreement to the Terms of Use at www.hondalink.com/TermsAndConditions. In a crash, HondaLink Assist will attempt to notify emergency services but NEITHER Honda-PRO NOR ITS SERVICE PROVIDERS GUARANTEE THAT SUCH NOTIFICATION WILL OCCUR.

Honda reserves the right to terminate HondaLink Assist services at any time or for any reason, and in the future may not be able to provide services due to changes in, or obsolescence of, technology integral to the service or changes in governmental regulation.

*1: Depending on your phone and adequate cellular coverage, your vehicle’s location may not be sent to the operator.
■ To enable notification

1. Go to the Phone Settings screen.  
   Phone Settings screen P. 411
2. Select the Phone tab, then HondaLink Assist.  
   A pop-up menu appears on the screen.
3. Select On or Off.

Setting options:
• On: Notification is available.
• Off: Disable the feature.
When you turn the ignition switch to ON, the compass self-calibrates, and the compass display appears.

**Compass Calibration**

If the compass indicates the wrong direction, or the CAL indicator blinks, you need to manually calibrate the system.

1. Turn the ignition switch to ON.
2. Press and hold the day/night button until the display shows the compass setting menu.
3. Rotate to select Calibration, then press.
4. When the display changes to Push CAL Start, press.
5. Drive the vehicle slowly in two circles.

The compass starts to show a direction after the calibration. The CAL indicator goes off.

- **Compass**
  - Compass operation can be affected under the following conditions:
    - Driving near power lines or stations
    - Crossing a bridge
    - Passing a large vehicle, or driving near a large object that can cause a magnetic disturbance
    - When accessories such as antennas and roof racks are mounted by magnets
  
- **Compass Calibration**
  - Calibrate the compass in an open area.
  - While setting the compass:
    - The Back button returns to the previous screen.

* Not available on all models
Compass Zone Selection

1. Turn the ignition switch to ON [Ⅰ].
2. Press and hold the [ ]. (day/night) button until the display shows the compass setting menu.
3. Rotate [ ] to select Zone, then press [ ]. The display shows the current zone number.
4. Rotate [ ] to select the zone number of your area (See Zone Map), then press [ ].

The zone selection is done to compensate the variation between magnetic north and true north.

If the calibration starts while the audio system is in use, the display returns to normal after the calibration is completed.

Zone Map

Guam Island: Zone 8
Puerto Rico: Zone 11
Driving

This chapter discusses driving and refueling.
Before Driving

Driving Preparation

Check the following items before you start driving.

Exterior Checks

- Make sure there are no obstructions on the windows, door mirrors, exterior lights, or other parts of the vehicle.
  - Remove any frost, snow, or ice.
  - Remove any snow on the roof, as this can slip down and obstruct your field of vision while driving. If frozen solid, remove ice once it has softened.
  - When removing ice from around the wheels, be sure not to damage the wheel or wheel components.
- Make sure the hood is securely closed.
  - If the hood opens while driving, your front view will be blocked.
- Make sure the tires are in good condition.
  - Check air pressures, and check for damage and excessive wear.
  - Checking and Maintaining Tires P. 595
- Make sure there are no people or objects behind or around the vehicle.
  - There are blind spots from the inside.

Exterior Checks

NOTICE

When doors are frozen shut, use warm water around the door edges to melt any ice. Do not try to force them open, as this can damage the rubber trim around the doors. When done, wipe dry to avoid further freezing.

Do not pour warm water into the key cylinder. You will be unable to insert the key if the water freezes in the hole.

Heat from the engine and exhaust can ignite flammable materials left under the hood, causing a fire. If you’ve parked your vehicle for an extended period, inspect and remove any debris that may have collected, such as dried grass and leaves that have fallen or have been carried in for use as a nest by a small animal. Also check under the hood for leftover flammable materials after you or someone else has performed maintenance on your vehicle.
Before Driving

Driving Preparation

• Store or secure all items on board properly.
  - Carrying too much cargo, or improperly storing it, can affect your vehicle’s handling, stability, stopping distance, and tires, and make it unsafe.
    - Maximum Load Limit P. 449

• Do not pile items higher than the seat height.
  - They can block your view and may be thrown forward in the event of sudden braking.

• Do not place anything in the front seat footwells. Make sure to secure the floor mat.
  - An object or unsecured floor mat can interfere with your brake and accelerator pedal operation while driving.

• If you have any animals on board, do not let them move around in the vehicle.
  - They may interfere with driving and a crash could occur.

• Securely close and lock all doors and the tailgate.
  - Locking/Unlocking the Doors from the Inside P. 142

• Adjust your seating position properly.
  - Adjust the head restraint, too.
    - Adjusting the Seats P. 195
    - Adjusting the Front Head Restraints P. 201

• Adjust the mirrors and steering wheel properly for your driving.
  - Adjust them while sitting in the proper driving position.
    - Adjusting the Steering Wheel P. 192
    - Adjusting the Mirrors P. 193

• Interior Checks
  The headlight aim is set by the factory, and does not need to be adjusted. However, if you regularly carry heavy items in the cargo area or tow a trailer, have the aiming readjusted at a dealer or by a qualified technician.
Before Driving

Driving Preparation

- Be sure items placed on the floor behind the front seats cannot roll under the seats. They can interfere with the driver's ability to operate the pedals, the operation of the seats, or the operation of the sensors under the seats.
- Everyone in the vehicle must fasten their seat belt. Fastening a Seat Belt P. 44
- Make sure that the indicators in the instrument panel come on when you start the vehicle, and go off soon after. Always have a dealer check the vehicle if a problem is indicated. Indicators P. 80
Maximum Load Limit

The maximum load for your vehicle is 850 lbs (385 kg). See the Tire and Loading Information label attached to the driver’s doorjamb.

Steps for Determining Correct Load Limit -

(1) Locate the statement “The combined weight of occupants and cargo should never exceed XXX kg or XXX lbs.” on your vehicle’s placard.

(2) Determine the combined weight of the driver and passengers that will be riding in your vehicle.

(3) Subtract the combined weight of the driver and passengers from XXX kg or XXX lbs.

(4) The resulting figure equals the available amount of cargo and luggage load capacity. For example, if the “XXX” amount equals 1,400 lbs. and there will be five 150 lb. passengers in your vehicle, the amount of available cargo and luggage load capacity is 650 lbs.

(1,400 - 750 (5 x 150) = 650 lbs.)

WARNING

Overloading or improper loading can affect handling and stability and cause a crash in which you can be hurt or killed.

Follow all load limits and other loading guidelines in this manual.

Gross Vehicle Weight Rating (GVWR):
The maximum allowable weight of the vehicle, all occupants, all accessories, all cargo, and the tongue load.

Specifications P. 648

Gross Axle Weight Rating (GAWR):
The maximum allowable weight of the vehicle axle.

Specifications P. 648
(5) Determine the combined weight of luggage and cargo being loaded on the vehicle. That weight may not safely exceed the available cargo and luggage load capacity calculated in step 4.

(6) If your vehicle will be towing a trailer, load from your trailer will be transferred to your vehicle. Consult this manual to determine how this reduces the available cargo and luggage load capacity of your vehicle.

In addition, the total weight of the vehicle, all occupants, accessories, cargo, and trailer tongue load must not exceed the Gross Vehicle Weight Rating (GVWR) or the Gross Axle Weight Rating (GAWR). Both are on a label on the driver’s doorjamb.

<table>

**Maximum Load Limit**

Towing a Trailer:
See Towing a Trailer to determine whether your vehicle is designed to tow a trailer.

**Towing a Trailer** P. 451
Towing a Trailer

Towing Preparation

### Towing Load Limits
Your vehicle can tow a trailer if you carefully observe the load limits, use the proper equipment, and follow the towing guidelines. Check the load limits before driving.

■ **Total trailer weight**
Maximum allowable weight of the trailer, cargo, and everything in or on it must not exceed 1,500 lbs (680 kg). Towing loads in excess of this can seriously affect vehicle handling and performance and can damage the engine and drivetrain.

■ **Tongue load**
The weight of the tongue with a fully loaded trailer on the hitch should be approximately 10% of the total trailer weight.
- Excessive tongue load reduces front tire traction and steering control. Too little tongue load can make the trailer unstable and cause it to sway.
- To achieve a proper tongue load, start by loading 60% of the load toward the front of the trailer and 40% toward the rear. Readjust the load as needed.

### Towing Load Limits
Check if all loads are within limits at a public scale. If a public scale is not available, add the estimated weight of your cargo load to the weight of your trailer (as quoted by the manufacturer), and the tongue load.

#### WARNING
Exceeding any load limit or improperly loading your vehicle and trailer can cause a crash in which you can be seriously hurt or killed.

Check the loading of your vehicle and trailer carefully before starting to drive.

- Break-in Period
  Avoid towing a trailer during your vehicle’s first 600 miles (1,000 km).

- Never exceed the gross weight ratings.
  Gross weight information
  - Specifications P. 648

**Continued**
Towing Equipment and Accessories

Towing equipment varies by the size of your trailer, how much load you are towing, and where you are towing.

■ Hitches
The hitch must be of an approved type and properly bolted to the underbody.

■ Safety chains
Always use safety chains when you tow a trailer. Leave enough slack to allow the trailer to turn corners easily, but do not allow the chains to drag on the ground.

■ Trailer brakes
Recommended for any trailer with a total weight of 1,000 lbs (450 kg) or more: There are two common types of trailer brakes: surge and electric. Surge brakes are common for boat trailers, since the brakes will get wet. If you choose electric brakes, be sure they are electronically actuated. Do not attempt to attach trailer brakes to your vehicle’s hydraulic system, as it will lower braking effectiveness and create a potential hazard.

■ Additional towing equipment
Many states and provinces/territories require special outside mirrors when towing a trailer. Even if mirrors are not required in your locale, you should install special mirrors if visibility is restricted in any way.

Towing Equipment and Accessories

Make sure that all equipment is properly installed and maintained, and that it meets federal, state, province/ territory, and local regulations.

Consult your trailer maker for proper installation and setup of the equipment. Improper installation and setup can affect the handling, stability, and braking performance of your vehicle.

Consult your trailer sales or rental agency if any other items are recommended or required for your towing situation.

The lighting and wiring of trailers can vary by type and brand. If a connector is required, it should only be installed by a qualified technician.

Trailer packages and products:
- Ball mount, hitch plug, hitch pin etc.
- Wiring harness kit
- Trailer hitch kit

Trailer brakes P. 452
Are available at a dealer.
**Trailer light**

Trailer lights and equipment must comply with federal, state, province/territory, and local regulations. Check with your local trailer sales or rental agency for the requirements in the area where you plan to tow.

The trailer lighting connector is located behind the left side panel in the cargo area. Even if you are planning to use the non-Honda trailer lighting harness and converter, ask a dealer for the correct connector and pins.

We recommend that you have a dealer install a Honda wiring harness and converter. They are designed for your vehicle.

The lighting and wiring of trailers can vary by type and brand. If a connector is required, it should only be installed by a qualified technician.
Driving Safely with a Trailer

- **Things You Need To Know Before Towing a Trailer**
  - Have the trailer properly serviced and keep it in good condition.
  - Make sure that all the weights and load in the vehicle and trailer are within limits.
  - Securely attach the hitch, safety chains, and other necessary parts to the trailer.
  - Securely store all the items in and on the trailer so that they do not shift while driving.
  - Check if the lights and brakes on the trailer are working properly.
  - Check the pressures of the trailer tires, including the spare.

- **Towing Speeds and Gears**
  - Drive slower than normal.
  - Obey posted speed limits for vehicles with trailers.
  - Use the [D] position when towing a trailer on level roads.

- **Turning and Braking**
  - Turn more slowly and with a wider turning arc than normal.
  - Allow more time and distance for braking.
  - Do not brake or turn suddenly.

- **Driving in Hilly Terrain**
  - Monitor your temperature gauge. If it nears the white (H) mark, turn off the climate control system and reduce speed. Pull to the side of the road safely to cool down the engine if necessary.
Towing Your Vehicle

Your vehicle is not designed to be towed behind a motor home. If your vehicle needs to be towed in an emergency, refer to the emergency towing information.

Emergency Towing P. 644
Off-Highway Driving Guidelines

General Information

Your vehicle has been designed primarily for use on pavement, however, its higher ground clearance allows you to occasionally travel on unpaved roads. It is not designed for trail-blazing, or other challenging off-highway activities.

If you decide to drive on unpaved roads, you will find that it requires somewhat different driving skills and that your vehicle will handle somewhat differently than it does on pavement. Pay attention to the precautions and tips in this section, and get acquainted with your vehicle before leaving the pavement.

Important Safety Precautions

To avoid loss of control or rollover, be sure to follow all precautions and recommendations:

• Be sure to store cargo properly and do not exceed your cargo load limits.  
  Maximum Load Limit P. 449
• Whenever you drive, make sure you and your passengers always wear seat belts.
• Keep your speed low, and never go faster than the conditions allow.
• It’s up to you to continually assess the situation and drive within the limits.

WARNING

Improperly operating this vehicle on or the off pavement can cause a crash or rollover in which you and your passengers could be seriously injured or killed.

• Follow all instructions and guidelines in this owner's manual.
• Keep your speed low, and don’t drive faster than conditions permit.

Failure to operate your vehicle correctly might result in a crash or a rollover.

Important Handling Information P. 36
Precautions While Driving P. 465
Avoiding Trouble

- **Check Out Your Vehicle** before you leave the pavement and make sure that all scheduled maintenance has been completed. Pay special attention to the condition of the tires, and check the tire pressures.

- **Remember** the route you choose presents limits (too steep or bumpy), you have limits (driving skill and comfort), and your vehicle has limits (traction, stability, and power). Failing to recognize these limits will likely put you and your passengers in a hazardous situation.

- **Accelerating and Braking** should be done slowly and gradually. Trying to start or stop too fast can cause a loss of traction and you could lose control.

- **Avoiding Obstacles and Debris** in the road reduces the likelihood of a rollover or damage to your suspension or other components.

- **Driving on Slopes** increases your risk of a rollover, particularly if you attempt to drive across a slope that is too steep. Going straight or down a slope is usually the safest. If you can’t clearly see all conditions or obstacles on a slope, walk it before you drive it. If there is any doubt whether you can safely pass, don’t try it. Find another route. If you get stuck when climbing, do not try to turn around. Back down slowly following the same route you took up the hill.

- **Crossing a Stream** - Avoid driving through deep water. If you encounter water in your route (a small stream or large puddle, for example), evaluate it carefully before going ahead. Make sure it is shallow, flowing slowly, and has firm ground underneath. If you are not sure of the depth or the ground, turn around and find another route. Driving through deep water can also damage your vehicle. The water can get into the transmission and differential, diluting the lubricant and causing an eventual failure. It can also wash the grease out of the wheel bearings.

- **If You Get Stuck**, carefully go in the direction that you think will get you unstuck. Do not spin the tires as this will only make things worse and could damage the transmission. If you are unable to free yourself, your vehicle will need to be towed. Front and rear tow hooks are provided for this purpose.
When Driving

Models without smart entry system

Starting the Engine

1. Make sure the parking brake is applied.
   - The parking brake and brake system indicator comes on for 15 seconds when you pull up the electric parking brake switch.
   - The parking brake must be applied to start the engine.

2. Check that the shift lever is in **P**, then depress the brake pedal.
   - Although it is possible to start the vehicle in **N** with the parking brake applied, it is safer to start it in **P**.

3. Turn the ignition switch to START **III** without depressing the accelerator pedal.

Starting the Engine

Keep your foot firmly on the brake pedal when starting the engine.

The engine is harder to start in cold weather and in thinner air found at altitudes above 8,000 feet (2,400 meters).

When starting the engine in cold weather, turn off all electrical accessories such as the lights, climate control system, and rear defogger in order to reduce battery drain.

If you live in a region where winter is extremely cold, an engine block heater will improve starting and warming of the engine. Consult a dealer for details.

If the exhaust system sounds abnormal or you can smell exhaust gas inside the vehicle, have your vehicle checked by a dealer. There may be a problem with the engine or exhaust system.

Do not hold the key in START **III** for more than 10 seconds.
- If the engine does not start right away, wait for at least 30 seconds before trying again.
- If the engine starts, but then immediately stops, wait at least 30 seconds before repeating step 3 while gently depressing the accelerator pedal. Release the accelerator pedal once the engine starts.
When Driving

Starting the Engine

1. Keeping your right foot on the brake pedal, put the shift lever in **D**. Select **R** when reversing.

2. With the parking brake applied, release the brake pedal and gently depress the accelerator pedal.
   - Make sure the parking brake and brake system indicator goes off.

Hill start assist system

Hill start assist keeps the brake engaged briefly to help prevent the vehicle from rolling on inclines as you move your foot from the brake pedal to the accelerator.

Move the shift lever to **D**, **S**, or **L** when facing uphill, or **R** when facing downhill, then release the brake pedal.

Starting to Drive

1. Keeping your right foot on the brake pedal, put the shift lever in **D**. Select **R** when reversing.

2. With the parking brake applied, release the brake pedal and gently depress the accelerator pedal.
   - Make sure the parking brake and brake system indicator goes off.

Parking Brake P. 522

Hill start assist system

Hill start assist may not prevent the vehicle from rolling downhill on a very steep or slippery slope, and does not operate on small inclines.

Hill start assist is not a replacement for the parking brake.

Hill start assist will operate even when VSA® is switched off.

Starting to Drive

The immobilizer system protects your vehicle from theft. If an improperly coded key (or other device) is used, the engine's fuel system is disabled.

Immobilizer System P. 159

You can also release the parking brake by pressing the electric parking brake switch while depressing the brake pedal. When facing downhill, you can start your vehicle more smoothly by manually releasing it with the electric parking brake switch than by releasing it with the accelerator pedal.
Starting the Engine

1. Make sure the parking brake is applied.
   ► The parking brake and brake system indicator comes on for 15 seconds when you pull up the electric parking brake switch.
   ► The parking brake must be applied to start the engine.

2. Check that the shift lever is in [P], then depress the brake pedal.
   ► Although it is possible to start the vehicle in [N] with the parking brake applied, it is safer to start it in [P].

Starting the Engine

Keep your foot firmly on the brake pedal when starting the engine.

The engine is harder to start in cold weather and in thinner air found at altitudes above 8,000 feet (2,400 meters).

When starting the engine in cold weather, turn off all electrical accessories such as the lights, climate control system, and rear defogger in order to reduce battery drain.

If you live in a region where winter is extremely cold, an engine block heater will improve starting and warming of the engine. Consult a dealer for details.

If the exhaust system sounds abnormal or you can smell exhaust gas inside the vehicle, have your vehicle checked by a dealer. There may be a problem with the engine or exhaust system.

The immobilizer system protects your vehicle from theft.
   If an improperly coded device is used, the engine’s fuel system is disabled.

☞ Immobilizer System P. 159
Starting the Engine

Bring the smart entry remote close to the ENGINE START/STOP button if the battery in the smart entry remote is weak.

- If the Smart Entry Remote Battery is Weak
  P. 625

The engine may not start if the smart entry remote is subjected to strong radio waves.

Do not hold the ENGINE START/STOP button to start the engine.

If the engine does not start, wait at least 30 seconds before trying again.

Stopping the Engine

You can turn the engine off when the vehicle is completely stopped.

1. Shift to [P].
2. Press the ENGINE START/STOP button.

3. Press the ENGINE START/STOP button without depressing the accelerator pedal.
When Driving  Starting the Engine

Remote Engine Start with Vehicle Feedback*

You can remotely start the engine using the button on the smart entry remote.

To start the engine

Press the button, then press and hold the button. Some exterior lights flash once.

LED: Blinks when any button is pressed.

Go within the range, and try again.

When started remotely, the engine automatically shuts off after 10 minutes of idling and/or the brake pedal and ENGINE START/STOP button have not been pressed simultaneously.

To extend the run time for another 10 minutes during the first run, press the button, then press and hold the button.

Some exterior lights flash six times if the engine runs successfully.

Some exterior lights will not flash if the engine runs unsuccessfully.

Never use the remote engine starter when the vehicle is parked in a garage or other area with limited ventilation.

WARNING

Engine exhaust contains toxic carbon monoxide.

Breathing carbon monoxide can kill you or cause unconsciousness.

The remote engine start may violate local laws. Before using the remote engine start, check your local laws.

The range may be less when the vehicle is running. This distance may vary by external electrical interference.

The engine may not start by the remote engine start if:

• You have disabled a remote engine start setting using the audio/information screen*.
• The power mode is not in VEHICLE OFF (LOCK).
• The gear is in a position other than P.
• The hood is open, or any door or the tailgate is unlocked.

* Not available on all models
When Driving

Starting the Engine

To stop the engine

Go within the range, and try again.

The exterior lights will not flash when the remote is out of the smart entry system range. The engine will not stop.

Press and hold the button for one second.

The exterior lights flash once if the engine stops successfully.

Remote Engine Start with Vehicle Feedback*

- You have already used the remote twice to start the engine.
- Another registered smart entry remote is in the vehicle.
- There is an antenna failure.
- The door is unlocked with the built-in key.
- The engine oil pressure is low.
- The engine coolant temperature is extremely high.
- The security system alarm is not set.

While the engine is running, the vehicle will automatically precondition inside the vehicle.

When it is warm outside:
- The air conditioning is activated in recirculation mode.

When it is cold outside:
- The defroster is activated at a moderately warm temperature.
- The rear defogger and door mirror heaters* are activated.
- The seat and heated steering wheel are activated*

Heated Steering Wheel* P. 220
Front Seat Heaters* P. 221

Continued
Starting to Drive

When the engine was started using the button* on the smart entry remote
1. Depress the brake pedal and press the ENGINE START/STOP button simultaneously.

When the engine was started in any case
2. Put the shift lever in D. Select R when reversing.
3. With the parking brake is applied, release the brake pedal and gently depress the accelerator pedal.
   ▶ Make sure the parking brake and brake system indicator goes off.
4. Gradually release the brake pedal and gently depress the accelerator pedal to pull away.

Hill start assist system
Hill start assist keeps the brake engaged briefly to help prevent the vehicle from rolling on inclines as you move your foot from the brake pedal to the accelerator. Move the shift lever to D, S, or L when facing uphill, or R when facing downhill, then release the brake pedal.

Starting to Drive

When the engine was started using the button* on the smart entry remote
The engine stops when the shift lever is moved out of P before the ENGINE START/STOP button is pressed. Follow step 1 when starting to drive.

You can also release the parking brake by pressing the electric parking brake switch while depressing the brake pedal. When facing downhill, you can start your vehicle more smoothly by manually releasing it with the electric parking brake switch than by releasing it with the accelerator pedal.

Hill start assist system
Hill start assist may not prevent the vehicle from rolling downhill on a very steep or slippery slope, and does not operate on small inclines.

Hill start assist is not a replacement for the parking brake.

Hill start assist will operate even when VSA® is switched off.

* Not available on all models
Precautions While Driving

Driving Guidelines for Your Utility Vehicle

Utility vehicles have a significantly higher rollover rate than other types of vehicles. To prevent rollovers or loss of control:

- Take corners at slower speeds than you would with a passenger vehicle.
- Avoid sharp turns and abrupt maneuvers whenever possible.
- Do not modify your vehicle in any way that you would raise the center of gravity.
- Roof load capacity is 165 lbs (75 kg), available roof racks/carriers may have lower capacities. Please check accessory’s information (Honda accessory).

In Rain

Avoid driving in deep water and on flooded roads. This can damage the engine or driveline, or cause electrical component failure.

Other Precautions

If there is a strong impact with something under the vehicle, stop in a safe location. Check the underside of the vehicle for damage or any fluid leaks.
When Driving

Continuously Variable Transmission

Creeping

The engine runs at a higher idle speed and creeping increases. Keep the brake pedal firmly depressed when stopped.

Kickdown

Quickly depressing the accelerator pedal while driving uphill may cause the transmission to drop to a lower ratio, unexpectedly increasing vehicle speed. Depress the accelerator pedal carefully, especially on slippery roads and curves.

Precautions While Driving

If the ignition switch is turned to ACCESSORY \(^1\) while driving, the engine will shut down and all steering and brake power assist functions will stop, making it difficult to control the vehicle.

Do not put the shift lever in N, as you will lose engine braking (and acceleration) performance.

During the first 600 miles (1,000 km) of operation, avoid sudden acceleration or full throttle operation so as to not damage the engine or powertrain.

Avoid hard braking for the first 200 miles (300 km). You should also follow this when the brake pads are replaced.

\(^1\) Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

Driving Guidelines for Your Utility Vehicle

Failure to operate your vehicle correctly might result in a crash or a rollover.

Important Handling Information P. 36

Precautions While Driving P. 465
Shifting

Change the shift position in accordance with your driving needs.

■ Shift lever positions

- Park
  Used when parking or starting the engine

- Reverse
  Used when reversing

- Neutral
  Transmission is not locked

- Drive
  Used for normal driving

- Drive (S)
  Used:
  • For better acceleration
  • To increase engine braking
  • When going up or down hills

- Low
  • Used to further increase engine braking
  • Used when going up or down hills

You cannot turn the ignition switch to LOCK [0]*1 and remove the key unless the shift lever is in [P].

The vehicle may move forward very slightly even in [N] while the engine is cold. Depress the brake pedal firmly and, when necessary, apply the parking brake.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
When Driving

Shifting

### Shift Lever Operation

**Models with information display**

- Shift Lever Position Indicator (Transmission System Indicator)
- Tachometer's red zone

**Models with driver information interface**

- Shift Lever Position Indicator (Transmission System Indicator)
- Tachometer's red zone

1. Depress the brake pedal and press the shift lever release button to shift.
2. Shift without pressing the shift lever release button.
3. Press the shift lever release button and shift.

---

**NOTICE**

When you change the shift lever from (D) to (R) and vice versa, come to a complete stop and keep the brake pedal depressed. Operating the shift lever before the vehicle has come to a complete standstill can damage the transmission.

Use the shift lever position indicator to check the lever position before pulling away.

If the indicator of the currently selected gear position, or the transmission system indicators are blinking simultaneously, there is a problem with the transmission.

Avoid sudden acceleration and have the transmission checked by a dealer as soon as possible.

The fuel supply may be cut off if you drive at engine speeds in or over the tachometer’s red zone (engine speed limit). If this happens, you may experience a slight jolt.

It may not be possible to operate the shift lever if the brake pedal is applied while the shift lever release button is held down. Depress the brake pedal first.
ECON Button

The ECON button turns the ECON mode on and off. The ECON mode helps you improve your fuel economy by adjusting the performance of the engine, transmission, climate control system, and cruise control.
When Driving ➤ Cruise Control*

Cruise Control*

Models with information display
Maintains a constant vehicle speed without having to keep your foot on the accelerator. Use cruise control on freeways or open roads where you can travel at a constant speed with little acceleration or deceleration.

When to use
- Vehicle speed for cruise control:
  Desired speed in a range above roughly 25 mph (40 km/h) ~
  Always keep sufficient distance between you and the vehicle in front of you.
- Shift positions for cruise control:
  In D or S

How to use
- Press the CRUISE button on the steering wheel.
  CRUISE MAIN is on in the instrument panel. Cruise control is ready to use.

WARNING
Improper use of the cruise control can lead to a crash.

Use the cruise control only when traveling on open highways in good weather.

It may not be possible to maintain a constant speed when driving uphill or downhill.

When not using cruise control:
  Turn off cruise control by pressing the CRUISE button.
  While in the ECON mode, it may take relatively more time to accelerate to maintain the set speed.

* Not available on all models
To Set the Vehicle Speed

Take your foot off the pedal and press the −/SET button when you reach the desired speed.

The moment you release the −/SET button, the set speed is fixed, and cruise control begins. The CRUISE CONTROL indicator comes on.

When you use cruise control, Straight Driving Assist (a feature of the Electric Power Steering system) is activated.

By enabling the steering system to automatically compensate for natural steering pull, Straight Driving Assist makes it easier for you to keep your vehicle in a straight line.
When Driving

Cruise Control

To Adjust the Vehicle Speed

Increase or decrease the vehicle speed using the RES/+ or −/SET buttons on the steering wheel.

- Each time you press the button, the vehicle speed is increased or decreased by about 1 mph (1.6 km/h).
- If you keep the button pressed, the vehicle speed increases or decreases until you release it. This speed is then set.

To Cancel

To cancel cruise control, do any of the following:
- Press the CANCEL button.
- Press the CRUISE button.
- Depress the brake pedal.

The CRUISE CONTROL indicator goes off.

To Adjust the Vehicle Speed

You can set the vehicle speed using the −/SET button on the steering wheel when adjusting the speed with the accelerator and brake pedals.

To Cancel

Resuming the prior set speed:
After cruise control has been canceled, you can still resume the prior set speed by pressing the RES/+ button while driving at a speed of at least 25 mph (40 km/h) or more.

You cannot set or resume in the following situations:
- When vehicle speed is less than 25 mph (40 km/h)
- When the CRUISE button is turned off

At vehicle speeds of 22 mph (35 km/h) or less, cruise control is canceled automatically.
Cruise Control*

Models with driver information interface
Maintains a constant vehicle speed without having to keep your foot on the accelerator. Use cruise control on freeways or open roads where you can travel at a constant speed with little acceleration or deceleration.

When to use
- Vehicle speed for cruise control: Desired speed in a range from about 25 mph (40 km/h) to 125 mph (200 km/h)
- Shift positions for cruise control: In D or S

Always keep sufficient distance between you and the vehicle in front of you.

How to use
- Press the CRUISE button on the steering wheel.

CRUISE MAIN is on in the instrument panel. Cruise control is ready to use.

* Not available on all models

**WARNING**
Improper use of the cruise control can lead to a crash.

Use the cruise control only when traveling on open highways in good weather.

It may not be possible to maintain a constant speed when driving uphill or downhill.

When not using cruise control:
Turn off cruise control by pressing the CRUISE button.

While in the ECON mode, it may take relatively more time to accelerate to maintain the set speed.

Continued
When Driving Cruise Control

To Set the Vehicle Speed

Take your foot off the pedal and press the \(-/SET\) button when you reach the desired speed.

The moment you release the \(-/SET\) button, the set speed is fixed, and cruise control begins. The set speed is displayed. The CRUISE CONTROL indicator and set speed comes on.

When you use cruise control, Straight Driving Assist (a feature of the Electric Power Steering system) is activated. By enabling the steering system to automatically compensate for natural steering pull, Straight Driving Assist makes it easier for you to keep your vehicle in a straight line.
When Driving

Cruise Control

To Adjust the Vehicle Speed

Increase or decrease the vehicle speed using the RES/+ or ←/SET buttons on the steering wheel.

- Each time you press the button, the vehicle speed is increased or decreased by about 1 mph or 1 km/h accordingly.
- If you keep the button pressed, the speed limit increases or decreases in increments of 5 mph or 5 km/h every 0.5 second until system limit is reached.
- The vehicle may accelerate or decelerate until the set speed is reached.

To Adjust the Vehicle Speed

You can set the vehicle speed using the ←/SET button on the steering wheel when adjusting the speed with the accelerator and brake pedals.

Continued
When Driving

Cruise Control

To Cancel

To cancel cruise control, do any of the following:

- Press the CANCEL button.
- Press the CRUISE button.
- Depress the brake pedal.

The CRUISE CONTROL indicator goes off.

Resuming the prior set speed:

After cruise control has been canceled, you can still resume the prior set speed by pressing the RES/+ button while driving at a speed of at least 25 mph (40 km/h) or more.

You cannot set or resume in the following situations:

- When vehicle speed is less than 25 mph (40 km/h)
- When the CRUISE button is turned off

At vehicle speeds of 22 mph (35 km/h) or less, cruise control is canceled automatically.
When Driving

Front Sensor Camera

The camera, used in systems such as RDM, LKAS, ACC with LSF and CMBS™, is designed to detect an object that triggers any of the systems to operate their functions.

Camera Location and Handling Tips

This camera is located behind the rearview mirror.

To help reduce the likelihood that high interior temperatures will cause the camera's sensing system to shut off, when parking, find a shady area or face the front of the vehicle away from the sun. If you use a reflective sun shade, do not allow it to cover the camera housing. Covering the camera can concentrate heat on it.

Never apply a film or attach any objects to the windshield, the hood, or the front grille that could obstruct the camera’s field of vision and cause the system to operate abnormally. Scratches, nicks, and other damage to the windshield within the camera’s field of vision can cause the system to operate abnormally. If this occurs, we recommend that you replace the windshield with a genuine Honda replacement windshield. Making even minor repairs within the camera’s field of vision or installing an aftermarket replacement windshield may also cause the system to operate abnormally. After replacing the windshield, have a dealer recalibrate the camera. Proper calibration of the camera is necessary for the system to operate properly.

* Not available on all models

Continued
When Driving

Front Sensor Camera *

Do not place an object on the top of the instrument panel. It may reflect onto the windshield and prevent the system from detecting lane lines properly.

If the Some Driver Assist Systems Cannot Operate: Camera Temperature Too High message appears:
• Use the climate control system to cool down the interior and, if necessary, also use defroster mode with the air flow directed toward the camera.
• Start driving the vehicle to lower the windshield temperature, which cools down the area around the camera.

If the Some Driver Assist Systems Cannot Operate: Clean Front Windshield message appears:
• Park your vehicle in a safe place, and clean the windshield. If the message does not disappear after you have cleaned the windshield and driven for a while, have your vehicle checked by a dealer.

* Not available on all models
Adaptive Cruise Control (ACC) with Low Speed Follow (LSF)*

Helps maintain a constant vehicle speed and a set following-interval behind a vehicle detected ahead of yours and, if the detected vehicle comes to a stop, can decelerate and stop your vehicle, without you having to keep your foot on the brake or the accelerator.

When ACC with LSF slows your vehicle by applying the brakes, your vehicle’s brake lights will illuminate.

When to use

- The camera is located behind the rearview mirror.
- The radar sensor is inside the front grille.

- **Vehicle speed for ACC with LSF:** A vehicle is detected ahead within ACC with LSF range – ACC with LSF operates at speeds up to 90 mph (145 km/h).
- **No vehicle is detected within ACC with LSF range** – ACC with LSF operates at the speed of 25 mph (40 km/h) or above.
- **Shift position for ACC with LSF:** In D or S.

*Important Reminder*

As with any system, there are limits to ACC with LSF. Use the brake pedal whenever necessary, and always keep a safe distance between your vehicle and other vehicles.

**WARNING**

Improper use of ACC with LSF can lead to a crash.

Use ACC with LSF only when driving on expressways or freeways and in good weather conditions.

**WARNING**

ACC with LSF has limited braking capability and may not stop your vehicle in time to avoid a collision with a vehicle that quickly stops in front of you.

Always be prepared to apply the brake pedal if the conditions require.

*Not available on all models*
When Driving
Adaptive Cruise Control (ACC) with Low Speed Follow (LSF)*

How to activate the system

ACC (green) is on in the instrument panel. ACC with LSF is ready to use.

- Press the MAIN button on the steering wheel.

How to use

ACC (green) is on in the instrument panel. ACC with LSF is ready to use.

- Press the MAIN button on the steering wheel.

Adaptive Cruise Control (ACC) with Low Speed Follow (LSF)*

When the MAIN button is pressed, both ACC with LSF and the Lane Keeping Assist System (LKAS) are either turned on or off.

ACC with LSF may not work properly under certain conditions.

ACC with LSF Conditions and Limitations
P. 486

When not using ACC with LSF: Turn off adaptive cruise by pressing the MAIN button. This also will turn off the Lane Keeping Assist System (LKAS).

Do not use ACC with LSF under the following conditions:
- On roads with heavy traffic or while driving in continuous stop and go traffic.
- On roads with sharp turns.
- On roads with steep downhill sections, as the set vehicle speed can be exceeded by coasting. In such cases, ACC with LSF will not apply the brakes to maintain the set speed.
- On roads with toll collection facilities or other objects between lanes of traffic, or in parking areas, or facilities with drive through access.

* Not available on all models
When Driving

Adaptive Cruise Control (ACC) with Low Speed Follow (LSF)

Driving

When driving at 25 mph (40 km/h) or above:
Take your foot off the pedal and press the –/SET button when you reach the desired speed. The moment you release the button, the set speed is fixed, and ACC with LSF begins.

When driving slower than 25 mph (40 km/h):
If the vehicle is moving and the brake pedal is not depressed, pressing the button fixes the set speed to 25 mph (40 km/h) regardless of current vehicle speed. If your vehicle is stationary and a vehicle is detected ahead, your vehicle speed can be set, even with the brake pedal depressed.

To Set the Vehicle Speed

You can switch the displayed set speed measurements on the driver information interface* or audio/information screen* between mph and km/h.

Customized Features P. 116, 349

The indicators for the Adaptive Cruise Control (ACC) with Low Speed Follow (LSF), Road Departure Mitigation (RDM), Vehicle Stability Assist® (VSA®) system, Vehicle Stability Assist® (VSA®) OFF, low tire pressure/TPMS, Collision Mitigation Braking System™ (CMBS™), and Parking Brake and Brake System (Amber) may come on along with a message in the Driver Information Interface after reconnecting the battery. Drive a short distance at more than 12 mph (20 km/h). The indicator should go off. If it does not, have your vehicle checked by a dealer.

* Not available on all models
When Driving

Adaptive Cruise Control (ACC) with Low Speed Follow (LSF)*

When ACC with LSF starts operating, the vehicle icon, distance bars and set speed appear on the driver information interface.

When you use ACC with LSF, Straight Driving Assist (a feature of the Electric Power Steering system) is activated. By enabling the steering system to automatically compensate for natural steering pull, Straight Driving Assist makes it easier for you to keep your vehicle in a straight line.
When in Operation

■ There is a vehicle ahead
ACC with LSF monitors if a vehicle ahead of you enters the ACC with LSF range. If a vehicle is detected doing so, the ACC with LSF system maintains or decelerates your vehicle’s set speed in order to keep the vehicle’s set following-interval from the vehicle ahead.

To Set or Change Following-Interval P. 489

When a vehicle whose speed is slower than your set speed is detected in front of you, your vehicle starts to slow down.

ACC with LSF Range: 394 ft. (120 m)

Driving

When in Operation

Even if the distance between your vehicle and the vehicle ahead is short, ACC with LSF may start accelerating your vehicle under the following circumstances:
• The vehicle ahead of you is going at almost the same speed as, or faster than, your vehicle.
• A vehicle that cuts in front of you is going faster than your vehicle, gradually increasing the distance between the vehicles.

You can also set the system to beep when a vehicle in front of you comes in and goes out of the ACC with LSF detecting range. Change the ACC Forward Vehicle Detect Beep setting.

Customized Features P. 349
When Driving

Adaptive Cruise Control (ACC) with Low Speed Follow (LSF)*

There is no vehicle ahead

Your vehicle maintains the set speed without having to keep your foot on the brake or accelerator pedal.

If there previously was a vehicle detected ahead that kept your vehicle from traveling at the set speed, ACC with LSF accelerates your vehicle to the set speed, and then maintains it.

When you depress the accelerator pedal

You can temporarily increase the vehicle speed. In this case, there is no audible or visual alert even if a vehicle is in the ACC with LSF range.

ACC with LSF stays on unless you cancel it. Once you release the accelerator pedal, the system resumes an appropriate speed for keeping the following-interval while a vehicle ahead is within the ACC with LSF range.

Limitations

You may need to use the brake to maintain a safe distance when using ACC with LSF. Additionally, ACC with LSF may not work properly under certain conditions.

ACC with LSF Conditions and Limitations

P. 486
When Driving

Adaptive Cruise Control (ACC) with Low Speed Follow (LSF)

A vehicle detected ahead is within ACC with LSF range and slows to a stop

Your vehicle also stops, automatically. The **Stopped** message appears on the driver information interface.

When the vehicle ahead of you starts again, the vehicle icon on the driver information interface blinks. If you press the **RES/+** or **-/-SET** button, or depress the accelerator pedal, ACC with LSF operates again within the prior set speed.

If no vehicle is ahead of you before you resume driving, depress the accelerator pedal and ACC with LSF will operate again within the prior set speed.

**WARNING**

Exiting a vehicle that has been stopped while the ACC with LSF system is operating can result in the vehicle moving without operator control.

A vehicle that moves without operator control can cause a crash, resulting in serious injury or death.

Never exit a vehicle when the vehicle is stopped by ACC with LSF.
When Driving

Adaptive Cruise Control (ACC) with Low Speed Follow (LSF)*

 ACC with LSF Conditions and Limitations

The system may automatically shut off and the ACC indicator will come on under certain conditions. Some examples of these conditions are listed below. Other conditions may reduce some of the ACC functions.

Front Sensor Camera* P. 477

Environmental conditions

• Driving in bad weather (rain, fog, snow, etc.).

Roadway conditions

• Driving on a snowy or wet roadway (obscured lane marking, vehicle tracks, reflected lights, road spray, high contrast).

Vehicle conditions

• The outside of the windshield is blocked by dirt, mud, leaves, wet snow, etc.
• An abnormal tire or wheel condition (Wrong size, varied size or construction, improperly inflated, compact spare tire, etc.).
• The camera temperature gets too high.
• The parking brake is applied.
• When the front grille is dirty.
• The vehicle is tilted due to a heavy load or suspension modifications.
• When tire chains are installed.

Collision Mitigation Braking System™ (CMBS™)* P. 530

You can read about handling information for the camera equipped with this system.

Front Sensor Camera* P. 477

Do not put a sticker on the radar sensor cover or replace the radar sensor cover.

Have your vehicle checked by a dealer if you find any unusual behavior of the system (e.g., the warning message appears too frequently).

If the front of the vehicle is impacted in any of the following situations, the radar sensor may not work properly. Have your vehicle checked by a dealer:

• The vehicle mounted onto a bump, curb, chock, embankment, etc.
• You drive the vehicle where the water is deep.
• Your vehicle has a frontal collision.

* Not available on all models
**Detection limitations**

- A vehicle or pedestrian suddenly crosses in front of you.
- The distance between your vehicle and the vehicle or pedestrian ahead of you is too short.
- A vehicle cuts in front of you at a slow speed, and it brakes suddenly.
- When you accelerate rapidly and approach the vehicle or pedestrian ahead of you at high speed.
- The vehicle ahead of you is a motorcycle, bicycle, mobility scooter, or other small vehicle.
- When there are animals in front of your vehicle.
- When you drive on a curved or winding or undulating road that makes it difficult for the sensor to properly detect a vehicle or a pedestrian in front of you.
- The speed difference between your vehicle and a vehicle or pedestrian in front of you is significantly large.
- An oncoming vehicle suddenly comes in front of you.
- Your vehicle abruptly crosses over in front of an oncoming vehicle.
- When driving through a narrow iron bridge.
- When the vehicle ahead of you brakes suddenly.
- When the vehicle ahead of you has a unique shape.
- When your vehicle or the vehicle ahead of you is driving on one edge of the lane.
To Adjust the Vehicle Speed

Increase or decrease the vehicle speed using the RES/+ or –/SET button on the steering wheel.

- Each time you press the RES/+ or –/SET button, the vehicle speed is increased or decreased by about 1 mph or 1 km/h accordingly.
- If you keep pressing the RES/+ or –/SET button, the vehicle speed increases or decreases by about 5 mph or 5 km/h accordingly.

To Adjust the Vehicle Speed

If a vehicle detected ahead is going at a speed slower than your increased set speed, ACC with LSF may not accelerate your vehicle. This is to maintain the set interval between your vehicle and the vehicle ahead.

When you depress the accelerator pedal and then push and release the –/SET button, the current speed of the vehicle is set.
When Driving
Adaptive Cruise Control (ACC) with Low Speed Follow (LSF)

To Set or Change Following-Interval

Press the (Interval) button to change the ACC with LSF following-interval. Each time you press the button, the following-interval (the interval behind a vehicle detected ahead of you) setting cycles through extra long, long, middle, and short following-interval.

Determine the most appropriate following-interval setting based on your specific driving conditions. Be sure to adhere to any following-interval requirements set by local regulation.
When Driving Adaptive Cruise Control (ACC) with Low Speed Follow (LSF)*

The higher your vehicle’s following-speed is, the longer the short, middle, long or extra long following-interval becomes. See the following examples for your reference.

<table>
<thead>
<tr>
<th>Following-Interval</th>
<th>When the Set Speed is:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>50 mph (80 km/h)</td>
</tr>
<tr>
<td>Short</td>
<td>83 feet 25 meters 1.1 sec</td>
</tr>
<tr>
<td>Middle</td>
<td>110 feet 33 meters 1.5 sec</td>
</tr>
<tr>
<td>Long</td>
<td>154 feet 47 meters 2.1 sec</td>
</tr>
<tr>
<td>Extra Long</td>
<td>204 feet 62 meters 2.8 sec</td>
</tr>
</tbody>
</table>

When your vehicle stops automatically because a vehicle detected ahead of you has stopped, the distance between the two vehicles will vary based on the ACC with LSF distance setting.
When Driving

Adaptive Cruise Control (ACC) with Low Speed Follow (LSF)

To cancel ACC with LSF, do any of the following:

- Press the CANCEL button.
- Press the MAIN button.
- ACC with LSF indicator goes off.
- Depress the brake pedal.
- When the LSF function has stopped the vehicle, you cannot cancel ACC with LSF by depressing the brake pedal.

To Cancel

Resuming the prior set speed: After you have canceled ACC with LSF, you can resume the prior set speed while it is still displayed. Press the RES/+ button.

The set speed cannot be set or resumed when ACC with LSF has been turned off using the MAIN button. Press the MAIN button to activate the system, then set the desired speed.
When Driving

Adaptive Cruise Control (ACC) with Low Speed Follow (LSF)

Automatic cancellation

The beeper sounds and a message appears on the driver information interface when ACC with LSF is automatically canceled. Any of these conditions may cause the ACC with LSF to automatically cancel:

- Bad weather (rain, fog, snow, etc.)
- When the radar sensor in the front grille gets dirty.
- The vehicle ahead of you cannot be detected.
- An abnormal tire condition is detected, or the tires are skidding.
- Driving on a mountainous road, or driving off road for extended periods.
- Abrupt steering wheel movement.
- When the ABS, VSA® or CMBS™ is activated.
- When the ABS or VSA® system indicator comes on.
- When the vehicle is stopped on a very steep slope.
- When you manually apply the parking brake.
- When the detected vehicle within the ACC with LSF range is too close to your vehicle.
- The camera behind the rearview mirror, or the area around the camera, including the windshield, gets dirty.
- When the Maximum Load Limit is exceeded.
- When passing through an enclosed space, such as tunnel.

The ACC with LSF automatic cancellation can be also triggered by the following causes. In these cases, the parking brake will be automatically applied.

- The driver’s seat belt is unfastened when the vehicle is stationary.
- The vehicle stops for more than 10 minutes.
- The engine is turned off.

Even though ACC with LSF has been automatically canceled, you can still resume the prior set speed. Wait until the condition that caused ACC with LSF to cancel improves, then press the –/SET button.
When Driving Adaptive Cruise Control (ACC) with Low Speed Follow (LSF)

Press and hold the  (interval) button for one second. Cruise Mode Selected appears on the driver information interface for two seconds, and then the mode switches to Cruise.

To switch back to ACC with LSF, press and hold the  button again for one second.

When to use
Desired speed in a range above roughly 25 mph (40 km/h) ~.

To Set the Vehicle Speed
Take your foot off the pedal and press the –/SET button when you reach the desired speed.

The moment you release the –/SET button, the set speed is fixed, and cruise control begins. The CRUISE CONTROL indicator comes on.

When you use cruise control, Straight Driving Assist (a feature of the Electric Power Steering system) is activated.

By enabling the steering system to automatically compensate for natural steering pull, Straight Driving Assist makes it easier for you to keep your vehicle in a straight line.

- Depress the brake pedal.

The CRUISE CONTROL indicator goes off.

To Cancel

Resuming the prior set speed:
After cruise control has been canceled, you can still resume the prior set speed by pressing the RES/+ button while driving at a speed of at least 25 mph (40 km/h) or more.

You cannot set or resume in the following situations:
- When vehicle speed is less than 25 mph (40 km/h)
- When the MAIN button is turned off.

At vehicle speeds of 22 mph (35 km/h) or less, cruise control canceled automatically.
Road Departure Mitigation (RDM) System*

Alerts and helps to assist you when the system detects a possibility of your vehicle unintentionally crossing over detected lane markings and/or leaving the roadway altogether.

**How the System Works**

The front camera behind the rearview mirror monitors left and right lane markings (in white or yellow). If your vehicle is getting too close to detected lane markings without a turn signal activated, the system, in addition to a visual alert, applies steering torque and alerts you with rapid vibrations on the steering wheel, to help you remain within the detected lane.

As a visual alert, the **Lane Departure** message appears on the driver information interface.

If the system determines that its steering input is insufficient to keep your vehicle on the roadway, it may apply braking.

Braking is applied only when the lane markings are solid continuous lines.

The system cancels assisting operations when you turn the steering wheel to avoid crossing over detected lane markings.

If the system operates several times without detecting driver response, the system beeps to alert you.

* Not available on all models

---

**Important Safety Reminder**

Like all assistance systems, the RDM system has limitations. Over-reliance on the RDM system may result in a collision. It is always your responsibility to keep the vehicle within your driving lane.

The RDM system only alerts you when lane drift is detected without a turn signal in use. The RDM system may not detect all lane markings or lane departures; accuracy will vary based on weather, speed and lane marker condition. It is always your responsibility to safely operate the vehicle and avoid collisions.

You can read about handling information for the camera equipped with this system.

[Front Sensor Camera*](P. 477)

The RDM system may not work properly or may work improperly under the certain conditions:

[RDM Conditions and Limitations](P. 497)

There are times when you may not notice RDM functions due to your operation of the vehicle, or road surface conditions.
When Driving
Road Departure Mitigation (RDM) System

How the System Activates

The system becomes ready to start searching for lane markings when all the following conditions are met:
- The vehicle is traveling between about 45 and 90 mph (72 and 145 km/h).
- The vehicle is on a straight or slightly curved road.
- The turn signals are off.
- The brake pedal is not depressed.
- The wipers are not in continuous operation.
- The system makes a determination that the driver is not actively accelerating, braking or steering.

RDM On and Off

Press the RDM button to turn the system on and off.
- The indicator in the button comes on and the message appears on the driver information interface when the system is on.

How the System Activates

The RDM system may automatically shut off and the indicator comes and stays on.

Indicators P. 80

RDM system function can be impacted when the vehicle is:
- Not driven within a traffic lane.
- Driven on the inside edge of a curve, or outside of a lane.
- Driven in a narrow lane.

RDM On and Off

When you have selected Warning Only from the customized options using the audio/information screen, the system does not operate the steering wheel and braking.

Customized Features P. 349

The indicators for the Adaptive Cruise Control (ACC) with Low Speed Follow (LSF), Road Departure Mitigation (RDM), Vehicle Stability Assist® (VSA®) system, Vehicle Stability Assist® (VSA®) OFF, low tire pressure/TPMS, Collision Mitigation Braking System™ (CMBS™), and Parking Brake and Brake System (Amber) may come on along with a message in the Driver Information Interface after reconnecting the battery. Drive a short distance at more than 12 mph (20 km/h). The indicator should go off. If it does not, have your vehicle checked by a dealer.
RDM Conditions and Limitations

The system may not properly detect lane markings and the position of your vehicle under certain conditions. Some examples of these conditions are listed below.

Environmental conditions
- Driving in bad weather (rain, fog, snow, etc.).
- Sudden changes between light and dark, such as an entrance or exit of a tunnel.
- There is little contrast between lane lines and the roadway surface.
- Driving into low sunlight (e.g., at dawn or dusk).
- Strong light is reflected onto the roadway.
- Driving in the shadows of trees, buildings, etc.
- Shadows of adjacent objects are parallel to lane markings.
- Roadway objects or structures are misinterpreted as lane markers.
- Reflections on the interior of the front windshield.
When Driving

Road Departure Mitigation (RDM) System

Roadway conditions
- Driving on a snowy or wet roadway (obscured lane marking, vehicle tracks, reflected lights, road spray, high contrast).
- Driving on a road with temporary lane markings.
- Faint, multiple, or varied lane markings are visible on the roadway due to road repairs or old lane markings.
- The roadway has merging, split, or crossing lines (e.g., such as at an intersection or crosswalk).
- The lane markings are extremely narrow, wide, or changing.
- The vehicle in front of you is driving near the lane lines.
- The road is hilly or the vehicle is approaching the crest of a hill.
- Driving on rough or unpaved roads, or over bumpy surfaces.
- When objects on the road (curb, guard rail, pylons, etc.) are recognized as white lines (or yellow lines).
- When driving on roads with double lines.

Vehicle conditions
- Headlight lenses are dirty or the headlights are not properly adjusted.
- The outside of the windshield is streaked or blocked by dirt, mud, leaves, wet snow, etc.
- The inside of the windshield is fogged.
- The camera temperature gets too high.
- An abnormal tire or wheel condition (wrong sized, varied size or construction, improperly inflated, compact spare tire, etc.).
- The vehicle is tilted due to a heavy load or suspension modifications.
- When tire chains are installed.
- The vehicle is towing a trailer.
Lane Keeping Assist System (LKAS)*

Provides steering input to help keep the vehicle in the middle of a detected lane and provides tactile and visual alerts if the vehicle is detected drifting out of its lane.

- **Steering input assist**
  The system applies torque to the steering to keep the vehicle between the left and right lane lines. The applied torque becomes stronger as the vehicle gets closer to either of the lane lines.

- **Front sensor camera**
  Monitors the lane lines

- **Tactile and visual alerts**
  Rapid vibrations on the steering wheel and a warning display alert you that the vehicle is drifting out of a detected lane.

When you operate the turn signals to change lanes, the system is suspended, and resumes after the signals are off.

If you make a lane change without operating the turn signals, the LKAS alerts activate, and torque is applied to the steering.

* Not available on all models

---

**Important Safety Reminders**

The LKAS is for your convenience only. It is not a substitute for your vehicle control. The system does not work if you take your hands off the steering wheel or fail to steer the vehicle.

- **Driver Information Interface Warning and Information Messages** P. 102

Do not place objects on the instrument panel. Objects may reflect on the front windshield and prevent correct detection of the traffic lanes.

The LKAS only alerts you when lane drift is detected without a turn signal in use. The LKAS may not detect all lane markings or lane departures; accuracy will vary based on weather, speed, and lane marker condition. It is always your responsibility to safely operate the vehicle and avoid collisions.

The LKAS is convenient when it is used on freeways.

The LKAS may not work properly or may work improperly under the certain conditions:

- **The LKAS Conditions and Limitations** P. 505

You can read about handling information for the camera equipped with this system.

- **Front Sensor Camera** P. 477
**Lane Keep Support Function**

Provides assistance to keep the vehicle in the center of the lane, when the vehicle nears a white or yellow line, steering force of the electric power steering will become stronger.

---

**Lane Departure Warning Function**

When the vehicle enters the warning area, the LKAS alerts you with slight steering wheel vibration as well as a warning display.

---

*Not available on all models*
When the System can be Used

The system can be used when the following conditions are met.
- The lane in which you are driving has detectable lane markers on both sides, and your vehicle is in the center of the lane.
- The vehicle speed is between about 45 and 90 mph (72 and 145 km/h).
- You are driving on a straight or slightly curved road.
- The turn signals are off.
- The brake pedal is not depressed.
- The wipers are not in continuous operation.

How to activate the system

1. Press the MAIN button. 
   ▶ The LKAS is on in the driver information interface. 
   The system is ready to use.

2. Press the LKAS button. 
   ▶ Lane outlines appear on the driver information interface. 
   The system is activated.

* Not available on all models

Lane Keeping Assist System (LKAS)*

If the vehicle drifts toward either left or right lane line due to the system applying torque, turn off the LKAS and have your vehicle checked by a dealer.
When Driving

Lane Keeping Assist System (LKAS)

3. Keep your vehicle near the center of the lane while driving.
   - The dotted outer lines change to solid ones once the system starts operating after detecting the left and right lane markings.

To cancel the LKAS:

Press the MAIN or LKAS button.

The LKAS is turned off every time you stop the engine, even if you turned it on the last time you drove the vehicle.

When the System can be Used

The LKAS temporarily deactivates when it fails to detect lane lines. When the system detects the lines again, it comes back on automatically.

To cancel

Pressing the MAIN button also turns ACC with LSF on and off.
The system operation is suspended if you:

- Set the wipers to continuous operation.
  - Turning the wipers off resumes the LKAS.
- Decrease the vehicle speed to 40 mph (64 km/h) or less.
  - Increasing the vehicle speed to 45 mph (72 km/h) or more resumes the LKAS.
- Depress the brake pedal.
  - The LKAS resumes and starts detecting the lane lines again once you release the brake pedal.

Models with automatic intermittent wipers

- Set the wiper switch to AUTO and the wipers operate continuously.
  - The LKAS resumes when the wipers stop or operate intermittently.
The LKAS may automatically be suspended when:

- The system fails to detect lane lines.
- The steering wheel is quickly turned.
- You fail to steer the vehicle.
- The vehicle runs on a curved road over the speed limit.

Once these conditions no longer exist, the LKAS automatically resumes.

The LKAS may automatically be canceled when:

- The camera temperature gets too high.
- The camera behind the rearview mirror, or the area around the camera, including the windshield, gets dirty.
- When driving through a sharp curve.
- When driving at a speed in excess of approximately 90 mph (145 km/h).
- When the ABS or VSA® systems engage.

A beeper will sound if the LKAS is automatically canceled.
The system may not detect lane markings and therefore may not keep the vehicle in the middle of a lane under certain conditions, including the following:

- Driving in bad weather (rain, fog, snow, etc.).
- Sudden changes between light and dark, such as an entrance or exit of a tunnel.
- There is little contrast between lane lines and the roadway surface.
- Driving into low sunlight (e.g., at dawn or dusk).
- Strong light is reflected onto the roadway.
- Driving in the shadows of trees, buildings, etc.
- Shadows of adjacent objects are parallel to lane markings.
- Roadway objects or structures are misinterpreted as lane markings.
- Reflections on the interior of the front windshield.
When Driving

Lane Keeping Assist System (LKAS)

Roadway conditions
- Driving on a snowy or wet roadway (obscured lane marking, vehicle tracks, reflected lights, road spray, high contrast).
- Driving on a road with temporary lane markings.
- Faint, multiple, or varied lane markings are visible on the roadway due to road repairs or old lane markings.
- The roadway has merging, split, or crossing lines (e.g., such as at an intersection or crosswalk).
- The lane markings are extremely narrow, wide, or changing.
- The vehicle in front of you is driving near the lane lines.
- The road is hilly or the vehicle is approaching the crest of a hill.
- Driving on rough or unpaved roads, or over bumpy surfaces.
- When objects on the road (curb, guard rail, pylons, etc.) are recognized as white lines (or yellow lines).
- When driving on roads with double lines.

Vehicle conditions
- Headlight lenses are dirty or the headlights are not properly adjusted.
- The outside of the windshield is streaked or blocked by dirt, mud, leaves, wet snow, etc.
- The inside of the windshield is fogged.
- The camera temperature gets too high.
- An abnormal tire or wheel condition (wrong sized, varied size or construction, improperly inflated, compact spare tire, etc.).
- The vehicle is tilted due to a heavy load or suspension modifications.
- The vehicle is towing a trailer.
Vehicle Stability Assist® (VSA®), aka Electronic Stability Control (ESC), System

VSA® helps to stabilize the vehicle during cornering if the vehicle turns more or less than what was intended. It also assists in maintaining traction on slippery surfaces. It does so by regulating engine output and selectively applying the brakes.

■ VSA® Operation

When VSA® activates, you may notice that the engine does not respond to the accelerator. You may also notice some noise from the hydraulic system. You will also see the indicator blink.

The VSA® may not function properly if tire type and size are mixed. Make sure to use the same size and type of tire, and the air pressures as specified.

When the VSA® system indicator comes on and stays on while driving, there may be a problem with the system. While this may not interfere with normal driving, have your vehicle checked by a dealer immediately.

VSA® cannot enhance stability in all driving situations and does not control the entire braking system. You still need to drive and corner at speeds appropriate for the conditions and always leave a sufficient margin of safety.

The main function of the VSA® system is generally known as Electronic Stability Control (ESC). The system also includes a traction control function.

In certain unusual conditions when your vehicle gets stuck in shallow mud or fresh snow, it may be easier to free it with the VSA® temporarily switched off.

Continued
When Driving ➤ Vehicle Stability Assist® (VSA®), aka Electronic Stability Control (ESC), System

### VSA® On and Off

This button is on the driver side control panel. To partially disable VSA® functionality/features, press and hold it until you hear a beep.

Your vehicle will have normal braking and cornering ability, but traction control function will be less effective.

To restore VSA® functionality/features, press the **OFF** button until you hear a beep.

VSA® is turned on every time you start the engine, even if you turned it off the last time you drove the vehicle.

Vehicle Stability Assist® (VSA®), aka Electronic Stability Control (ESC), System

When the **OFF** button is pressed, the traction control function becomes less effective. This allows for the wheels to spin more freely at low speed. You should only attempt to free your vehicle with the VSA® off if you are not able to free it when the VSA® is on.

Immediately after freeing your vehicle, be sure to switch VSA® on again. We do not recommend driving your vehicle with the VSA® system switched off.

You may hear a motor sound coming from the engine compartment while system checks are being performed immediately after starting the engine or while driving. This is normal.

The indicators for the Adaptive Cruise Control (ACC) with Low Speed Follow (LSF)*, Road Departure Mitigation (RDM)*, Vehicle Stability Assist® (VSA®) system, Vehicle Stability Assist® (VSA®) OFF, low tire pressure/TPMS, Collision Mitigation Braking System™ (CMBS™)*, and Parking Brake and Brake System (Amber) may come on along with a message in the Driver Information Interface after reconnecting the battery. Drive a short distance at more than 12 mph (20 km/h). The indicator should go off. If it does not, have your vehicle checked by a dealer.

* Not available on all models
**Agile Handling Assist**

Lightly brakes each of the front and rear wheels, as needed, when you turn the steering wheel, and helps support the vehicle’s stability and performance during cornering.

---

**Agile Handling Assist**

The agile handling assist cannot enhance stability in all driving situations. You still need to drive and corner at speeds appropriate for the conditions and always leave a sufficient margin of safety.

When the VSA® system indicator comes on and stays on while driving, the agile handling assist does not activate.

You may hear a sound coming from the engine compartment while the agile handling assist is activated. This is normal.
**When Driving**

**Blind spot information System**

Is designed to detect vehicles in specified alert zones adjacent to your vehicle, particularly in harder to see areas commonly known as “blind spots.”

When the system detects vehicles approaching from behind in adjacent lanes, the appropriate indicator comes on for a few seconds, providing assistance when you change lanes.

**How the system works**

- The transmission is in **D**.
- Your vehicle speed is between 20 mph (32 km/h) and 100 mph (160 km/h)
- **Alert zone range**
  - A: Approx. 1.6 ft. (0.5 m)
  - B: Approx. 10 ft. (3 m)
  - C: Approx. 10 ft. (3 m)

**Radar Sensors:** underneath the rear bumper corners

**Alert Zone**

---

**WARNING**

Failure to visually confirm that it is safe to change lanes before doing so may result in a crash and serious injury or death. Do not rely only on the blind spot information system when changing lanes.

Always look in your mirrors, to either side of your vehicle, and behind you for other vehicles before changing lanes.

**Important Safety Reminder**

Like all assistance systems, blind spot information system has limitations. Over reliance on blind spot information system may result in a collision.

The system is for your convenience only. Even if an object is within the alert zone, the following situations may occur.

- The blind spot information system alert indicator may not come on due to obstruction (splashes, etc.) even without the **Blind Spot Info Not Available** driver information interface appearing.
- The blind spot information system alert indicator may come on even with the message appearing.

* Not available on all models
\section*{When the system detects a vehicle}

\begin{itemize}
  \item \textbf{Blind spot information System Alert Indicator:}
  Located on the outside rearview mirror on both sides.
  \item \textbf{Comes on when}
  \begin{itemize}
    \item A vehicle enters the alert zone from behind to overtake you with a speed difference of no more than 31 mph (50 km/h) from your vehicle.
    \item You pass a vehicle with a speed difference of no more than 12 mph (20 km/h).
  \end{itemize}
  \item \textbf{Blinks and the beeper sounds when}
  You move the turn signal lever in the direction of the detected vehicle. The beeper sounds three times.
\end{itemize}

\section*{Blind spot information System *}

The blind spot information system alert indicator may not come on under the following conditions:
\begin{itemize}
  \item A vehicle does not stay in the alert zone for more than two seconds.
  \item A vehicle is parked in a side lane.
  \item The speed difference between your vehicle and the vehicle you are passing is greater than 6 mph (10 km/h).
  \item An object not detected by the radar sensors approaches or passes your vehicle.
\end{itemize}

You can change the setting for blind spot information system.
\begin{itemize}
  \item \textbf{Customized Features} P. 349
\end{itemize}

Turn the system off when towing a trailer.
The system may not work properly for the following reasons:
\begin{itemize}
  \item The added mass tilts the vehicle and changes the radar coverage.
  \item The trailer itself can be detected by the radar sensors, causing the blind spot information system alert indicators to come on.
\end{itemize}

* Not available on all models

\textit{Continued}
When Driving

Blind spot information System *

**Blind spot information System**

Blind spot information system may be adversely affected when:

- Objects (guard rails, poles, trees, etc.,) are detected.
- An object that does not reflect radio waves well, such as a motorcycle, is in the alert zone.
- Driving on a curved road.
- A vehicle is moving from a far lane to the adjacent lane.
- The system picks up external electrical interference.
- The rear bumper or the sensors have been improperly repaired or the rear bumper has been deformed.
- The orientation of the sensors has been changed.
- In bad weather (Heavy rain, snow, and fog).
- Making a turn at an intersection.
- Driving on a bumpy road.
- Making a short turn that slightly tilts the vehicle.

For proper blind spot information system use:

- Always keep the rear bumper corner area clean.
- Do not cover the rear bumper corner area with labels or stickers of any kind.
- Take your vehicle to a dealer if you need the rear bumper corner area or the radar sensors to be repaired, or the rear bumper corner area is strongly impacted.

The system does not operate when in [R].

* Not available on all models
LaneWatch™*

LaneWatch is an assistance system that allows you to check the passenger side rear areas displayed on the audio/information screen when the turn signal is activated to the passenger’s side. A camera in the passenger side door mirror monitors these areas and allows you to check for vehicle, in addition to your visual check and use of the passenger door mirror. You can also keep the system on for your convenience while driving.

When Driving

LaneWatch™*

1. The system activates when you:
   - Move the turn signal lever to the passenger side.
   - Press the LaneWatch button.

2. The passenger side view display appears on the audio/information screen.

The system deactivates when you:
   - Pull the turn signal lever back.
   - Press the LaneWatch button again.

WARNING

Failure to visually confirm that it is safe to change lanes before doing so may result in a crash and serious injury or death.

Do not rely only on LaneWatch while driving.

Always look in your mirrors, to either side of your vehicle, and behind you for other vehicles before changing lanes.

Important Safety Reminder

Like all assistance systems, LaneWatch has limitations. Over reliance on LaneWatch may result in a collision.

The LaneWatch function can be affected by weather, lighting (including headlights and low sun angle), ambient darkness, camera condition, and loading.

The LaneWatch may not provide the intended display of traffic to the side and rear under the following conditions:
- Your vehicle’s suspension has been altered, changing the height of the vehicle.
- Your tires are over or under inflated.
- Your tires or wheels are of varied size or construction.

* Not available on all models

Continued
When Driving

LaneWatch™*

Customizing the LaneWatch settings
You can customize the following items using the audio/information screen.

- **Show with Turn Signal**: Selects whether LaneWatch monitor comes on when you operate the turn signal light lever.
- **Display Time after Turn Signal Off**: Changes the remaining Lane Watch display time after you pull the turn signal lever back.
- **Reference Line**: Selects whether the reference lines appear on the LaneWatch monitor.
- **Display**: Adjusts display settings.

Customized Features P. 349

Reference Lines

Three lines that appear on the screen can give an idea of how far the vehicles or objects on the screen are from your vehicle, respectively. If an object is near line 1 (in red), it indicates that it is close to your vehicle whereas an object near line 3 is farther away.

LaneWatch™*

The LaneWatch camera view is restricted. Its unique lens makes objects on the screen look slightly different from what they are.

LaneWatch display does not come on when the shift lever is in [R].

For proper LaneWatch operation:
- The camera is located in the passenger side door mirror. Always keep this area clean. If the camera lens is covered with dirt or moisture, use a soft, moist cloth to keep the lens clean and free of debris.
- Do not cover the camera lens with labels or stickers of any kind.
- Do not touch the camera lens.

Reference Lines

The area around the reference line 1 (red) is very close to your vehicle. As always, make sure to visually confirm the safety of a lane change before changing lanes.

The distance between your vehicle and lines 1, 2 and 3 on the screen vary depending on road conditions and vehicle loading. For example, the reference lines on the screen may seem to appear closer than the actual distances when the rear of your vehicle is more heavily loaded.

Consult a dealer if:
- The passenger side door mirror, or area around it is severely impacted, resulting in changing the camera angle.
- The LaneWatch display does not come on at all.

* Not available on all models
Real Time AWD with Intelligent Control System™

When the system senses a loss of front wheel traction, it automatically transfers some power to the rear wheels. This allows you to utilize all available traction and may increase mobility.

You still need to exercise the same care when accelerating, steering, and braking that you would in a two wheel drive vehicle.

If you excessively spin all four wheels and overheat the AWD system, only the front wheels receive power. Stop until the system cools down.

* Not available on all models
When Driving

Tire Pressure Monitoring System (TPMS)

Instead of directly measuring the pressure in each tire, the TPMS on this vehicle monitors and compares the rolling radius and rotational characteristics of each wheel and tire while you are driving to determine if one or more tires are significantly under-inflated. This will cause the low tire pressure/TPMS indicator to come on and a message to appear on the driver information interface.

TPMS Calibration

You must start TPMS calibration every time you:
• Adjust the pressure in one or more tires.
• Rotate the tires.
• Replace one or more tires.

Before calibrating the TPMS:
• Set the cold tire pressure in all four tires.

Checking Tires P. 595

Make sure:
• The vehicle is at a complete stop.
• The shift lever is in P.
• The ignition switch is in ON II*1.

The system does not monitor the tires when driving at low speed.

Conditions such as low ambient temperature and altitude change directly affect tire pressure and can trigger the low tire pressure/TPMS indicator to come on.

Tire pressure checked and inflated in:
• Warm weather can become under-inflated in colder weather.
• Cold weather can become over-inflated in warmer weather.

The low tire pressure indicator will not come on as a result of over inflation.

The TPMS may not function properly if tire type and size are mixed. Make sure to use the same size and type of tire.

Checking and Maintaining Tires P. 595

The low tire pressure/TPMS indicator may come on with a delay or may not come on at all when:
• You rapidly accelerate, decelerate, or turn the steering wheel.
• You drive on snowy or slippery roads.
• Snow chains are used.

The low tire pressure/TPMS indicator may come on under the following conditions:
• A compact spare tire is used.
• There is a heavier and uneven load on the tires, such as when towing a trailer, than the condition at calibration.
• Snow chains are used.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
When Driving

Tire Pressure Monitoring System (TPMS)

Press and hold the TPMS button until the low tire pressure/TPMS indicator blinks twice, indicating the calibration process has begun.

- If the low tire pressure/TPMS indicator does not blink, confirm the above conditions then press and hold the TPMS button again.
- The calibration process finishes automatically.

TPMS Calibration

- TPMS cannot be calibrated if a compact spare tire is installed.
- The calibration process requires approximately 30 minutes of cumulative driving at speeds between 30–65 mph (48–105 km/h).
- During calibration, if the ignition is turned off then on again, and the vehicle is not moved within 45 seconds, the low tire pressure indicator may come on briefly. This is normal and indicates that the calibration process is not yet complete.

If the snow chains are installed, remove them before calibrating the TPMS.

If the low tire pressure/TPMS indicator comes on even when the properly inflated specified regular tires are installed, have your vehicle checked by a dealer.

We recommend that the tires be replaced with the same brand, model, and size as the originals. Ask a dealer for details.
When Driving

Tire Pressure Monitoring System (TPMS)

TPMS Calibration

The indicators for the Adaptive Cruise Control (ACC) with Low Speed Follow (LSF)*, Road Departure Mitigation (RDM)*, Vehicle Stability Assist® (VSA®) system, Vehicle Stability Assist® (VSA®) OFF, low tire pressure/TPMS, Collision Mitigation Braking System™ (CMBS™)*, and Parking Brake and Brake System (Amber) may come on along with a message in the Driver Information Interface after reconnecting the battery. Drive a short distance at more than 12 mph (20 km/h). The indicator should go off. If it does not, have your vehicle checked by a dealer.

* Not available on all models
When Driving

Tire Pressure Monitoring System (TPMS)

You can calibrate the system from the customized feature on the audio/information screen.
1. Turn the ignition switch to ON *1.
2. Select 📦.
3. Select Settings.
4. Select Vehicle.
5. Select TPMS Calibration.
6. Select Cancel or Calibrate.
   - When the calibration is complete, the display returns to the customization menu screen.
     - If the Unable to initialize TPMS message appears, repeat steps 4-5.
     - The calibration process finishes automatically.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
When Driving

**Tire Pressure Monitoring System (TPMS) - Required Federal Explanation**

Each tire, including the spare (if provided), should be checked monthly when cold and inflated to the inflation pressure recommended by the vehicle manufacturer on the vehicle placard or tire inflation pressure label.

(If your vehicle has tires of a different size than the size indicated on the vehicle placard or tire inflation pressure label, you should determine the proper tire inflation pressure for those tires.)

As an added safety feature, your vehicle has been equipped with a tire pressure monitoring system (TPMS) that illuminates a low tire pressure telltale

![Low tire pressure](image)

when one or more of your tires is significantly under-inflated.

Accordingly, when the low tire pressure telltale illuminates, you should stop and check your tires as soon as possible, and inflate them to the proper pressure.

Driving on a significantly under-inflated tire causes the tire to overheat and can lead to tire failure. Under-inflation also reduces fuel efficiency and tire tread life, and may affect the vehicle's handling and stopping ability.
Please note that the TPMS is not a substitute for proper tire maintenance, and it is the driver’s responsibility to maintain correct tire pressure, even if under-inflation has not reached the level to trigger illumination of the TPMS low tire pressure telltale.

Your vehicle has also been equipped with a TPMS malfunction indicator to indicate when the system is not operating properly. The TPMS malfunction indicator is combined with the low tire pressure telltale. When the system detects a malfunction, the telltale will flash for approximately one minute and then remain continuously illuminated. This sequence will continue upon subsequent vehicle start-ups as long as the malfunction exists.

When the malfunction indicator is illuminated, the system may not be able to detect or signal low tire pressure as intended.

TPMS malfunctions may occur for a variety of reasons, including the installation of replacement or alternate tires or wheels on the vehicle that prevent the TPMS from functioning properly.

Always check the TPMS malfunction telltale after replacing one or more tires or wheels on your vehicle to ensure that the replacement or alternate tires and wheels allow the TPMS to continue to function properly.
Braking

Brake System

■ Parking Brake
Use the parking brake to keep the vehicle stationary when parked. When the parking brake is applied, you can manually or automatically release it.

■ To apply
The electric parking brake can be applied any time the vehicle has battery, no matter which position the ignition switch*1 is in.

Pull the electric parking brake switch up gently and securely.

The parking brake and brake system indicator comes on.

■ To release
The vehicle must be ON *1 in order to release the electric parking brake.

1. Depress the brake pedal.
2. Press the electric parking brake switch.

The parking brake and brake system indicator goes off.

Manually releasing the parking brake using the switch helps your vehicle start slowly and smoothly when facing down hill on steep hills.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

When you depress the brake pedal, you may hear a whirring sound from the engine compartment. This is because the brake system is in operation, and it is normal.

You may hear the electric parking brake system operating from the rear wheel area when you apply or release the parking brake. This is normal.

The brake pedal may slightly move due to the electric parking brake system operation when you apply or release the parking brake. This is normal.

You cannot apply or release the parking brake if the battery goes dead.

If you pull up and hold the electric parking brake switch while driving, the brakes on all four wheels are applied by the VSA® system until the vehicle come to a stop. The electric parking brake then applies, and the switch should be released.

In the following situations, the parking brake automatically operates.

• When the vehicle stops with the automatic brake hold system activated for more than 10 minutes.
• When the driver’s seat belt is unfastened while your vehicle is stopped and the brake hold system is applied.
• When the engine is turned off while the brake hold system is applied.
• When there is a problem with the brake hold system while brake hold is applied.

■ Jump Starting P. 627
Continued

---

**Automatic parking brake feature operation**

If the automatic parking brake feature has been activated:

- The parking brake is applied automatically when you turn the ignition switch to **LOCK**.*
- To confirm that the parking brake is applied, check if the parking brake and brake system indicator is on.

*Activating and deactivating the automatic parking brake feature* P. 524

---

**To release automatically**

Use the accelerator pedal to release the parking brake when you are starting the vehicle facing uphill, or in a traffic jam.

Depressing the accelerator pedal releases the parking brake.

![Accelerator Pedal](image)

Gently depress the accelerator pedal. The parking brake and brake system indicator goes off.

The parking brake automatically releases as you depress the accelerator pedal when:

- You are wearing the driver’s seat belt.
- The engine is running.
- The transmission is not in **P** or **N**.

---

**Parking Brake**

*Models with ACC with LSF*

- When the vehicle is stops more than 10 minutes while ACC with LSF is activated.
- When the driver’s seat belt is unfastened while your vehicle is stopped automatically by ACC with LSF.
- When the engine is turned off while ACC with LSF is activated.

If the parking brake cannot be released automatically, release it manually.

When the vehicle is traveling uphill, the accelerator pedal may need to be pressed farther to automatically release the electric parking brake.

The parking brake cannot be released automatically while the following indicators are on:

- Malfunction indicator lamp
- Transmission system indicator

The parking brake may not be released automatically while the following indicators are on:

- Brake system indicator
- VSA® system indicator
- **ABS** indicator
- Supplemental restraint system indicator

---

*1: Models with the smart entry system have an **ENGINE START/STOP** button instead of an ignition switch.

---

*Continued*
Activating and deactivating the automatic parking brake feature

With the ignition switch in ON [II]*1, carry out the following steps to either activate or deactivate the automatic parking brake feature.

1. Shift the select lever to [P].
2. Without depressing the brake pedal, pull up and release the parking brake switch.
   - Check that the parking brake and brake system indicator has come on.
3. Pull up and hold the parking brake switch. When you hear a beeping sound, release the switch and within 3 seconds pull up and hold the switch again.
4. When you hear a sound indicating that the procedure is completed, release the switch.
   - Two beeps indicates that the feature has been activated.
   - One beep indicates that the feature has been deactivated.
   - When you have completed activating the feature, the parking brake will remain applied after you turn off the engine.
   - To confirm that the parking brake is applied, check if the parking brake and brake system indicator is on.

If you need to temporarily deactivate the feature for when putting your vehicle through a conveyor-type car wash or when having your vehicle towed. You can follow the procedure explained below.

1. Depress the brake pedal and bring the vehicle to a stop.
2. Turn the ignition switch to LOCK [0]*1 and then within 2 seconds push down the parking brake switch.
   - Activation and deactivation settings for the feature will not be affected.
   - Before temporarily deactivating the feature, make sure to first turn off both ACC with LSF and the automatic brake hold system.
   - To confirm that the parking brake is applied, check if the parking brake and brake system indicator is on.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

Parking brake system

In cold climates, the parking brake may freeze in place if applied.

When parking the vehicle, chock the wheels and make sure the automatic parking brake feature is deactivated.

Also, when putting your vehicle through a conveyor-type car wash or when having your vehicle towed, deactivate the automatic parking brake feature and leave the parking brake released.
Your vehicle is equipped with disc brakes at all four wheels. The brake assist system increases the stopping force when you depress the brake pedal hard in an emergency situation. The anti-lock brake system (ABS) helps you retain steering control when braking very hard.

**Foot Brake**

Check the brakes after driving through deep water, or if there is a buildup of road surface water. If necessary, dry the brakes by lightly depressing the pedal several times.

If you hear a continuous metallic friction sound when applying the brakes, this is caused by the brake wear indicator rubbing on the brake rotor and indicates that the brake pads need to be replaced. Have the vehicle checked by a dealer. If you hear only an occasional squeak or squeal when you initially apply the brake pedal, this may be normal and caused by high frequency vibration of the brake pads against the rotating brake disc.

Constantly using the brake pedal while going down a long hill builds up heat, which reduces the brake effectiveness. Apply engine braking by taking your foot off the accelerator pedal and downshifting to a lower gear/speed position. With manual transmission use a lower gear for greater engine braking.

Do not rest your foot on the brake pedal while driving, as it will lightly apply the brakes and cause them to lose effectiveness over time and reduce pad life. It will also confuse drivers behind you.

Whenever the brakes are activated by CMBS™ or another system that automatically controls braking, the brake pedal is depressed and released in accordance with braking function.

* Not available on all models
Automatic Brake Hold

Keeps the brake applied after releasing the brake pedal until the accelerator pedal is pressed. You can use this system while the vehicle is temporarily stopped, like at traffic lights and in heavy traffic.

Turning on the system

Fasten your seat belt properly, then start the engine. Press the automatic brake hold button.

- The automatic brake hold system indicator comes on. The system is turned on.

Activating the system

Depress the brake pedal to come to a complete stop. The shift lever must not be in P or R.

- The automatic brake hold indicator comes on. Braking is kept for up to 10 minutes.
- Release the brake pedal after the automatic brake hold indicator comes on.

Canceling the system

Depress the accelerator pedal while the shift lever is in a position other than P or N. The brake hold is disengaged and the vehicle starts to move.

- The automatic brake hold indicator goes off. The system releases the brake automatically.

WARNING

Activating the automatic brake hold system on steep hills or slippery roads may still allow the vehicle to move if you remove your foot from the brake pedal.

If a vehicle unexpectedly moves, it may cause a crash resulting in serious injury or death.

Never activate the automatic brake hold system or rely on it to keep a vehicle from moving when stopped on a steep hill or slippery roads.

WARNING

Using the automatic brake hold system to park the vehicle may result in the vehicle unexpectedly moving.

If a vehicle moves unexpectedly, it may cause a crash, resulting in serious injury or death.

Never leave the vehicle when braking is temporarily kept by automatic brake hold and always park the vehicle by putting the transmission in P and applying the parking brake.
The system automatically cancels when:
• You engage the parking brake.
• You depress the brake pedal and move the shift lever to P or R.

The system automatically cancels and the parking brake is applied when:
• Braking is kept for more than 10 minutes.
• The driver’s seat belt is unfastened.
• The engine is turned off.
• There is a problem with automatic brake hold system.

Turning off the automatic brake hold system

While the system is on, press the automatic brake hold button again.
- The automatic brake hold system indicator goes off.

If you want to turn off automatic brake hold while the system is in operation, press the automatic brake hold button with the brake pedal depressed.

Automatic Brake Hold

While the system is activated, you can turn off the engine or park the vehicle through the same procedure as you normally do.

When Stopped P. 540

Whether the system is on, or the system is activated, the automatic brake hold turns off once the engine is off.

Turning off the automatic brake hold system

Make sure to turn off the automatic brake hold system before using an automated car wash.

You may hear an operating noise if the vehicle moves while the automatic brake hold system is in operation.
Anti-lock Brake System (ABS)

Helps prevent the wheels from locking up, and helps you retain steering control by pumping the brakes rapidly, much faster than you.

The electronic brake distribution (EBD) system, which is part of the ABS, also balances the front-to-rear braking distribution according to vehicle loading.

You should never pump the brake pedal. Let the ABS work for you by always keeping firm, steady pressure on the brake pedal. This is sometimes referred to as “stomp and steer.”

ABS operation
The brake pedal may pulsate slightly when the ABS is working. Keep holding the pedal firmly down. On dry pavement, you need to press on the brake pedal very hard before the ABS activates. However, you may feel the ABS activate immediately if you are trying to stop on snow or ice.

ABS may activate when you depress the brake pedal when driving on:
- Wet or snow covered roads.
- Roads paved with stone.
- Roads with uneven surfaces, such as potholes, cracks, manholes, etc.

When the vehicle speed goes under 6 mph (10 km/h), the ABS stops.

NOTICE
The ABS may not function correctly if you use an incorrect tire type and size.

When the ABS indicator comes on while driving, there may be a problem with the system. While normal braking is not affected, there is a possibility of the ABS not operating. Have the vehicle checked by a dealer immediately.

The ABS does not reduce the time or distance it takes to stop the vehicle. It only helps with steering control during hard braking.

In the following cases, your vehicle may need more stopping distance than a vehicle without the ABS:
- When driving on rough road surfaces, including when driving on uneven surfaces, such as gravel or snow.
- When tire chains are installed.

The following may be observed with the ABS system:
- Motor sounds coming from the engine compartment when the brakes are applied, or when system checks are being performed after the engine has been started and while vehicle is accelerates.
- Brake pedal and/or the vehicle body vibration when ABS activates.

These vibrations and sounds are normal to ABS systems and are no cause for concern.
Brake Assist System

Designed to assist the driver by generating greater braking force when you depress the brake pedal hard during emergency braking.

■ Brake assist system operation
Press the brake pedal firmly for more powerful braking.

When brake assist operates, the pedal may wiggle slightly and an operating noise may be heard. This is normal. Keep holding the brake pedal firmly down.
Collision Mitigation Braking System™ (CMBS™) *

Can assist you when there is a possibility of your vehicle colliding with a vehicle or a pedestrian detected in front of yours. The CMBS™ is designed to alert you when a potential collision is determined, as well as to reduce your vehicle speed to help minimize collision severity when a collision is deemed unavoidable.

Important Safety Reminder

The CMBS™ is designed to reduce the severity of an unavoidable collision. It does not prevent collision nor stop the vehicle automatically. It is still your responsibility to operate the brake pedal and steering wheel appropriately according to the driving conditions.

The CMBS™ may not activate or may not detect a vehicle in front of your vehicle under certain conditions:

CMBS™ Conditions and Limitations P. 536

You can read about handling information for the camera equipped with this system.

Front Sensor Camera* P. 477

Be careful not to have radar sensor cover strongly impacted.

* Not available on all models
How the system works

When to use

The camera is located behind the rearview mirror.

The radar sensor is in the front grille.

The system starts monitoring the roadway ahead when your vehicle speed is about 3 mph (5 km/h) and there is a vehicle in front of you.

The CMBS™ activates when:

- The speed difference between your vehicle and a vehicle or pedestrian detected in front of you becomes about 3 mph (5 km/h) and over with a chance of a collision.
- Your vehicle speed is about 62 mph (100 km/h) or less and the system determines there is a chance of a collision with:
  - Vehicles detected in front of you that are stationary, oncoming, or traveling in your same direction.
  - A pedestrian who is detected in front of you.
- Your vehicle speed is above 62 mph (100 km/h), and the system determines there is a chance of a collision with a vehicle detected in front of you traveling in your same direction.

When the CMBS™ activates, it may automatically apply the brake. It will be canceled when your vehicle stops or a potential collision is not determined.
Braking

Collision Mitigation Braking System™ (CMBS™) *

■ When the system activates

The system provides visual and audible alerts of a possible collision, and stops if the collision is avoided.

► Take appropriate action to prevent a collision (apply the brakes, change lanes, etc.)

At system’s earliest collision alert stage, you can change the distance (Long/Normal/Short) between vehicles at which alerts will come on through audio/information screen* setting options.

How the system works

The camera in the CMBS™ is also designed to detect pedestrians. However, this pedestrian detection feature may not activate or may not detect a pedestrian in front of your vehicle under certain conditions. Refer to the ones indicating the pedestrian detection limitations from the list.

CMBS™ Conditions and Limitations P. 536

* Not available on all models
Collision Alert Stages

The system has three alert stages for a possible collision. However, depending on circumstances, the CMBS™ may not go through all of the stages before initiating the last stage.

</tbody>
</table>
Braking
Collision Mitigation Braking System™ (CMBSTM) *

CMBS™ On and Off

Press and hold the button until the beeper sounds to switch the system on or off.

When the CMBS™ is off:
- The CMBS™ indicator in the instrument panel comes on.
- A message on the driver information interface reminds you that the system is off.

The CMBS™ is turned on every time you start the engine, even if you turned it off the last time you drove the vehicle.

Collision Mitigation Braking System™ (CMBSTM) *

The CMBS™ may automatically shut off, and the CMBS™ indicator will come and stay on under certain conditions.

CMBS™ Conditions and Limitations P. 536

When the CMBS™ is activated, it will continue to operate even if the accelerator pedal is partially depressed. However, it will be canceled if the accelerator pedal is deeply depressed.

The indicators for the Adaptive Cruise Control (ACC) with Low Speed Follow (LSF), Road Departure Mitigation (RDM), Vehicle Stability Assist® (VSA®) system, Vehicle Stability Assist® (VSA®) OFF, low tire pressure/TPMS, Collision Mitigation Braking System™ (CMBS™), and Parking Brake and Brake System (Amber) may come on along with a message in the Driver Information Interface after reconnecting the battery. Drive a short distance at more than 12 mph (20 km/h). The indicator should go off. If it does not, have your vehicle checked by a dealer.

* Not available on all models
With Little Chance of a Collision

The CMBS™ may activate even when you are aware of a vehicle ahead of you, or when there is no vehicle ahead. Some examples of this are:

- **When Passing**
  Your vehicle approaches another vehicle ahead of you and you change lanes to pass.

- **At an intersection**
  Your vehicle approaches or passes another vehicle that is making a left or right turn.

- **On a curve**
  When driving through curves, your vehicle comes to a point where an oncoming vehicle is right in front of you.

- **Through a low bridge at high speed**
  You drive under a low or narrow bridge at high speed.

- **Speed bumps, road work sites, train tracks, roadside objects, etc.**
  You drive over speed bumps, steel road plates, etc., or your vehicle approaches train tracks or roadside objects [such as a traffic sign and guard rail] on a curve or, when parking, stationary vehicles and walls.

Collision Mitigation Braking System™ (CMBS™) *

For the CMBS™ to work properly:

- Always keep the radar sensor cover clean.

- Never use chemical solvents or polishing powder for cleaning the sensor cover. Clean it with water or a mild detergent.

- Do not paint, or apply any coverings or paint to radar sensor area. This can impact CMBS™ operation.

- Have your vehicle checked by a dealer if you find any unusual behavior of the system (e.g. the warning message appears too frequently).

- If the front of the vehicle is impacted in any of the following situations, the radar sensor may not work properly. Have your vehicle checked by a dealer:
  - The vehicle mounted onto a bump, curb, chock, embankment, etc.
  - You drive the vehicle where the water is deep.
  - Your vehicle has a frontal collision.

* Not available on all models

---

Continued
Braking Collision Mitigation Braking System™ (CMBSTM) *

CMBS™ Conditions and Limitations

The system may automatically shut off and the CMBS™ indicator will come on under certain conditions. Some examples of these conditions are listed below. Other conditions may reduce some of the CMBS™ functions.

Front Sensor Camera* P. 477

Environmental conditions
- Driving in bad weather (rain, fog, snow, etc.).
- Sudden changes between light and dark, such as an entrance or exit of a tunnel.
- There is little contrast between objects and the background.
- Driving into low sunlight (e.g., at dawn or dusk).
- Strong light is reflected onto the roadway.
- Driving in the shadows of trees, buildings, etc.
- Roadway objects or structures are misinterpreted as vehicles and pedestrians.
- Reflections on the interior of the front windshield.

Roadway conditions
- Driving on a snowy or wet roadway (obscured lane marking, vehicle tracks, reflected lights, road spray, high contrast on a snowy or wet roadway).
- Driving on curvy, winding, or undulating roads.
- The road is hilly or the vehicle is approaching the crest of a hill.

* Not available on all models
■ Vehicle conditions

- Headlight lenses are dirty or the headlights are not properly adjusted.
- The outside of the windshield is blocked by dirt, mud, leaves, wet snow, etc.
- The inside of the windshield is fogged.
- An abnormal tire or wheel condition (wrong sized, varied size or construction, improperly inflated, compact spare tire, etc.).
- When tire chains are installed.
- The vehicle is tilted due to a heavy load or suspension modifications.
- The camera temperature gets too high.
- Driving with the parking brake applied.
- When the radar sensor in the front grille gets dirty.
- The vehicle is towing a trailer.
Braking

Collision Mitigation Braking System™ (CMBS™) *

■ Detection limitations

- A vehicle or pedestrian suddenly crosses in front of you.
- The distance between your vehicle and the vehicle or pedestrian ahead of you is too short.
- When you accelerate rapidly and approach the vehicle or pedestrian ahead of you at high speed.
- The speed difference between your vehicle and a vehicle or pedestrian in front of you is significantly large.
- A vehicle cuts in front of you at a slow speed, and it brakes suddenly.
- The vehicle ahead of you is a motorcycle, bicycle, mobility scooter or other small vehicle.
- When there are animals in front of your vehicle.
- When you drive on a curved, winding or undulating road that makes it difficult for the sensor to properly detect a vehicle in front of you.
- An oncoming vehicle suddenly comes in front of you.
- Another vehicle suddenly comes in front of you at an intersection, etc.
- Your vehicle abruptly crosses over in front of an oncoming vehicle.
- When driving through a narrow iron bridge.
- When the lead vehicle suddenly slows down.
Limitations applicable to pedestrian detection only

- When there is a group of people in front of your vehicle walking together side by side.
- Surrounding conditions or belongings of the pedestrian alter the pedestrian’s shape, preventing the system from recognizing that the person is a pedestrian.
- When the pedestrian is slouching or squatting.
- When the pedestrian is shorter than about 3 feet (1 meter) or taller than about 7 feet (2 meter) in height.
- When a pedestrian blends in with the background.
- When a pedestrian is bent over or squatting, or when their hands or raised or they are running.
- When several pedestrians are walking ahead in a group.
- When the camera cannot correctly identify that a pedestrian is present due to an unusual shape (holding luggage, body position, size).

■ Automatic shutoff

CMBSTM may automatically shut itself off and the CMBSTM indicator comes and stays on when:

- The temperature inside the system is high.
- You drive off-road or on a mountain road, or curved and winding road for an extended period.
- An abnormal tire condition is detected (wrong tire size, flat tire, etc.).
- The camera behind the rearview mirror, or the area around the camera, including the windshield, gets dirty.

Once the conditions that caused CMBSTM to shut off improve or are addressed (e.g., cleaning), the system comes back on.
Parking Your Vehicle

When Stopped

1. Depress the brake pedal firmly.
2. With the brake pedal depressed, pull up the electric parking brake switch slowly, but fully.
3. Move the shift lever from **D** to **P**.
4. Turn off the engine.
   - The parking brake and brake system indicator goes off in about 15 seconds.

Always confirm the electric parking brake is set, in particular if you are parked on an incline.

**WARNING**
The vehicle can roll away if left unattended without confirming that Park is engaged.

A vehicle that rolls away could cause a crash resulting in serious injury or death.

Always keep your foot on the brake pedal until you have confirmed that **P** is shown on the shift lever position indicator.

Do not park your vehicle near flammable objects, such as dry grass, oil, or timber.
Heat from the exhaust can cause a fire.

**1.5 L engine models**

After shutting off the engine, you may hear certain noises coming from the vehicle. Here’s the lowdown:
- Noise from Under Vehicle: This noise is caused by the vacuum pump inside the fuel evaporation leakage check module (ELCM).
  Depending on conditions, the pump will come on for about 15 minutes about 5 to 10 hours after engine shutoff. This noise is just normal vehicle operation and don’t indicate a vehicle problem.
When Stopped

**NOTICE**

The following can damage the transmission:

- Depressing the accelerator and brake pedals simultaneously.
- Holding the vehicle in place when facing uphill by depressing the accelerator pedal.
- Moving the shift lever into **P** before the vehicle stops completely.

In extremely cold temperatures, the parking brake may freeze up if applied. If such temperatures are expected, do not apply the parking brake but, if parking on a slope, either turn the front wheels so they will contact the curb if the vehicle rolls down the slope or block the wheels to keep the vehicle from moving. If you do not take either precaution, the vehicle may roll unexpectedly, leading to a crash.
Cross Traffic Monitor*

Monitors the rear corner areas using the radar sensors when reversing, and alerts you if a vehicle approaching from a rear corner is detected.

The system is convenient when you are backing out of a parking space.

CAUTION

Cross Traffic Monitor cannot detect all approaching vehicles and may not detect an approaching vehicle at all.

Failure to visually confirm that it is safe to back up the vehicle before doing so may result in a collision.

Do not solely rely on the system when reversing; always also use your mirrors, and look behind and to the sides of your vehicle before reversing.
How the System Works

The system activates when:
• The power mode is in ON.
• The Cross Traffic Monitor system is turned on.

Cross Traffic Monitor On and Off P. 545
• The transmission is in R.
• Your vehicle is moving at 3 mph (5 km/h) or lower.

When a vehicle is detected approaching from a rear corner, Cross Traffic Monitor alerts you with a buzzer and a displayed warning.

The system will not detect a vehicle that approaches from directly behind your vehicle, nor will it provide alerts about a detected vehicle when it moves directly behind your vehicle.

The system does not detect or provide alerts for a vehicle that is moving away from your vehicle, and it may alert for pedestrians, bicycles, or stationary objects.

Cross Traffic Monitor *

Cross Traffic Monitor may not detect an approaching vehicle, or may delay alerting you under the following conditions:
• An obstacle, such as another vehicle and a wall, near your vehicle’s rear bumper, is blocking the radar sensor’s scope.
• Your vehicle is moving at the speed of about 3 mph (5 km/h) or higher.
• A vehicle is approaching at the speed other than between about 6 mph (10 km/h) and 16 mph (25 km/h).
• The system picks up external interference such as other radar sensors from another vehicle or strong radio wave transmitted from a facility nearby.
• Either corner of the rear bumper is covered with snow, ice, mud or dirt.
• When there is bad weather.
• Your vehicle is on an incline.
• Your vehicle is tilted due to a heavy load in the rear.
• Your vehicle is reversing towards a wall, a pole, a vehicle, and so on.
• The rear bumper or the sensors have been improperly repaired or the rear bumper has been deformed. Have your vehicle checked by a dealer.

For proper operation, always keep the rear bumper corner area clean.
Do not cover the rear bumper corner area with labels or stickers of any kind.

* Not available on all models

Continued
When the System Detects a Vehicle

An arrow icon appears on the side a vehicle is approaching on the audio/information screen.

When the System Detects a Vehicle

If the [ ] on the lower right changes to [ ] when the transmission is in [R], mud snow or ice may have accumulated in the vicinity of the sensor. Check the bumper corners for any obstructions, and thoroughly clean the area if necessary.

If the [ ] comes on when the transmission is in [R], there may be a problem with the Cross Traffic Monitor system. Do not use the system and have your vehicle checked by a dealer.

If the display remains the same with the transmission in [R], there may be a problem with the rear camera system and the Cross Traffic Monitor system. Do not use the system and have your vehicle checked by a dealer.
Cross Traffic Monitor On and Off

You can switch on and off the system using the audio/information screen.

1. Select 🗓.
2. Select Settings.
3. Select Camera.
5. Select On or Off, then select OK.

The system can also be turned on and off on the audio/information screen by pressing the CTM icon.
About Your Multi-View Rear Camera

The audio/information screen can display your vehicle’s rear view. The display automatically changes to a rear view when the shift lever is moved to **R**.

### Multi-View Rear Camera Display Area

- **Wide View Mode**
- **Normal View Mode**
- **Top Down View Mode**

- **Approx. 39 inches (1 m)**
- **Approx. 20 inches (50 cm)**
- **Tailgate Open Range**
- **Camera**
- **Bumper**
- **Guidelines**

Visually confirm that it is safe to drive before backing up. Certain conditions (such as weather, lighting, and high temperatures) may also restrict the rear view. Do not rely on the rearview display which does not give you all information about conditions at the back of your vehicle.

If the camera lens is covered with dirt or moisture, use a soft, moist cloth to keep the lens clean and free of debris.

You can change the **Fixed Guideline** and **Dynamic Guideline** settings.

- **Fixed Guideline**
  - **On**: Guidelines appear when you shift into **R**.
  - **Off**: Guidelines do not appear.

- **Dynamic Guideline**
  - **On**: Guidelines move according to the steering wheel direction.
  - **Off**: Guidelines do not move.

*Not available on all models*
You can view three different camera angles on the rearview display.

**Models with color audio system**
Press the selector knob to switch the angle.

**Models with Display Audio**
Touch the appropriate icon to switch the angle.

- Wide view
- Normal view
- Top down view

**All models**
- If you were last using Wide view mode or Normal view mode, the same view mode will be activated the next time you put the transmission into R.
- If you were using Top down view mode before you turned off the power system, Wide view mode will be activated the next time you set the power mode to ON and put the transmission into R.
- If you were using Top down view mode and 10 seconds elapsed after you took the transmission out of R, Wide view mode will be activated the next time you put the transmission into R.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.*
Refueling

Fuel Information

■ Fuel recommendation

**Unleaded gasoline, pump octane number 87 or higher**

Use of lower octane gasoline can cause a persistent, heavy metallic knocking noise that can lead to engine damage.

■ Top tier detergent gasoline

Because the level of detergency and additives in gasoline vary in the market, Honda endorses the use of “TOP TIER Detergent Gasoline” where available to help maintain the performance and reliability of your vehicle. TOP TIER Detergent Gasoline meets a new gasoline standard jointly established by leading automotive manufacturers to meet the needs of today’s advanced engines.

Qualifying gasoline retailers will, in most cases, identify their gasoline as having met “TOP TIER Detergent Gasoline” standards at the retail location. This fuel is guaranteed to contain the proper level of detergent additives and be free of metallic additives. The proper level of detergent additives, and absence of harmful metallic additives in gasoline, help avoid build-up of deposits in your engine and emission control system.

For further important fuel-related information for your vehicle, or on information on gasoline that does not contain MMT, visit [www.hondacars.com](http://www.hondacars.com). In Canada, visit [www.honda.ca](http://www.honda.ca) for additional information on gasoline. For more information on top tier gasoline, visit [www.toptiergas.com](http://www.toptiergas.com).

■ Fuel tank capacity: 14 US gal (53 L)

NOTICE

We recommend quality gasoline containing detergent additives that help prevent fuel system and engine deposits. In addition, in order to maintain good performance, fuel economy, and emissions control, we strongly recommend the use of gasoline that does NOT contain harmful manganese-based fuel additives such as MMT, if such gasoline is available.

Use of gasoline with these additives may adversely affect performance, and cause the malfunction indicator lamp on your instrument panel to come on. If this happens, contact a dealer for service.

Some gasoline today is blended with oxygenates such as ethanol. Your vehicle is designed to operate on oxygenated gasoline containing up to 15% ethanol by volume. Do not use gasoline containing methanol. If you notice any undesirable operating symptoms, try another service station or switch to another brand of gasoline.
How to Refuel

Your fuel tank is not equipped with a fuel filler cap. You can insert the filler nozzle directly into the filler neck. The tank seals itself again when you pull out the filler nozzle.

1. Stop your vehicle with the service station pump on the left side of the vehicle in the rear.
2. Turn off the engine.
3. Pull on the fuel fill door release handle under the lower left corner of the dashboard.
   ► The fuel fill door opens.

The fuel filler opening is designed to accept only service station filler nozzles for refueling. Use of smaller diameter tubes (e.g., those used to siphon fuel for other uses) or other non-service station devices can damage the area in and around the filler opening.

WARNING

Gasoline is highly flammable and explosive. You can be burned or seriously injured when handling fuel.

• Stop the engine, and keep heat, sparks, and flame away.
• Handle fuel only outdoors.
• Wipe up spills immediately.
How to Refuel

4. Place the end of the filler nozzle on the lower part of filler opening, then insert it slowly and fully.
   ▶ Make sure that the end of the filler nozzle goes down along with the filler pipe.
   ▶ Keep the filler nozzle level.
   ▶ When the tank is full, the filler nozzle will click off automatically.
   ▶ After filling, wait about five seconds before removing the filler nozzle.

5. Shut the fuel fill door by hand.

How to Refuel

The filler nozzle automatically stops to leave space in the fuel tank so that fuel does not overflow as a result of changes in air temperature.

If the filler nozzle keeps turning off when the tank is not full, there may be a problem with the pump’s fuel vapor recovery system. Try filling at another pump. If this does not fix the problem, consult a dealer.

Do not continue to add fuel after the filler nozzle has automatically stopped. Additional fuel can exceed the full tank capacity.

If you have to refuel your vehicle from a portable container, use the funnel provided with your vehicle.

Refueling From a Portable Fuel Container
P. 646
Improving Fuel Economy and Reducing CO₂ Emissions

Achieving fuel economy and reducing CO₂ emissions is dependent on several factors, including driving conditions, load weight, idling time, driving habits, and vehicle condition. Depending on these and other factors, you may not achieve the rated fuel economy of this vehicle.

Maintenance and Fuel Economy

You can optimize your fuel economy with proper maintenance of your vehicle. Always maintain your vehicle in accordance with the messages displayed on the information display/driver information interface.

- Use engine oil with the viscosity recommended.
- Maintain the specified tire pressure.
- Do not load the vehicle with excess cargo.
- Keep your vehicle clean. A buildup of snow or mud on your vehicle's underside adds weight and increases wind resistance.

Direct calculation is the recommended method to determine actual fuel consumed while driving.

\[
\text{Miles driven} \div \text{Gallons of fuel} = \text{Miles per Gallon} \times \frac{100}{\text{Liter}} \div \frac{\text{Kilometers}}{\text{L per 100 km}}
\]

In Canada, posted fuel economy numbers are established following a simulated test. For more information on how this test is performed, please visit http://oee.nrcan.gc.ca/

* Not available on all models
Turbo Engine Vehicle*

Handling Precautions
The turbocharger is a high-precision device to obtain greater horsepower by delivering a large volume of compressed air into the engine using a turbine driven by the engine’s exhaust gas pressure.

- When the engine is cold just after starting, avoid revving the engine or sudden acceleration.

- Always replace the engine oil and engine oil filter according to the Maintenance Minder. The turbine rotates at very high speeds over 100,000 rpm and its temperature reaches over 1,292°F (700°C). It is lubricated and cooled by engine oil. If you fail to replace the engine oil and filter at the scheduled distance or interval, deteriorated engine oil may cause failure such as sticking and abnormal noise of the turbine bearing.

* Not available on all models
This chapter discusses basic maintenance.

Before Performing Maintenance

Inspection and Maintenance

For your safety, perform all listed inspections and maintenance to keep your vehicle in good condition. If you become aware of any abnormality (noise, smell, insufficient brake fluid, oil residue on the ground, etc.), have your vehicle inspected by a dealer. (Note, however, that service at a dealer is not mandatory to keep your warranties in effect.)

Types of Inspection and Maintenance

Daily inspections
Perform inspections before long distance trips, when washing the vehicle, or when refueling.

Periodic inspections
- Check the brake fluid level monthly. Check the Brake Fluid
  P. 582
- Check the tire pressure monthly. Examine the tread for wear and foreign objects. Checking and Maintaining Tires
  P. 595
- Check the operation of the exterior lights monthly. Replacing Light Bulbs
  P. 584
- Check the condition of the wiper blades at least every six months. Checking and Maintaining Wiper Blades
  P. 591

Maintenance, replacement, or repair of emissions control devices and systems may be done by any automotive repair establishment or individuals using parts that are “certified” to EPA standards.

According to state and federal regulations, failure to perform maintenance on the maintenance main items marked with # will not void your emissions warranties. However, all maintenance services should be performed in accordance with the intervals indicated by the information display/driver information interface:

Maintenance Service Items
P. 559, 564

If you want to perform complex maintenance tasks that require more skills and tools, you can purchase a subscription to the Service Express website at www.techinfo.honda.com.

Authorized Manuals
P. 658

If you want to perform maintenance yourself, make sure that you have the necessary tools and skills first. After performing maintenance, update the records in the separate maintenance booklet.

* Not available on all models
Safety When Performing Maintenance

Some of the most important safety precautions are given here. However, we cannot warn you of every conceivable hazard that can arise in performing maintenance. Only you can decide whether you should perform a given task.

Maintenance Safety

- To reduce the possibility of fire or explosion, keep cigarettes, sparks, and flames away from the battery and all fuel related parts.
- Never leave rags, towels, or other flammable objects under the hood. Heat from the engine and exhaust can ignite them causing a fire.
- To clean parts, use a commercially available degreaser or parts cleaner, not gasoline.
- Wear eye protection and protective clothing when working with the battery or compressed air.
- Engine exhaust contains carbon monoxide, which is poisonous and can kill you. Only operate the engine if there is sufficient ventilation.

Vehicle Safety

- The vehicle must be in a stationary condition.
  - Make sure your vehicle is parked on level ground, the parking brake is set, and the engine is off.
- Be aware that hot parts can burn you.
  - Make sure to let the engine and exhaust system cool thoroughly before touching vehicle parts.
- Be aware that moving parts can injure you.
  - Do not start the engine unless instructed, and keep your hands and limbs away from moving parts.
Before Performing Maintenance

**Parts and Fluids Used in Maintenance Service**

The use of Honda genuine parts and fluids is recommended when maintaining and servicing your vehicle. Honda genuine parts are manufactured according to the same high quality standards used in Honda vehicles.
Select the Maintenance Minder to see maintenance items that are due soon and to see the percentage of life remaining in the engine oil.

When the engine oil life is less than 15%, a Maintenance Minder message will appear every time you turn the ignition switch to ON **(w)**, reminding you to bring your vehicle to a dealer for service.

**Models with information display**

**To Use Maintenance Minder™**

<table>
<thead>
<tr>
<th>Displaying the Maintenance Minder Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Turn the ignition switch to ON <strong>(w)</strong>.</td>
</tr>
<tr>
<td>2. Press the <strong>(TRIP)</strong> knob repeatedly until the engine oil life appears on the information display.</td>
</tr>
</tbody>
</table>

The Maintenance Minder indicator ( ) stays on in the instrument panel after the engine oil life becomes 0%. Have the indicated maintenance done by a dealer immediately.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

---

**Displaying the Maintenance Minder Information**

- Based on the engine operating conditions, the remaining engine oil life is calculated and displayed as a percentage.

To Use Maintenance Minder™

Reset the Maintenance Minder™ display if you have performed the maintenance service.

1. Turn the ignition switch to ON [II] and have the vehicle at a complete stop.
2. Display the Maintenance Minder by repeatedly pressing the TRIP knob.
3. Press and hold the knob for 10 seconds or more.
   ▶ The display will blink to show it is in reset mode.
4. Rotate the knob to select the item you wish to reset.
   ▶ Reset the selected item by pushing the knob for five seconds or more.

Resetting the Display

NOTICE
Failure to reset the Maintenance Minder™ display after a maintenance service results in the system showing incorrect maintenance intervals, which can lead to serious mechanical problems.

The dealer will reset the Maintenance Minder™ display after completing the required maintenance service. If someone other than a dealer performs maintenance service, reset the Maintenance Minder™ display yourself.
To Use Maintenance Minder™

Displaying the Maintenance Minder Information

Certain maintenance items due soon, along with the estimated remaining oil life, appear on the driver information interface.

1. Set the power mode to ON.
2. Press the ENTER button several times until is displayed.
3. Press ENTER to go to the Maintenance Minder screen. The engine oil life appears on the driver information interface along with maintenance items due soon.

Resetting the Display

Reset the Maintenance Minder display if you have performed the maintenance service.

1. Set the power mode to ON.
2. Press the (display/information) button repeatedly until the appears.
3. Press the ENTER button.
4. Press and hold the ENTER button for about 10 seconds to enter the reset mode.
5. Press / to select a maintenance item to reset, or to select All Due Items (You can also select Cancel to end the process).
6. Press the ENTER button to reset the selected item.
7. Repeat from step 4 for other items you wish to reset.

NOTICE

Failure to reset the Maintenance Minder™ display after a maintenance service results in the system showing incorrect maintenance intervals, which can lead to serious mechanical problems.

The dealer will reset the Maintenance Minder™ display after completing the required maintenance service. If someone other than a dealer performs maintenance service, reset the Maintenance Minder™ display yourself.

You can also reset the Maintenance Minder™ display using the audio/information screen.

How to customize P. 356
Maintenance Under the Hood

Maintenance Items Under the Hood

1.5 L engine models

- Engine Oil Dipstick (Orange)
- Brake Fluid (Black Cap)
- Battery
- Washer Fluid (Blue Cap)
- Engine Coolant Reserve Tank
- Radiator Cap
- Engine Oil Fill Cap

Continued
Maintenance Under the Hood

Maintenance Items Under the Hood

2.4 L engine models

- Engine Oil Fill Cap
- Brake Fluid (Black Cap)
- Washer Fluid (Blue Cap)
- Battery
- Engine Coolant Reserve Tank
- Radiator Cap
- Engine Oil Dipstick (Orange)
Opening the Hood

1. Park the vehicle on a level surface, and set the parking brake.
2. Pull the hood release handle under the lower left corner of the dashboard. The hood will pop up slightly.
3. Push the hood latch lever (located under the front edge of the hood to the center) to the side and raise the hood. Once you have raised the hood slightly, you can release the lever.
4. Remove the support rod from the clamp using the grip. Mount the support rod in the hood.

When closing, remove the support rod, and stow it in the clamp, then gently lower the hood. Remove your hand at a height of approximately 12 inches (30 cm) and let the hood close.

NOTICE
Do not open the hood when the wiper arms are raised. The hood will strike the wipers, resulting in damage to the hood and/or the wipers.

When closing the hood, check that the hood is securely latched.

If the hood latch lever moves stiffly, or if you can open the hood without lifting the lever, the latch mechanism should be cleaned and lubricated.

WARNING
The hood support rod can become very hot due to heat from the engine. To ensure against possible burns, do not handle the metal section of the rod: Use the foam grip instead.
Recommended Engine Oil

- Genuine Honda Motor Oil
- Premium-grade 0W-20 detergent oil with an API Certification Seal on the container.

Oil is a major contributor to your engine's performance and longevity. If you drive the vehicle with insufficient or deteriorated oil, the engine may fail or be damaged.

This seal indicates the oil is energy conserving and that it meets the American Petroleum Institute’s latest requirements.

Use a Genuine Honda Motor Oil or another commercial engine oil of suitable viscosity for the ambient temperature as shown.

- Synthetic oil
You may also use synthetic motor oil if it is labeled with the API Certification Seal and is the specified viscosity grade.
Oil Check

We recommend that you check the engine oil level every time you refuel.
Park the vehicle on level ground.
Wait approximately three minutes after turning the engine off before you check the oil.

1. Remove the dipstick (orange).
2. Wipe the dipstick with a clean cloth or paper towel.
3. Insert the dipstick back all the way into its hole.

If the oil level is near or below the lower mark, slowly add oil, being careful not to overfill.
4. Remove the dipstick again, and check the level. It should be between the upper and lower marks. Add oil if necessary.

Oil Check

Under certain driving conditions, it is normal for the engine oil level to rise above the upper mark. If you have a concern, consult a dealer for details.
Adding Engine Oil

1. Unscrew and remove the engine oil fill cap.
2. Add oil slowly.
3. Reinstall the engine oil fill cap, and tighten it securely.
4. Wait for three minutes and recheck the engine oil dipstick.

If any oil spills, wipe it away immediately. Spilled oil may damage the engine compartment components.

Do not fill the engine oil above the upper mark. Overfilling the engine oil may result in leaks and engine damage.
Maintenance Under the Hood

Changing the Engine Oil and Oil Filter

You must change the engine oil and oil filter regularly in order to maintain the engine's lubrication. The engine may be damaged if they are not changed regularly. Specialized equipment and procedures are required to change the engine oil and oil filter. Have an authorized Honda dealer replace them.

Do not attempt to change the engine oil and oil filter yourself.

Change the oil and filter in accordance with the maintenance message on the information display.*

1. Run the engine until it reaches normal operating temperature, and then turn the engine off.
2. Open the hood and remove the engine oil fill cap.
3. Remove the phillips head screws and slotted head screws by turning 90° counterclockwise on the undercarriage and remove the under cover.

NOTICE
You may damage the environment if you do not dispose of the oil in a suitable way. If you are changing the oil by yourself, appropriately dispose of the used oil. Put the oil in a sealed container and take it to a recycling center. Do not throw the oil away into a garbage can or onto the ground.

* Not available on all models
4. Remove the drain bolt and washer from the bottom of the engine, and drain the oil into a suitable container.
5. Remove the oil filter and dispose of the remaining oil.
6. Check that the filter gasket is not stuck to the engine contact surface.
   ► If it is stuck, you must detach it.
7. Wipe away dirt and dust adhering to the contact surface of the engine block, and install a new oil filter.
   ► Apply a light coat of new engine oil to the oil filter gasket.
8. Put a new washer on the drain bolt, then reinstall the drain bolt.
    ► Tightening torque: 30 lbf-ft (40 N·m, 4.0 kgf·m)
9. Pour the recommended engine oil into the engine.
    ► Engine oil change capacity (including filter):
      1.5 L engine models
      3.7 US qt (3.5 L)
      2.4 L engine models
      4.7 US qt (4.4 L)
10. Reinstall the engine oil fill cap securely and start the engine.
11. Run the engine for a few minutes, and then check that there is no leak from the drain bolt or oil filter.
12. Stop the engine, wait for three minutes, and then check the oil level on the dipstick.
    ► If necessary, add more engine oil.
13. Reinstall the under cover in the same order it was removed.

Changing the Engine Oil and Oil Filter

You will need a special wrench to replace the oil filter. You can buy this wrench from a dealer.

When installing the new oil filter, follow the instructions supplied with the oil filter.

Reinstall the engine oil fill cap. Start the engine. The low oil pressure indicator should go off within five seconds. If it does not, turn off the engine, and check your work.

Be sure to verify that the oil filter is designed for your vehicle. A genuine Honda oil filter is recommended for optimum lubrication flow and filtration properties to assure the reliability of the engine.
1.5 L engine models

Engine Coolant

Specified coolant: Honda Long Life Antifreeze/Coolant Type 2

This coolant is premixed with 50% antifreeze and 50% water. Do not add any straight antifreeze or water.

We recommend you check the engine coolant level every time you refuel. Check the reserve tank. Add the engine coolant accordingly.

Checking the Coolant

1. Make sure the engine and radiator are cool.
2. Check the amount of coolant in the reserve tank.
   ► If the coolant level is below the MIN mark, add the specified coolant until it reaches the MAX mark.
3. Inspect the cooling system for leaks.

Engine Coolant

⚠️ WARNING

Removing the reserve tank cap while the engine is hot can cause the coolant to spray out, seriously scalding you.

Always let the engine and radiator cool down before removing the reserve tank cap.

NOTICE

Genuine Honda engine coolant is a 50/50 mixture of antifreeze and water that can withstand freezing at temperatures as low as about -31°F (-35°C). If your vehicle is consistently subjected to temperatures below this, the concentration of antifreeze in the coolant should be increased. Consult a dealer for details.

If Honda antifreeze/coolant is not available, you may use another major brand of non-silicate coolant as a temporary replacement. Check that it is a high quality coolant recommended for aluminum engines.

Continued use of any non-Honda coolant can result in corrosion, causing the cooling system to malfunction or fail. Have the cooling system flushed and refilled with Honda antifreeze/coolant as soon as possible.

Do not add rust inhibitors or other additives to your vehicle's cooling system. They may not be compatible with the coolant or with the engine components.

Continued
**Adding the Coolant**

1. Make sure the engine and radiator are cool.
2. Turn the reserve tank cap 1/8 turn counterclockwise and relieve any pressure in the coolant system.
3. Push down and turn the reserve tank cap counter-clockwise to remove it.
4. Pour coolant into the reserve tank until it reaches the **MAX** mark.
5. Put the reserve tank cap back on, and tighten it fully.

**NOTICE**

Pour the fluid slowly and carefully so you do not spill any. Clean up any spills immediately; they can damage components in the engine compartment.
2.4 L engine models

**Engine Coolant**

**Specified coolant: Honda Long Life Antifreeze/Coolant Type 2**

This coolant is premixed with 50% antifreeze and 50% water. Do not add any straight antifreeze or water.

We recommend you check the engine coolant level every time you refuel. Check the reserve tank first. If it is completely empty, also check the coolant level in the radiator. Add the engine coolant accordingly.

**Reserve Tank**

1. Make sure the engine and radiator are cool.
2. Check the amount of coolant in the reserve tank.
   - If the coolant level is below the MIN mark, add the specified coolant until it reaches the MAX mark.
3. Inspect the cooling system for leaks.

**WARNING**

Removing the radiator cap while the engine is hot can cause the coolant to spray out, seriously scalding you.

**Always let the engine and radiator cool down before removing the radiator cap.**

**NOTICE**

Genuine Honda engine coolant is a 50/50 mixture of antifreeze and water that can withstand freezing at temperatures as low as about -31°F (-35°C). If your vehicle is consistently subjected to temperatures below this, the concentration of antifreeze in the coolant should be increased. Consult a dealer for details.

If Honda antifreeze/coolant is not available, you may use another major brand of non-silicate coolant as a temporary replacement. Check that it is a high quality coolant recommended for aluminum engines. Continued use of any non-Honda coolant can result in corrosion, causing the cooling system to malfunction or fail. Have the cooling system flushed and refilled with Honda antifreeze/coolant as soon as possible.

Do not add rust inhibitors or other additives to your vehicle’s cooling system. They may not be compatible with the coolant or with the engine components.

Continued
Maintenance Under the Hood

1. Make sure the engine and radiator are cool.
2. Turn the radiator cap 1/8 turn counterclockwise and relieve any pressure in the coolant system.
3. Push down and turn the radiator cap counterclockwise to remove it.
4. The coolant level should be up to the base of the filler neck. Add coolant if it is low.
5. Put the radiator cap back on, and tighten it fully.

**NOTICE**
Pour the fluid slowly and carefully so you do not spill any. Clean up any spills immediately; they can damage components in the engine compartment.
Transmission Fluid

■ Continuously Variable Transmission Fluid

Specified fluid: Honda HCF-2 Transmission Fluid

Have a dealer check the fluid level and replace if necessary.

Do not attempt to check or change the continuously variable transmission fluid yourself.

NOTICE

Do not mix HCF-2 with other transmission fluids. Using a transmission fluid other than HCF-2 may adversely affect the operation and durability of your vehicle’s transmission, and damage the transmission. Any damage caused by using a transmission fluid that is not equivalent to HCF-2 is not covered by Honda’s new vehicle limited warranty.
Brake Fluid

**Specified fluid: Honda Heavy Duty Brake Fluid DOT 3**

### Checking the Brake Fluid

The fluid level should be between the **MIN** and **MAX** marks on the side of the reserve tank.

**NOTICE**

Brake fluid marked DOT 5 is not compatible with your vehicle's braking system and can cause extensive damage.

If the specified brake fluid is not available, you should use only DOT 3 or DOT 4 fluid from a sealed container as a temporary replacement.

Using any non-Honda brake fluid can cause corrosion and decrease the longevity of the system. Have the brake system flushed and refilled with Honda Heavy Duty Brake Fluid DOT 3 as soon as possible.

If the brake fluid level is at or below the **MIN** mark, have a dealer inspect the vehicle for leaks or worn brake pads as soon as possible.
Refilling Window Washer Fluid

Check the amount of window washer fluid by looking at the reservoir. If the level is low, fill the washer reservoir.

**NOTICE**

Do not use engine antifreeze or a vinegar/water solution in the windshield washer reservoir. Antifreeze can damage your vehicle’s paint. A vinegar/water solution can damage the windshield washer pump.

**Canadian models with driver information interface**

If the washer fluid is low, a message appears on the driver information interface.

**All models**

Pour the washer fluid carefully. Do not overflow the reservoir.
Replacing Light Bulbs

Headlight Bulbs

When replacing, use the following bulbs.

**High beam headlight: 60 W (HB3 for halogen bulb type)**
**High beam headlight: LED type**

**Low beam headlight: 55 W (H11 for halogen bulb type)**
**Low beam headlight: LED type**

### High Beam Headlights

1. Push the tab to remove the coupler.
2. Rotate the old bulb counter-clockwise to remove.
3. Insert a new bulb into the headlight assembly and turn it clockwise.
4. Insert the coupler into the connector of the bulb.

**NOTICE**

Halogen bulbs get very hot when lit. Oil, perspiration, or a scratch on the glass can cause the bulb to overheat and shatter.

The headlight aim is set by the factory, and does not need to be adjusted. However, if you regularly carry heavy items in the cargo area or tow a trailer, have the aiming readjusted at a dealer or by a qualified technician.

When replacing a halogen bulb, handle it by its base, and protect the glass from contact with your skin or hard objects. If you touch the glass, clean it with denatured alcohol and a clean cloth.

**Models with LED headlights**

Headlights are LED type. Have an authorized Honda dealer inspect and replace the light assembly.

* Not available on all models
Replacing Light Bulbs

Headlight Bulbs

1. Remove the holding clip using a flat-tip screwdriver, then remove the upper part of the window washer reserve tank.
2. Push the tab to remove the coupler.
3. Rotate the old bulb counter-clockwise to remove.
4. Insert a new bulb into the headlight assembly and turn it clockwise.
5. Insert the coupler into the connector of the bulb.

Low Beam Headlights

Passenger side
1. Remove the holding clip using a flat-tip screwdriver, then remove the upper part of the window washer reserve tank.

Both side
2. Push the tab to remove the coupler.
3. Rotate the old bulb counter-clockwise to remove.
4. Insert a new bulb into the headlight assembly and turn it clockwise.
5. Insert the coupler into the connector of the bulb.

Center pin
Insert a flat-tip screwdriver, lift and remove the center pin to remove the clip.

Push until the pin is flat.
Insert the clip with the center pin raised, and push until it is flat.
Replacing Light Bulbs

Fog Light Bulbs

When replacing, use the following bulbs.

**Fog Light: 35 W (H8 for halogen bulb type)**

1. Remove the screw using a Phillips-head screwdriver and remove the holding clips using a flat-tip screwdriver.
2. Pull down the under cover.

NOTICE

Halogen bulbs get very hot when lit. Oil, perspiration, or a scratch on the glass can cause the bulb to overheat and shatter.

When replacing a halogen bulb, handle it by its plastic case, and protect the glass from contact with your skin or hard objects. If you touch the glass, clean it with denatured alcohol and a clean cloth.

* Not available on all models
3. Push the tab to remove the coupler.

**Right side**
4. Rotate the old bulb clockwise to remove.
5. Insert a new bulb into the fog light assembly and turn it counter-clockwise.
6. Insert the coupler into the connector of the bulb.

**Left side**
4. Rotate the old bulb counter-clockwise to remove.
5. Insert a new bulb into the fog light assembly and turn it clockwise.
6. Insert the coupler into the connector of the bulb.

* Not available on all models
Replacing Light Bulbs

Parking/Daytime Running Lights
Parking/daytime running lights are LED type. Have an authorized Honda dealer inspect and replace the light assembly.

Front Turn Signal/Front Side Marker Lights
Front turn signal lights/front side marker lights are LED type. Have an authorized Honda dealer inspect and replace the light assembly.

Side Turn Signal/Emergency Indicator Lights*
Side turn signal lights are LED type. Have an authorized Honda dealer inspect and replace the light assembly.

Brake/Taillight, Rear Turn Signal Light and Rear Side Marker Lights
Brake/taillight, rear turn signal light and rear side marker lights are LED type. Have an authorized Honda dealer inspect and replace the light assembly.

* Not available on all models
**Taillight and Back-Up Light Bulbs**

When replacing, use the following bulbs.

- **Taillight**: LED
- **Back-Up Light**: 16W

1. Remove the cover by prying on the edge using a flat-tip screwdriver.
   - Wrap the flat-tip screwdriver with a cloth to prevent scratches.

2. Turn the socket to the left and remove it.
   - Remove the old bulb.

3. Insert a new bulb.

Taillights are LED type. Have an authorized Honda dealer inspect and replace the light assembly.
Replacing Light Bulbs

Rear License Plate Light
Rear license plate light is LED type. Have an authorized Honda dealer inspect and replace the light assembly.

High-Mount Brake Light
High-mount brake light is LED type. Have an authorized Honda dealer inspect and replace the light assembly.
Checking and Maintaining Wiper Blades

Checking Wiper Blades
If the wiper blade rubber has deteriorated, it will leave streaks and the hard surfaces of the blade may scratch the window glass.

Changing the Front Wiper Blade Rubber

1. Lift the driver side wiper arm first, then the passenger side.

2. Press and hold the tab, then slide the holder off the wiper arm.

**NOTICE**
Avoid dropping the wiper arm onto the windshield, it may damage the wiper arm and/or the windshield.
3. Pull the end of the wiper blade to the direction of the arrow in the image until it unfastens from the holder’s end cap.

4. Pull the wiper blade in the opposite direction to slide it out of the holder.

5. Slide the new wiper blade onto the holder from the bottom end.
   - The tab on the holder should fit in the indent of the wiper blade.

6. Slide the holder onto the wiper arm, then push down the lock tab.

7. Lower the passenger side wiper arm first, then the driver side.
Changing the Rear Wiper Blade Rubber

1. Raise the wiper arm off.
2. Pivot the bottom end of the holder up until it comes off from the wiper arm.
3. Slide the blade out of the holder.
4. Remove the retainers from wiper blade and mount to a new rubber blade.

NOTICE
Avoid dropping the wiper arm; it may damage the rear window.
5. Slide the new wiper blade onto the holder. Make sure it is engaged correctly, then install the wiper blade assembly onto the wiper arm.
Checking and Maintaining Tires

Checking Tires

To safely operate your vehicle, your tires must be of the proper type and size, in good condition with adequate tread, and properly inflated.

Inflation guidelines

Properly inflated tires provide the best combination of handling, tread life, and comfort. Refer to the driver’s doorjamb label or specifications page for the specified pressure.

Underinflated tires wear unevenly, adversely affect handling and fuel economy, and are more likely to fail from overheating.

Overinflated tires make your vehicle ride harshly, are more prone to road hazards, and wear unevenly.

Every day before you drive, look at each of the tires. If one looks lower than the others, check the pressure with a tire gauge.

At least once a month or before long trips, use a gauge to measure the pressure in all tires, including the spare. Even tires in good condition can lose 1–2 psi (10–20 kPa, 0.1–0.2 kgf/cm²) per month.

Inspection guidelines

Every time you check inflation, also examine the tires and valve stems.

Look for:
- Bumps or bulges on the side or in the tread. Replace the tire if you find any cuts, splits, or cracks in the side of the tire. Replace it if you see fabric or cord.
- Remove any foreign objects and inspect for air leaks.
- Uneven tread wear. Have a dealer check the wheel alignment.
- Excessive tread wear.

Wear Indicators P. 600
- Cracks or other damage around valve stem.

WARNING

Using tires that are excessively worn or improperly inflated can cause a crash in which you can be seriously hurt or killed.

Follow all instructions in this owner’s manual regarding tire inflation and maintenance.

Measure the air pressure when tires are cold. This means the vehicle has been parked for at least three hours, or driven less than 1 mile (1.6 km). If necessary, add or release air until the specified pressure is reached.

If checked when hot, tire pressure can be as much as 4–6 psi (30–40 kPa, 0.3–0.4 kgf/cm²) higher than if checked when cold.

Whenever tire pressure is adjusted, you must calibrate the TPMS.

Tire Pressure Monitoring System (TPMS) P. 516

Have a dealer check the tires if you feel a consistent vibration while driving. New tires and any that have been removed and reinstalled should be properly balanced.

Check the spare tire pressure once a month or before long trips.
Checking and Maintaining Tires

Tire and Loading Information Label

The label attached to the driver’s doorjamb provides necessary tire and loading information.

Tire Labeling

The tires that came on your vehicle have a number of markings. Those you should be aware of are described below.

Tire Sizes

Whenever tires are replaced, they should be replaced with tires of the same size.

The label attached to the driver’s doorjamb contains:

1. The number of people your vehicle can carry.
2. The total weight your vehicle can carry. Do not exceed this weight.
3. The original tire sizes for front, rear, and spare.
4. The proper cold tire pressure for front, rear, and spare.

Following is an example of tire size with an explanation of what each component means.

**Example Tire Size**

- **P235/60 R18 102T**
  - **P:** Vehicle type (P indicates passenger vehicle).
  - **235:** Tire width in millimeters.
  - **60:** Aspect ratio (the tire’s section height as a percentage of its width).
  - **R:** Tire construction code (R indicates radial).
  - **18:** Rim diameter in inches.
  - **102:** Load index (a numerical code associated with the maximum load the tire can carry).
  - **T:** Speed symbol (an alphabetical code indicating the maximum speed rating).
Tire Identification Number (TIN)

The tire identification number (TIN) is a group of numbers and letters that look like the example in the side column. TIN is located on the sidewall of the tire.

Glossary of Tire Terminology

Cold Tire Pressure – The tire air pressure when the vehicle has been parked for at least three hours or driven less than 1 mile (1.6 km).

Load Rating – Means the maximum load that a tire is rated to carry for a given inflation pressure.

Maximum Inflation Pressure – The maximum tire air pressure that the tire can hold.

Maximum Load Rating – Means the load rating for a tire at the maximum permissible inflation pressure for that tire.

Recommended Inflation Pressure – The cold tire inflation pressure recommended by the manufacturer.

Treadwear Indicators (TWI) – Means the projections within the principal grooves designed to give a visual indication of the degrees of wear of the tread.
DOT Tire Quality Grading (U.S. Vehicles)

The tires on your vehicle meet all U.S. Federal Safety Requirements. All tires are also graded for treadwear, traction, and temperature performance according to Department of Transportation (DOT) standards. The following explains these gradings.

**Uniform Tire Quality Grading**

Quality grades can be found where applicable on the tire sidewall between tread shoulder and maximum section width.

**Treadwear**

The treadwear grade is a comparative rating based on the wear rate of the tire when tested under controlled conditions on a specified government test course. For example, a tire graded 150 would wear one and one-half (1 1/2) times as well on the government course as a tire graded 100. The relative performance of tires depends upon the actual conditions of their use, however, and may depart significantly from the norm due to variations in driving habits, service practices and differences in road characteristics and climate.
Checking and Maintaining Tires

DOT Tire Quality Grading (U.S. Vehicles)

### Traction

The traction grades, from highest to lowest, are AA, A, B, and C. Those grades represent the tire's ability to stop on wet pavement as measured under controlled conditions on specified government test surfaces of asphalt and concrete. A tire marked C may have poor traction performance.

### Temperature

The temperature grades are A (the highest), B, and C, representing the tire’s resistance to the generation of heat and its ability to dissipate heat when tested under controlled conditions on a specified indoor laboratory test wheel. Sustained high temperature can cause the material of the tire to degenerate and reduce tire life, and excessive temperature can lead to sudden tire failure. The grade C corresponds to a level of performance which all passenger car tires must meet under the Federal Motor Vehicle Safety Standard No. 109. Grades B and A represent higher levels of performance on the laboratory test wheel than the minimum required by law.

---

**Warning:** The traction grade assigned to this tire is based on straight-ahead braking traction tests, and does not include acceleration, cornering, hydroplaning, or peak traction characteristics.

**Warning:** The temperature grade for this tire is established for a tire that is properly inflated and not overloaded. Excessive speed, underinflation, or excessive loading, either separately or in combination, can cause heat buildup and possible tire failure.
Wear Indicators

The groove where the wear indicator is located is 1/16 inch (1.6 mm) shallower than elsewhere on the tire. If the tread has worn so that the indicator is exposed, replace the tire. Worn out tires have poor traction on wet roads.

Tire Service Life

The life of your tires is dependent on many factors, including driving habits, road conditions, vehicle loading, inflation pressure, maintenance history, speed, and environmental conditions (even when the tires are not in use).

In addition to regular inspections and inflation pressure maintenance, it is recommended that you have annual inspections performed once the tires reach five years old. All tires, including the spare, should be removed from service after 10 years from the date of manufacture, regardless of their condition or state of wear.
Tire and Wheel Replacement

Replace your tires with radials of the same size, load range, speed rating, and maximum cold tire pressure rating (as shown on the tire’s sidewall). Using tires of a different size or construction can cause certain vehicle systems such as the ABS and Vehicle Stability Assist® (VSA®) system to work incorrectly.

It is best to replace all four tires at the same time. If that isn’t possible, replace the front or rear tires in pairs.

Make sure that the wheel’s specifications match those of the original wheels.

⚠️ WARNING

Installing improper tires on your vehicle can affect handling and stability. This can cause a crash in which you can be seriously hurt or killed.

Always use the size and type of tires recommended in this owner’s manual.
Checking and Maintaining Tires

Tire Rotation

Rotating tires according to the maintenance messages on the information display’s driver information interface helps to distribute wear more evenly and increase tire life.

- **Tires without rotation marks**
  
  Rotate the tires as shown here.

- **Tires with rotation marks**
  
  Rotate the tires as shown here.

- **Tires with directional tread patterns**
  
  Tires with directional tread patterns should only be rotated front to back (not from one side to the other). Directional tires should be mounted with the rotation indication mark facing forward, as shown below. Whenever tires are rotated, you must calibrate the TPMS.

*Not available on all models*
Winter Tires

If driving on snowy or frozen roads, mount all season marked “M+S” tires, snow tires, or tire chains; reduce speed; and maintain sufficient distance between vehicles when driving.

Be particularly careful when operating the steering wheel or brakes to prevent skidding.

Use tire chains, snow tires, or all season tires when necessary or according to the law.

When mounting, refer to the following points.

For winter tires:
• Select the size and load ranges that are the same as the original tires.
• Mount the tires to all four wheels.

For tire chains:
• Install them on the front tires only.
• Because your vehicle has limited tire clearance, we strongly recommend using the chains listed below:
  - **Models with 235/65R17 tires**
    - **Cable-type: SCC RADIAL CHAIN TC2111MM**
  - **Models with 235/60R18 tires**
    - **Cable-type: SCC RADIAL CHAIN TC2212MM**
• Follow the chain manufacturer's instruction when installing. Mount them as tightly as you can.
• Check that the chains do not touch the brake lines or suspension.
• Drive slowly.
Battery

Checking the Battery

The condition of the battery is monitored by a sensor located on the negative terminal of the battery. If there is a problem with this sensor, the driver information interface will display a warning message. If this happens, have your vehicle inspected by a dealer.

Check the battery terminals for corrosion monthly.

If your vehicle's battery is disconnected or goes dead:
- The audio system is disabled. 
  Audio System Theft Protection P. 232
- The clock resets*.
  Clock P. 130
- Canadian models only: The immobilizer system needs to be reset.
  Immobilizer System Indicator P. 90

WARNING: Battery post, terminals, and related accessories contain lead and lead compounds.
Wash your hands after handling.

WARNING:
The battery gives off explosive hydrogen gas during normal operation.
A spark or flame can cause the battery to explode with enough force to kill or seriously hurt you.
When conducting any battery maintenance, wear protective clothing and a face shield, or have a skilled technician do it.

* Not available on all models
## Charging the Battery

Disconnect both battery cables to prevent damaging your vehicle’s electrical system. Always disconnect the negative (–) cable first, and reconnect it last.

**Battery**

1. When you find corrosion, clean the battery terminals by applying a baking powder and water solution. Clean the terminals with a damp towel. Cloth/towel dry the battery. Coat the terminals with grease to help prevent future corrosion.

2. When replacing the battery, the replacement must be of the same specifications. Consult a dealer for more information.

3. The indicators for the Adaptive Cruise Control (ACC) with Low Speed Follow (LSF)*, Road Departure Mitigation (RDM) System*, Vehicle Stability Assist® (VSA®) system, Vehicle Stability Assist® (VSA®) OFF, Collision Mitigation Braking System™ (CMBS™)*, Low Tire Pressure/TPMS, and Parking Brake and Brake System (Amber) may come on along with a message in the Driver Information Interface* when you turn the ignition switch to ON after re-connecting the battery.

4. Drive a short distance at more than 12 mph (20 km/h). The indicator should go off. If it does not, have your vehicle checked by a dealer.

---

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.  
* Not available on all models
Remote Transmitter Care

Replacing the Button Battery
If the indicator does not come on when the button is pressed, replace the battery.

1. Unscrew the cover with a small Phillips-head screwdriver.
2. Open the remote transmitter.
   ▶ Wrap the small flat-tip screwdriver with a cloth to prevent scratching the transmitter.
3. Remove the button battery with the small flat-tip screwdriver.
4. Make sure to replace the battery with the correct polarity.

**Master Keys with Remote Transmitter***

**Battery type: CR1620**

1. Unscrew the cover with a small Phillips-head screwdriver.
2. Open the remote transmitter.
   ▶ Wrap the small flat-tip screwdriver with a cloth to prevent scratching the transmitter.
3. Remove the button battery with the small flat-tip screwdriver.
4. Make sure to replace the battery with the correct polarity.

**WARNING**

**CHEMICAL BURN HAZARD**
The battery that powers the remote transmitter can cause severe internal burns and can even lead to death if swallowed. Keep new and used batteries away from children. If you suspect that a child has swallowed the battery, seek medical attention immediately.

**NOTICE**
An improperly disposed of battery can damage the environment. Always confirm local regulations for battery disposal.

Replacement batteries are commercially available or at a dealer.

* Not available on all models
Remote Transmitter Care
Replacing the Button Battery

■ Smart Entry Remote*

Battery type: CR2032

1. Remove the built-in key.

2. Remove the upper half of the cover by carefully prying on the edge with a coin.
   ▶ Remove carefully to avoid losing the buttons.
   ▶ Wrap a coin with a cloth to prevent scratching the smart entry remote.

3. Make sure to replace the battery with the correct polarity.

* Not available on all models
Climate Control System Maintenance

Air Conditioning

To ensure proper and safe operation, the Society of Automotive Engineers (SAE J2845) recommends that the refrigerant system only be serviced by trained and certified technicians.

Never repair or replace the air conditioning evaporator (cooling coil) with one removed from a used or salvaged vehicle.

New replacement mobile air conditioning evaporators must be certified (and labeled) as meeting SAE Standard J2842.

Dust and Pollen Filter

The climate control system is equipped with a dust and pollen filter that collects pollen, dust, and other debris in the air. The Maintenance Minder™ messages will let you know when to replace the filter.

We recommend that you replace the dust and pollen filter sooner when using your vehicle in areas with high concentrations of dust.
Interior Care

Use a damp cloth with a mixture of mild detergent and warm water to remove dirt. Use a clean cloth to remove detergent residue.

**Cleaning Seat Belts**

Use a soft brush with a mixture of mild soap and warm water to clean the seat belts. Let the belts air dry. Wipe the loops of the seat belt anchors using a clean cloth.

**Cleaning the Window**

Wipe using a glass cleaner.

* Not available on all models

Cleaning Seat Belts

Do not spill liquids inside the vehicle. Electrical devices and systems may malfunction if liquids are splashed on them.

Do not use silicone based sprays on electrical devices such as audio devices and switches. Doing so may cause the items to malfunction or cause a fire inside the vehicle.

If a silicone based spray is inadvertently used on electrical devices, consult a dealer.

Depending on their composition, chemicals and liquid aromatics may cause discoloration, wrinkles, and cracking to resin-based parts and textiles.

Do not use alkali solvents or organic solvents such as benzene or gasoline.

After using chemicals, make sure to gently wipe them away using a dry cloth.

Do not place used cloths on top of resin based parts or textiles for long periods of time without washing.

Cleaning the Window

Wires are mounted to the inside of the rear window. Wipe along the same direction as the wires with a soft cloth so as not to damage them.

Be careful not to spill fluids, such as water or glass cleaner, on or around the cover of both the front sensor camera* and the rainfall/light sensor*.
Cleaning

Interior Care

Floor Mats

The driver's floor mat hooks over floor anchors, which keep them from sliding forward. To remove a mat for cleaning, turn the anchor knobs to the unlock position. When reinstalling the mat after cleaning, turn the knobs to the lock position.

Do not put additional floor mats on top of the anchored mat.

Maintaining Genuine Leather*

To properly clean leather:

1. Use a vacuum or soft dry cloth first to remove any dirt or dust.
2. Clean the leather with a soft cloth dampened with a solution comprised of 90% water and 10% neutral soap.
3. Wipe away any soap residue with a clean damp cloth.
4. Wipe away residual water and allow leather to air dry in the shade.

Floor Mats

If you use any floor mats that were not originally provided with your vehicle, make sure they are designed for your specific vehicle, fit correctly, and are securely anchored by the floor anchors. Position the rear seat floor mats properly. If they are not properly positioned, the floor mats can interfere with the front seat functions.

Maintaining Genuine Leather*

It is important to clean or wipe away dirt or dust as soon as possible. Spills can soak into leather resulting in stains. Dirt or dust can cause abrasions in the leather. In addition, please note that some dark colored clothing can rub onto the leather seats resulting in discoloration or stains.

* Not available on all models
Exterior Care

Dust off the vehicle body after you drive. Regularly inspect your vehicle for scratches on painted surfaces. A scratch on a painted surface can result in body rust. If you find a scratch, promptly repair it.

■ Washington the Vehicle

Wash the vehicle regularly. Wash more frequently when driving in the following conditions:
- If driving on roads with road salt.
- If driving in coastal areas.
- If tar, soot, bird droppings, insects, or tree sap are stuck to painted surfaces.

■ Using an Automated Car Wash

- Make sure to follow the instructions indicated on the automated car wash.
- Fold in the door mirrors.
- For models equipped with automatic intermittent wipers, turn the wipers off.

■ Using High Pressure Cleaners

- Keep sufficient distance between the cleaning nozzle and the vehicle body.
- Take particular care around the windows. Standing too close may cause water to enter the vehicle interior.
- Do not spray high pressure water directly into the engine compartment. Instead, use low pressure water and a mild detergent.

Do not spray water into the air intake vents. It can cause a malfunction.

Do not spray water onto the capless unit when the fuel fill door is open. It can cause damage to the fuel system or engine.
Cleaning

Exterior Care

Applying Wax
A good coat of automotive body wax helps protect your vehicle’s paint from the elements. Wax will wear off over time and expose your vehicle’s paint to the elements, so reapply as necessary.

Maintaining the Bumpers and Other Resin Coated Parts
If you get gasoline, oil, engine coolant, or battery fluid on resin coated parts, they may be stained or the coating may peel. Promptly wipe it away using a soft cloth and clean water.

Cleaning the Window
Wipe using a glass cleaner.

Maintaining Aluminum Wheels
Aluminum is susceptible to deterioration caused by salt and other road contaminants. When necessary, as early as possible use a sponge and mild detergent to wipe away these contaminants. Do not use a stiff brush or harsh chemicals (including some commercial wheel cleaners). These can damage the protective finish on aluminum alloy wheels, resulting in corrosion. Depending on the type of finish, the wheels also may lose their luster or appear burnished. To avoid water stains, wipe the wheels dry with a cloth while they are still wet.

Applying Wax
NOTICE
Chemical solvents and strong cleaners can damage the paint, metal, and plastic on your vehicle. Wipe away spills immediately.

Maintaining the Bumpers and Other Resin Coated Parts
Ask a dealer about the correct coating material when you want to repair the painted surface of the parts made of resin.
Fogged Exterior Light Lenses

The inside lenses of exterior lights (headlights, brake lights, etc.) may fog temporarily if you have driven in the rain, or after the vehicle has been run through a car wash. Dew condensation also may build up inside the lenses when there is a significant enough difference between the ambient and inside lens temperatures (similar to vehicle windows fogging up in rainy conditions). These conditions are natural processes, not structural design problems in the exterior lights.

Lens design characteristics may result in moisture developing on the light lens frame surfaces. This also is not a malfunction.

However, if you see large amounts water accumulation, or large water drops building up inside the lenses, have your vehicle inspected by a dealer.
Accessories and Modifications

Accessories

When installing accessories, check the following:

• Do not install accessories on the windshield. They can obstruct your view and delay your reaction to driving conditions.

• Do not install any accessories over areas marked SRS Airbag, on the sides or backs of the front seats, on front or side pillars, or near the side windows. Accessories installed in these areas may interfere with proper operation of the vehicle's airbags or may be propelled into you or another occupant if the airbags deploy.

• Be sure electronic accessories do not overload electrical circuits or interfere with proper operation of your vehicle.

• Before installing any electronic accessory, have the installer contact a dealer for assistance. If possible, have a dealer inspect the final installation.

Modifications

Do not modify your vehicle in a manner that may affect its handling, stability, or reliability, or install non-genuine Honda parts or accessories that may have a similar effect.

Even minor modifications to vehicle systems can affect overall vehicle performance. Always make sure all equipment is properly installed and maintained, and do not make any modification to your vehicle or its systems that might cause your vehicle to no longer meet federal, state, province, territory, and local regulations.

The on-board diagnostic port (OBD-II/SAE J1962 connector) installed on this vehicle is intended to be used with automobile system diagnostic devices or with other devices that Honda has approved. Use of any other type of device may adversely affect the vehicle's electronic systems or allow them to be compromised, possibly resulting in a system malfunction, drained battery, or other unexpected problems.

Do not modify or attempt to repair any of the electrical components.

WARNING

Improper accessories or modifications can affect your vehicle's handling, stability, and performance, and cause a crash in which you can be seriously hurt or killed.

Follow all instructions in this owner's manual regarding accessories and modifications.

Honda Genuine accessories are recommended to ensure proper operation on your vehicle.
Handling the Unexpected

This chapter explains how to handle unexpected troubles.

Tools

Types of Tools

The tools are stored in the cargo area.
If a Tire Goes Flat

Changing a Flat Tire

If a tire goes flat while driving, grasp the steering wheel firmly, and brake gradually to reduce speed. Then stop in a safe place. Replace the flat tire with a compact spare tire. Go to a dealer as soon as possible to have the full-size tire repaired or replaced.

1. Park the vehicle on firm, level, and non-slippery surface, and apply the parking brake.
2. Move the shift lever to P.
3. Turn on the hazard warning lights and turn the ignition switch to LOCK 0.\(^*1\)

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

NOTICE
Do not mount tire chains on a compact spare tire. If a chain-mounted front tire goes flat, remove one of the full-size rear tires and replace it with the compact spare tire. Remove the flat front tire and replace it with the full-size tire that was removed from the rear. Mount the tire chains on the front tire.

NOTICE
Do not use the jack if it doesn’t work properly. Call your dealer or a professional towing service.
If a Tire Goes Flat

Changing a Flat Tire

Getting Ready to Replace the Flat Tire

1. Open the cargo area floor lid.

2. Take the tool bag out of the cargo area. Take the wheel nut wrench and jack handle bar out of the tool bag.

3. Take the jack out of the spare tire area.

4. Unscrew the wing bolt and remove the spacer cone. Then remove the spare tire.
5. Place a wheel block or rock in the front and rear of the wheel diagonal to the flat tire.

6. Place the compact spare tire under the vehicle body (wheel side up) near the tire that needs to be replaced.

7. Loosen each wheel nut about one turn using the wheel nut wrench.
If a Tire Goes Flat

1. Place the jack under the jacking point closest to the tire to be changed.
2. Turn the end bracket clockwise (as shown in image) until the top of the jack contacts the jacking point.
   - Make sure that the jacking point tab is resting in the jack notch.
3. Raise the vehicle, using the jack handle bar and the jack handle, until the tire is off the ground.

How to Set Up the Jack

WARNING

The vehicle can easily roll off the jack, seriously injuring anyone underneath.

Follow the directions for changing a tire exactly and never get under the vehicle when it is supported only by the jack.

Do not use the jack with people or luggage in the vehicle.

Use the jack provided in your vehicle. Other jacks may not support the weight ("load") or their shape may not match.

The following instructions must be followed to use the jack safely:
- Do not use while the engine is running.
- Use only where the ground is firm and level.
- Use only at the jacking points.
- Do not get in the vehicle while using the jack.
- Do not put anything on top of or underneath the jack.

Loose items can fly around the interior in a crash and can seriously injure the occupants.

Store the wheel, jack, and tools securely before driving.
### Replacing the Flat Tire

1. Remove the wheel nuts and flat tire.

2. Wipe the mounting surfaces of the wheel with a clean cloth.
3. Mount the compact spare tire.
4. Screw the wheel nuts until they touch the lips around the mounting holes, then stop rotating.

5. Lower the vehicle and remove the jack.
   Tighten the wheel nuts in the order indicated in the image. Go around, tightening the nuts, two to three times in this order.

   **Wheel nut torque:**
   80 lbf-ft (108 N·m, 11 kgf·m)

---

**Continued**
If a Tire Goes Flat

Changing a Flat Tire

Handling the Unexpected

1. Remove the center cap.

2. Remove the cargo area lid as shown.

3. Place the flat tire face down in the spare tire well.

4. Remove the spacer cone from the wing bolt, flip it over, and insert it back on the bolt. Secure the flat tire with the wing bolt.

5. Securely store the wheel nut wrench and jack handle bar back in the tool bag. Store the bag in the cargo area properly.

6. Store the jack in its holder. Turn the jack’s end bracket to lock it in place.

Storing the Flat Tire

 WARNING

Loose items can fly around the interior in a crash and can seriously injure the occupants. Store the wheel, jack, and tools securely before driving.
If you replace a flat tire with the spare tire, the low tire pressure/TPMS indicator comes on while you are driving. After driving for a few miles (kilometers), the indicator will start blinking for a short time and then stay on. **Tire Pressures Low** appears on the driver information interface*, but this is normal.

Calibrate the TPMS when you replace the tire with a specified regular tire.

**TPMS Calibration** P. 516

* Not available on all models
## Engine Does Not Start

### Checking the Engine

If the engine does not start, check the starter.

#### Starter condition

<table>
<thead>
<tr>
<th>Condition</th>
<th>Models with smart entry system</th>
<th>Checklist</th>
</tr>
</thead>
</table>
| Starter doesn’t turn or turns over slowly. The battery may be dead. Check each of the items on the right and respond accordingly. | Check for a message on the driver information interface*.  
- If the To Start, Hold Remote Near Start Button message appears  
  - If the Smart Entry Remote Battery is Weak P. 625  
  - Make sure the smart entry remote is in its operating range.  
  - ENGINE START/STOP Button Operating Range P. 170 |  |
| The starter turns over normally, but the engine doesn’t start. There may be a problem with a fuse. Check each of the items on the right and respond accordingly. | Review the engine start procedure.  
Follow its instructions, and try to start the engine again. Starting the Engine P. 458 |  |
| | Check the immobilizer system indicator.  
When the immobilizer system indicator is blinking, the engine cannot be started.  
Immobilizer System P. 159 |  |
| | Check the fuel level.  
There should be enough fuel in the tank. Fuel Gauge P. 116 |  |
| | Check the fuses.  
Check all fuses or have the vehicle checked by a dealer.  
Inspecting and Changing Fuses P. 643 |  |
| | If the problem continues:  
Emergency Towing P. 644 |  |

* Not available on all models
If the Smart Entry Remote Battery is Weak

If the beeper sounds and the To Start, Hold Remote Near Start Button message appears on the driver information interface; and the ENGINE START/STOP button flashes and the engine will not start. Start the engine as follows:

1. Touch the center of the ENGINE START/STOP button with the H logo on the smart entry remote while the ENGINE START/STOP button is flashing.

   The buttons on the smart entry remote should be facing you.
   - The ENGINE START/STOP button flashes for about 30 seconds.

2. Depress the brake pedal and press the ENGINE START/STOP button within 10 seconds after the beeper sounds and the ENGINE START/STOP button changes from flashing to on.
   - If you don’t depress the pedal, the mode will change to ACCESSORY.
Emergency Engine Stop

The ENGINE START/STOP button may be used to stop the engine due to an emergency situation even while driving. If you must stop the engine, do either of the following operations:

- Press and hold the ENGINE START/STOP button for about two seconds.
- Firmly press the ENGINE START/STOP button three times.

The steering wheel will not lock. However, because turning off the engine disables the power assist the engine provides to the steering and braking systems, it will require significantly more physical effort and time to steer and slow the vehicle. Use both feet on the brake pedal to slow down the vehicle and stop immediately in a safe place.

The power mode is in ACCESSORY when the engine is stopped.

To change the mode to VEHICLE OFF, change the shift lever to P after the vehicle comes to a complete stop.

Canadian models

Then press the ENGINE START/STOP button twice without depressing the brake pedal.

Models with smart entry system

Emergency Engine Stop

Do not press the ENGINE START/STOP button while driving unless it is absolutely necessary for the engine to be switched off.

If you press the ENGINE START/STOP button while driving, the beeper sounds.
Jump Starting

Jump Starting Procedure

Turn off the power to electric devices, such as the audio and lights. Turn off the engine, then open the hood.

1. Open the terminal cover on your vehicle’s battery positive + terminal.
2. Connect the first jumper cable to your vehicle’s battery + terminal.
3. Connect the other end of the first jumper cable to the booster battery + terminal.
   - Use a 12-volt booster battery only.
   - When using an automotive battery charger to boost your 12-volt battery, select a lower charging voltage than 15 volts. Check the charger manual for the proper setting.
4. Connect the second jumper cable to the booster battery – terminal.

WARNING

A battery can explode if you do not follow the correct procedure, seriously injuring anyone nearby.

Keep all sparks, open flames, and smoking materials away from the battery.

Battery performance degrades in cold conditions and may prevent the engine from starting.
5. Connect the other end of the second jumper cable to the engine hanger (as shown). Do not connect this jumper cable to any other part.

6. If your vehicle is connected to another vehicle, start the assisting vehicle's engine and increase its rpm slightly.

7. Attempt to start your vehicle's engine. If it turns over slowly, check that the jumper cables have good metal-to-metal contact.
What to Do After the Engine Starts

Once your vehicle’s engine has started, remove the jumper cables in the following order:

1. Disconnect the jumper cable from your vehicle’s ground.
2. Disconnect the other end of the jumper cable from the booster battery terminal.
3. Disconnect the jumper cable from your vehicle’s battery terminal.
4. Disconnect the other end of the jumper cable from the booster battery terminal.

Have your vehicle inspected by a nearby service station or a dealer.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models

What to Do After the Engine Starts

The indicators for the Adaptive Cruise Control (ACC) with Low Speed Follow (LSF)*, Road Departure Mitigation (RDM)*, Vehicle Stability Assist® (VSA®) system, Vehicle Stability Assist® (VSA®) OFF, Collision Mitigation Braking System™ (CMBS™)*, low tire pressure/TPMS, and Parking Brake and Brake System (Amber) may come on along with a message in the Driver Information Interface* when you turn the ignition switch to ON [II]*1 after reconnecting the battery.

Drive a short distance at more than 12 mph (20 km/h). The indicator should go off. If it does not, have your vehicle checked by a dealer.

* Not available on all models

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
Shift Lever Does Not Move

Follow the procedure below if you cannot move the shift lever out of the P position.

### Releasing the Lock

1. Set the parking brake.
2. Remove the key from the ignition switch.
3. Wrap a cloth around the tip of a small flat-tip screwdriver. Put it into the shift lock release slot (as shown in image) and remove the cover.
4. Insert the key into the shift lock release slot.
5. While pushing the key down, press the shift lever release button, and place the shift lever into N.

The lock is now released. Have the shift lever checked by a dealer as soon as possible.
Handling the Unexpected

Overheating

How to Handle Overheating

Overheating symptoms are as follows:

- The temperature gauge needle is at the mark or the engine suddenly loses power.
- Stop Driving When Safe. Engine Temperature Too Hot message appears on the driver information interface.*
- Steam or spray comes out of the engine compartment.

First thing to do
1. Immediately park the vehicle in a safe place.
2. Turn off all accessories and turn on the hazard warning lights.

- No steam or spray present: Keep the engine running and open the hood.
- Steam or spray is present: Turn off the engine and wait until it subsides. Then open the hood.

* Not available on all models

Continue reading for more details...
Handling the Unexpected

How to Handle Overheating

Next thing to do

1. Check that the cooling fan is operating and stop the engine once the temperature gauge needle goes down.
   - If the cooling fan is not operating, immediately stop the engine.

2. Once the engine has cooled down, inspect the coolant level, and check the cooling system components for leaks.
   - If the coolant level in the reserve tank is low, or no coolant in the tank, check that the radiator is cool. Cover the reserve tank cap with a heavy cloth and open the cap. Add coolant until it reaches the MAX mark and put the cap back on.

   WARNING
   Removing the reserve tank cap while the engine is hot can cause the coolant to spray out, seriously scalding you.
   Always let the engine and radiator cool down before removing the reserve tank cap.
   If the coolant is leaking, contact a dealer for repairs.
   Use water as an emergency/temporary measure only. Have a dealer flush the system with proper antifreeze as soon as possible.

1.5 L engine models

Reserve Tank

MAX

MIN
How to Handle Overheating

1. Check that the cooling fan is operating and stop the engine once the temperature gauge needle goes down.
   - If the cooling fan is not operating, immediately stop the engine.
2. Once the engine has cooled down, inspect the coolant level and check the cooling system components for leaks.
   - If the coolant level in the reserve tank is low, add coolant until it reaches the MAX mark.
   - If there is no coolant in the reserve tank, check that the radiator is cool. Cover the radiator cap with a heavy cloth and open the cap. If necessary, add coolant up to the base of the filler neck, and put the cap back on.

Last thing to do

Once the engine has cooled sufficiently, restart it, and check the temperature gauge.
If the temperature gauge needle has gone down, resume driving. If it has not gone down, contact a dealer for repairs.

2.4 L engine models

WARNING

Removing the reserve tank cap while the engine is hot can cause the coolant to spray out, seriously scalding you.

Always let the engine and radiator cool down before removing the reserve tank cap.

If the coolant is leaking, contact a dealer for repairs.

Use water as an emergency/temporary measure only. Have a dealer flush the system with proper antifreeze as soon as possible.
Indicator, Coming On/Blinking

If the Low Oil Pressure Indicator Comes On

■ Reasons for the indicator to come on
  Comes on when the engine oil pressure is low.

■ What to do as soon as the indicator comes on
  1. Immediately park the vehicle on level ground in a safe place.
  2. If necessary, turn the hazard warning lights on.

■ What to do after parking the vehicle
  1. Stop the engine and let it sit for about three minutes.
  2. Open the hood and check the oil level.
     Oil Check P. 571
  3. Start the engine and check the low oil pressure indicator.
     - The indicator goes off: Start driving again.
     - The indicator does not go off within 10 seconds: Stop the engine and contact a dealer for repairs immediately.

If the Charging System Indicator Comes On

■ Reasons for the indicator to come on
  Comes on when the battery is not being charged.

■ What to do when the indicator comes on
  Turn off the climate control system, rear defogger, and other electrical systems. Immediately contact a dealer for repairs.

NOTICE
Running the engine with low oil pressure can cause serious mechanical damage almost immediately.

If you need to stop temporarily, do not turn off the engine. Restarting the engine may rapidly discharge the battery.
If the Malfunction Indicator Lamp Comes On or Blinks

**Reasons for the indicator lamp to come on or blink**
- Comes on when there is a problem with the engine emissions control system.
- Blinks when engine misfiring is detected.

**What to do when the indicator lamp comes on**
Avoid high speeds and immediately get your vehicle inspected at a dealer.

**What to do when the indicator lamp blinks**
Park the vehicle in a safe place with no flammable items and wait at least 10 minutes or more with the engine stopped until it cools.

---

**NOTICE**
If you drive with the malfunction indicator lamp on, the emissions control system and the engine could be damaged.

If the malfunction indicator lamp blinks again when restarting the engine, drive to the nearest dealer at 31 mph (50 km/h) or less. Have your vehicle inspected.
If the Brake System Indicator (Red) Comes On or Blinks

**U.S.**

**Canada**

**Reasons for the indicator to come on**
- The brake fluid is low.
- There is a malfunction in the brake system.

**What to do when the indicator comes on while driving**
Depress the brake pedal lightly to check pedal pressure.
- If normal, check the brake fluid level the next time you stop.
- If abnormal, take immediate action. If necessary, downshift the transmission to slow the vehicle using engine braking.

**Reason for the indicator to blink**
- There is a problem with the electric parking brake system.

**What to do when the indicator blinks**
Avoid using the parking brake and have your vehicle checked by a dealer immediately.
If the Brake System Indicator (Red) Comes On or Blinks at the Same Time When the Brake System Indicator (Amber) Comes On

- If the brake system indicator (red) comes on or blinks at the same time when the brake system indicator (amber) comes on, release the parking brake manually or automatically. 

**Parking Brake P. 522**

- If the brake system indicator (red) continuously comes on or blinks at the same time when the brake system indicator (amber) comes on, stop the vehicle in a safe place and have it inspected by a dealer immediately.

  ▶ Preventing the vehicle from moving

  Move the shift lever to [P].

- If the brake system indicator (amber) comes on alone, avoid using the parking brake and have your vehicle checked by a dealer immediately.

If you apply the parking brake, you may not be able to release it.

If the brake system indicator (red) and the brake system indicator (amber) come on at the same time, the parking brake is working.

If the brake system indicator (red) blinks at the same time when the brake system indicator (amber) comes on, the parking brake may not work because it is checking the system.
If the Electric Power Steering (EPS) System Indicator Comes On

**Reasons for the indicator to come on**

- Comes on when there is a problem with the EPS system.
- If you depress the accelerator pedal repeatedly to increase the engine speed while the engine is idling, the indicator comes on, and sometimes the steering wheel becomes harder to operate.

**What to do when the indicator comes on**

Stop the vehicle in a safe place and restart the engine. If the indicator comes on and stays on, immediately have your vehicle inspected by a dealer.
If the Low Tire Pressure/TPMS Indicator Comes On or Blinks

■ Reasons for the indicator to come on or blink
A tire pressure is significantly low, or the TPMS has not been calibrated. If there is a problem with the TPMS or the compact spare tire is installed, the indicator blinks for about one minute, and then stays on.

■ What to do when the indicator comes on
Drive carefully avoiding abrupt cornering and hard braking. Stop your vehicle in a safe place. Check the tire pressure and adjust the pressure to the specified level. The specified tire pressure is on a label on the driver side doorjamb.

▶ Calibrate the TPMS after the tire pressure is adjusted.

TPMS Calibration P. 516

■ What to do when the indicator blinks, then remains on
Have the tire inspected by a dealer as soon as possible. If the compact spare tire causes the indicator to blink, change the tire to a full-size tire. The indicator will go off after driving for a few miles (kilometers).

▶ Calibrate the TPMS after a full-size tire is reinstalled.

TPMS Calibration P. 516

NOTICE
Driving on an extremely underinflated tire can cause it to overheat. An overheated tire can fail. Always inflate your tires to the prescribed level.
### Fuses

#### Fuse Locations

If any electrical devices are not working, turn the ignition switch to LOCK \[0\]^1 and check to see if any applicable fuse is blown.

Fuse locations are shown on the fuse box cover. Locate the fuse in question by the fuse number and box cover number.

![Fuse Box Diagram](image)

#### Engine Compartment Fuse Box

Located near the brake fluid reservoir. Push the tabs to open the box.

Inspecting and Changing Fuses

1. Turn the ignition switch to LOCK (LOCK). Turn headlights and all accessories off.
2. Remove the fuse box cover.
3. Check the large fuse in the engine compartment.
   ▶ If the fuse is blown, use a Phillips-head screwdriver to remove the screw and replace it with a new one.
4. Inspect the small fuses in the engine compartment and the vehicle interior.
   ▶ If there is a blown fuse, remove it with the fuse puller, and replace it with a new one.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.

**NOTICE**
Replacing a fuse with one that has a higher rating greatly increases the chances of damaging the electrical system.

Replace fuse with a spare fuse of the same specified amperage.

Use the charts to locate the fuse in question and confirm the specific amperage on the fuse label.

**Fuse Locations** P. 640

There is a fuse puller on the back of the engine compartment fuse box cover.
Emergency Towing

Call a professional towing service if you need to tow your vehicle.

**All models**

- **Flat bed equipment**
  The operator loads your vehicle on the back of a truck. **This is the best way to transport your vehicle.**

**2WD models**

- **Wheel lift equipment**
  The tow truck uses two pivoting arms that go under the front tires and lift them off the ground. The rear tires remain on the ground. **This is an acceptable way to tow your vehicle.**

**NOTICE**

Trying to lift or tow your vehicle by the bumpers will cause serious damage. The bumpers are not designed to support the vehicle’s weight.

Improper towing, such as towing behind a motorhome or other motor vehicle can damage the transmission.

Never tow your vehicle with just a rope or chain. It is very dangerous since ropes or chains may shift from side to side or break.

Make sure the parking brake is released. If you cannot release the parking brake, your vehicle must be transported by the flat bed equipment.

**Parking Brake** P. 522
When You Cannot Open the Tailgate

What to Do When Unable to Open the Tailgate

If you cannot open the tailgate, use the following procedure:

1. Use a flat-tip screwdriver and remove the cover on the inside of the tailgate.
   - Wrap the flat-tip screwdriver with a cloth to prevent scratches.

2. To open the tailgate, push the tailgate while pushing the lever to the right using a flat-tip screwdriver.

When You Cannot Open the Tailgate

Following up:
After taking these steps, contact a dealer to have the vehicle checked.

When you open the tailgate from inside, make sure there is enough space around the tailgate, and it does not hit anyone or any object.
Refueling from a Portable Fuel Container

If you have run out of fuel and need to refuel your vehicle from a portable fuel container, use the funnel provided with your vehicle.

1. Turn off the engine.
2. Press on the edge of the fuel fill door to make it pop up slightly.
   ▶ The fuel fill door opens.
3. Take the funnel out of the tool case in the cargo area.
4. Place the end of the funnel on the lower part of filler opening, then insert it slowly and fully.
   ▶ Make sure that the end of the funnel goes down along with the filler pipe.
5. Fill the tank with fuel from the portable fuel container.
   ▶ Pour fuel carefully so you do not spill any.
6. Remove the funnel from the filler neck.
   ▶ Wipe up any fuel from the funnel before storing it.
7. Shut the fuel fill door by hand.

**NOTICE**
Do not insert the nozzle of a portable fuel container or any funnel other than the one provided with your vehicle. Doing so can damage the fuel system.
Do not try to pry open or push open the sealed fuel tank with foreign objects. This can damage the fuel system and its seal.

**WARNING**
Gasoline is highly flammable and explosive. You can be burned or seriously injured when handling fuel.

- Stop the engine, and keep heat, sparks, and flame away.
- Handle fuel only outdoors.
- Wipe up spills immediately.

**Make sure the fuel in the portable fuel container is gasoline before you refuel.**

Identification Numbers

Vehicle Identification Number (VIN), Engine Number, and Transmission Number

Your vehicle has a 17-digit vehicle identification number (VIN) used to register your vehicle for warranty purposes, and for licensing and insuring your vehicle. The locations of your vehicle’s VIN, engine number, and transmission number are shown as follows:

1.5 L engine models

- **Vehicle Identification Number**
- **Engine Number**
- **Continuously Variable Transmission Number**
- **Certification Label/Vehicle Identification Number**

The interior vehicle identification number (VIN) is located under the cover.
Identification Numbers
Vehicle Identification Number (VIN), Engine Number, and Transmission Number

2.4 L engine models

- Engine Number
- Vehicle Identification Number
- Continuously Variable Transmission Number
- Certification Label/ Vehicle Identification Number
Devices that Emit Radio Waves

Each radio frequency device installed in the vehicle conforms to the requirements and standards of the regulation listed below:

As required by the FCC:
This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.
Reporting Safety Defects

In the U.S.
If you believe that your vehicle has a defect which could cause a crash or could cause injury or death, you should immediately inform the National Highway Traffic Safety Administration (NHTSA) in addition to notifying American Honda Motor Co., Inc.

If NHTSA receives similar complaints, it may open an investigation, and if it finds that a safety defect exists in a group of vehicles, it may order a recall and remedy campaign. However, NHTSA cannot become involved in individual problems between you, your dealer, or American Honda Motor Co., Inc.

To contact NHTSA, you may call the Vehicle Safety Hotline toll-free at 1-888-327-4236 (TTY: 1-800-424-9153); go to http://www.safercar.gov; or write to: Administrator, NHTSA, 1200 New Jersey Avenue, SE., Washington, DC 20590. You can also obtain other information about motor vehicle safety from http://www.safercar.gov.

In Canada
If you believe that your vehicle has a defect which could cause a crash or could cause injury or death, you should immediately inform Honda Canada Inc. and you may also inform Transport Canada.

If Transport Canada receives similar complaints, it may open an investigation, and if it finds that a safety defect exists in a group of vehicles, it may lead to a recall and remedy campaign. However, Transport Canada cannot become involved in individual problems between you, your dealer, or Honda Canada Inc.

To contact Transport Canada’s Defect Investigations and Recalls Division, you may call 1-800-333-0510. For more information on reporting safety defects or about motor vehicle safety, go to http://www.tc.gc.ca/roadsafety.
Emissions Testing

Testing of Readiness Codes

Your vehicle has readiness code as part of the onboard self diagnostic system. Some States use these codes for testing to verify whether your vehicle’s emissions components are working properly. The codes may not be read properly if testing is performed just after the battery has gone dead or been disconnected.

To check if they are set, turn the ignition switch to ON [II]*1, without starting the engine. The malfunction indicator lamp will come on for several seconds. If it then goes off, the readiness codes are set. If it blinks five times, the readiness codes are not set.

If you are required to have your vehicle tested before the readiness codes are ready, prepare the vehicle for retesting by doing the following:

1. Fill the gas tank to approximately 3/4 full.
2. Park the vehicle and leave the engine off for 6 hours or more.
3. Make sure the ambient temperature is between 40°F and 95°F (4°C and 35°C).
4. Start the engine without touching the accelerator pedal, and let it idle for 20 seconds.
5. Keep the vehicle in [P]. Increase the engine speed to 2,000 rpm, and hold it there for about 3 minutes.
6. Let the engine idle with your foot off the accelerator for 20 seconds.

*1: Models with the smart entry system have an ENGINE START/STOP button instead of an ignition switch.
7. Select a nearby, lightly traveled major highway where you can maintain a speed of 50 to 60 mph (80 to 97 km/h) for at least 20 minutes. Drive on the highway in [D]. Do not use cruise control. When traffic allows, drive for 90 seconds without moving the accelerator pedal. (Vehicle speed may vary slightly; this is okay.) If you cannot do this for a continuous 90 seconds because of traffic conditions, drive for at least 30 seconds, then repeat it two more times (for a total of 90 seconds).

8. Drive in city or suburban traffic for at least 10 minutes. When traffic conditions allow, let the vehicle coast for several seconds without using the accelerator pedal or the brake pedal.

9. Park the vehicle and leave the engine off for 30 minutes.
Warranty Coverages

■ U.S. Owners
Your new vehicle is covered by these warranties:

*New Vehicle Limited Warranty* – covers your new vehicle, except for the emissions control systems and accessories, against defects in materials and workmanship.

*Emissions Control Systems Defects Warranty and Emissions Performance Warranty* – these two warranties cover your vehicle’s emissions control systems. Time, mileage, and coverage are conditional. Please read your warranty booklet for exact information.

*Seat Belt Limited Warranty* – a seat belt that fails to function properly is covered by a limited warranty. Please read your warranty booklet for details.

*Rust Perforation Limited Warranty* – all exterior body panels are covered against rusting from the inside out for the specified time period, regardless of mileage.

*Accessory Limited Warranty* – Honda accessories are covered under this warranty. Time and mileage limits depend on the type of accessory and other factors. Please read your warranty booklet for details.

*Replacement Parts Limited Warranty* – covers all Honda replacement parts against defects in materials and workmanship.
**Replacement Battery Limited Warranty** – provides prorated coverage for a replacement battery purchased from your dealer.

**Replacement Muffler Lifetime Limited Warranty** – provides coverage for as long as the purchaser of the muffler owns the vehicle.

Restrictions and exclusions apply to all these warranties. Please read the Honda warranty information booklet that came with your vehicle for precise information on warranty coverages. Your vehicle’s original tires are covered by their manufacturer. Tire warranty information is in a separate booklet.

■ **Canadian Owners**
Please refer to the warranty manual that came with your vehicle.

■ **EPA Contact Information**
An owner may obtain further information concerning emission warranties or report violations of the terms of the emission warranties by contacting:

U.S. Environmental Protection Agency  
Office of Transportation and Air Quality  
Compliance Division, Light-Duty Vehicle Group  
Attn: Warranty Complaints  
2000 Traverwood Drive  
Ann Arbor, MI 48105  
Email: complianceinfo@epa.gov
Authorized Manuals

■ Service Express
For electronic copies of service publications, you can purchase a subscription to Service Express. Visit www.techinfo.honda.com for pricing and options.

■ For U.S. Owners
Manuals can be purchased from Helm Incorporated. You can order a manual by phone at 1 (800) 782-4356 (credit card orders only), or online at www.helminc.com.

■ For Canadian Owners
Please contact a dealer to order any manuals that you may require.
Customer Service Information

Honda dealership personnel are trained professionals who should be able to deal with any problems you may encounter with your vehicle. If, however, you are faced with a problem that they cannot resolve to your satisfaction, contact Honda Client Relations/Services.

Requirements to access Pandora®

- Latest version of the Pandora app installed on your Android, Blackberry, or iPhone.
- Registered Pandora account (you can create a free account at www.pandora.com or on your smartphone)
- Connection to the internet via Wi-Fi or cellular data network.

Limitations

- Access to Pandora requires an active internet connection
- Ability to access Pandora through this system is subject to change without notice
- Certain functionality of Pandora service is not available when accessing the service through this system including, but not limited to, creating new stations, deleting stations, emailing current stations, buying tracks, viewing additional text information, logging in to Pandora, and adjusting Cell Network Audio Quality.

Pandora internet radio is a music service not affiliated with HONDA. More information is available at http://www.pandora.com. Pandora, the Pandora logo, and the Pandora trade dress are trademarks or registered trademarks of Pandora Media, Inc., used with permission.

- Mobile access requires a smartphone with an active data plan. Standard data rates may apply.
- Pandora is only available in the United States.

* Not available on all models
