

Training With a Rolling Code System

For security purposes, newer garage door opening systems use a “rolling” or variable code. Information from the remote control and the garage door opener is needed before HomeLink can operate the garage door opener.

The “Training HomeLink” procedure trains HomeLink to the proper garage door opener code. The following procedure synchronizes HomeLink to the garage door opener so it sends and receives the correct codes.

1. Make sure you have properly completed the “Training HomeLink” procedure.
2. Find the “training” button on your garage door opener unit. The location will vary, depending on the manufacturer.

3. Press the training button on the garage door opener unit until the indicator next to the button comes on. The indicator may blink, or come on and stay on. You then have approximately 30 seconds to complete the following steps.

4. Press and hold the button on HomeLink for 3 to 4 seconds.
5. Press and hold the HomeLink button again for 3 to 4 seconds. This should turn off the training indicator on the garage door opener unit. (Some systems may require you to press the button up to three times.)
6. Press the HomeLink button again for about 1 second. It should operate the garage door.

HomeLink Universal Transceiver

Erasing Codes

To erase the codes stored in all three buttons, press and hold the two outside buttons until the red indicator begins to flash, then release the buttons.

You should erase all three codes before selling the vehicle.

Retraining a Button

If you want to retrain a programmed button for a new device, you do not have to erase all button memory. You can replace the existing memory code using this procedure:

1. Press and hold the HomeLink button to be trained until the HomeLink indicator begins to flash slowly.
 - If a rolling code transmitter was previously programmed, the indicator will flash rapidly for 2 seconds, and then stay on for about 23 seconds.

- If a standard transmitter was programmed, the indicator will stay on for about 25 seconds.

2. Once the HomeLink indicator begins to flash slowly, continue to hold the HomeLink button, and follow steps 3 thru 6 under “Training HomeLink” (see page [293](#)).

Customer Assistance

If you have problems with training the HomeLink Universal Transceiver, or would like information on home products that can be operated by HomeLink, call (800) 355-3515. On the Internet, go to www.homelink.com.

AcuraLink enhances your ownership experience by providing a direct communication link between your vehicle and the Acura Server.

Working through the XM radio satellite, AcuraLink works in conjunction with the navigation system, HandsFreeLink (HFL), and audio system in your vehicle. It displays and receives several kinds of messages, including:

- Operating tips and information on your vehicle's features.
- Important recall and safety information.
- Maintenance information to keep your vehicle in top condition.
- Diagnostic information to provide information about any problems with your vehicle.

Interface Dial

Most AcuraLink functions are controlled by the interface dial. The interface dial has two parts, a knob and a selector.

The knob turns left and right. Use it to make selections or adjustments to a list or menu on the screen.

The selector can be pushed left, right, up, down, and in. Use the selector to scroll through lists, to select menus, and to highlight menu items. When you make a selection, push the center of the selector (ENTER) to go to that selection.

Reading Messages

If you have new messages, an envelope icon appears in the top right corner of the navigation screen.

To open a message:

- Press ENTER on the interface selector, then select New Message from the navigation system map menu. If there is more than one message, stored in the system, you will see a list of message titles.

- Scroll up or down, and select the message you want to read by pressing ENTER on the interface selector.

To view previously read messages, press the INFO button, select MESSAGES, then select the category you want to review.

Unread messages have a closed envelope icon next to them. The icon disappears when it has already been read.

NOTE: Only diagnostic info messages overlay the screen while driving. They indicate if your vehicle has a problem that may need immediate attention (see page [304](#)).

After purchasing your vehicle, messages may not appear immediately. Your dealer has to register the vehicle identification before you can receive messages. This can take several days to process.

Deleting Messages

NOTE: Diagnostic info and recall/campaign messages can only be deleted by your dealer.

To delete a single message:

- Press the INFO button to bring up the Information screen.
- Scroll to the Messages option, then select it by pressing ENTER on the interface selector.
- Select the message category for the message you want to delete.
- Use the interface knob to scroll up or down to the message title you want to delete, and select it by pressing ENTER on the interface selector.
- Scroll to Delete with the interface knob, and select it by pressing ENTER on the interface selector.

To delete all messages:

NOTE: The Delete All Messages command does not apply to Recall or Diagnostic Info messages. These messages must be deleted by your dealer.

- Press the SETUP button to view the setup screen.
- Select MORE by pushing the interface selector to the right.
- Use the interface knob to scroll to the AcuraLink/Messages button, and select it by pressing ENTER on the interface selector.
- Scroll to the Delete Messages option, and select it by pressing ENTER on the interface selector.
- Scroll to the category with the messages you want to delete, and select the category by pressing ENTER on the interface selector.

Message Options

When you open a message, you can read a summary of it, and then choose one of several options. If an option is not available for a message, that button will not be highlighted.

CONTINUED

AcuraLink

Delete — Select this button to delete the current message.

Voice — Select this button to hear a voice read the entire message. This gives you more information than the screen can display at one time. When you select the Voice button, it changes to a Stop Reading button. Select the button again to stop the voice.

Call — Select this button to call a phone number embedded in the message. When you select **Call**, the HandsFreeLink (HFL) dials the number for you.

To make a call, your Bluetooth compatible phone must be paired to your vehicle's HandsFreeLink system, have its power on, and be inside the vehicle (see page 306).

Find Nearest Acura Dealer — Select this button to find the nearest Acura dealer using the navigation

system.

Call Your Acura Dealer — Select this button to call the Acura dealer you purchased your vehicle from. AcuraLink also directs you to this dealer so you can schedule a maintenance appointment or receive information about a message. If your assigned servicing dealer changes, AcuraLink will be updated to call that dealer.

More Info — Select this button to get more information about the current diagnostic message. To use this option, your cell phone must be paired to the HFL. In addition, the paired phone must have a compatible data service and be set up with the AcuraLink system to make a data connection. Access the handsfreelink.com website to find out which data services are currently compatible with AcuraLink.

Message Preferences

To set your AcuraLink preferences (the types of messages you want to receive, if any), visit the Owner Link website at www.owners.acura.com, and choose what you would like to receive. If you do not have internet access, call Acura Client Services at (800) 382-2238; they can set your message preferences for you.

AcuraLink/Message Screen

To access the following functions, press the SETUP button, push the interface selector to the right to select MORE, then rotate the interface knob to select AcuraLink/Messages.

Delete Messages — Select this button to delete all stored messages within a category, except for diagnostic info and recall campaign messages. These messages can only be deleted by a certified technician after the recall is done or the problem is corrected, or through a broadcast message from Acura.

New Message Notification — Select ON if you want to be notified of new messages (envelope icon appears on the navigation screen). Select OFF if you do not want to be notified of new messages (envelope icon does not appear on the navigation screen).

Messages can still be accessed using the INFO menu. If you would like to stop receiving messages, visit the OwnerLink website at www.owners.acura.com to change your messaging preferences.

Auto Reading — Select ON to have the system automatically read each message to you. Select OFF to manually select the Voice button when you want a message read to you.

Phone-Data Connection — Select this button to begin the process required to connect to Acura. This is used to access the most recent diagnostic information when a problem occurs.

CONTINUED

Connect to the Acura Server —

The default setting is prompt. When a diagnostic info message appears, and you select the Check Now button, the system will prompt you before connecting to the Acura server. If you do not wish to connect at that time, select No at the prompt, and you will see the information from the onboard database. The “Auto” setting will remove the prompt when you select the Check Now button and will automatically connect to the Acura server. This setting only applies when you have a Bluetooth® enabled phone that is paired with the HFL and you have completed the Phone-Data Connection setup.

NOTE: For the Phone Data Connection button to be active, you need a Bluetooth® compatible and enabled cellphone paired to the HandsFreeLink (HFL). To complete the data connection setup, the paired phone must have a compatible data service.

Message Categories

There are six message categories in AcuraLink: Quick Tips, Feature Guides, Maintenance Minders, Recalls/Campaigns, Diagnostic Info, and Dealer Appointment Reminders. The system can store up to 256 messages.

Message categories can be added, revised, or deleted through broadcast messages from Acura.
