2012 Civic Hybrid Navigation Online Reference Manual

The information and specifications included in this publication were in effect at the time of approval for printing. Honda Motor Co., Ltd., reserves the right, however, to discontinue or change specifications or design at any time without notice and without incurring any obligation.

Accessories Precautions

The GPS antenna is located in the dashboard. Metallic front or side window tinting can seriously degrade or obstruct GPS reception.

Signal noise from devices such as radar detectors, vehicle tracking devices, remote starters, and additional amplifiers can disrupt the navigation system. If you install any such item, install it away from the navigation display and antenna.

Important Safety Information

Using the navigation system while driving can take your attention away from the road, causing a crash in which you could be seriously injured or killed.

Only operate system controls when the conditions permit you to safely do so.

Avoid focusing on the screen or manually operating the system controls while driving.

Certain on-screen controls are disabled when driving, but most of the audible instructions and voice commands continue to function. Pull to the side of the road if you need to devote more attention and time to look at the screen or access additional menus.

Route guidance may conflict with street closures, road construction, detours, and out-of-date map data.

The system itself may also have limitations. Verify route information by carefully observing roads, signs, and signals. Always use your own judgment and obey traffic laws.

System Limitations P. 182

NOTICE

This vehicle's navigation display, if so equipped, includes mercury-containing components. Upon removal, please reuse, recycle, or dispose of as hazardous waste. Clean the screen with a soft, damp cloth. You may use a mild cleaner intended for use on navigation screens.

Overview—Functions at a Glance

Navigation

You can select any place/landmark as a destination by using voice control or the touch screen. The navigation system gives you turn-by-turn driving directions to your destination.

Store home addresses P35

Register **2** home addresses.

Store contacts P30

Store up to **200** contacts in **2** address books.

Enter destination P.56

Select your destination using **11** methods.

Select route P.78

Set route preferences and select one of **3** routes.

Follow your route in real-time with voice guidance.

FM Traffic P.99

View and avoid congestion and traffic incidents.

Avoid certain areas P102

Set streets and areas to detour around.

Add waypoints
P103

Add up to 4 "pit stops" along your route.

(15)

Index

Audio

The advanced audio system provides clear, well-defined sound and makes the most of your music. Enjoy listening to a variety of audio sources, such as:

AM/FM Radio →R116
XM® Radio →R121
Compact Disc →R125

iPod® →R129

USB Flash Drive →R133

Bluetooth® Audio →R137

Voice Control P19

Use voice commands to control the system while driving. You can operate all key functions of the navigation, audio, and climate control systems.

Pair a compatible cell phone to receive incoming and make outgoing calls. You can operate the phone features without ever taking your hands off the wheel.

System Controls

- The audio system is muted during voice control mode.
- Say M "Help" to see all supported commands. A voice help tutorial is also available.

Voice Help P13

<u>ح</u> ۱۱)

Audio System

You can play music from a wide array of media sources. You can also control the audio system using voice commands.

Basic Operation

- Press the VOL (Volume/Power) button to turn the audio system on or off.
- 2 Press the AUDIO button and select **SOURCE** on the screen.

4 Rotate the VOL (Volume/Power) knob to adjust the volume.

Audio Control Display

Press the AUDIO button to display the audio system on the navigation screen.

Map Screen Legend

During Route Guidance

During route guidance, route information is displayed on the map/guidance screen and multi-information display. Press the MAP/GUIDE button to display the guidance screen.

Map Screen

Guidance Screen

Day or Night Mode

Press the *) (Display mode) button to manually switch between day and night mode.

Multi-information Display

Turn-by-Turn Directions

The next guidance point appears on the multi-information display.

Next driving maneuver is approaching.

How to Enter Information

You can enter information (e.g., city names, street names, personal names, and business names comprising letters, numbers, and symbols) when prompted on input screens by two different methods.

Using Voice Control

When you see 🛐 in this manual, voice commands are available for that feature.

- Say the letter, number, or symbol (e.g., say [6] "A").
- Use spelling assist (e.g., say ½ "Alpha" to enter the letter "A" or ¾ "Hyphen" to enter a hyphen).
- The system beeps if you say an unavailable (grayed out) letter or number.
- If a voice command is not recognized, a list is displayed with possible options.

On list screens:

- Say the number of the list item (e.g., say 😥 "Five" to select item 5).
- Say 🐔 "Up" or 🐔 "Previous" to scroll up one page.
- Say 🛍 "Down" or 🛍 "Next" to scroll down one page.

Using the Touch Screen

Touch a character or icon on the screen to select it.

- Select **Delete** to remove the last entered character.
- Select **Shift** to display accented and upper/lower case characters.
- Select **Space** to enter a space character.
- Select More to display symbols.

On input search screens, the number of hits in the map database is displayed. Select **List** to display a list of possible entries.

NOTE

You can also use the joystick to enter information.

System Controls P. 4

Navigation—Home Addresses and Going Home

The "Home" feature automatically routes you to your home address from any location simply by selecting **Go Home 1** or **2**, or saying significantly from the same of the same o Home." You can store two home addresses as Home Address 1 and Home Address 2.

Storing Your Home Address

Going Home

2 Select Go Home 1.

Alternatively, you can say 6 "Go Home" from any screen. Your home address is displayed on the Calculate Route screen.

- The following voice commands are available: say 6 "Go Home," 6 "Go Home 1," € "Go Home 2."
- If you have two home addresses stored, saying "Go Home" will select Home Address 1.

Navigation—Entering a Destination

Enter your destination using one of several methods, then follow route guidance on the map or guidance screen to your destination. You can also perform these steps using [6] voice control.

7 If there is more than one city with the specified street, a list of cities is displayed. Select the desired city from the list.

View Routes: Choose one of three routes.

 Route Pref.: Choose MAX or MIN for the three settings.

Navigation—Changing Route or Destination

You can alter your route by adding waypoints to visit, adding streets to avoid, or changing your destination during route guidance.

Adding a Waypoint ("Pit Stop")

You can add up to four waypoints along your route. P.103

- 1 Press the DEST button.
 2 Select Waypoint.
- 3 Select search method.

 Select a search method

 Places Along the Route

 Places Around the Destination

 Places Around the Waypoint

When you select **Places Around the Waypoint**, select the desired waypoint.

4 Select the icon category and location to add to the destination list when prompted.

Changing Your Destination

There are four methods you can use to specify a new destination during route guidance.

- Say <u>Find Nearest...</u> <u>P108</u>
 Searches for the nearest place/landmark on the map screen (e.g., <u>Find nearest gas station</u>
- Say *Go Home" >P.10
 Routes to your home address.
- Selecting an icon on the map
 P109

 Scroll the map to position the cursor over a place/landmark icon or a new area on the map. Press the Enter button twice.
- Entering a new destination Priss the DEST button. Select DEST
 Menu1/2 and enter a new destination.

Canceling Your Route

From the map screen:

1 Select MAP MENU.

Index

Voice Help

This navigation system comes with voice help information, which tells you how to use the voice command functions. Go to Voice Info for tips when using the voice command functions.

Getting Started Tutorial

Command Help

For "Command Help" menu items, all voice commands that are available for that system are listed.

Select **Read** to hear the commands in the list read aloud.

Voice Commands P189

mE.

Troubleshooting

For more Information P.167

Why does the vehicle position icon on the map "lag" a short distance behind my actual position, especially at intersections?

This is normal. The navigation system is unaware of the width of intersections. Large differences in vehicle position can indicate a temporary loss of the GPS signal.

Why does the "time to destination" display sometimes increase even though I am getting closer to my destination?

The "time to destination" is based on the posted road speed signs and your actual road speed to give you a better estimate of arrival time

Why does my clock frequently change the time forward and backward by one hour?

The clock setting is automatically updated based on your GPS location. If you normally drive between two time zones, the clock may keep adjusting the time. You can turn this feature off.

Clock Adjustment P. 46

How do I specify a destination when an entered city or street could not be found?

Try entering the street first. Some cities are lumped in with a major metro area. In rural "unverified" areas or new subdivisions, streets may be missing or only partially numbered

How do I turn on the navigation system voice guidance?

- 1. Press the INFO button. Select **Setup**. Check that Volume is not set to Off
- 2. Select Other, then Basic Settings. Set Voice **Recognition Tutor** to **On** if you want the system to provide confirmations and system prompts.

My battery was disconnected or went dead, and the navigation system is asking for a code. Where do I find it?

In most cases, you do not need to enter a code. Simply press and hold the VOL (Volume/Power) button for two seconds; the system should reactivate.

System Initialization P. 180

How to Use This Manual

This section explains different methods on how you can easily find information in this manual.

Two types of Tables of Contents help you find your desired information.

First, find the general chapter related to what you are looking for (e.g., entering a destination from the Address Book). Then, go to that chapter to view a more specific table of contents.

Chapter Contents

This more detailed table of contents shows you exactly what information is listed by section and title.

Menu items displayed on the navigation screen (e.g., Address Book) can be found individually in the Index.

The Index consists of main terms and subentries. The sub-entries help you get to the desired page depending on what you are looking for.

> Go to the **Next Page**

After following the menu tree, step-by-step instructions explain how to achieve the desired result.

Menu Tree

The menu tree helps guide you through the system's menu options. To get to your desired function, follow the menu tree in order of the steps shown.

NOTE:

All menu options can also be activated with voice commands.

Press the hard button on the system control panel.

Press the DEST button

Select the menu option.

Select Address Book

Sample pages and images in this section may differ from the actual ones.

16

System Setup

This section describes the start-up procedure and the navigation and setup functions.

(Inde

Index

Your vehicle has a voice control system that allows hands-free operation of most of the navigation system functions. You can also control the audio and climate control system*, and make and receive phone calls using *Bluetooth*® HandsFreeLink®.

The voice control system uses the 🚱 (Talk) and 🖘 (Hang-Up/Back) buttons on the steering wheel and a microphone near the map lights on the ceiling.

A "Voice Info" feature provides a tutorial that explains how to use the voice control system.

▶ Voice Help P. 13

Command Input

If the system does not understand a command or you wait too long to give a command, it responds with "Pardon," "Please repeat," or "Would you say again."

When you give a command, the system generally either repeats the command as a confirmation or asks you for further information. If you do not wish to hear this feedback, you can turn it off. However, listening to the feedback will help familiarize you with the way the system expects commands to be phrased.

Basic Settings P. 23

If the system cannot perform a command or the command is not appropriate for the screen you are on, the system beeps.

If the system responds with prompts such as "Please use the touch screen to..." or "Please use the joystick to...," the system is asking for input that cannot be performed using the voice control system.

On character input screens, a list of possible characters is displayed if the system does not recognize your command.

You can find out which voice commands are available for a particular screen using the 6 Help command. The system will display and read the list of available commands to you.

፮፮ 🖟 (Talk) Button

When you press the 🖟 (Talk) button, a helpful prompt asks what you would like to do. Press and release the 🖟 (Talk) button again to bypass this prompt and give a command.

* Climate voice control: Civic Hybrid model only.

Command Input

The audio system is muted while using the voice control system.

§ INFO button **▶ Setup ▶ Personal Information ▶ User Name**

Change the user name ("User 1" or "User 2") to your desired name.

- **1.** Select the name to change.
- 2. Enter a name. Select OK.

Previous Destinations

The navigation system maintains a list of your previously routed destinations as a shortcut for entering the same destination in the future. You can delete some or all of your previous destinations from the list.

- 1. Select the destination to delete.
 - ► Repeat the procedure as necessary.
 - ltems to be deleted are indicated with a trash icon.

2. Select **OK** to delete the selected destinations.

>> Previous Destinations

Up to 50 destinations can be stored.

The list of previous destinations is shared with User 1 and User 2. For example, if User 1 deletes some previous destinations, they are deleted for User 2 as well.

To cancel the selection of a previous destination, select the destination again.

Selecting **Delete All** allows you to delete all destinations.

§ INFO button ▶ Setup ▶ Other ▶ Routing & Guidance

Choose various settings that determine the navigation system functionality during route quidance.

Select an item.

The following items are available:

- Rerouting: Sets the route recalculation to automatic or manual mode.
 ▶ Rerouting P. 40
- Unverified Area Routing: Sets whether you use the route guidance in unverified areas.
 - Unverified Area Routing P. 41
- Edit Avoid Area: Specifies areas to avoid when calculating a route.

 ▶ Edit Avoid Area P. 43
- Edit Waypoint Search Area: Sets the distance from the route to find waypoints.
 Edit Waypoint Search Area P. 45
- Guidance Mode: Sets whether to display only the map screen or a split mapguidance screen.
 - **Guidance Mode** P. 90

Rerouting

§ INFO button ➤ Setup ➤ Other ➤ Routing & Guidance

Set whether route recalculation occurs automatically or manually during route guidance.

Select an option.

The following options are available:

- Automatic (factory default): The system calculates a new route automatically when you deviate from the route. It is strongly recommended that you leave the system set to Automatic.
- Manual: Disables route recalculation. The system beeps and "Off Route" is displayed when you deviate from the route.

Rerouting

If you live in an area with poor mapping, you may wish to set **Rerouting** to **Manual** to avoid constant recalculation. You will need to select **Recalc.** manually to make the system recalculate your new route.

Index

Unverified Area Routing

% INFO button ▶ Setup ▶ Other ▶ Routing & Guidance

Receive turn-by-turn map and voice guidance in unverified areas.

Set routing Rerouting Automatic Manual Unverified Area Routing On Off Edit Avoid Area Edit

Select On or Off.

Differences	Off (factory default)	On
On or Off?	The driver wishes to manually navigate using the navigation map and choose the streets that lead to the destination.	The driver chooses to let the navigation system suggest possible routing, knowing that the guidance may not be accurate.
Route calculation	Route is usually longer, using verified roads whenever possible.	Route is shorter, but uses unverified (purple) streets that may not be accurate.
Route line	A blue dotted vector line is displayed on the map that continually points to your destination.	A blue-pink dashed route line highlights suggested unverified streets on the map while traveling to your destination.
Cautionary messages	Cautionary pop-up screens and voice announcements remind you to obey all traffic restrictions.	Cautionary pop-up screens and voice announcements remind you to exercise additional caution and obey all traffic restrictions.

■ Unverified Area Routing

Unverified roads are found in rural areas, and typically include residential streets away from the center of a town. They may not be accurate, and can contain errors in location, naming, and address range.

Unverified roads are shown only when viewing the map in the 1/20, 1/8, 1/4 mile map scales.

System Setup

Differences	Off (factory default)	On
Guidance (map/voice)	There is no turn-by-turn map or voice guidance.	Voice guidance commands end with the phrase "if possible" to remind you to verify all traffic restrictions.
My Destination (Direction list)	A direction list is typically not available. However, depending on your route, directions are provided to help you reach the first available verified road.	A direction list is provided showing unverified street names in blue boxes and turn symbols in pink.

Fdit Avoid Area

§ INFO button ▶ Setup ▶ Other ▶ Routing & Guidance ▶ Edit Avoid Area "Edit"

Specify up to five areas to avoid (e.g., road construction, closures), if possible, when the system calculates routes to your destination.

1. Select **New Area** or an existing area to edit.

- Select Edit Name to label the area to avoid.
- 3. Enter a name or title. Select OK
- **4.** Select **Edit Area** to define the area to avoid.

The following items are available (after an area is set):

- View Area Map: Displays the selected avoid area on the map.
- Delete: Deletes the selected avoid area.

Edit Avoid Area

The avoid areas are shared with User 1 and User 2. For example, if User 1 specifies some avoid areas, User 2 can also use them for setting a route.

The maximum size of an "avoid area" is 1/2 square mile.

If your selected area contains a freeway, you are asked "Do you want to avoid freeways?" Answering "No" allows you to use a route through an avoid area on a freeway without any pop-up messages.

You can select areas to avoid, however you cannot select roads or areas that you want the system to use for routing.

You can enter up to 25 characters for the name.

(Inde

5. Select a method for specifying the area.

The following items are available:

- Address: Specify the general area by entering an address.
- Map Input: Specify the general area by map input.

 ▶ Map Input P. 75

Cursor

► To redo the area selection, press the CANCEL button.

cursor over your desired start point,

necessary. Press the ENTER button

6. Scroll the map to position the

adjusting the map scale as

to mark the start point.

- **7.** Scroll the map to "draw" the area. Press the ENTER button to mark the end point.
- 8. Select OK.
 - ► The area you specify is displayed in the list of areas to avoid.

.....

§ INFO button ▶ Setup ▶ Other ▶ Clock Adjustment ▶ Clock Adjustment

Set the automatic adjustment of the system clock for daylight saving and international time zones.

Select an item.

The following items are available:

 Auto Daylight: The navigation system automatically adjusts the clock ("spring ahead" or "fall back" by one hour) when a daylight saving time change occurs.
 On (factory default): Adjusts the clock automatically.
 Off: Disables the feature.

 Auto Time Zone: The navigation system automatically adjusts the clock when driving through different time zones.

On (factory default): Adjusts the clock automatically.

Off: Disables the feature

- Clock Format: Sets the time notation to either 12-hour clock (12H, factory default) or 24-hour clock (24H).
- Time Adjustment: Adjust the current time manually.
 Adjust Time P. 47
- Reset: Reset the clock settings to the factory default.
 Resetting the Clock Settings P. 47

Clock Adjustment

You can check the time and date from any screen using voice commands.

Յ Global Commands P. 190

Auto Daylight

This function is not activated in areas that have not adopted daylight saving time, even if you have set **Auto Daylight** to **On**.

Auto Time Zone

If you live and work in two different time zones, you may want to turn **Auto Time Zone** to **Off**. When driving near a time zone boundary, the displayed time zone may fluctuate between the two zone times.

Setup ► Other ► Vehicle

Set the off-road tracking feature and correct the vehicle position displayed on the map.

Select an item.

The following items are available:

- Off-road Tracking: Set whether to display the tracking dots on the map.
 → Off-road Tracking P. 50
- Correct Vehicle Position: Adjust the position of the vehicle on the map.

 → Correct Vehicle Position P. 51

Off-road Tracking

Setup ► Other ► Vehicle

The navigation system can be set to display white off-road tracking dots ("breadcrumbs") on the map screen whenever you drive into an area approximately 1/2 mile away from a mapped road.

Select an option.

The following options are available:

- On: The system displays the white tracking dots.
 Driving Off-road P. 83
- Off (factory default): Disables the feature.

To clear existing breadcrumbs, set Off-road Tracking to Off, exit the Setup screen, and then set Off-road Tracking to On again.

Index

Correct Vehicle Position

% INFO button ▶ Setup ▶ Other ▶ Vehicle

Manually adjust the current position of the vehicle as displayed on the map screen if the position appears to be incorrect.

- 1. Put the vehicle in Park
- 2. Select ADJUST under Current Vehicle Position.
- **3.** Scroll the map to position the arrowhead at your correct position.
- **4.** Select **C** or **D** to position the arrowhead in the correct direction the vehicle is facing.
- 5. Select OK.

○ Correct Vehicle Position

An apparent position error can occur where buildings, tunnels, and other objects block or reflect the GPS signals, forcing the system to use "dead reckoning" to determine your location and direction.

Using this function to adjust vehicle position is not recommended. When the system reacquires a GPS signal, it will automatically place the vehicle in the correct location.

If you continually have to adjust the vehicle position, you may have problems with the GPS reception or there may be database errors.

System Limitations P. 182

(hÉ

Reset Factory Default Settings

§ INFO button ➤ Setup ➤ Other ➤ Reset Factory Default

Reset all the settings on the Setup screens to their factory defaults.

■ Deviating From the Planned Route

If you leave the calculated route, the system automatically recalculates a route to the desired destination based on your current location and direction.

Rerouting P. 40

■ Driving Off-road

If you leave all mapped (digitized) roads, the system automatically starts displaying a series of dots (breadcrumbs) to track the path you are taking. If needed, you can follow the dots back to the mapped road you originally left.

Off-road Tracking P. 50

Deviating From the Planned Route

If **Rerouting** is set to **Manual** and you go off route, the system waits for you to manually initiate recalculation. Select **Recalc.**

Rerouting P. 40

Driving Off-road

A message "Not on a digitized road" may appear when you drive half a mile away from a mapped road.

Breadcrumbs may occasionally be displayed in urban areas, such as large parking lots in shopping malls, in new subdivisions where the roads are not yet in the database, or in areas where a GPS signal is unavailable, such as in a parking garage.

Off-road tracking breadcrumbs are limited to approximately 150 miles. Breadcrumbs at the beginning of the trail are deleted if you exceed that distance.

Breadcrumbs are displayed only at 1/20, 1/8, 1/4, and 1/2 mile map scales.

Listening to Voice Guidance

VOICE (on map)

As you approach each guidance point, a pop-up window is displayed on the map screen with instructions for you to follow. Voice guidance for each guidance point is also provided.

Typically, you hear three prompts:

- 1/2 mile from the guidance point
- 1/4 mile from the guidance point
- Just before the guidance point

To replay voice guidance, select **VOICE** on the map screen.

If you select **VOICE** between guidance points, voice guidance for the next guidance point is provided.

∑ Listening to Voice Guidance

"Voice" (on the map screen)

You can turn voice guidance off if you prefer.

Display and Volume Settings P. 21

When driving in unverified areas, the phrase "if possible" is inserted before each voice guidance prompt.

VOICE on the map screen may be grayed out if the vehicle is approaching or in an unverified area.

The timing of voice guidance varies depending on the type of road you are on and the distance to the next guidance point.

XM® Radio Service

■ Subscribing to XM® Radio

- **1.** Retrieve your radio ID before registering for subscription.
 - ► To see the radio ID, press the ▼ (SEEK/SKIP) button to select "000" channel. You can also select "000" channel from CHANNEL LIST.
- 2. Have your radio ID and credit card number ready, and either call XM or visit the XM website to subscribe.

■ Receiving XM® Radio

Press the XM button and stay in this mode for about 30 minutes until the service is activated. Make sure your vehicle is in an open area with good reception.

■XM® Radio Display Messages

Loading: XM is loading the audio or program information.

Channel Off Air: The channel is not currently broadcasting.

Channel Not Authorized: The encryption code is being updated. Channels 0 and 1 still work normally.

No Signal: The signal is too weak in the current location.

Channel Not Available: No such channel exists, the channel is not part of your subscription, or the artist or title information is not available.

Check Antenna: There is a problem with the XM antenna. Contact a dealer.

Subscribing to XM® Radio

Contact Information for XM® Radio:

U.S.: XM® Radio at *www.xmradio.com*, or (800) 852-9696

Canada: XM Canada at www.xmradio.ca, or (877) 209-0079

■ Receiving XM® Radio

The XM satellites are in orbit over the equator; therefore, objects south of the vehicle may cause satellite reception interruptions. Satellite signals are more likely to be blocked by tall buildings and mountains the farther north you travel from the equator.

You may experience reception problems under the following circumstances:

- In a location with an obstruction to the south of your vehicle
- In tunnels
- On the lower level of a multi-tiered road
- Large items are carried on the roof rack

- Phonebook: Adds a number from the imported phonebook.
- History: Adds a number from the last 20 numbers.
- Phone Number: Enters a number manually.

Setting Up Speed Dialing

You can control the HFL system using voice commands.

HFL Menus P. 160

Up to 15 speed dial entries can be stored per phone.

65

Index

Home

ос _Б

PHONE button ► Speed Dial 1 or Speed Dial 2

- 1. Select a speed dial entry.
- 2. Select Edit Speed Dial.
- 3. Select Voice Tag.

4. Follow the prompt to enter a voice tag.

■ Registering a Voice Tag to a Speed Dial Entry

Voice tags allow you to call your speed dial entries from the PHONE screen using the "Call..." voice command (e.g., say ** "Call John Smith").

- Avoid using duplicate voice tags.
- Avoid using "Home" as a voice tag.
- It is easier for HFL to recognize a longer name (e.g., "John Smith" instead of "John").

Deleting a Speed Dial Entry

- 1. Select Delete Speed Dial.
- 2. Select Yes.

Index

Home

■ Editing a Voice Tag

PHONE button ► Speed Dial 1 or Speed Dial 2

- 1. Select a speed dial entry.
- 2. Select Edit Speed Dial.
- 3. Select Voice Tag

4. Select an item.

The following items are available:

- Play Stored Voice Tag: Plays the stored voice tag.
- Record Voice Tag: Stores a voice tag. Follow the prompt to enter a voice tag.
- Delete Voice Tag: Deletes the stored voice tag. Select Yes.

Bluetooth® HandsFreeLink®

Editing Phone Information

PHONE button ► Phone Setup ► Add/Select a phone ► List

Edit the user name of a paired phone, and protect the phonebook and speed dial entries with a PIN.

1. Select a phone to edit.

2. Select an item.

The following items are available:

- Connect: Connects the selected phone to the HFL.
- Edit Name: Enter a name.
- PIN: Enter a 4-digit PIN. Re-enter to confirm. You can select Do Not Use PIN to remove a PIN
- Replace this Phone: Deletes the selected phone and adds a new phone.
 ▶ Pairing a Phone P. 146
- Delete this Phone: Deletes the user name, call history, and phonebook.

■ Editing Phone Information

You can control the HFL system using voice commands.

HFL Menus P. 160

You can name up to six HFL users. Each can be PIN protected, and have their own phonebook, speed dial entries, and call history.

Phone Setup

PHONE button ► Phone Setup

Set HFL options and features.

- 1. Select an item.
- 2. Select OK.

The following items are available:

- Bluetooth Setup: Pairs your phone to the system.
 Pairing a Phone P. 146
- Bluetooth Connection: Turns the Bluetooth® connection on or off.
 On: Connects your Bluetooth-compatible device to the system.
 Off (factory default): Disables the feature.
- Auto Transfer: Sets whether to automatically transfer a call from your phone to
 HFL when you enter and turn on the vehicle.
 On (factory default): Automatically transfers your call to HFL.
 Off: Disables the feature
- Auto Answer: Sets whether to automatically answer an incoming call.
 On: Automatically connects an incoming call after about five seconds.
 Off (factory default): Disables the feature.
- Volume: Select = or + to adjust the receiver and ring volume. If you change the volume during a call, it is maintained at that level until you change it again.

You can control the HFL system using voice commands

→ HFL Menus P. 160

us.

Making a Call

Make calls by entering a number or using the imported phonebook, call history, or speed dial entries.

- Using the Phonebook P. 157
- **≥ Entering a Phone Number** P. 157
- **Using Call History** P. 158
- Using Speed Dial P. 158

156

Making a Call

You can control the HFL system using voice commands.

HFL Menus P. 160

When you say (Call by number" or Call by voice tag" on any screen, the following screen appears:

You can make a call to a phone number or a speed dial entry with a voice tag using a voice command (e.g., say (Call John Smith").

Only one phone can be used with HFL at a time. When there are more than two paired phones in the vehicle, the first paired phone the system finds is automatically linked.

■ Using the Phonebook

PHONE button ► Phonebook

- 1. Select a name
 - ► Select alphabetical tabs to display the entries in the group.
- 2. Select a number.
- **3.** Select **Call** to begin dialing.

■ Entering a Phone Number

% PHONE button ▶ Dial

- 1. Enter a phone number.
- 2. Select Dial to begin dialing.

A command that consists of several words can be spoken together.

For example, say (123-456-7890" at once.

2012 Civic Hybrid Navigation

Call history

1. Select a call

- ► Select All. Dialed. Received. Missed to view the call history by category.
- 2. Select Call to begin dialing.

■ Using Speed Dial

■ Using Call History

PHONE button ► Call History

PHONE button ► Speed Dial 1 or Speed Dial 2

- 1. Select a speed dial entry.
- **2.** Select **Call** to begin dialing.

■ Using Call History

The call history shows the last 20 calls from your phone.

■ Using Speed Dial

To make a call using speed dial, you need to create speed dial entries.

Setting Up Speed Dialing P. 151

More Speed Dial Lists

You can make a call by using more speed dials on the other phones.

- **1.** Select another paired phone in the list.
- 2. Select a speed dial entry.
- 3. Select Call to begin dialing.

If the other phone is PIN-protected, enter the PIN when prompted. Select OK. PINs are optional.

Editing Phone Information P. 154

Receiving a Call

1. Press the (Pick-Up) button to answer a call and display the Calling screen.

2. Press the (Hang-Up) button to terminate the call.

The following options are available during a call:

- MUTE: Allows you to mute your voice.
- Touch Tones (available on some phones): Allows you to send numbers or names during a call. This is useful when you call a menu-driven phone system.
- Transfer Call: Allows you to transfer a call from HFL to your phone, or from your phone to HFL.

■ Receiving a Call

An incoming call notification appears on both the navigation screen and the multi-information display, and you hear an audible ring tone.

If your phone has Call Waiting, press the button to put the original call on hold and answer the incoming call. To return to the original call, press the button again. If you want to hang up the original call and answer the new call, press the button.

To change the volume level of HFL, use the audio system volume knob or the steering wheel volume controls.

Some phones may send battery, signal strength, and roaming status information to the screen.

Phonebook

Displays the cell phone's imported phonebook.

Using the Phonebook P. 157

Map, Voice, Entering Destinations

Problem	Solution
The Startup Confirmation screen is displayed every time I start the car.	This is normal. The Startup Confirmation screen reminds you and your guest drivers to always operate the navigation system in a safe manner.
The navigation system reboots by itself (returns to the opening screen).	A reboot can be caused by extreme temperatures or shock from bumpy roads, and does not necessarily indicate a problem. If this happens frequently, please see your dealer.
How do I specify a destination when an entered city or street could not be found?	 Try entering the street first. Some cities are lumped in with a major metro area. In rural "unverified" areas or new subdivisions, streets may be missing or only partially numbered. Try selecting the destination directly from the map. Map Input P. 75
Why do some letters become grayed out when I enter an address?	As you enter each letter in an address or a place/landmark, the navigation system looks in the database to see what letters are possible and grays out letters that do not apply.
How do I delete Personal Addresses, Previous Destinations, or the Home Address?	 Press the INFO button. Select Setup > Personal Information to display the types of information. Select the type of address to delete. Select Delete.
I cannot hear the navigation system voice.	 Press the INFO button. Select Setup and check that Volume is not set to Off. Display and Volume Settings P. 21 Select Other > Basic Settings and set Voice Recognition Tutor to On. Basic Settings P. 23
The voice control system is having difficulty recognizing my voice commands.	 Check that the vents are not blowing air onto the microphone on the ceiling, the vehicle is as quiet as possible, and you are using the correct command when speaking. Voice Recognition P. 20 Say Say Say " "Help" on any screen to see a list of the applicable voice commands.

Problem	Solution
The navigation system pronunciation of street names in the guidance command or destination address sounds strange.	The basic guidance phrases use a studio-recorded voice, but street names are pronounced using a machine-generated voice. Consequently, the name may be mispronounced or sound strange at times.
The screen is bright when I drive at night.	 Check that the nighttime dashboard brightness control is not set to maximum. Press the INFO button. Select Setup > Other > Color > Map. Set the Night color to Black for the best contrast. Switching Display Mode Manually P. 26
The screen is dark when I drive during the day.	Press the INFO button. Select Setup > Other > Color > Map . Set the Day color to White for the best contrast. Switching Display Mode Manually P. 26
How do I change or remove my PIN?	 Press the INFO button. Select Setup > Personal Information > PIN Number > GO Home 1 PIN or GO Home 2 PIN or Address Book PIN. Enter your existing PIN. You then have the choice to change or remove the PIN. PIN Numbers P. 36
I have forgotten my PIN. How do I reset the PIN for Home or the PIN for personal addresses (User 1 or User 2)?	Your dealer must reset the PIN for you.
Why is Call grayed out on the Calculate Route screen?	Your phone is not paired to ${\it Bluetooth} @$ HandsFreeLink@ or, if paired, your phone is in use.

Troubleshooting

Traffic

Problem	Solution
My FM Traffic is missing or is not displaying properly. What is wrong?	 Verify the following: FM Traffic relies on a clear FM signal. If signal strength is low, traffic data may not be available. Check the traffic icon on the icon bar, and the icon options for traffic. Showing Icons on the Map P. 92 It is possible that there is a temporary technical problem with your metropolitan area traffic. You can call Honda Automobile Customer Service to see if there is an outrage. Honda Automobile Customer Service Contact Information P. 184 If the situation persists, see your Honda dealer for assistance.

Guidance, Routing

Problem	Solution
The navigation system does not route me the same way I would go or the same way as other mapping systems.	The navigation system attempts to generate the optimal route. You can change the route preferences used when calculating a route. ▶ Changing the Route Preference P. 78
The street I'm on is not shown on the map screen.	The mapping database is constantly undergoing revision. You can access the most recent information on the internet. Map Coverage P. 185
The vehicle position icon is not following the road and the "GPS icon" text in the upper left hand corner of the screen is white or missing.	 Check that the GPS antenna (located in the dashboard) is not blocked. For best reception, remove items from the dashboard, such as radar detectors, cell phones, or loose articles. Metallic tinting or other aftermarket devices can interfere with the GPS reception. Please consult your dealer. → GPS System P. 182

otin
9
тос

Problem	Solution
The blue highlighted route and voice guidance stopped or turned into a blue/pink dashed line before I got to my destination.	Your route has entered an unverified area. ■ Unverified Area Routing P. 41
How do I stop the map from rotating as I drive along?	Select the map orientation icon on the map screen, or say 😥 "Display north-up" to change the map orientation.
Sometimes, I cannot select between the North-up and Heading-up map orientations.	The Heading-up map orientation can only be shown in the lower scales (1/20 - 1 mile scales). ▶ Map Scale and Functions P. 95
The "time to destination" display sometimes increases even though I am getting closer to my destination.	If your speed reduces due to slower traffic, the navigation system updates the "time to destination" based on your actual road speed to give you a better estimate of arrival time.
The vehicle position icon on the map "lags" a short distance behind, especially when I arrive at an intersection.	This is normal. The navigation system is unaware of the width of intersections. Large differences in vehicle position can indicate a temporary loss of the GPS signal. ☐ GPS System P. 182
The screen is showing white dots as I drive along.	These dots are called "breadcrumbs." These are displayed if Off-road Tracking is set to On and you drive more than 1/2 mile off mapped roads. ▶ Off-road Tracking P. 50
How do I remove the white dots ("breadcrumbs") from my screen?	Press the INFO button. Select Setup > Other > Vehicle, and set Off-road Tracking to Off, then return to the map. Doff-road Tracking P. 50
A road that I selected to avoid is being used when routing.	When you "draw" your area to avoid, make sure to select sections of roads that include at least one intersection. ▶ Avoiding Streets P. 102
My elevation (shown when I display the current position) seems to fluctuate even though my elevation has not changed.	This is normal. The elevation can vary ±100 feet due to GPS calculation errors. ⊇ GPS System P. 182

- (
9
7
(
·
- (
- (
•

TOC

Problem	Solution
My elevation is missing on the "current position" screen.	The elevation is only displayed if the GPS antenna can receive signals from at least four satellites. Try moving the vehicle into an open area. The elevation is also not displayed if the calculated elevation is zero or below sea level.

Update, Coverage, Map Errors

Problem	Solution
My city is not part of a fully verified detailed coverage area.	The mapping database is constantly undergoing revision. You can access the most recent information on the internet. ☑ Map Coverage P. 185
Does the navigation system work outside North America?	The navigation system contains maps for the 50 U.S. states, Canada, and Puerto Rico. The navigation system will not work in Mexico or other countries. Map Coverage P. 185
Can I play video DVDs in my navigation system?	No. The navigation system is designed only to read music discs. If you experience any problems that you cannot resolve, please contact your dealer.
How do I report errors I find in the database?	Minor errors are bound to occur in a large database. If you encounter major errors, see ▶ Reporting Errors P. 184

Display, Accessories

Problem	Solution
The display appears dim when starting the car in really cold weather.	This is normal. The display will become brighter after a few minutes.

Home

Miscellaneous Questions

Problem	Solution
My clock frequently changes forward and backward by one hour.	The clock setting is automatically updated based on your GPS location. If you live and work on the boundary between two time zones, you can turn off this feature. Clock Adjustment P. 46
The clock changes even when I am not driving near a time zone boundary.	The time zone boundaries are only approximated in the navigation system. Depending on the geography of the time zone boundary, the switch to a different zone can be erratic. Clock Adjustment P. 46
My state does not observe daylight saving time. How do I turn off this feature?	Press the INFO button. Select Setup > Other > Clock Adjustment > Clock Adjustment, and set Auto Daylight to Off. Clock Adjustment P. 46
Daylight saving time has started, but the navigation system did not change time even though Auto Daylight is set to ON.	The automatic daylight saving time feature does not work in regions where the daylight saving time system has not been adopted.
The navigation system automatic daylight feature is not switching the navigation system clock on the correct dates.	Press the INFO button. Select Setup > Other > Clock Adjustment > Clock Adjustment, and set Auto Daylight to On. Note that the automatic daylight feature does not work in regions where the daylight saving time system has not been adopted. Clock Adjustment P. 46
The navigation system clock switched by one hour for no apparent reason.	You may be driving near a time zone boundary. Clock Adjustment P. 46
My battery was disconnected or went dead, and the navigation system is asking for a code.	Press and hold the VOL ♂ (Volume/Power) button for two seconds. The system should reactivate. If you have installed an aftermarket system, see your dealer. Entering the Security Code P. 180
How do I change the interface language?	Press the INFO button. Select Setup > Other > Language , and set the language to English , Français , or Español .

174

Navigation System

Error Message	Solution
The display temperature is too high. For protection, the display will shut down.	This message appears briefly when the display temperature is too high. The navigation system turns off until the display cools down. The system turns back on automatically when the display cools down.
The navigation system is unable to start due to excessive heat. The system will start after the system cools.	The navigation system has difficulty accessing to the map database when the temperature is below approximately -22°F/-30°C. The navigation system starts up automatically when the display warms up.
Route has not been completed. Please try again from a different location.	This message appears when you are on a route to or from a new area that is not in the database. Try planning a different route to or from a different location. If the error persists or is shown for a wide area, see your dealer.
Destination is not in this database version. Please set from map. No POI found	The destination was not found in the database. Try another destination nearby, or select the destination from the map using the joystick. If the error persists or is shown for a wide area, see your dealer.

Disc Player

The navigation system must be initialized if power to the navigation system is interrupted for any reason (e.g., the battery was disconnected).

Entering the Security Code

Find the navigation system's security code and serial number label in your Owner's Manual kit. Do not store the label in your vehicle. If you lose the label, you must first retrieve the serial number, and then obtain the code. You can find out about your serial number and security code from a dealer

1	2	3
4	5	6
7	8	9
	0	

- **1.** Turn the ignition switch to ON (II), and turn on the audio system.
 - ► If you turn the ignition switch to ACCESSORY (I), and you will requested to enter the security code. See step 3.
- 2. Press and hold the VOL ((Volume/ Power) button for more than two seconds.
 - ➤ The system is reactivated when the system's control unit recognizes that the system is in your vehicle. If the control unit fails to recognize, "ENTER CODE" appears on the navigation screen.
- 3. Enter the security code.
 - ▶ If you do not enter the security code correctly after 10 tries, leave the system for one hour before trying again, or visit a dealer to have the system reset.

NOTE:

In the U.S., you can register the security code on Owner Link (owners.honda.com.). To find information on how to retrieve the serial number and obtain the code, visit radio-navicode.honda.com.

Acquiring GPS Information

Depending on the length of time the power was interrupted, your system may require GPS initialization.

The navigation system lost power and is acquiring its location from the GPS satellites. This usually takes less than 10 minutes.

* Start the engine.

* Park the vehicle in an open area away from trees, power lines, and tall buildings.

* Remove loose articles, cell phones, or electrical accessories located near the GPS antenna.

* If this screen is displayed repeatedly when starting the vehicle, see your dealer.

If initialization is not necessary, the system proceeds directly to the Startup Confirmation screen

If the system fails to locate a sufficient number of satellites to locate your position within 10 minutes, the following screen is displayed.

Something is interfering with the system's ability to acquire its location. Check the following:

If The vehicle must be in an open area with a clear view of the sky.

Remove sources of GPS interference like metallic window tint above antenna, or electrical items near antenna (see owner's manual for details).

If Check GPS antenna cable connection.

Restart the engine and repeat the GPS acquire procedure. If the problem persists, see your dealer.

If you are experiencing GPS reception problems:

GPS System P. 182

Startup Confirmation Screen

The Startup Confirmation screen is displayed when initialization has successfully completed. It is displayed every time you start your vehicle. Select **OK** to continue.

NOTE:

"OK" cannot be selected using a voice command.

Map Matching

Map matching is the process of using the acquired GPS information to locate your position on the map screen. If you are on a mapped road, the name of the road is displayed along the bottom of the map screen when map matching is completed. Do not enter a destination until the road name is displayed.

The system may initially show your location on a different street (e.g., in urban areas where streets are close together), may show an incorrect elevation, or may delay the display of the vehicle position icon at intersections. This is normal; the system will correct itself while you drive.

Index

182

GPS System

The signals received from the GPS satellites are extremely weak (less than a millionth of the strength of a local FM station) and require an unobstructed view of the sky. The GPS antenna is located in the dashboard. The signal reception can easily be interrupted or interfered with by the following:

- Metallic window tint on the front or side windows
- Cell phones, PDAs, or other electronic devices docked in a cradle or lying loose on the dashboard
- Remote starters or "hidden" vehicle tracking systems mounted near the navigation unit
- Audio electronic devices mounted near the navigation unit
- Trees, tall buildings, freeway overpasses, tunnels, or overhead electrical power wires

The GPS is operated by the U.S. Department of Defense. For security reasons, there are certain inaccuracies built into the GPS for which the navigation system must constantly compensate. This

can cause occasional positioning errors of up to several hundred feet.

Address Calculation

The destination icon shows only the approximate location of a destination address. This occurs if the number of possible addresses is different from the number of actual addresses on a block. For example, the address 1425 on a 1400 block with 100 possible addresses (because it is followed by the 1500 block) will be shown a quarter of the way down the block by the system. If there are only 25 actual addresses on the block, the actual location of address 1425 would be at the end of the block.

Database

The digitized map database reflects conditions as they existed at various points in time before production. Accordingly, your database may contain inaccurate or incomplete data or information due to the passage of time, road construction, changing conditions, or other causes.

For example, some places/landmarks may be missing when you search the database because the name was misspelled, the place was improperly categorized, or a place/landmark is not yet in the database. This is also true for police stations, hospitals, and other public institutions. Do not rely on the navigation system if you need law enforcement or hospital services. Always check with local information sources

In addition, the map database contains verified and unverified areas. Unverified streets may be missing from the map, in the wrong location, or have an incorrect name or address range. A message will warn you if your route includes unverified streets. Exercise additional caution when driving in unverified areas.

The database does not include, analyze, process, consider, or reflect any of the following categories of information:

- Neighborhood quality or safety
- Population density
- Availability or proximity of law enforcement
- Emergency, rescue, medical, or other assistance
- Construction work, zones, or hazards
- Road and lane closures
- Legal restrictions (such as vehicular type, weight, load, height, and speed restrictions)
- Road slope or grade

- Bridge height, width, weight, or other limits
- · Traffic facilities safety
- Special events
- Pavement characteristics or conditions

Every effort has been made to verify that the database is accurate. The number of inaccuracies you experience increases the longer you go without obtaining an updated map database.

We assume no liability for any incident that may result from an error in the program, or from changed conditions not noted above.

Resolving Problems

If you run into a specific issue that you cannot resolve, consult the following help resources:

- For navigation system issues:
 Troubleshooting P. 168
 There are also FAQs available online at automobiles.honda.com.
- For questions regarding Bluetooth® HandsFreeLink:
 - **Bluetooth® HandsFreeLink®** P. 144
- · For traffic-related issues:
 - Traffic P 170
- For reporting issues with the database or places/landmarks:
 - **Reporting Errors** P. 184
- Call Honda Automobile Customer Service
 - **▶** Honda Automobile Customer Service Contact Information P. 184

Reporting Errors

You can help to improve database accuracy by reporting any errors you encounter.

- Report errors in freeways and main "verified" roads shown in black on the map at http://mapreporter.navteq.com/ dur-web-external/.
- Please do not report errors in purple "unverified" roads. Maps for these areas are provided for reference only.
 - Unverified Area Routing P. 41
- Please do not report errors in places/ landmarks, such as changes in business names. Information about points of interest are constantly being updated. An updated database is available for purchase, usually in the fall of each year.
 - **Dobtaining Navigation Update Data** P. 185
- For vehicle position icon errors, screen error messages, or other GPS-related errors:
 - **→ Troubleshooting** P. 168
 - System Limitations P. 182

Honda Automobile Customer Service Contact Information

Honda Navi

American Honda Motor Co., Inc.

Honda Customer Service Mail Stop 500-2N-7E 1919 Torrance Blvd.

Torrance, CA 90501-2746 Tel: (800) 999-1009 Fax: (310) 783-3273

Visiting Your Dealer

If you have a question that you cannot resolve using the available help resources, you can consult your dealer. Please identify the specific issue (e.g., error occurs when you enter a specific address, when driving on a certain road, or just when it's cold) so that the service technician can refer the issue to the factory so that a solution can be found. Be patient, the service technician may be unfamiliar with your specific issue.

Map Coverage

The navigation system provides map coverage for the contiguous United States, Alaska, Hawaii, Canada, and Puerto Rico. The map coverage consists of accurately mapped (verified) metropolitan areas and a less accurate (unverified) rural database. Note that unverified areas are constantly being reviewed and converted to verified areas each year.

Contiguous United States

WHOODST HOME TO BE TO

Map coverage update information is available from Honda Automobile Customer Service or online at www.hondanavi.com.

To find navigation system update information:

- 1. Visit www.hondanavi.com.
- **2.** Enter your vehicle model and model year.
- Click Map Coverage to display a list of verified coverage areas on the most recent update.
- Click Map Coverage Details to display a PDF document with a full listing of all coverage areas.
 - ➤ Adobe® Reader® is required for viewing and printing the Portable Document Format (PDF) documents. To download the latest version of Adobe Reader, visit http://get.adobe.com/reader/.

Obtaining Navigation Update Data

Honda is continually expanding the scope of the navigation system. Navigation system software upgrades may be made available periodically, usually in the fall of each year.

To purchase an updated data file:

- **1.** Obtain your vehicle's VIN number and the System/Device Information.
 - **System/Device Information** P. 165
- Call the Honda Navigation Disc Fulfilment Center at (888) 549-3798, or order online at www.hondanavi.com.

Update data is not available from your dealer. However, the dealer may assist you in obtaining an update data for you out of courtesy. There is no program for free updates.

45

muck

186

Traffic Information

- Continuously updated traffic information is available in major metropolitan areas across the 48 contiguous states and Hawaii.
- Visit automobiles.honda.com/traffic for a complete listing of coverage areas and other information.

Operation in Alaska, Hawaii, Canada, and Puerto Rico

■XM® Radio

Navigation-equipped vehicles delivered to Alaska, Hawaii, Canada, and Puerto Rico are equipped with XM hardware, but XM broadcasting is not available. There are certain functions that rely on XM satellite signal coverage which are not available. Unavailable menu options will appear gray on the LCD display.

■ Map Coverage

All roads displayed on the map screens are verified roads. Information in this manual relating to "unverified" roads or areas is not applicable.

Address and Place Entry Screens

Entering a destination address or place/ landmark on another island may result in a screen caution message. This is because there are no ferry routes between islands in the database.

Shipping a Vehicle to the U.S. Mainland

To receive XM audio, you must call XM and set up an account at (800) 852-9696.

Voice Commands

On-Screen Commands

The system accepts these commands on any screen. There are over 100 on-screen commands. Say what is written on the screen to activate that selection. For lists, you can say the list item number to select that item.

Next/Previous*1 Right/Left*1

Up/Down*2

Return

OK (excluding Startup Confirmation screen)

Delete

- *1. To get to another tab.
- *2. While driving, you can scroll down the list up to three pages.

Spelling Assistance

The voice control system can also recognize phonetic alphabet input for numbers, letters, accented letters, punctuation marks, and symbols.

NOTE:

When selecting letters using the voice control system, a confirmation box may pop up to confirm the entry.
