P/N 00X31-SZT-8400

The information and specifications included in this publication were in effect at the time of approval for printing. Honda Motor Co., Ltd., reserves the right, however, to discontinue or change specifications or design at any time without notice and without incurring any obligation.

Accessories Precautions

The GPS antenna is located in the dashboard. Metallic front or side window tinting can seriously degrade or obstruct GPS reception.

Signal noise from devices such as radar detectors, vehicle tracking devices, remote starters, and additional amplifiers can disrupt the navigation system. If you install any such item, install it away from the navigation display and antenna.

Important Safety Information

⚠ WARNING

Using the navigation system while driving can take your attention away from the road, causing a crash in which you could be seriously injured or killed.

Only operate system controls when the conditions permit you to safely do so.

Avoid focusing on the screen or manually operating the system controls while driving.

Certain on-screen controls are disabled when driving, but most of the audible instructions and voice commands continue to function. Pull to the side of the road if you need to devote more attention and time to look at the screen or access additional menus.

Route guidance may conflict with street closures, road construction, detours, and out-of-date map data.

The system itself may also have limitations. Verify route information by carefully observing roads, signs, and signals. Always use your own judgment and obey traffic laws.

➔ **System Limitations** P. 184

NOTICE

This vehicle’s navigation display, if so equipped, includes mercury-containing components. Upon removal, please reuse, recycle, or dispose of as hazardous waste.

Clean the screen with a soft, damp cloth. You may use a mild cleaner intended for use on navigation screens.

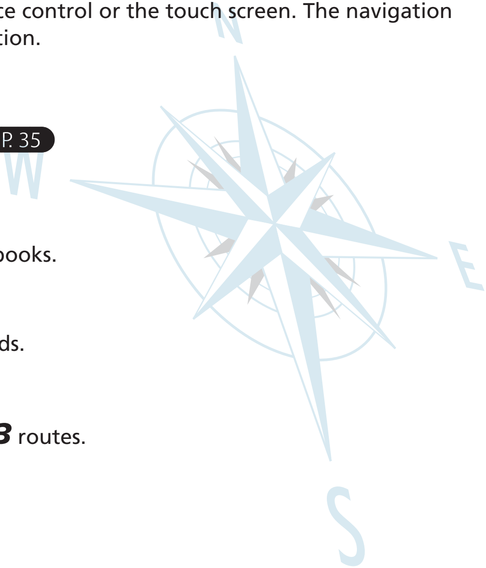
Overview—Functions at a Glance

Navigation

You can select any place/landmark as a destination by using voice control or the touch screen. The navigation system gives you turn-by-turn driving directions to your destination.



Store home addresses ➔P. 35

Register **2** home addresses.

Store contacts ➔P. 30

Store up to **200** contacts in **2** address books.

Enter destination ➔P. 56

Select your destination using **11** methods.

Select route ➔P. 78

Set route preferences and select one of **3** routes.

Track route ➔P. 80

Follow your route in real-time with voice guidance.

FM Traffic ➔P. 99

View and avoid congestion and traffic incidents.

Avoid certain areas ➔P. 102

Set streets and areas to detour around.

Add waypoints ➔P. 103

Add up to **4** “pit stops” along your route.

Audio

The advanced audio system provides clear, well-defined sound and makes the most of your music.
Enjoy listening to a variety of audio sources, such as:

AM/FM Radio ➡P. 116

Compact Disc ➡P. 121

iPod® ➡P. 125

Pandora® ➡P. 129

USB Flash Drive ➡P. 132

Bluetooth® Audio ➡P. 136

Voice Control ➡P. 19

Use voice commands to control the system while driving. You can operate all key functions of the navigation, audio, and climate control systems.

Bluetooth® HandsFreeLink® ➡P. 144

Pair a compatible cell phone to receive incoming and make outgoing calls. You can operate the phone features without ever taking your hands off the wheel.

Text Messages ➡P. 163

Receive text messages on the navigation screen from a compatible device and hear them read aloud. Reply to them using preloaded messages.

Other Features

Multi-View Rear Camera ➡P. 168

Helps you check for obstacles around the rear of your vehicle on the navigation screen when reversing.

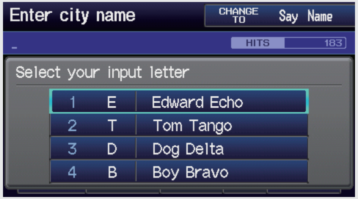
How to Enter Information

You can enter information (e.g., city names, street names, personal names, and business names comprising letters, numbers, and symbols) when prompted on input screens by two different methods.

Using Voice Control

When you see 🗣 in this manual, voice commands are available for that feature.

- Say the letter, number, or symbol (e.g., say 🗣 *"A"*).
- Use spelling assist (e.g., say 🗣 *"Alpha"* to enter the letter "A" or 🗣 *"Hyphen"* to enter a hyphen).
- The system beeps if you say an unavailable (grayed out) letter or number.
- If a voice command is not recognized, a list is displayed with possible options.



Select your input letter

1	E	Edward Echo
2	T	Tom Tango
3	D	Dog Delta
4	B	Boy Bravo

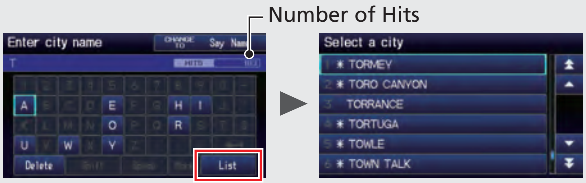
On list screens:

- Say the number of the list item (e.g., say 🗣 *"Five"* to select item 5).
- Say 🗣 *"Up"* or 🗣 *"Previous"* to scroll up one page.
- Say 🗣 *"Down"* or 🗣 *"Next"* to scroll down one page.

Using the Touch Screen

Touch a character or icon on the screen to select it.

- Select **Delete** to remove the last entered character.
- Select **Shift** to display accented and upper/lower case characters.
- Select **Space** to enter a space character.
- Select **More** to display symbols.



On input search screens, the number of hits in the map database is displayed. Select **List** to display a list of possible entries.

NOTE

You can also use the joystick to enter information.

System Controls P. 4

On list screens:

Scrolling through lists or tabs is limited while the vehicle is moving.

Certain touch screen functions are limited or inoperable while the vehicle is moving. For these functions, use available voice commands or pull over to proceed.

Navigation—Home Addresses and Going Home

The “Home” feature automatically routes you to your home address from any location simply by selecting **Go Home 1** or **2**, or saying *“Go Home.”* You can store two home addresses as **Home Address 1** and **Home Address 2**. P. 35

Storing Your Home Address

Voice Commands ➡P. 193

Troubleshooting

For more Information ➔P. 169

Q Why does the vehicle position icon on the map “lag” a short distance behind my actual position, especially at intersections?

A This is normal. The navigation system is unaware of the width of intersections. Large differences in vehicle position can indicate a temporary loss of the GPS signal.

Q Why does the “time to destination” display sometimes increase even though I am getting closer to my destination?

A The “time to destination” is based on the posted road speed signs and your actual road speed to give you a better estimate of arrival time.

Q Why does my clock frequently change the time forward and backward by one hour?

A The clock setting is automatically updated based on your GPS location. If you normally drive between two time zones, the clock may keep adjusting the time. You can turn this feature off.

➔ **Clock Adjustment** P. 46

Q How do I specify a destination when an entered city or street could not be found?

A Try entering the street first. Some cities are lumped in with a major metro area. In rural “unverified” areas or new subdivisions, streets may be missing or only partially numbered.

Q How do I turn on the navigation system voice guidance?

A

1. Press the INFO button. Select **Setup**. Check that **Volume** is not set to **Off**.
2. Select **Other**, then **Basic Settings**. Set **Voice Recognition Tutor** to **On** if you want the system to provide confirmations and system prompts.

Q My battery was disconnected or went dead, and the navigation system is asking for a code. Where do I find it?

A Your vehicle comes with a label in the Owner’s Manual kit that includes the system’s security code and serial number. You should keep this label in a safe place outside your vehicle. If you cannot find it, contact your dealer.

How to Use This Manual

This section explains different methods on how you can easily find information in this manual.

Searching the Table of Contents

➡P. 1

Two types of Tables of Contents help you find your desired information.

"OK" on the Confirmation screen cannot be selected by using a voice command.

Voice Control System

Your vehicle has a voice control system that allows hands-free operation of most of the navigation system functions. You can also control the audio and climate control system, and make and receive phone calls using *Bluetooth*® HandsFreeLink®.

The voice control system uses the (Talk) and (Back) buttons on the steering wheel and a microphone near the map lights on the ceiling.

A “Voice Info” feature provides a tutorial that explains how to use the voice control system.

➔ **Voice Help** P. 13

Command Input

If the system does not understand a command or you wait too long to give a command, it responds with “Pardon? No command was heard. Please press the talk button and say a command.”

When you give a command, the system generally either repeats the command as a confirmation or asks you for further information. If you do not wish to hear this feedback, you can turn it off. However, listening to the feedback will help familiarize you with the way the system expects commands to be phrased.

➔ **Basic Settings** P. 23

If the system cannot perform a command or the command is not appropriate for the screen you are on, the system beeps.

If the system responds with prompts such as “Please use the touch screen to…” or “Please use the joystick to…,” the system is asking for input that cannot be performed using the voice control system.

On character input screens, a list of possible characters is displayed if the system does not recognize your command.

You can find out which voice commands are available for a particular screen using the Help command. The system will display and read the list of available commands to you.

» (Talk) Button

When you press the (Talk) button, a helpful prompt asks what you would like to do. Press and release the (Talk) button again to bypass this prompt and give a command.

» Command Input

The audio system is muted while using the voice control system.

Voice Recognition

To achieve optimum voice recognition when using either the navigation voice control system or *Bluetooth*® HandsFreeLink®:

- Make sure the correct screen is displayed for the voice command that you are using.
  ➲ **Voice Commands** P. 194
- Close the windows and moonroof.
- Adjust the dashboard and side vents so air does not blow onto the microphone on the ceiling.
- Speak clearly in a clear, natural speaking voice without pausing between words.
- Reduce any background noise if possible. The system may misinterpret your command if more than one person is speaking at the same time.
- Refer to the Voice Info tutorial.
  ➲ **Voice Help** P. 13

» Voice Recognition

The voice control system can only be used from the driver's seat because the microphone unit removes noises from the front passenger's side.

For Night mode
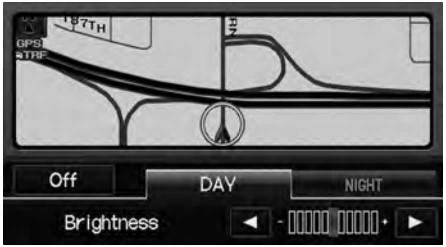
Set to **Black** (factory default is **Blue**) to obtain the best nighttime display contrast.

Switching Display Mode Manually

Set the screen brightness separately for Day and Night modes. Press the ☼☽ (Display mode) button to cycle through the display modes (Day to Night to Off).



1. Press the ☼☽ button.
   - ▶ The Brightness bar is displayed for a few seconds.
2. Press the ☼☽ button again.
   - ▶ Repeat the procedure to switch the display modes.
   - ▶ Select ◀ or ▶ to adjust the brightness.

≫ Switching Display Mode Manually

A visual guide helps you see the difference between Day and Night modes.
➲ **Day or Night Mode** P. 8

Recommended Settings

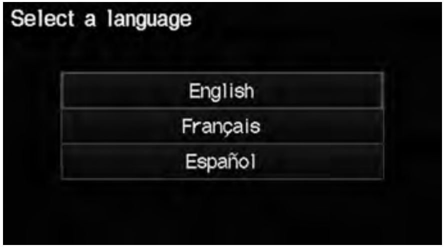
- Select mid-range for the dash illumination.
- Select **White** for the map Day display and **Black** for the map Night display.

Illumination control	Priority	Operation
☀☽ button	1	Selects Day, Night, or Off display mode. This button has the highest priority and overrides all other display control adjustments listed below.
Sunlight sensor (see your Owner’s Manual for location)	2	If the sunlight sensor detects daylight and the headlights are turned on, the system automatically overrides the Night display and displays the Day display mode. **Remember**: If desired, use the ☀☽ button to override this automatic choice.
Dash illumination adjustment buttons (see your Owner’s Manual for location)	3	When the headlights are turned on, and you wish to have the Day display mode, adjust the illumination to full brightness (beeps). **Remember**: Adjust the dash brightness back to mid-range to allow auto switching by sensing the headlights are on or off.
Headlights (Auto/On/Off)	4	When turned on, the display changes to Night display mode. The previous three controls listed above can “cancel” this function. **Remember**: Use the ☀☽ button, or adjust the dash illumination to full brightness, to set the display to your desired choice.
Screen color choice	N/A	The user can select the color of the screen that will be displayed for the Day and Night display modes described above. **Remember**: For best contrast, ensure that the map color is white for Day and black for Night.

Language

INFO button ▶ **Setup** ▶ **Other** ▶ **Language**

Set the system language used on all screens. You can choose from three languages: **English**, **Français** (French), **Español** (Spanish).



Select a language

Select the system language.

» Language

Voice confirmation of cities and streets only occurs when **English** is the system language.

When **Français** or **Español** is selected, some messages continue to be displayed in English.

Personal Information

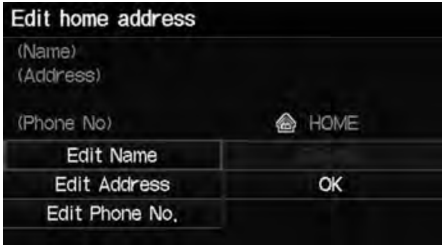
Set two home addresses that you frequently use.



Edit home address
(Name)
(Address)
(Phone No)

1. Edit the name, address, and phone number the same way as an address in the address book.
   Adding an Address Book Entry P. 31
2. Select **OK**.

Home Addresses

If you have PIN-protected your home addresses, enter your PIN when prompted. Select **OK**. PINs are optional.
PIN Numbers P. 36

If your home street is not in the system database, park on the nearest verified street to your home. When entering the “Address” field, select **Current Position** to use your current location as the home address.

You can delete a home address if necessary. Select **Delete**. Select **Yes**.

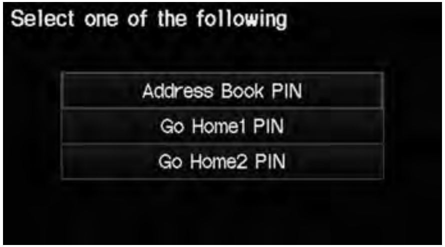
When you transfer the vehicle to a third party, delete all home addresses.

The home icon is shown on the map screen on 5 mile or less map scales.

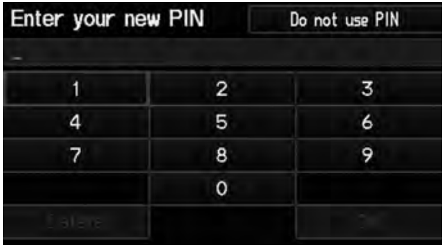
PIN Numbers

INFO button ▶ **Setup** ▶ **Personal Information** ▶ **PIN Number**

Set a 4-digit PIN for protecting personal addresses and your home addresses. Once you set a PIN, you are prompted to enter it whenever you access a personal address or a home address.



1. Select the PIN to create.
2. Select the user name (when selecting **Address Book PIN**).



3. Enter a 4-digit PIN.
4. Re-enter the new PIN when prompted to confirm the number you just entered.
   ▶ If you do not enter the same number both times, an “INCORRECT PIN” message is displayed. Enter your PIN again.

≫ PIN Numbers

PIN
Personal Identification Number (PIN) is a password used to access some personal data.

PINs are optional. If you choose to use a PIN, keep a note of the number in a secure location. If you forget your PIN, your dealer will have to reset the navigation system and all of your stored information will be erased. The factory default is no PIN.

Go Home PIN
Go Home PINs are shared with User 1 and User 2. If either User 1 or User 2 sets a Go Home PIN, both of them need to enter the PIN when:

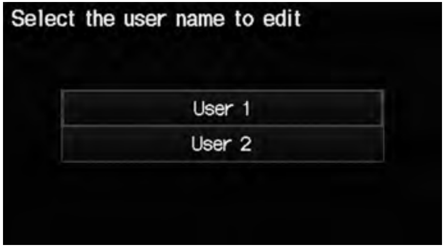
- selecting **Go Home** for a destination
- selecting **Home Address** for editing

If you want to stop using a PIN, select **Do not use PIN**.

User Name

INFO button ▶ **Setup** ▶ **Personal Information** ▶ **User Name**

Change the user name ("User 1" or "User 2") to your desired name.



Select the user name to edit

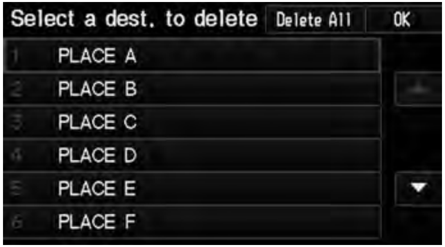
1. Select the name to change.

2. Enter a name. Select **OK**.

Previous Destinations

INFO button ▶ **Setup** ▶ **Personal Information** ▶ **Previous Destinations**

The navigation system maintains a list of your previously routed destinations as a shortcut for entering the same destination in the future. You can delete some or all of your previous destinations from the list.



Select a dest. to delete
Delete All

Edit Avoid Area

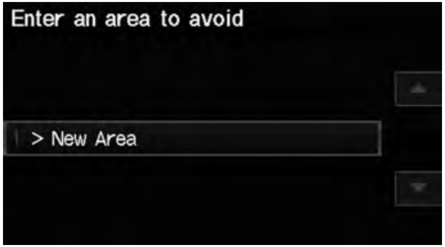
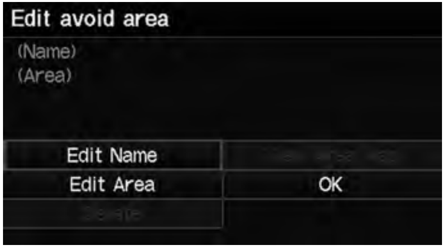
INFO button ▶ **Setup** ▶ **Other** ▶ **Routing & Guidance** ▶ **Edit Avoid Area** **"Edit"**

Specify up to five areas to avoid (e.g., road construction, closures), if possible, when the system calculates routes to your destination.



1. Select **New Area** or an existing area to edit.



2. Select **Edit Name** to label the area to avoid.
3. Enter a name or title. Select **OK**.
4. Select **Edit Area** to define the area to avoid.

The following items are available (after an area is set):

- **View Area Map**: Displays the selected avoid area on the map.
- **Delete**: Deletes the selected avoid area.

Continued

» Edit Avoid Area

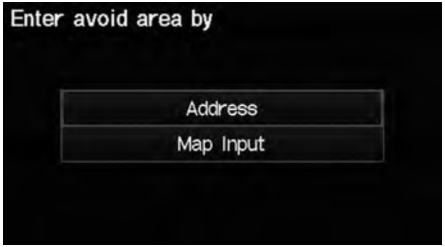
The avoid areas are shared with User 1 and User 2. For example, if User 1 specifies some avoid areas, User 2 can also use them for setting a route.

The maximum size of an "avoid area" is about 1 square mile.

If your selected area contains a freeway, you are asked "Do you want to avoid freeways?" Answering "No" allows you to use a route through an avoid area on a freeway without any pop-up messages.

You can select areas to avoid, however you cannot select roads or areas that you want the system to use for routing.

You can enter characters for the name until the input field is full.



Enter avoid area by
Address
Map Input

5. Select a method for specifying the area.

6. Scroll the map to position the cursor over your desired start point, adjusting the map scale as necessary. Press the ENTER button to mark the start point.
   ▶ To redo the area selection, press the CANCEL button.
7. Scroll the map to “draw” the area. Press the ENTER button to mark the end point.
8. Select **OK**.
   ▶ The area you specify is displayed in the list of areas to avoid.

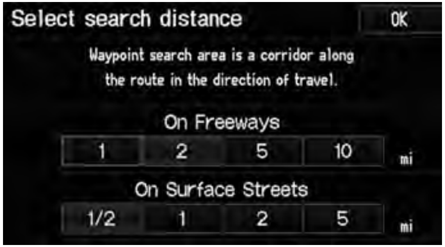
Edit Waypoint Search Area

INFO button ▶ **Setup** ▶ **Other** ▶ **Routing & Guidance** ▶ **Edit Waypoint Search Area “Edit”**

Select the distance from your highlighted route line (on either side of your route) that the system will search for a waypoint.

Adding Waypoints P. 103

You can specify a different search distance for freeways and surface streets.



Select search distance

Waypoint search area is a corridor along the route in the direction of travel.

1. Select a search distance.
2. Select **OK**.

The following options are available:

- **On Freeways**: 1, 2, 5, or 10 miles can be set. Factory default is 2 miles.
- **On Surface Street**: 1/2, 1, 2, or 5 miles can be set. Factory default is 1/2 mile.

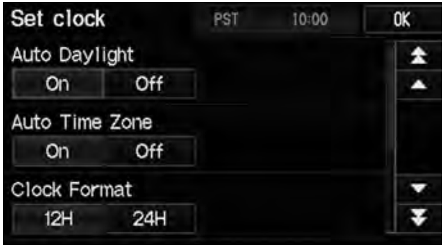
Edit Waypoint Search Area

The search distance does not affect the search range used for the Find Nearest voice commands (e.g., say *“Find nearest gas station”*).

Clock Adjustment

INFO button ▶ **Setup** ▶ **Other** ▶ **Clock Adjustment** ▶ **Clock Adjustment**

Set the automatic adjustment of the system clock for daylight saving and international time zones.



Select an item.

The following items are available:

- **Auto Daylight**: The navigation system automatically adjusts the clock (“spring ahead” or “fall back” by one hour) when a daylight saving time change occurs.
  On (factory default): Adjusts the clock automatically.
  Off: Disables the feature.
- **Auto Time Zone**: The navigation system automatically adjusts the clock when driving through different time zones.
  On (factory default): Adjusts the clock automatically.
  Off: Disables the feature.
- **Clock Format**: Sets the time notation to either 12-hour clock (**12H**, factory default) or 24-hour clock (**24H**).
- **Time Adjustment**: Adjust the current time manually.
  ➔ **Adjust Time** P. 47
- **Reset**: Reset the clock settings to the factory default.
  ➔ **Resetting the Clock Settings** P. 47

≫ Clock Adjustment

You can check the time and date from any screen using voice commands.
➔ **Global Commands** P. 194

Auto Daylight
This function is not activated in areas that have not adopted daylight saving time, even if you have set **Auto Daylight** to **On**.

Auto Time Zone
If you live and work in two different time zones, you may want to turn **Auto Time Zone** to **Off**. When driving near a time zone boundary, the displayed time zone may fluctuate between the two zone times.

4. Select (or) to position the arrowhead in the correct direction the vehicle is facing.
5. Select **OK**.

» Correct Vehicle Position

An apparent position error can occur where buildings, tunnels, and other objects block or reflect the GPS signals, forcing the system to use “dead reckoning” to determine your location and direction.

Using this function to adjust vehicle position is not recommended. When the system reacquires a GPS signal, it will automatically place the vehicle in the correct location.

If you continually have to adjust the vehicle position, you may have problems with the GPS reception or there may be database errors.

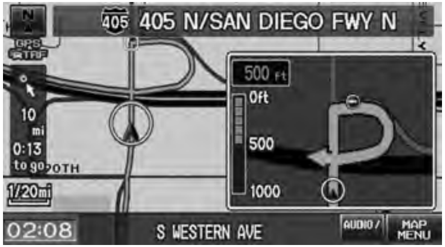
Viewing the Route

■ Map Screen



After calculating the route to your destination, the route is displayed on the map screen.
➔ **Map Screen Legend** P. 7

As you drive, the system tracks your position on the map in real time and provides guidance as you approach each guidance point on the route.

≫ Viewing the Route

"Display Map"

You can change the map scale using voice control commands (e.g., say *"Display 2 mile scale"*).
➔ **Map Scale Commands** P. 195

You can also change the map scale by using the ZOOM button.

You can control the icons displayed on the map screen using voice control commands (e.g., say *"Display post office"*).
➔ **Map Display Commands** P. 194

You can obtain information about the route using voice control commands (e.g., say *"How long to the destination?"*).
➔ **Route Commands** P. 196

You can display the next guidance point on the map screen by saying *"Display Map Guide"* (when en route).

If you scroll the map while en route, the time and distance to destination indicators are replaced with an indicator showing distance from the current vehicle position.

The map screen can be viewed in single-screen or split-screen mode.
➔ **Guidance Mode** P. 90

Guidance Screen

The guidance screen offers an alternative way to view your route.

▶If **Unverified Area Routing** is **On**, the route line changes to a dashed blue-pink line to indicate that the route line uses unverified streets.

≫ Route Line

You can set **Unverified Area Routing** to **Off** to follow your own route to the destination. If **Unverified Area Routing** is **On**, be aware that unverified streets may not be displayed accurately.

➡ **Unverified Area Routing** P. 41

You can always view the entire route by simply saying 🗣 *"Display entire route."*

The route line may also consist of red or orange segments when your route line displays traffic information.

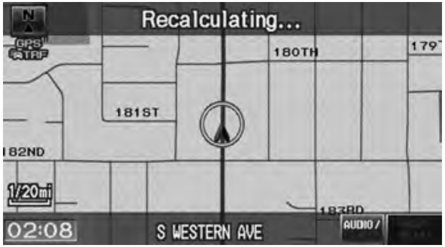
➡ **Map Screen Legend** P. 7

➡ **FM Traffic** P. 99

Deviating From the Planned Route

If you leave the calculated route, the system automatically recalculates a route to the desired destination based on your current location and direction.

➲ **Rerouting** P. 40

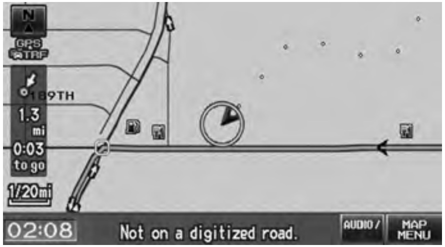


Recalculating...

Driving Off-road

If you leave all mapped (digitized) roads, the system automatically starts displaying a series of dots (breadcrumbs) to track the path you are taking. If needed, you can follow the dots back to the mapped road you originally left.

➲ **Off-road Tracking** P. 50



Not on a digitized road.

≫ Deviating From the Planned Route

If **Rerouting** is set to **Manual** and you go off route, the system waits for you to manually initiate recalculation. Select **Recalc.**

➲ **Rerouting** P. 40

≫ Driving Off-road

A message “Not on a digitized road” may appear when you drive half a mile away from a mapped road.

Breadcrumbs may occasionally be displayed in urban areas, such as large parking lots in shopping malls, in new subdivisions where the roads are not yet in the database, or in areas where a GPS signal is unavailable, such as in a parking garage.

Off-road tracking breadcrumbs are limited to approximately 150 miles. Breadcrumbs at the beginning of the trail are deleted if you exceed that distance.

Breadcrumbs are displayed only at 1/20, 1/8, 1/4, and 1/2 mile map scales.

Listening to Voice Guidance

MAP MENU (on map) ▶ **Voice**

As you approach each guidance point, a pop-up window is displayed on the map screen with instructions for you to follow. Voice guidance for each guidance point is also provided.

Typically, you hear three prompts:

- 1/2 mile from the guidance point (2 miles on freeway)
- 1/4 mile from the guidance point (1.2 miles on freeway)
- Just before the guidance point

To replay voice guidance, select **Voice** on the map menu.

If you select **Voice** on the map menu between guidance points, voice guidance for the next guidance point is provided.

» Listening to Voice Guidance

"Voice" (on the map screen)

You can turn voice guidance off if you prefer.
Display and Volume Settings P. 21

When driving in unverified areas, the phrase "if possible" is inserted before each voice guidance prompt.

Voice on the map menu may be grayed out if the vehicle is approaching or is in an unverified area with **Unverified Area Routing** set to **Off**.

The timing of voice guidance varies depending on the type of road you are on and the distance to the next guidance point.

Displaying the Map Menu

Use the Map Menu to control the icons displayed on the screen and to display traffic information. You can also use the Map Menu to find locations or to cancel the route.

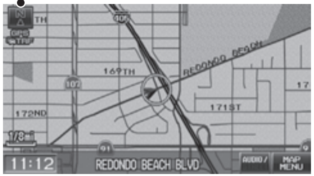
Traffic speed	Yes	No	No
Traffic incident	Yes	No	Yes

Map Orientation

Select the map orientation icon to change the map orientation.

Map orientation icon

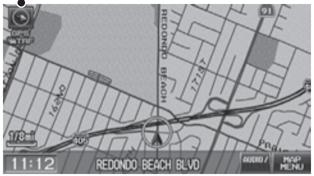


North-up: Displays the map with North always pointing up.

Select N

Select

Map orientation icon



Heading-up: Displays the map so that the direction you are traveling is always pointing up.

Traffic Incident

When you use the joystick to position the cursor (round red circle) over the traffic incident icon, you can view the summary of the incident.

When you press the ENTER button to select the traffic incident icon, you can view a pop-up message describing the incident in detail.

Map Orientation

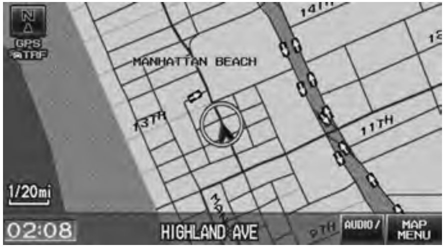
"Display Heading-up" (from map screen), *"Display North-up"* (from map screen)

The red arrow in the symbol always points North. On scales greater than 1 mile, North-up mode is always used.

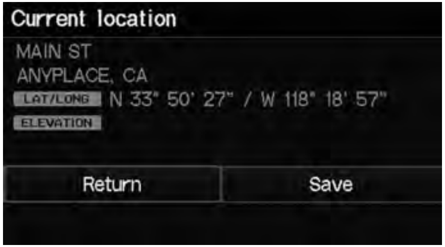
Current Location

Display and save your current location for future use as a destination. The address, latitude, longitude, and elevation of your current location are displayed.

■ To save your current location in the address book:



1. Select the vehicle icon on the map.



Current location
MAIN ST
ANYPLACE, CA
LAT/LONG N 33° 50' 27" / W 118° 18' 57"
ELEVATION

2. Select **Save**.
3. Edit the name, phone number, and category.
   ➔ **Address Book** P. 30
4. Select **OK**.

Current Location

"Display Current Location" (on map screen)

You can also save the current location by saying *"Register the Current Location"*.

If you have PIN-protected your address book, enter your PIN when prompted. Select **OK**. PINs are optional.
➔ **PIN Numbers** P. 36

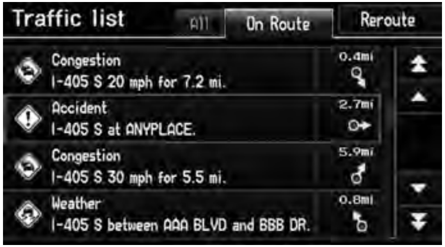
The elevation is not displayed if the system is receiving insufficient GPS information. When elevation is displayed, it may differ with roadside elevation signs by ±100 feet or more.

Saving your current location does not change or cancel your current route.

FM Traffic

MAP MENU (on map) ▶ **Traffic Incidents**

View and avoid specific incidents and/or congestion on your route:



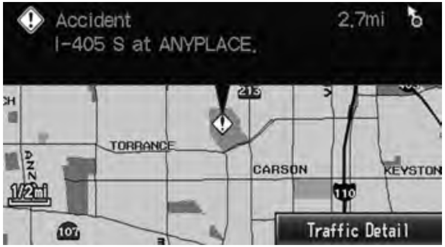
Congestion
I-405 S 20 mph for 7.2 mi. 0.4mi

Accident
I-405 S at ANYPLACE. 2.7mi

Congestion
I-405 S 30 mph for 5.5 mi. 5.9mi

Weather
I-405 S between AAA BLVD and BBB DR. 0.8mi

1. Select **On Route**.
2. Select an incident from the list.
   ▶ The system displays the map screen and the incident location.



Accident
I-405 S at ANYPLACE. 2.7mi

3. Select **Traffic Detail**.

≫ FM Traffic

You must be in or near a traffic-enabled city to receive coverage for that area. FM Traffic is available in the lower 48 states and Hawaii.

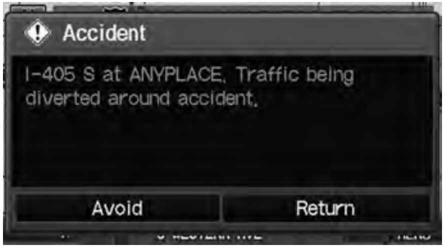
Automatic traffic rerouting may not provide a detour route depending on circumstances.

"Display traffic incidents", *"Display traffic list"*

You can also display the traffic incidents from the INFO screen.

You can display traffic incidents and related information on the map screen using voice commands.
Map Display Commands P. 194

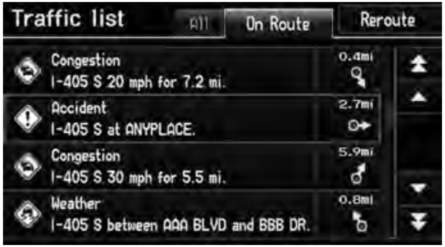
Continued



I-405 S at ANYPLACE. Traffic being diverted around accident.

4. Select **Avoid**.

▶ Repeat step 2 to 4 as necessary.



Congestion
I-405 S 20 mph for 7.2 mi. 0.4mi

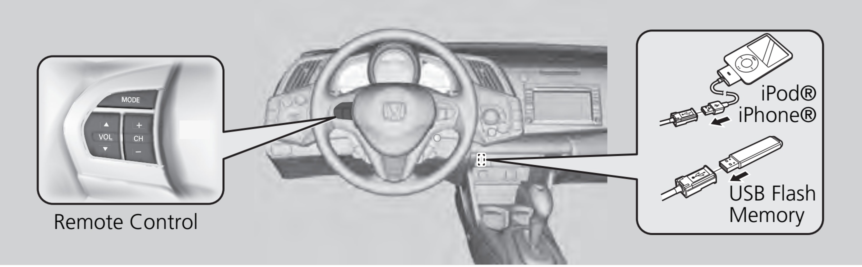
About Your Audio System

The audio system features FM/AM radio. It can also play audio discs, WMA/MP3/AAC tracks, iPods®, USB flash drives, and *Bluetooth*® devices.

The audio system is operable from the buttons and switches on the panel, or the remote controls on the steering wheel.
➔ **Audio Remote Controls** P. 140
➔ **Audio System** P. 6



» About Your Audio System

Video CDs, DVDs, and 3-inch/8-cm mini discs are not supported.

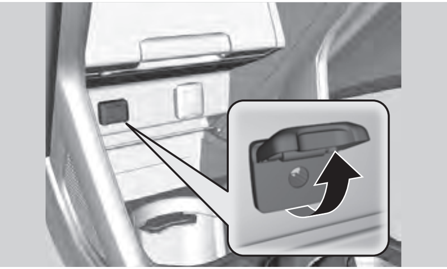
Do not leave the iPod® or USB flash drive in the vehicle. Direct sunlight and high temperatures may damage it.

iPod® and iPhone® are registered trademarks owned by Apple Inc.

You can operate the audio system by voice commands.
➔ **Audio Commands** P. 197

Auxiliary Input Jack

Use the jack in the front console compartment to connect standard audio devices.



1. Open the AUX cover.
2. Connect a standard audio device to the input jack using a 1/8 inch/3.5 mm stereo miniplug.
   ▶ The audio system automatically switches to the AUX mode.

» Auxiliary Input Jack

To switch the mode, press any of the other audio mode buttons. You can return to the AUX mode by pressing the AUX button.

System Theft Protection

The system is disabled when it is disconnected from the power source, such as when the battery is disconnected or goes dead.

■ Reactivating the system

1. Turn the ignition switch to ON (II), and turn on the system.
   ▶ If you turn the ignition switch to ACCESSORY (I), you will be requested to enter the security code. See step 2.
2. Enter the security code. If you do not enter the code correctly after 10 tries, leave the system for one hour before trying again, or visit a dealer to have the system reset.

System Theft Protection

Find the audio system's security code and serial number label in your Owner's Manual kit.

Do not store the label in your vehicle. If you lose the label, you must first retrieve the serial number, and then obtain the code from a dealer.

U.S. Only
You can register the security code at Owner Link (*owners.honda.com.*). To find information on how to retrieve the serial number and obtain the code, visit *radio-navicode.honda.com*.

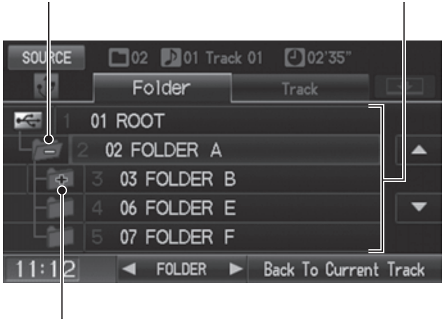
Change the folder if the tracks are stored in a folder structure.



Touch to close the folder.

Folder list

Touch to open the folder.

1. Select a folder.
   ▶ The system displays the track list.
2. Select a track.
   ▶ The system begins playing the selected track.

Repeat and Random Play

To stop repeat- or random-play, select the current play mode button again.

Playing Tracks in Folders

Folder List

- Any music tracks not in a folder are automatically added to a “ROOT” folder, which is displayed at the top of the Folder List.
- If the root folder has additional folders in a lower layer, they are listed on the screen.

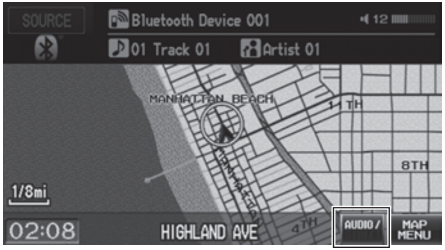
Back to Current Track: Displays the current track at the top of the list.

Playing *Bluetooth*® Audio

Your audio system allows you to listen to music tracks stored on your *Bluetooth*-compatible phone.

This function is available when the phone is linked to the vehicle’s *Bluetooth*® HandsFreeLink® (HFL) system.
➡ ***Bluetooth*® HandsFreeLink®** P. 143

Selecting *Bluetooth*® Audio Mode



1. Make sure that your phone is on, paired, and linked to HFL.
   ➡ **Pairing a Phone** P. 146
2. Press the CD/AUX button until you get to *Bluetooth*® Audio mode.
   ▶ A *Bluetooth*® message and icon are displayed on the display and screen.
3. Select **AUDIO/STREET** until **AUDIO** is highlighted in blue.

» Playing *Bluetooth*® Audio

“Display audio screen”

You can control the *Bluetooth*® Audio using voice commands.
➡ ***Bluetooth*® Audio Commands** P. 199

Not all *Bluetooth*-enabled phones with streaming audio capabilities are compatible. To check if your phone is compatible:

- U.S.: Visit *automobiles.honda.com/handsfreelink*.
- Canada: Visit *www.handsfreelink.ca*.
- Call HandsFreeLink customer support at (888) 528-7876.

In some states, it may be illegal to perform some data device functions while driving.

In some cases, the name of the artist, album, or track may not appear correctly.

Only one phone can be used with HFL at a time. When there are more than two paired phones in the vehicle, the first paired phone the system finds is automatically linked.

  Adjusting the Sound P. 139
- **SOURCE**: Changes the source mode.

Audio Screen Control

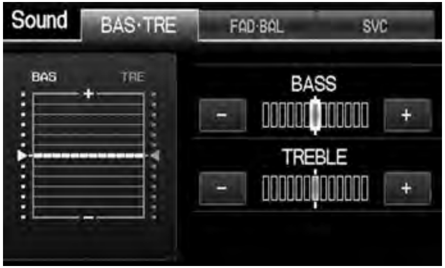
The display items vary on the connected device.

The following functions may not be available on some devices:

- Pause function
- Group selection

AUDIO button (▶ **AUDIO MENU**) ▶ **SOUND**

Adjust the sound bass, treble, fader, and balance. You can also adjust the strength of the sound coming from the subwoofer speaker. In addition, you can set Speed-sensitive Volume Compensation (SVC).



1. Select the tab to adjust the desired sound mode.
2. Adjust the desired level.

Adjusting the Sound

Fader adjusts the front-to-back strength, while balance adjusts the side-to-side strength. If the fader adjustment is set to the maximum front level, the subwoofer is turned off.

The **SVC** has four modes: **Off**, **Low**, **Mid**, and **High**. SVC adjusts the volume level based on the vehicle speed. The faster you go, the audio volume increases. As you slow down, the audio volume decreases. If you feel the sound is too loud, choose **Low**, and vice versa.

Steering Wheel Controls

Control basic audio system functions using the controls mounted on the steering wheel.

  ➔ **Setting Up Speed Dialing** P. 151

Bluetooth® HandsFreeLink®

You can control the HFL system using voice commands.
➔ **HFL Menus** P. 160

To use HFL, you need a *Bluetooth*-compatible cell phone. For a list of compatible phones, pairing procedures, and special feature capabilities:

- U.S.: Visit *automobiles.honda.com/handsfreelink*.
- Canada: Visit *www.handsfreelink*.ca.
- Call HandsFreeLink customer support at (888) 528-7876.

Voice Control Tips

- Aim the vents away from the ceiling and close the windows, as noise coming from them may interfere with the microphone.
- Press and release the (Talk) button before giving a command. Speak clearly and naturally after a beep.
  ➔ **Voice Control Operation** P. 5
- If the microphone picks up voices other than yours, the command may be misinterpreted.
- To change the volume level, use the audio system’s volume knob or the remote audio controls.

Help Features

Say 🗣 *"Hands-free help"* or 🗣 *"Help"* any time to get help or hear a list of commands.

➔ **Voice Help** P. 13

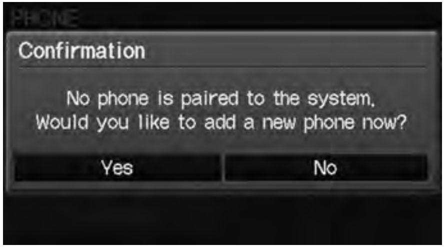
Pairing a Phone

PHONE button

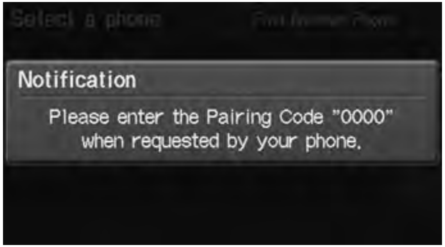
When no *Bluetooth*-compatible phone has ever been paired to the system, the following screen appears:



Confirmation

No phone is paired to the system. Would you like to add a new phone now?

1. Select **Yes**.
2. Put your cell phone in “Discovery” or “Search” mode.
3. Select **OK**.
    - ▶ The system begins to search for your phone.



Notification

Please enter the Pairing Code "0000" when requested by your phone.

4. Select your phone in the list.
    - ▶ Select **Find Another Phone** if your phone is not found.
    - ▶ Refer to your phone manual for instructions on searching for a *Bluetooth*® device.
5. Enter the 4-digit pairing code on your phone when prompted to complete the pairing process.

Pairing a Phone

Your *Bluetooth*-compatible phone must be paired to HFL before you can make and receive hands-free calls.

The maximum range between your phone and vehicle is about 30 feet (10 meters).

Phone Pairing Tips

- You cannot pair your phone while the vehicle is moving.
- Your phone must be in discovery or search mode when pairing the phone. Refer to your phone’s manual.
- Up to six phones can be paired.
- Your phone’s battery may drain faster when it is paired to HFL.
- If your phone is not ready for pairing or not found by the system within three minutes, the system will time out and returns to idle.
- The default pairing code “0000” is used unless you change the setting.

Pairing Code

You can change the pairing code setting.

Press the ☎ (Pick-Up) button to display the Cellular Phone screen.

Press the (Talk) button each time you give a voice command.

“Speed Dial 1” or “Speed Dial 2”

⮕ **Using Speed Dial** P. 158

“More Speed Dial Lists”

Make a call by using another paired phone’s speed dial list (Speed Dial 2 only).
⮕ **Using Speed Dial** P. 158

Select an entry

“Call”

Dial the phone number of the selected speed dial entry.

“Edit Speed Dial”

⮕ **Setting Up Speed Dialing** P. 151

“Edit Phone Number”

Edit the phone number of the selected speed dial entry.

“Voice Tag”

Create a voice tag for a speed dial number.
⮕ **Registering a Voice Tag to a Speed Dial Entry** P. 152

“Delete Speed Dial”

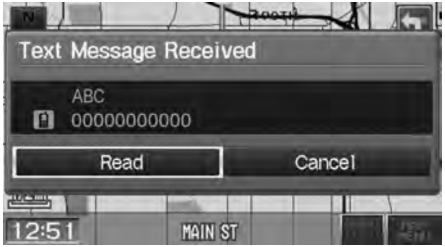
Delete a previously stored speed dial number.

Text Messages

If your paired phone is MAP-compatible, you can receive and hear text messages and reply to them using fixed reply messages.

➲ **Pairing a Phone** P. 146

If a text message is received, the following screen is displayed.

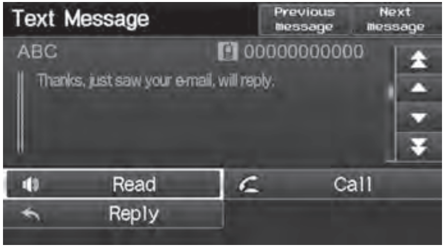


Text Message Received

ABC

00000000000

1. Select **Read**.
- ▶ The text message is read aloud.
- ▶ Select **Cancel** to check the text message later.
- ▶ If the phone number of the sender is stored to the Phonebook, the name is displayed.



Text Message

ABC 00000000000

Thanks, just saw your e-mail, will reply.

2. Select an item.
- ▶ The entire message body is not displayed while driving.

The following items are available:

- **Read:** Reads the text message aloud. Select **Stop** to stop reading. Adjust the volume using the VOL ⏻ (Volume/Power) knob.
- **Reply:** Replies to the message using a fixed reply message. You cannot create your own messages.
  ➲ **Replying to the Message** P. 164

Continued

» Text Messages

You can control the text messages feature using voice commands.

➲ **Text Message Commands** P. 199

To use this function, you need a Bluetooth- and MAP (Message Access Profile)-compatible cell phone. For a list of compatible phones and special feature capabilities:

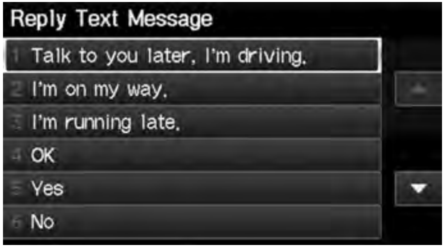
- U.S.: Visit *automobiles.honda.com/handsfreelink*.
- Canada: Visit *www.handsfreelink.ca*.
- Call HandsFreeLink customer support at (888) 528-7876.

If your phone is not capable of this function, a notification appears when you select the text message option.

Select **Text Messages** from the Phone screen to view a list of the 20 most recently received text messages. You can select each one to read, reply, or call back. The list cannot be scrolled while the vehicle is moving.

- **Call:** Calls the sender.
- **Previous message:** Displays the previous message.
- **Next message:** Displays the next message.

Replying to the Message



Reply Text Message

1 Talk to you later. I'm driving.
2 I'm on my way.
3 I'm running late.
4 OK
5 Yes
6 No

1. Select the message you want to use.
2. Select **Send**.

Text Messages

You can set up text message notification when the first message for the paired phone is received. You can change the setting from the Phone setup screen.
Phone Setup P. 155

If you delete a message on the phone, the message is also deleted in the system. If you send a message from the system, the message goes to your phone's outbox.

Other Features

This section describes the useful functions incorporated into the navigation system.

Trip Computer 166

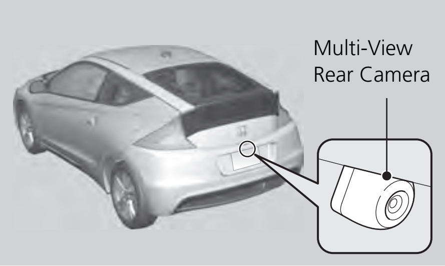
» Map Update

When you order a map update, it is mailed to you on a USB flash drive.

➲ **Obtaining Navigation Update Data** P. 187

Multi-View Rear Camera

Your vehicle is equipped with a multi-view rear camera. When you shift into Reverse, the rear view is displayed on the navigation system screen. The edge of the bumper and parking guide lines are also displayed.

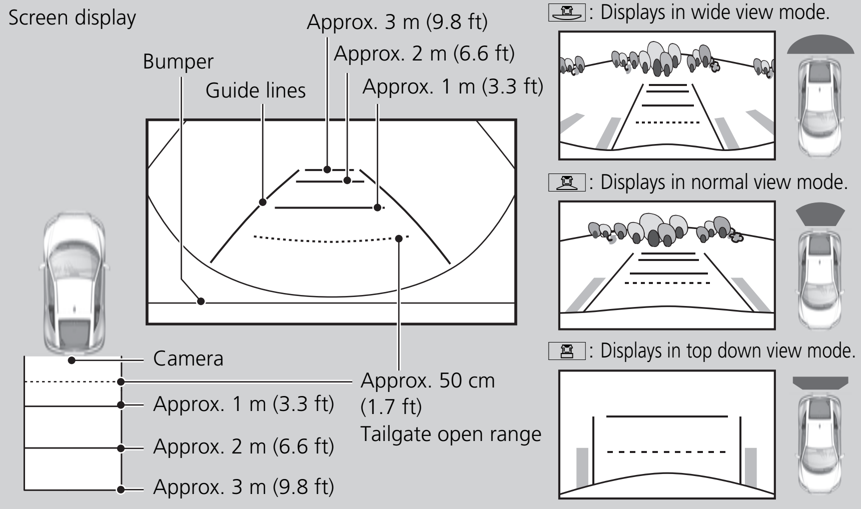


Multi-View
Rear Camera

To turn the guide lines on or off, press and hold the CANCEL button until the guide lines turn on or off.

Press the ZOOM IN/OUT button to adjust the screen brightness.

While the rear view is displayed, touch , or to switch between wide, normal, and top down view modes.



Screen display
Bumper
Guide lines
Approx. 3 m (9.8 ft)
Approx. 2 m (6.6 ft)
Approx. 1 m (3.3 ft)
Camera
Approx. 1 m (3.3 ft)
Approx. 2 m (6.6 ft)
Approx. 3 m (9.8 ft)
Approx. 50 cm (1.7 ft)
Tailgate open range
: Displays in wide view mode.
: Displays in normal view mode.
: Displays in top down view mode.

Multi-View Rear Camera

Always keep the camera lens clean and unobstructed. The multi-view rear camera has a lens that makes distances appear different than they actually are. Always take care when reversing, and look behind you for obstacles.

Navigation controls are disabled when in Reverse.

If you turn the guide lines off, they remain off until you turn them back on.

Adjusting the brightness for the multi-view rear camera display does not affect the brightness for the navigation screen.

If the last used viewing mode is wide or normal, the same mode is selected the next time you shift into Reverse. If top view was last used, wide mode is selected.

Map, Voice, Entering Destinations

Problem	Solution
The Startup Confirmation screen is displayed every time I start the car.	This is normal. The Startup Confirmation screen reminds you and your guest drivers to always operate the navigation system in a safe manner. If you do not select **OK** at startup, voice commands will not work.
The navigation system reboots by itself (returns to the opening screen).	A reboot can be caused by extreme temperatures or shock from bumpy roads, and does not necessarily indicate a problem. If this happens frequently, please see your dealer.
How do I specify a destination when an entered city or street could not be found?	• Try entering the street first. Some cities are lumped in with a major metro area. In rural “unverified” areas or new subdivisions, streets may be missing or only partially numbered. • Try selecting the destination directly from the map. ➲ **Map Input** P. 75
Why do some letters become grayed out when I enter an address?	As you enter each letter in an address or a place/landmark, the navigation system looks in the database to see what letters are possible and grays out letters that do not apply.
How do I delete Personal Addresses, Previous Destinations, or the Home Address?	**1.** Press the INFO button. Select **Setup** > **Personal Information** to display the types of information. **2.** Select the type of address to delete. **3.** Select **Delete**.
I cannot hear the navigation system voice.	Press the INFO button. Select **Setup** and check that **Volume** is not set to **Off**. ➲ **Display and Volume Settings** P. 21
The voice control system is having difficulty recognizing my voice commands.	• Check that the vents are not blowing air onto the microphone on the ceiling, the vehicle is as quiet as possible, and you are using the correct command when speaking. ➲ **Voice Recognition** P. 20 • Say 🗣 *“Help”* on any screen to see a list of the applicable voice commands.
The navigation system pronunciation of street names in the guidance command or destination address sounds strange.	The basic guidance phrases use a studio-recorded voice, but street names are pronounced using a machine-generated voice. Consequently, the name may be mispronounced or sound strange at times.

Problem	Solution
I cannot give voice commands.	Make sure you selected “OK” at the Startup Confirmation screen. ➲ **Start-up** P. 18
I cannot select an option on the touch screen.	To prevent driver distraction, certain touch screen functions and features are limited or inoperable while the vehicle is moving. Use voice commands, or pull over to proceed.
The screen is bright when I drive at night.	**1.** Check that the nighttime dashboard brightness control is not set to maximum. **2.** Press the INFO button. Select **Setup** > **Other** > **Color** > **Map**. Set the Night color to Black for the best contrast. ➲ **Switching Display Mode Manually** P. 26
The screen is dark when I drive during the day.	Press the INFO button. Select **Setup** > **Other** > **Color** > **Map**. Set the Day color to White for the best contrast. ➲ **Switching Display Mode Manually** P. 26
How do I change or remove my PIN?	**1.** Press the INFO button. Select **Setup** > **Personal Information** > **PIN Number** > **GO Home 1 PIN** or **GO Home 2 PIN** or **Address Book PIN**. **2.** Enter your existing PIN. You then have the choice to change or remove the PIN. ➲ **PIN Numbers** P. 36
I have forgotten my PIN. How do I reset the PIN for Home or the PIN for personal addresses (User 1 or User 2)?	Your dealer must reset the PIN for you.
Why is Call grayed out on the Calculate Route screen?	Your phone is not paired to *Bluetooth*® HandsFreeLink® or, if paired, your phone is in use.

Traffic

Problem	Solution
My FM Traffic is missing or is not displaying properly. What is wrong?	Verify the following: • FM Traffic relies on a clear FM signal. If signal strength is low, traffic data may not be available. • Check the traffic icon on the icon bar, and the icon options for traffic. ➲ **Showing Icons on the Map** P. 92 • It is possible that there is a temporary technical problem with your metropolitan area traffic. You can call Honda Automobile Customer Service to see if there is an outrage. ➲ **Honda Automobile Customer Service Contact Information** P. 186 • If the situation persists, see your Honda dealer for assistance.

Guidance, Routing

Problem	Solution
The navigation system does not route me the same way I would go or the same way as other mapping systems.	The navigation system attempts to generate the optimal route. You can change the route preferences used when calculating a route. ➲ **Changing the Route Preference** P. 78
The street I'm on is not shown on the map screen.	The mapping database is constantly undergoing revision. You can access the most recent information on the internet. ➲ **Map Coverage** P. 187
The vehicle position icon is not following the road and the "GPS icon" text in the upper left hand corner of the screen is white or missing.	• Check that the GPS antenna (located in the dashboard) is not blocked. For best reception, remove items from the dashboard, such as radar detectors, cell phones, or loose articles. • Metallic tinting or other aftermarket devices can interfere with the GPS reception. Please consult your dealer. ➲ **GPS System** P. 184

Problem	Solution
The blue highlighted route and voice guidance stopped or turned into a blue/pink dashed line before I got to my destination.	Your route has entered an unverified area. ➡ **Unverified Area Routing** P. 41
How do I stop the map from rotating as I drive along?	Select the map orientation icon on the map screen, or say 🗣 *"Display north-up"* to change the map orientation.
Sometimes, I cannot select between the North-up and Heading-up map orientations.	The Heading-up map orientation can only be shown in the lower scales (1/20 - 1 mile scales). ➡ **Map Scale and Functions** P. 95
The "time to destination" display sometimes increases even though I am getting closer to my destination.	If your speed reduces due to slower traffic, the navigation system updates the "time to destination" based on your actual road speed to give you a better estimate of arrival time.
The vehicle position icon on the map "lags" a short distance behind, especially when I arrive at an intersection.	This is normal. The navigation system is unaware of the width of intersections. Large differences in vehicle position can indicate a temporary loss of the GPS signal. ➡ **GPS System** P. 184
The screen is showing white dots as I drive along.	These dots are called "breadcrumbs." These are displayed if **Off-road Tracking** is set to **On** and you drive more than 1/2 mile off mapped roads. ➡ **Off-road Tracking** P. 50
How do I remove the white dots ("breadcrumbs") from my screen?	Press the INFO button. Select **Setup** > **Other** > **Vehicle**, and set **Off-road Tracking** to **Off**, then return to the map. ➡ **Off-road Tracking** P. 50
A road that I selected to avoid is being used when routing.	When you "draw" your area to avoid, make sure to select sections of roads that include at least one intersection. ➡ **Avoiding Streets** P. 102
My elevation (shown when I display the current position) seems to fluctuate even though my elevation has not changed.	This is normal. The elevation can vary ±100 feet due to GPS calculation errors. ➡ **GPS System** P. 184

Problem	Solution
My elevation is missing on the “current position” screen.	The elevation is only displayed if the GPS antenna can receive signals from at least four satellites. Try moving the vehicle into an open area. The elevation is also not displayed if the calculated elevation is zero or below sea level.

Update, Coverage, Map Errors

Problem	Solution
My city is not part of a fully verified detailed coverage area.	The mapping database is constantly undergoing revision. You can access the most recent information on the internet. ⮚ **Map Coverage** P. 187
Does the navigation system work outside North America?	The navigation system contains maps for the 50 U.S. states, Canada, and Puerto Rico. The navigation system will not work in Mexico or other countries. ⮚ **Map Coverage** P. 187
Can I play video DVDs in my navigation system?	No. The navigation system is designed only to read music discs. If you experience any problems that you cannot resolve, please contact your dealer.
How do I report errors I find in the database?	Minor errors are bound to occur in a large database. If you encounter major errors, see ⮚ **Reporting Errors** P. 186

Display, Accessories

Problem	Solution
The display appears dim when starting the car in really cold weather.	This is normal. The display will become brighter after a few minutes.

Multi-View Rear Camera

Problem	Solution
When I shift gears, the multi-view rear camera image display is delayed.	This is normal. When shifting into or out of Reverse, you may experience a delay while the screen image switches between the navigation screen and the multi-view rear camera image.
The multi-view rear camera image is too dark or too bright. How do I adjust the brightness?	While the camera image is displayed, press the ZOOM IN/OUT button to adjust the brightness. This adjustment does not affect the navigation screen brightness settings.

Miscellaneous Questions

Problem	Solution
My clock frequently changes forward and backward by one hour.	The clock setting is automatically updated based on your GPS location. If you live and work on the boundary between two time zones, you can turn off this feature. ➲ **Clock Adjustment** P. 46
The clock changes even when I am not driving near a time zone boundary.	The time zone boundaries are only approximated in the navigation system. Depending on the geography of the time zone boundary, the switch to a different zone can be erratic. ➲ **Clock Adjustment** P. 46
My state does not observe daylight saving time. How do I turn off this feature?	Press the INFO button. Select **Setup** > **Other** > **Clock Adjustment** > **Clock Adjustment**, and set **Auto Daylight** to **Off**. ➲ **Clock Adjustment** P. 46
Daylight saving time has started, but the navigation system did not change time even though Auto Daylight is set to ON.	The automatic daylight saving time feature does not work in regions where the daylight saving time system has not been adopted.
The navigation system automatic daylight feature is not switching the navigation system clock on the correct dates.	Press the INFO button. Select **Setup** > **Other** > **Clock Adjustment** > **Clock Adjustment**, and set **Auto Daylight** to **On**. Note that the automatic daylight feature does not work in regions where the daylight saving time system has not been adopted. ➲ **Clock Adjustment** P. 46
The navigation system clock switched by one hour for no apparent reason.	You may be driving near a time zone boundary. ➲ **Clock Adjustment** P. 46
My battery was disconnected or went dead, and the navigation system is asking for a code.	Your vehicle comes with a label in the Owner’s Manual kit that includes the system’s security code and serial number. You should keep this label in a safe place outside your vehicle. If you cannot find it, contact your dealer.
How do I change the interface language?	Press the INFO button. Select **Setup** > **Other** > **Language**, and set the language to **English**, **Français**, or **Español**.

Navigation System

Error Message	Solution
The display temperature is too high! For protection, the display will shut down.	This message appears briefly when the display temperature is too high. The navigation system turns off until the display cools down. The system turns back on automatically when the display cools down.
The navigation system is unable to start due to excessive heat. The system will start after the system cools.	The navigation system has difficulty accessing to the map database when the temperature is high. The navigation system starts up automatically when the display cools down.
Route has not been completed. Please try again from a different location.	This message appears when you are on a route to or from a new area that is not in the database. Try planning a different route to or from a different location. If the error persists or is shown for a wide area, see your dealer.
Destination is not in this database version. Please set from map.	The destination was not found in the database. Try another destination nearby, or select the destination from the map using the joystick. If the error persists or is shown for a wide area, see your dealer.
No POI found...	

Disc Player

Error Message	Cause	Solution
Bad Disc Please Check Owners Manual	Servo error	• Press the ⏏ (Eject) button and remove the disc, and check that the error message is cleared. • Check that the disc is not damaged or deformed, and insert the disc again. ➔ **Recommended Discs** P. 124 • If the error message reappears, press the ⏏ button, and pull out the disc. • Insert a different disc. If the new disc plays, there is a problem with the first disc. • If the error message repeats, or the disc cannot be removed, contact your dealer. Do not try to force the disc out of the player.
	Mechanical error	
Mecha Error	Mechanical error	
Check Disc	Focus error Disc violates copyright Disc not supported	
	Load error	
Unsupported	Appears when an unsupported disc is inserted.	• If it appears when a supported disc is inserted, reinsert the disc.
Unplayable File	Appears when the tracks on the disc are DRM or an unsupported format.	• This error message appears for about three seconds, then plays the next song.
	The system cannot read the track(s).	• Check the tracks on the disc. There is a possibility that the tracks have been damaged.
Heat Error	High temperature	• Turn the audio system off and allow the player to cool down until the error message is cleared.

iPod®/Pandora®

Error Message	Cause	Solution
Unsupported	Appears when an unsupported iPod®/iPhone® is connected.	• Update the iPod®/iPhone® software to the latest version. • If it appears when a supported iPod®/iPhone® is connected, reconnect the iPod®/iPhone®.
Connect Retry	Appears when the iPod®/iPhone® cannot be authenticated.	Reconnect the iPod®/iPhone®.
No Data	Appears when there are no tracks in the iPod®.	Store tracks in the iPod®.
Bad Use Device Please Check Owners Manual	Appears when the overcurrent protection feature of the system stops supplying power to USB because an incompatible iPod®/iPhone® is connected.	Disconnect the iPod®/iPhone®. Turn the audio system off, and turn it on again. Do not reconnect the iPod®/iPhone® that caused the error.
USB Error	Appears when the internal USB error occurs.	Try a different iPod®/iPhone®.
No station	Appears when there are no stations in Pandora®.	Check the iPhone®.
Unsupported Ver.	Appears when the Pandora® version is not supported.	Update Pandora® to the latest version.
No active station	Appears when the station is deleted from the iPhone®.	Select another station.
No Connection	Appears when the iPhone® has an error, including out of service.	Check the iPhone®.
Rating error	Appears when the like/dislike operation is failed.	Try again later.
Bookmark error	Appears when the bookmark operation is failed.	Try again later.

Error Message	Cause	Solution
Skip error	Appears when the number of skips exceeds the skip limit or advertisements are broadcasted.	• You can skip after the skip limit is removed. Try again later. • You can skip after the advertisements are finished.
Maintenance	Appears when the Pandora® server is in maintenance.	Try again later.

USB Flash Drive

Error Message	Cause	Solution
Unsupported	Appears when an unsupported device is connected.	If it appears when a supported device is connected, reconnect the device.
Unplayable File	Appears when the tracks in the USB flash drive are DRM or an unsupported format.	This error message appears for about three seconds, then plays the next song.
	The system cannot read the track(s).	Check the tracks in the USB flash drive. There is a possibility that the tracks have been damaged.
No Data	Appears when the USB flash drive is empty or there are no tracks in MP3, WMA, or AAC format in the drive.	Save tracks in MP3, WMA, or AAC format in the USB flash drive.
Bad Use Device Please Check Owners Manual	Appears when the overcurrent protection feature of the system stops supplying power to USB because an incompatible device is connected.	Disconnect the device. Turn the audio system off, and turn it on again. Do not reconnect the device that caused the error.
USB Error	Appears when the Internal USB ROM error occurs.	Try a different USB flash drive.

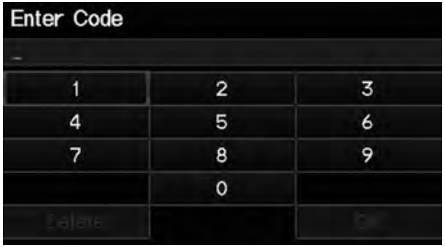
System Initialization

The navigation system must be initialized if power to the navigation system is interrupted for any reason (e.g., the battery was disconnected).

Entering the Security Code

Find the navigation system’s security code and serial number label in your Owner’s Manual kit. Do not store the label in your vehicle. If you lose the label, you must first retrieve the serial number, and then obtain the code. You can find out about your serial number and security code from a dealer.



1. Turn the ignition switch to ON (II), and turn on the audio system.

▶ If you turn the ignition switch to ACCESSORY (I), you will be requested to enter the security code. See step 2.

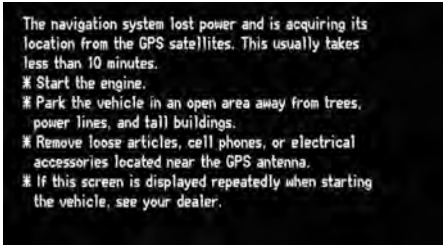
2. Enter the security code.

▶ If you do not enter the security code correctly after 10 tries, leave the system for one hour before trying again, or visit a dealer to have the system reset.

NOTE:
In the U.S., you can register the security code on Owner Link (owners.honda.com.)*. To find information on how to retrieve the serial number and obtain the code, visit* radio-navicode.honda.com*.*

Acquiring GPS Information

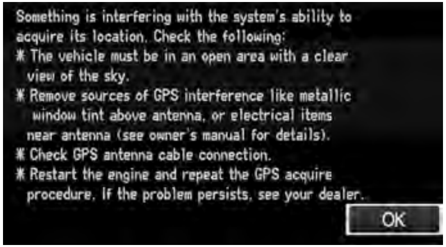
Depending on the length of time the power was interrupted, your system may require GPS initialization.



The navigation system lost power and is acquiring its location from the GPS satellites. This usually takes less than 10 minutes.
＊ Start the engine.
＊ Park the vehicle in an open area away from trees, power lines, and tall buildings.
＊ Remove loose articles, cell phones, or electrical accessories located near the GPS antenna.
＊ If this screen is displayed repeatedly when starting the vehicle, see your dealer.

If initialization is not necessary, the system proceeds directly to the Startup Confirmation screen.

If the system fails to locate a sufficient number of satellites to locate your position within 10 minutes, the following screen is displayed.

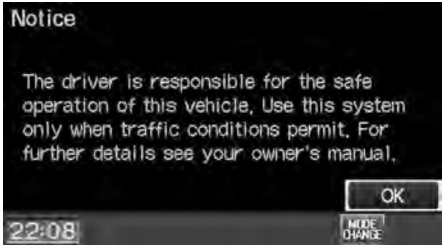


Something is interfering with the system’s ability to acquire its location. Check the following:
＊ The vehicle must be in an open area with a clear view of the sky.
＊ Remove sources of GPS interference like metallic window tint above antenna, or electrical items near antenna (see owner’s manual for details).
＊ Check GPS antenna cable connection.
＊ Restart the engine and repeat the GPS acquire procedure. If the problem persists, see your dealer.

If you are experiencing GPS reception problems:
➲ **GPS System** P. 184

Startup Confirmation Screen

The Startup Confirmation screen is displayed when initialization has successfully completed. It is displayed every time you start your vehicle. Select **OK** to continue.



Notice

The driver is responsible for the safe operation of this vehicle. Use this system only when traffic conditions permit. For further details see your owner's manual.

NOTE:
"OK" cannot be selected using a voice command.

Map Matching

Map matching is the process of using the acquired GPS information to locate your position on the map screen. If you are on a mapped road, the name of the road is displayed along the bottom of the map screen when map matching is completed. Do not enter a destination until the road name is displayed.

The system may initially show your location on a different street (e.g., in urban areas where streets are close together), may show an incorrect elevation, or may delay the display of the vehicle position icon at intersections. This is normal; the system will correct itself while you drive.

GPS System

The signals received from the GPS satellites are extremely weak (less than a millionth of the strength of a local FM station) and require an unobstructed view of the sky. The GPS antenna is located in the dashboard. The signal reception can easily be interrupted or interfered with by the following:

- Metallic window tint on the front or side windows
- Cell phones, PDAs, or other electronic devices docked in a cradle or lying loose on the dashboard
- Remote starters or “hidden” vehicle tracking systems mounted near the navigation unit
- Audio electronic devices mounted near the navigation unit
- Trees, tall buildings, freeway overpasses, tunnels, or overhead electrical power wires

The GPS is operated by the U.S. Department of Defense. For security reasons, there are certain inaccuracies built into the GPS for which the navigation system must constantly compensate. This can cause occasional positioning errors of up to several hundred feet.

Address Calculation

The destination icon shows only the approximate location of a destination address. This occurs if the number of possible addresses is different from the number of actual addresses on a block. For example, the address 1425 on a 1400 block with 100 possible addresses (because it is followed by the 1500 block) will be shown a quarter of the way down the block by the system. If there are only 25 actual addresses on the block, the actual location of address 1425 would be at the end of the block.

Database

The digitized map database reflects conditions as they existed at various points in time before production. Accordingly, your database may contain inaccurate or incomplete data or information due to the passage of time, road construction, changing conditions, or other causes.

For example, some places/landmarks may be missing when you search the database because the name was misspelled, the place was improperly categorized, or a place/landmark is not yet in the database. This is also true for police stations, hospitals, and other public institutions. Do not rely on the navigation system if you need law enforcement or hospital services. Always check with local information sources.

In addition, the map database contains verified and unverified areas. Unverified streets may be missing from the map, in the wrong location, or have an incorrect name or address range. A message will warn you if your route includes unverified streets. Exercise additional caution when driving in unverified areas.

The database does not include, analyze, process, consider, or reflect any of the following categories of information:

- Neighborhood quality or safety
- Population density
- Availability or proximity of law enforcement
- Emergency, rescue, medical, or other assistance
- Construction work, zones, or hazards
- Road and lane closures
- Legal restrictions (such as vehicular type, weight, load, height, and speed restrictions)
- Road slope or grade
- Bridge height, width, weight, or other limits
- Traffic facilities safety
- Special events
- Pavement characteristics or conditions

Every effort has been made to verify that the database is accurate. The number of inaccuracies you experience increases the longer you go without obtaining an updated map database.

➔ **Obtaining Navigation Update Data**
P. 187

We assume no liability for any incident that may result from an error in the program, or from changed conditions not noted above.

Resolving Problems

If you run into a specific issue that you cannot resolve, consult the following help resources:

- For navigation system issues:
  ➔ **Troubleshooting** P. 170
  There are also FAQs available online at *automobiles.honda.com*.
- For questions regarding *Bluetooth*® HandsFreeLink:
  ➔ ***Bluetooth*® HandsFreeLink®** P. 144
- For traffic-related issues:
  ➔ **Traffic** P. 172
- For reporting issues with the database or places/landmarks:
  ➔ **Reporting Errors** P. 186
- Call Honda Automobile Customer Service.
  ➔ **Honda Automobile Customer Service Contact Information** P. 186

Reporting Errors

You can help to improve database accuracy by reporting any errors you encounter.

- Report errors in freeways and main “verified” roads shown in black on the map at *http://mapreporter.navteq.com/dur-web-external/*.
- Please do not report errors in purple “unverified” roads. Maps for these areas are provided for reference only.
  ➔ **Unverified Area Routing** P. 41
- Please do not report errors in places/landmarks, such as changes in business names. Information about points of interest are constantly being updated. An updated database is available for purchase, usually in the fall of each year.
  ➔ **Obtaining Navigation Update Data** P. 187
- For vehicle position icon errors, screen error messages, or other GPS-related errors:
  ➔ **Troubleshooting** P. 170
  ➔ **System Limitations** P. 184

Visiting Your Dealer

If you have a question that you cannot resolve using the available help resources, you can consult your dealer. Please identify the specific issue (e.g., error occurs when you enter a specific address, when driving on a certain road, or just when it’s cold) so that the service technician can refer the issue to the factory so that a solution can be found. Be patient, the service technician may be unfamiliar with your specific issue.

Map Coverage

The navigation system provides map coverage for the contiguous United States, Alaska, Hawaii, Canada, and Puerto Rico. The map coverage consists of accurately mapped (verified) metropolitan areas and a less accurate (unverified) rural database. Note that unverified areas are constantly being reviewed and converted to verified areas each year.

MAP MENU

Map coverage update information is available from Honda Automobile Customer Service or online at *www.hondanavi.com*.

To find navigation system update information:

1. Visit *www.hondanavi.com*.
2. Enter your vehicle model and model year.
3. Click Map Coverage to display a list of verified coverage areas on the most recent update.
4. Click Map Coverage Details to display a PDF document with a full listing of all coverage areas.

   ▶ Adobe® Reader® is required for viewing and printing the Portable Document Format (PDF) documents. To download the latest version of Adobe Reader, visit *http://get.adobe.com/reader/*.

Obtaining Navigation Update Data

Honda is continually expanding the scope of the navigation system. Navigation system software upgrades may be made available periodically, usually in the fall of each year.

To purchase an updated data file:

1. Obtain your vehicle’s VIN number and the System/Device Information.
   ➔ **System/Device Information** P. 167
2. Call the Honda Navigation Disc Fulfilment Center at (888) 291-4675, or order online at *www.hondanavi.com*.

Update data is not available from your dealer. However, the dealer may assist you in obtaining an update data for you out of courtesy. There is no program for free updates.

Traffic Information

- Continuously updated traffic information is available in major metropolitan areas across the 48 contiguous states and Hawaii.
- Visit *automobiles.honda.com/*traffic for a complete listing of coverage areas and other information.

Operation in Alaska, Hawaii, Canada, and Puerto Rico

■ Map Coverage

All roads displayed on the map screens are verified roads. Information in this manual relating to “unverified” roads or areas is not applicable.

■ Address and Place Entry Screens

Entering a destination address or place/landmark on another island may result in a screen caution message. This is because there are no ferry routes between islands in the database.

END-USER TERMS

The data (“Data”) is provided for your personal, internal use only and not for resale. It is protected by copyright, and is subject to the following terms and conditions which are agreed to by you, on the one hand, and NAVTEQ North America, LLC (“NT”) and its licensors (including their licensors and suppliers) on the other hand.

© 2011 NAVTEQ. All rights reserved.

This data includes information taken with permission from Canadian authorities, including © Her Majesty the Queen in Right of Canada, © Queen’s Printer for Ontario, © Canada Post Corporation, GeoBase®, © The Department of Natural Resources Canada. All rights reserved.

NAVTEQ holds a non-exclusive license from the United States Postal Service® to publish and sell ZIP+4® information.

©United States Postal Service® 2011. Prices are not established, controlled or approved by the United States Postal Service®. The following trademarks and registrations are owned by the USPS: United States Postal Service, USPS, and ZIP+4.

■TERMS AND CONDITIONS

Personal Use Only. You agree to use this Data for the solely personal, non-commercial purposes for which you were licensed, and not for service bureau, time-sharing or other similar purposes. Accordingly, but subject to the restrictions set forth in the following paragraphs, you may copy this Data only as necessary for your personal use to (i) view it, and (ii) save it, provided that you do not remove any copyright notices that appear and do not modify the Data in any way. You agree not to otherwise reproduce, copy, modify, decompile, disassemble or reverse engineer any portion of this Data, and may not transfer or distribute it in any form, for any purpose, except to the extent permitted by mandatory laws. Multi-disc sets may only be transferred or sold as a complete set as provided by you and not as a subset thereof.

Restrictions. Except where you have been specifically licensed to do so by NT, and without limiting the preceding paragraph, you may not (a) use this Data with any products, systems, or applications installed or otherwise connected to or in communication with vehicles, capable of vehicle navigation, positioning, dispatch, real time route guidance, fleet management or similar applications; or (b) with or in communication with any positioning devices or any mobile or wireless-connected electronic or computer devices, including without limitation cellular phones, palmtop and handheld computers, pagers, and personal digital assistants or PDAs.

Warning. The Data may contain inaccurate or incomplete information due to the passage of time, changing circumstances, sources used and the nature of collecting comprehensive geographic data, any of which may lead to incorrect results.

No Warranty. This Data is provided to you “as is,” and you agree to use it at your own risk. NT and its licensors (and their licensors and suppliers) make no guarantees, representations or warranties of any kind, express or implied, arising by law or otherwise, including but not limited to, content, quality, accuracy, completeness, effectiveness, reliability, fitness for a particular purpose, usefulness, use or results to be obtained from this Data, or that the Data or server will be uninterrupted or error-free.

Disclaimer of Warranty: NT AND ITS LICENSORS (INCLUDING THEIR LICENSORS AND SUPPLIERS) DISCLAIM ANY WARRANTIES, EXPRESS OR IMPLIED, OF QUALITY, PERFORMANCE, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. Some States, Territories and Countries do not allow certain warranty exclusions, so to that extent the above exclusion may not apply to you.

Disclaimer of Liability: NT AND ITS LICENSORS (INCLUDING THEIR LICENSORS AND SUPPLIERS) SHALL NOT BE LIABLE TO YOU: IN RESPECT OF ANY CLAIM, DEMAND OR ACTION, IRRESPECTIVE OF THE NATURE OF THE CAUSE OF THE CLAIM, DEMAND OR ACTION ALLEGING ANY LOSS, INJURY OR DAMAGES, DIRECT OR INDIRECT, WHICH MAY RESULT FROM THE USE OR POSSESSION OF THE INFORMATION; OR FOR ANY LOSS OF PROFIT, REVENUE, CONTRACTS OR SAVINGS, OR ANY OTHER DIRECT, INDIRECT, INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF YOUR USE OF OR INABILITY TO USE THIS INFORMATION, ANY DEFECT IN THE INFORMATION, OR THE BREACH OF THESE TERMS OR CONDITIONS, WHETHER IN AN ACTION IN CONTRACT OR TORT OR BASED ON A WARRANTY, EVEN IF NT OR ITS LICENSORS HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. Some States, Territories and Countries do not allow certain liability exclusions or damages limitations, so to that extent the above may not apply to you.

Export Control. You agree not to export from anywhere any part of the Data provided to you or any direct product thereof except in compliance with, and with all licenses and approvals required under, applicable export laws, rules and regulations.

Entire Agreement. These terms and conditions constitute the entire agreement between NT (and its licensors, including their licensors and suppliers) and you pertaining to the subject matter hereof, and supersedes in their entirety any and all written or oral agreements previously existing between us with respect to such subject matter.

Governing Law. The above terms and conditions shall be governed by the laws of the State of Illinois, without giving effect to (i) its conflict of laws provisions, or (ii) the United Nations Convention for Contracts for the International Sale of Goods, which is explicitly excluded. You agree to submit to the jurisdiction of the State of Illinois for any and all disputes, claims and actions arising from or in connection with the Data provided to you hereunder.

Government End Users. If the Data is being acquired by or on behalf of the United States government or any other entity seeking or applying rights similar to those customarily claimed by the United States government, this Data is a “commercial item” as that term is defined at 48 C.F.R. (“FAR”) 2.101, is licensed in accordance with this End User License Agreement, and each copy of the Data delivered or otherwise furnished shall be marked and embedded as appropriate with the following “Notice of Use,” and shall be treated in accordance with such Notice:

NOTICE OF USE

CONTRACTOR (MANUFACTURER/ SUPPLIER) NAME: NAVTEQ
CONTRACTOR (MANUFACTURER/ SUPPLIER) ADDRESS: 425 West Randolph St., Chicago, Illinois 60606

This Data is a commercial item as defined in FAR 2.101 and is subject to the End User License Agreement under which this Data was provided.

© 2011 NAVTEQ - All rights reserved.

If the Contracting Officer, federal government agency, or any federal official refuses to use the legend provided herein, the Contracting Officer, federal government agency, or any federal official must notify NAVTEQ prior to seeking additional or alternative rights in the Data.

As required by the FCC

1)This device complies with Part 15 of the FCC Rules and Canadian RSS-210/RSS-Gen. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

2)The FCC requires the user to be notified that any changes or modifications made to this device that are not expressly approved by the party responsible for compliance may void the user's authority to operate the equipment.

3)This product emits radio frequency energy, but the radiated output power of this device is far below the FCC and IC radio frequency exposure limits. This equipment complies with FCC and IC RF radiation exposure limits set forth for an uncontrolled environment. Nevertheless, the device should be used in such a manner that the potential for human contact with the antenna during normal operation is minimized.

* These commands toggle the function on and off, so the command may not match your intended action.

Audio Commands

The system accepts these commands on most screens.

*Audio**
Audio on
Audio off

* This command toggles the function on and off, so the command may not match your intended action.

NOTE:
Audio volume levels cannot be controlled using voice control.

■Radio Commands

*Radio**
Radio on
Radio off
Radio select FM1
Radio select FM2
Radio select AM
Radio tune to # FM (#: frequency, e.g., 95.5)
Radio tune to # AM (#: frequency, e.g., 1020)
Radio seek up
Radio seek down
Radio next station
Radio preset # (#: 1 to 6)
Radio FM preset # (#: 1 to 6)
Radio FM1 preset # (#: 1 to 6)
Radio FM2 preset # (#: 1 to 6)
Radio AM preset # (#: 1 to 6)
*Radio auto select**
*Radio scan**

* These commands toggle the function on and off, so the command may not match your intended action.

■Disc Commands

DISC play
DISC play track # (#: 1 to 30)
DISC skip forward
DISC skip back
*DISC track random**
*DISC track repeat**
*DISC track scan**
DISC folder up
DISC folder down
*DISC folder random**
*DISC folder repeat**
*DISC folder scan**
DISC normal play (cancels random, repeat, or scan play mode, resumes normal play mode)

* These commands toggle the function on and off, so the command may not match your intended action.

■USB Commands

USB play
USB play track # (#: 1 to 30)
USB skip forward
USB skip back
*USB track random**
*USB track repeat**
*USB track scan**
USB folder up
USB folder down
*USB folder random**
*USB folder repeat**
*USB folder scan**
USB normal play (cancels random, repeat, or scan play mode, resumes normal play mode)

* These commands toggle the function on and off, so the command may not match your intended action.

■iPod® Commands

iPod play
iPod play track # (#: 1 to 30)
iPod skip forward
iPod skip back
*iPod track shuffle**
*iPod album shuffle**
*iPod track repeat**
iPod normal play (cancels repeat or shuffle play mode, resumes normal play mode)

* These commands toggle the function on and off, so the command may not match your intended action.

■Pandora® Commands

*Pandora play**1
*Pandora on**1
*Pandora off**1
Pandora like song
Pandora dislike song
Pandora skip forward (or *next song*)
Pandora bookmark song
Pandora bookmark artist
Pandora station up
Pandora station down
*Pause**2
*Resume**2

*1. These commands toggle the function on and off, so the command may not match your intended action.

*2. These commands can be accepted from Audio screen only.

Bluetooth® Audio Commands

Bluetooth audio play
Bluetooth audio skip forward
Bluetooth audio skip back
Bluetooth audio pause
Bluetooth audio resume

NOTE:
Bluetooth® Audio commands may not work on some phones or Bluetooth® audio devices.
