DISCLOSURES

Devices That Emit Radio Waves
The following products and systems on your vehicle emit radio waves when in operation:
- AcuraLink®
- Audio system
- Blind spot information system
- Bluetooth® Audio
- Bluetooth® HandsFreeLink®
- Collision Mitigation Braking System™ (CMBS™)
- HomeLink® Universal Transceiver
- Immobilizer system
- Remote engine starter
- Remote transmitter
- Keyless Access System
- Tire Pressure Monitoring System

Each of the above complies with the appropriate requirements or the required standards of FCC (Federal Communications Commission) and Industry Canada, described below:

As required by the FCC:
This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

As required by Industry Canada:
This device complies with Industry Canada Standard RSS-Gen/210/251/310. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

California Perchlorate Contamination Prevention Act
The airbags, seat belt tensioners, and CR-type batteries in this vehicle may contain perchlorate materials—special handling may apply. See www.dtsc.ca.gov/hazardouswaste/perchlorate/ for more information.

California Proposition 65 Warning
WARNING: This product contains or emits chemicals known to the state of California to cause cancer and birth defects or other reproductive harm.

Event Data Recorders
This vehicle is equipped with an event data recorder (EDR). The main purpose of an EDR is to record, in certain crash or near crash-like situations, such as an airbag deployment or hitting a road obstacle, data that will assist in understanding how a vehicle’s systems performed. The EDR is designed to record data related to vehicle dynamics and safety systems for a short period of time, typically 30 seconds or less. The EDR in this vehicle is designed to record such data as:
- How various systems in your vehicle were operating;
- Whether or not the driver and passenger safety belts were buckled/fastened;
- How far (if at all) the driver was depressing the accelerator and/or brake pedal; and,
- How fast the vehicle was traveling.

These data can help provide a better understanding of the circumstances in which crashes and injuries occur. NOTE: EDR data are recorded by your vehicle only if a non-trivial crash situation occurs; no data are recorded by the EDR under normal driving conditions and no personal data (e.g., name, gender, age, and crash location) are recorded. However, other parties, such as law enforcement, could combine the EDR data with the type of personally identifying data routinely acquired during a crash investigation.

To read data recorded by an EDR, special equipment is required, and access to the vehicle or the EDR is needed. In addition to the vehicle manufacturer, other parties such as law enforcement, could combine the EDR data with the type of personally identifying data routinely acquired during a crash investigation.

The data belong to the vehicle owner and may not be accessed by anyone else except as legally required or with the permission of the vehicle owner.

Service Diagnostic Recorders
This vehicle is equipped with service-related devices that record information about powertrain performance. The data can be used to verify emissions law requirements and/or help technicians diagnose and solve service problems. It may also be combined with data from other sources for research purposes, but it remains confidential.
INTRODUCTION

This Owner’s Guide is intended to help you quickly get acquainted with your 2016 Acura RDX. It provides basic information and instructions on technology and convenience features, as well as emergency procedures and how to get assistance.

This guide is for vehicles sold in the United States and Canada. It covers all RDX models, so you may find descriptions of features and equipment that are not in your vehicle.

Images throughout this guide are from U.S. vehicles and represent features and equipment that are available on some, but not all, models. Images shown in this guide should be considered examples and used for demonstration purposes only.

This guide is not intended to be a substitute for the Owner’s Manual. The Owner Information CD enclosed in your glove box kit includes the Owner’s Manual, Navigation Manual, and vehicle and tire warranties in electronic format. This information can be viewed on a computer (PC or Mac platform) and saved or printed for your reference. In addition, you can visit owners.acura.com (U.S.) or myacura.ca (Canada) to view the complete and most current information.

If you are the first registered owner of your vehicle, you may request a complimentary printed copy of the Owner’s Manual, Navigation Manual, or Vehicle Warranty within the first six months after vehicle purchase. To request a copy, visit owners.acura.com and create or log in to your account. In Canada, please request a copy from your Acura dealer.

American Honda Motor Company strives to be proactive in protecting our environment and natural resources. By using electronic delivery for a considerable portion of the information typically found in a vehicle owner’s manual, we are further reducing our impact on the environment.

Acura Total Luxury Care Roadside Assistance

Your Acura TLC Roadside Assistance representative is here to help you 24 hours a day, 7 days a week. Under your 4-year/50,000-mile (80,000-km) warranty, the following benefits are available:

• Towing services—full cost of towing to the closest Acura dealer
• Roadside assistance—jump starting, fuel delivery, lockout, and flat tire
• Trip planning—detailed trip routing, emergency services, and more

Call (800) 594-8500 (U.S.) or (800) 565-7587 (Canada)

Acura Client Relations

Your authorized Acura dealer should be able to answer any questions you have about your vehicle. However, if you are dissatisfied with the information you receive, you can call Acura Client Relations (see page 145).

Call (800) 382-2238 (U.S.) or (888) 922-8729 (Canada)

Your safety—and the safety of others—is very important, and operating this vehicle safely is an important responsibility. While we strive to help you make informed decisions about safety, it is not practical or possible to warn you about all the hazards associated with operating or maintaining your vehicle. Therefore, you must use your own good judgment.

**Important Safety Information**

This guide explains many of your vehicle’s safety features and how to use them. Please read this information carefully. Following the instructions below will also help to keep you and your passengers safe.

**Important Safety Precautions**

- Always wear your seat belt.
- Secure all children in the proper restraint system.
- Be aware of airbag hazards.
- Don’t drink and drive.
- Pay appropriate attention to the task of driving safely.
- Control your speed.
- Keep your vehicle in safe condition.

Engaging in cell phone conversation or other activities that keep you from paying close attention to the road, other vehicles, and pedestrians could lead to a crash. Remember, situations can change quickly, and only you can decide when it is safe to divert some attention away from driving.

**Important Handling Information**

Your vehicle has a higher ground clearance than a passenger vehicle designed for use only on pavement. Higher ground clearance has many advantages for off-highway driving. It allows you to travel over bumps, obstacles, and rough terrain. It also provides good visibility so you can anticipate problems earlier.

These advantages come at some cost. Because your vehicle is taller and rides higher off the ground, it has a higher center of gravity, making it more susceptible to tipping or rollover if you make abrupt turns. Utility vehicles have a significantly higher rollover rate than other types of vehicles. In a rollover crash, an unbelted person is significantly more likely to die than a person wearing a seat belt. As a reminder, make sure you and your passengers always wear seat belts.
Safety Messages
When you see the following messages throughout this guide, pay close attention.

⚠️ DANGER ⚠️ You WILL be KILLED or SERIOUSLY HURT if you don’t follow instructions.
⚠️ WARNING ⚠️ You CAN be KILLED or SERIOUSLY HURT if you don’t follow instructions.
⚠️ CAUTION ⚠️ You CAN be HURT if you don’t follow instructions.
⚠️ NOTICE ⚠️ This information is intended to help you avoid damage to your vehicle, other property, or the environment.

Carbon Monoxide Gas
The engine exhaust from this vehicle contains carbon monoxide, a colorless, odorless, and highly toxic gas. As long as you properly maintain your vehicle and follow the instructions set forth below, you will not accumulate dangerous levels of carbon monoxide gas in the vehicle interior.

Have the exhaust system inspected for leaks whenever:
- The exhaust system is making an unusual noise.
- The exhaust system may have been damaged.
- The vehicle is raised for an oil change.

When you operate a vehicle with the tailgate open, airflow can pull exhaust gas into the interior and create a hazardous condition. If you must drive with the tailgate open, open all the windows and set the climate control system as shown below.
1. Select the fresh air mode.
2. Select the mode.
3. Set the fan speed to high.
4. Set the temperature control to a comfortable setting.

Adjust the climate control system in the same manner if you sit in your parked vehicle with the engine running.

⚠️ WARNING ⚠️
Carbon monoxide gas is toxic. Breathing it can cause unconsciousness and even kill you.
Avoid any enclosed areas or activities that expose you to carbon monoxide.

An enclosed area such as a garage can quickly fill up with carbon monoxide gas. Do not run the engine with the garage door closed. Even when the garage door is open, drive out of the garage immediately after starting the engine.

Seat Belts
A seat belt is your best protection in all types of collisions. Airbags are designed to supplement seat belts, not replace them. So even though your vehicle is equipped with airbags, make sure you and your passengers always wear your seat belts and wear them properly.

Lap/Shoulder Seat Belts
All five seating positions are equipped with lap/shoulder seat belts with emergency locking retractors. In normal driving, the retractor lets you move freely while keeping some tension on the belt. During a collision or sudden stop, the retractor locks to restrain your body. The front passenger’s and rear seat belts also have a lockable retractor for use with child seats.

The front seats are equipped with automatic seat belt tensioners to enhance safety. The tensioners automatically tighten the front seat belts during a moderate to severe frontal collision, sometimes even if the collision is not severe enough to inflate the front airbags.

Proper Use of Seat Belts
Follow these guidelines for proper use:
- All occupants should sit upright, well back in the seat, and remain in that position for the duration of the trip. Slouching and leaning reduces the effectiveness of the belt and can increase the chance of serious injury in a crash.
- Never place the shoulder part of a lap/shoulder seat belt under your arm or behind your back. This could cause very serious injuries in a crash.
- Two people should never use the same seat belt. If they do, they could be very seriously injured in a crash.
- Do not put any accessories on the seat belts. Devices intended to improve comfort or reposition the shoulder part of a seat belt can reduce the protective capability and increase the chance of serious injury in a crash.
- No one should sit in a seat with an inoperative seat belt or one that does not appear to be working correctly. Using a seat belt that is not working properly may not protect the occupant in a crash. Have a dealer check the belt as soon as possible.

⚠️ WARNING ⚠️
Not wearing a seat belt properly increases the chance of a serious injury or death in a crash, even though your vehicle has airbags.
Be sure you and your passengers always wear seat belts and wear them properly.
Seat Belt Inspection

Regularly check the condition of your seat belts as follows:

• Pull each belt out fully, and look for frays, cuts, burns, and wear.
• Check that the latches work smoothly and the belts retract easily. If a belt does not retract easily, cleaning the belt may correct the problem. Only use a mild soap and warm water. Do not use bleach or cleaning solvents. Make sure the belt is completely dry before allowing it to retract.

Any belt that is not in good condition or working properly will not provide proper protection and should be replaced as soon as possible.

A belt that has been worn during a crash may not provide the same level of protection in a subsequent crash. Have your seat belts inspected by a dealer after any collision.

WARNING

Not checking or maintaining seat belts can result in serious injury or death if the seat belts do not work properly when needed.

Check your seat belts regularly and have any problem corrected as soon as possible.

Fastening a Seat Belt

Adjust your seat to the proper position (see page 40), and then follow the below steps.

1. Pull the seat belt out slowly.
2. Insert the latch plate into the buckle, then tug on the belt to make sure the buckle is secure. Make sure that the belt is not twisted or caught on anything.
3. Position the lap part of the belt as low as possible across your hips, then pull up on the shoulder part of the belt so the lap part fits snugly. This lets your strong pelvic bones take the force of a crash and reduces the chance of internal injuries.
4. If necessary, pull up on the belt again to remove any slack, then make sure that the belt rests across your chest and over your shoulder. This spreads the forces of a crash over the strongest bones in your upper body.

To release the belt, push the red PRESS button then guide the belt by hand until it has retracted completely.

WARNING

Improperly positioning the seat belts can cause serious injury or death in a crash.

Make sure all seat belts are properly positioned before driving.

Adjusting the Shoulder Anchor

The front seats have adjustable shoulder anchors to accommodate taller and shorter occupants.

1. Move the anchor up and down while holding the release button.
2. Position the anchor so that the belt rests across the center of your chest and over your shoulder.
**Seat Belt with Detachable Anchor**

The seat belt for the second-row center seat is located in the ceiling.

1. Pull out the seat belt’s small latch plate and the latch plate from each holding slot in the ceiling.

2. Line up the triangle marks on the small latch plate and anchor buckle. Make sure the seat belt is not twisted. Attach the belt to the anchor buckle.

3. Insert the latch plate into the buckle. Properly fasten the seat belt the same way you fasten the lap/shoulder seat belt.

To unlatch the detachable anchor, insert the latch plate into the slot on the side of the anchor buckle.

**WARNING**

Using the seat belt with the detachable anchor unlatched increases the chance of serious injury or death in a crash.

Before using the seat belt, make sure the detachable anchor is correctly latched.

---

**Airbags**

Your vehicle is equipped with three types of airbags: front airbags, side airbags, and side curtain airbags.

**Front Airbags (SRS)**

The front SRS airbags inflate in a moderate-to-severe frontal collision to help protect the head and chest of the driver and/or front passenger. They are housed in the center of the steering wheel for the driver, and in the dashboard for the front passenger. Both airbags are marked **SRS AIRBAG**.

SRS (Supplemental Restraint System) indicates that the airbags are designed to supplement seat belts, not replace them. Seat belts are the occupant’s primary restraint system.

**Advanced Airbags**

Your front airbags have advanced features to help reduce the likelihood of airbag-related injuries to smaller occupants.

The driver’s advanced front airbag system includes a seat position sensor. If the seat is too far forward, the airbag inflates with less force, regardless of the severity of the impact.

If there is a problem with the driver’s seat position sensor, the SRS indicator will come on and the airbag will inflate with full (normal) force, regardless of the driver’s seating position.

The passenger’s advanced front airbag system has weight sensors. Although Acura recommends against carrying an infant or small child in front, if the sensors detect the weight of a child (up to 65 lbs or 29 kg), the system will automatically turn off the passenger’s front airbag.

For both advanced front airbags to work properly:

- Do not spill any liquid on or under the seats.
- Do not put any object under the passenger’s seat.
- Make sure any objects are positioned properly on the floor. Improperly positioned objects can interfere with the advanced airbag sensors.
- All occupants should sit upright and wear their seat belts properly.
- Do not place any cover over any part of the passenger side dashboard.
Side Airbags
The side airbags help protect the upper torso and pelvis of the driver or a front passenger during a moderate-to-severe side impact. They are housed in the outside edge of the driver’s and front passenger’s seat-backs. Both are marked SIDE AIRBAG.

Side Curtain Airbags
Side curtain airbags help protect the head and torso of the driver and passengers in outer seating positions during a moderate-to-severe side impact. The side curtain airbags equipped in this vehicle are also designed to help reduce the likelihood of partial and complete ejection of vehicle occupants through side windows in crashes, particularly rollover crashes.

The side curtain airbags are located in the ceiling above the side windows on both sides of the vehicle.

The side curtain airbags are designed to deploy in a rollover or moderate-to-severe side impact. If the SRS control unit senses that your vehicle is about to roll over, it immediately deploys both side curtain airbags and activates both front seat belt tensioners. If the impact is on the passenger’s side, the passenger’s side curtain airbag will inflate even if there are no occupants on that side of the vehicle.

To get the best protection from the side curtain airbags, occupants should wear their seat belts properly and sit upright and well back in their seats.

Do not attach any objects to the side windows or roof pillars, as they can interfere with the proper operation of the side curtain airbags.

When side curtain airbags deploy in a frontal collision
One or both side curtain airbags may inflate in a moderate-to-severe angled frontal collision. In this case, the side curtain airbags will deploy slightly after the front airbags.

Important Facts About Your Airbags
Always wear your seat belt properly, and sit upright and as far back from the steering wheel as possible while allowing full control of the vehicle. A front passenger should move their seat as far back from the dashboard as possible.

Do not place hard or sharp objects between yourself and a front airbag.
Carrying hard or sharp objects on your lap, or driving with a pipe or other sharp object in your mouth, can result in injuries if your front airbag inflates.

Do not attach or place objects on the front airbag covers.
Objects on the covers marked SRS AIRBAG could interfere with the proper operation of the airbags or be propelled inside the vehicle and hurt someone if the airbags inflate.

Do not attach accessories or near the side airbags.
They can interfere with the proper operation of the airbags, or hurt someone if an airbag inflates.

Do not attach any objects to the side windows or roof pillars.
They can interfere with the proper operation of the side curtain airbags.

Do not cover or replace the front seat-back covers.
This can prevent your side airbags from properly deploying during a side impact.

Airbag System Indicators
If a problem occurs in the airbag system, the SRS indicator will come on and a message appears on the multi-information display.

SRS (Supplemental Restraint System) Indicator
If the indicator comes on at any other time besides vehicle start-up, or does not come on at all, have the system checked by a dealer as soon as possible. If you don’t, your airbags and seat belt tensioners may not work properly when they are needed.

WARNING
An open glove box can cause serious injury to your passenger in a crash, even if the passenger is wearing the seat belt.
Always keep the glove box closed while driving.

WARNING
Ignoring the SRS indicator can result in serious injury or death if the airbag systems or tensioners do not work properly.
Have your vehicle checked by a dealer as soon as possible if the SRS indicator alerts you to a possible problem.
Passenger Airbag Off Indicator

The indicator comes on to alert you that the front passenger’s front airbag has been turned off. This occurs when the front passenger’s weight sensors detect 65 lbs (29 kg) or less, the weight of an infant or small child, on the seat.

Infants and small children should always ride properly restrained in a back seat.

Objects placed on the seat can also cause the indicator to come on.

If the front passenger’s seat is empty, the passenger’s front airbag will not deploy and the indicator will not come on.

If the indicator comes on with no occupant or objects in the front passenger’s seat, something may be interfering with the weight sensors, such as:

- An object hanging on the seat or in the seat-back pocket.
- A child seat or other object pressing against the rear of the seat-back.
- A rear passenger pushing or pulling on the back of the front passenger’s seat.
- The front seat or seat-back is forced against an object on the seat or floor behind it.
- An object placed under the front passenger’s seat.

If none of these conditions exist, have your vehicle checked by a dealer as soon as possible.

The passenger airbag off indicator may go on and off repeatedly if the total weight on the seat is near the airbag cutoff threshold.

Airbag System Components

1. Two SRS (Supplemental Restraint System) front airbags. The driver’s airbag is stored in the center of the steering wheel; the front passenger’s airbag is stored in the dashboard. Both are marked SRS AIRBAG.
2. Two side airbags, one for the driver and one for the front passenger. The airbags are stored in the outer edges of the seat-backs. Both are marked SIDE AIRBAG.
3. Two side curtain airbags, one for each side of the vehicle. The airbags are stored in the ceiling, above the side windows. The front and rear pillars are marked SIDE CURTAIN AIRBAG.
4. An electronic control unit that continually monitors and can record information about the sensors, the airbag activators, the seat belt tensioners, and driver and front passenger seat belt use when the vehicle is on.
5. Automatic front seat belt tensioners. The driver’s and front passenger’s seat belts incorporate sensors that detect whether or not they are fastened.
6. A driver’s seat position sensor. If the seat is too far forward, the airbag will inflate with less force.
7. Weight sensors in the front passenger’s seat. The front passenger’s airbag will be turned off if the weight on the seat is 65 lbs (29 kg) or less (the weight of an infant or small child).
8. Impact sensors that can detect a moderate-to-severe front or side impact.
9. An indicator on the dashboard that alerts you that the front passenger’s front airbag has been turned off.
An indicator on the instrument panel that alerts you to a possible problem with your airbag system or seat belt tensioners.

A rollover sensor that detects whether the vehicle is about to roll over.

### Airbag Care
You do not need to, and should not, perform any maintenance on or replace any airbag system components yourself. However, you should have your vehicle inspected by a dealer in the following situations:

#### When the airbags have deployed
If an airbag has inflated, the control unit and other related parts must be replaced. Similarly, once an automatic seat belt tensioner has been activated, it must be replaced.

#### When the vehicle has been in a moderate-to-severe collision
Even if the airbags did not inflate, have your dealer inspect the following: the driver's seat position sensor, weight sensors in the passenger's seat, front seat belt tensioners, and each seat belt that was worn during the crash.

### Do not remove or modify a front seat without first consulting a dealer
This would likely disable the driver's seat position sensor or the weight sensors in the passenger's seat. If it is necessary to remove or modify a front seat to accommodate a person with disabilities, contact an Acura dealer. For U.S. vehicles, call Acura Client Relations at (800) 382-2238. For Canadian vehicles, call Acura Client Services at (888) 922-8729.

### Child Safety
Each year, many children are injured or killed in vehicle crashes because they are either unrestrained or not properly restrained. In fact, vehicle collisions are the number one cause of death of children ages 12 and under.

The National Highway Traffic Safety Administration and Transport Canada recommend that all children ages 12 and under be properly restrained in a rear seat. Some states or provinces/territories have laws restricting where children may ride.

To reduce the number of child deaths and injuries, every state, Canadian province and territory requires that infants and children be properly restrained when they ride in a vehicle.

### Protecting Child Passengers
- An inflating front or side airbag can injure or kill a child sitting in the front seat.
- A child in the front seat is more likely to interfere with the driver's ability to safely control the vehicle.
- Statistics show that children of all sizes and ages are safer when they are properly restrained in a rear seat.
- Any child who is too small to wear a seat belt correctly must be restrained in an approved child seat that is properly secured to the vehicle using either the lap belt portion of the lap/shoulder belt or the lower anchors of the LATCH system.
- Never hold a child on your lap because it is impossible to protect them in the event of a collision.
- Never put a seat belt over yourself and a child. During a crash, the belt would likely press deep into the child and cause serious or fatal injuries.
- Never let two children use the same seat belt. Both children could be very seriously injured in a crash.
- Do not allow children to operate the doors, windows, or seat adjustments.
- Do not leave children in the vehicle unattended, especially in hot weather when the inside of the vehicle can get hot enough to kill them. They could also activate vehicle controls, causing it to move unexpectedly.

---

**WARNING**

Children who are unrestrained or improperly restrained can be seriously injured or killed in a crash.

Any child too small for a seat belt should be properly restrained in a child seat. A larger child should be properly restrained with a seat belt, using a booster seat if necessary.
Protecting Infants

An infant must be properly restrained in a rear-facing, reclining child seat until the infant reaches the seat manufacturer’s weight or height limit for the seat, and the infant is at least one year old. Many experts recommend use of a rear-facing seat for a child up to two years old if the child’s height and weight are appropriate for a rear-facing seat.

Child seats must be placed and secured in a rear seating position. Rear-facing child seats should never be installed in a forward-facing position.

When properly installed, a rear-facing child seat may prevent the driver or a front passenger from moving their seat all the way back, or from locking their seat-back in the desired position. It can also interfere with proper operation of the front passenger’s advanced front airbag system. If this occurs, we recommend that you install the child seat directly behind the front passenger’s seat, move the seat as far forward as needed, and leave it unoccupied. Or, you may wish to get a smaller rear-facing child seat.

Protecting Smaller Children

If a child is at least one year old and within the weight range indicated by the child seat manufacturer, the child should be properly restrained in a firmly secured forward-facing child seat.

We strongly recommend placing a forward-facing child seat in a rear seating position.

Placing a forward-facing child seat in the front seat can be hazardous, even with advanced front airbags that automatically turn the passenger’s front airbag off. A rear seat is the safest place for a child.

Selecting a Child Seat

Most child seats are LATCH-compatible (Lower Anchors and Tethers for Children). Some have a rigid-type connector, while others have a flexible-type connector. Both are equally easy to use. Some existing and previously owned child seats can only be installed using the seat belt. Whichever type you choose, follow the child seat manufacturer’s use and care instructions as well as the instructions in this manual. Proper installation is key to maximizing your child’s safety.

In seating positions and vehicles not equipped with LATCH, a LATCH-compatible child seat can be installed using the seat belt and a top tether for added security. This is because all child seats are required to be designed so that they can be secured with a lap belt or the lap part of a lap/shoulder belt. In addition, the child seat manufacturer may advise that a seat belt be used to attach a LATCH-compatible seat once a child reaches a specified weight. Please read the child seat owner’s manual for proper installation instructions.

Important consideration when selecting a child seat

Make sure the child seat meets the following three requirements:

- The child seat is the correct type and size for the child.
- The child seat is the correct type for the seating position.
Installing a LATCH-Compatible Child Seat

A LATCH-compatible child seat can be installed in either of the two outer rear seats. A child seat is attached to the lower anchors with either the rigid or flexible type of connectors.

1. Locate the lower anchors under the marks.

2. Place the child seat on the vehicle seat, then attach the child seat to the lower anchors according to the instructions that came with the child seat. Make sure that the lower anchors are not obstructed by the seat belt or any other object.

3. Raise the head restraint to its highest position, then route the tether strap between the head restraint legs, and secure the tether strap hook onto the anchor.

4. Tighten the tether strap as instructed by the child seat manufacturer.

5. Make sure the child seat is firmly secured by rocking it forward and back and side to side; little movement should be felt.

6. Make sure any unused seat belt that a child can reach is buckled, the lockable retractor is activated, and the belt is fully retracted and locked.

Installing a Child Seat with a Lap/Shoulder Seat Belt

1. Place the child seat on the vehicle seat.

2. Route the seat belt through the child seat according to the seat manufacturer’s instructions, and insert the latch plate into the buckle. Insert the latch plate fully until it clicks.

3. Slowly pull the shoulder part of the belt all the way out until it stops. This activates the lockable retractor.

4. Let the seat belt completely wind up into the retractor, then try to pull it out to make sure the retractor is locked. If you are able to pull the shoulder belt out, the lockable retractor is not activated. Pull the seat belt all the way out, and repeat steps 3–4.

5. Grab the shoulder part of the seat belt near the buckle, and pull up to remove any slack from the lap part of the belt. When doing this, place your weight on the child seat and push it into the vehicle seat.

6. Make sure the child seat is firmly secured by rocking it forward and back and side to side; little movement should be felt.

7. Make sure any unused seat belt that a child can reach is buckled, the lockable retractor is activated, and the belt is fully retracted and locked.

To deactivate a lockable retractor, release the buckle and allow the seat belt to wind up all the way.
Adding Security with a Tether

Since a tether can provide additional security to the lap/shoulder seat belt installation, we recommend using a tether whenever one is available.

Two tether anchorage points are provided behind the rear outer seating positions and one in the ceiling for the rear center. A child seat that is installed with a seat belt and comes with a tether can use the tether for additional security.

Using an outer anchor
1. Raise the head restraint to its highest position, then route the tether strap through the head restraint legs. Make sure the strap is not twisted.
2. Secure the tether strap hook onto the anchor.
3. Tighten the tether strap as instructed by the child seat manufacturer.

Using the center anchor
1. Lower the head restraint to its lowest position.
2. Open the anchor cover.
3. Route the tether strap over the head restraint. Make sure the strap is not twisted.
4. Secure the tether strap hook onto the anchor.
5. Tighten the tether strap as instructed by the child seat manufacturer.

Protecting Larger Children

When a child is too big for a child seat, secure the child in a rear seat using the lap/shoulder seat belt.

Have the child sit upright and all the way back, then ensure the following:

- The child’s knees bend comfortably over the edge of the seat.
- The shoulder belt crosses between the child’s neck and arm.
- The lap part of the seat belt is as low as possible, touching the child’s thighs.
- The child can stay seated for the whole trip.

If a lap/shoulder belt cannot be used properly, position the child in a booster seat in a rear seating position. For the child’s safety, check that the child meets the booster seat manufacturer’s recommendations.

Some U.S. states and Canadian provinces/territories require children to use a booster seat until they reach a given age or weight (e.g., 6 years or 60 lbs). Be sure to check current laws in the state or province/territory where you intend to drive.

Allowing a child age 12 or under to sit in the front can result in injury or death if the passenger’s front airbag inflates.

If a larger child must ride in front, move the vehicle seat as far to the rear as possible, have the child sit up properly and wear the seat belt properly, using a booster seat if needed.
Safety Label Locations
Safety labels are in the locations shown. They warn you of potential hazards that can cause serious injury or death. Read these labels carefully.

Reporting Safety Defects
In the U.S.
If you believe that your vehicle has a defect which could cause a crash or could cause injury or death, you should immediately inform the National Highway Traffic Safety Administration (NHTSA) in addition to notifying American Honda Motor Co., Inc.

If NHTSA receives similar complaints, it may open an investigation, and if it finds that a safety defect exists in a group of vehicles, it may order a recall and remedy campaign. However, NHTSA cannot become involved in individual problems between you, your dealer, or American Honda Motor Co., Inc.

To contact NHTSA, you may call the Vehicle Safety Hotline toll-free at (888) 327-4236 (TTY: 1-800-424-9153); go to http://www.safercar.gov; or write to:
Administrator, NHTSA, 1200 New Jersey Avenue, SE., Washington, DC 20590. You can also obtain other information about motor vehicle safety from http://www.safercar.gov.

In Canada
If you believe that your vehicle has a defect which could cause a crash or could cause injury or death, you should immediately inform Honda Canada, Inc., and you may also inform Transport Canada.

If Transport Canada receives similar complaints, it may open an investigation, and if it finds that a safety defect exists in a group of vehicles, it may lead to a recall and remedy campaign. However, Transport Canada cannot become involved in individual problems between you, your dealer, or Honda Canada, Inc.

To contact Transport Canada’s Defect Investigations and Recalls Division, you may call (800) 333-0510. For more information on reporting safety defects or about motor vehicle safety, go to http://www.tc.gc.ca/roadsafety.
INSTRUMENT PANEL

Learn about the indicators, gauges, and displays related to driving the vehicle.

Indicators briefly appear with each engine start and then go out. Red and amber indicators are most critical. Blue and green indicators are used for general information.

Malfunction Indicators
These are the most critical indicators. If they come on and stay lit while driving or at any other time, there may be a problem. See your dealer if necessary.

- **Brake system**
  - Brake fluid is low.
  - There is a malfunction in the brake system. Press the brake pedal lightly to check pedal pressure. If normal, check the brake fluid level when you stop. If abnormal, take immediate action. If necessary, downshift the transmission to slow the vehicle using engine braking. Have your vehicle repaired immediately.

- **Low oil pressure**
  Engine oil pressure is low. Stop in a safe place. Open the hood and check the oil level, and add oil if necessary. If the indicator does not turn off, have your vehicle repaired immediately.

- **Malfunction indicator lamp** (check engine light)
  - The emissions control system may have a problem, or the fuel cap is missing or loose.
  - (Blinks) A misfire in the engine’s cylinders is detected. Stop in a safe place, and wait for the engine to cool down.

- **Charging system**
  The battery is not charging. Turn off all electrical items, but do not turn off the vehicle to prevent further battery discharge. Have your vehicle repaired immediately.

- **Anti-Lock Brake System (ABS)**
  There is a problem with the anti-lock brake system. Your vehicle still has normal braking ability, but no anti-lock function.

- **Supplemental Restraint System (SRS)**
  There is a problem with one of the airbag systems or seat belt tensioners.

- **Electric Power Steering (EPS)**
  There is a problem with the electric power steering system.

- **Tire Pressure Monitoring System (TPMS)**
  (Blinks and stays on) There is a problem with the tire pressure monitoring system, or the vehicle is fitted with the spare tire.

- **Keyless Access system**
  There is a problem with the keyless access system.

- **AWD All-Wheel Drive (AWD) system**
  - There is a problem with the AWD system. Only the front wheels are powered.
  - (Blinks) The AWD system has overheated and is inactive. Stop in a safe place, shift to Park (P), and idle the engine until the indicator goes off.

- **Vehicle Stability Assist (VSA) system**
  There is a problem with the VSA system or the hill start assist system.

- **Brake system**
  - There is a problem with the hydraulic brake boost system.

- **Blind spot information (BSI)**
  - There is a problem with the system, or the sensor is blocked.

- **Lane Departure Warning (LDW)**
  - There is a problem with the system, the temperature is too high, or the camera is blocked.

- **Adaptive Cruise Control (ACC)**
  - There is a problem with the system.

- **Lane Keeping Assist System (LKAS)**
  - There is a problem with the system.

- **Collision Mitigation Braking System™ (CMBS™)**
  - There is a problem with the system, the temperature is too high, or the camera or sensor is blocked.

---

*if equipped
Condition Indicators
These indicators may require you to perform an action.

Parking brake
Release the parking brake before driving. You will hear a beep if you drive with it not fully released.

Seat belt reminder
Make sure seat belts are fastened for you and all passengers. The indicator blinks and beeps sound continuously if you or your front passenger has not fastened your seat belts when you begin driving. If the indicator remains on after seat belts are fastened, see your dealer.

Low fuel
Refuel as soon as possible. If the indicator blinks, there is a problem with the fuel gauge. See your dealer.

Door/tailgate open*
Close any open doors or the tailgate. A beep sounds if any doors or the tailgate is opened while driving.

Low tire pressure
Stop in a safe place, check tire pressures, and inflate tire(s) if necessary.

System message
When a condition or malfunction indicator comes on, a message also appears on the multi-information display. Check the display for more information.

Immobilizer
Your remote transmitter cannot be recognized by the vehicle. If the indicator blinks, you may not be able to start the engine. Turn the vehicle off and then on again. If it continues to blink, there may be a problem with the system. See your dealer.

*if equipped

On/Off Indicators
These indicators remind you when an item is on or off.

- VSA off
- VSA engaged (blinks)
- CRUISE MAIN on*
- CRUISE CONTROL on*
- Turn signals/hazards on
- Exterior lights on
- Fog lights on*
- High beams on
- BSI off*
- ACC on*
- LKAS* LKAS on*
- CMBS™ off*
Multi-Information Display

Consists of several displays that provide you with useful information.

Models with black-and-white display

- **Main Displays**
  - Main display:
    - Average/instant fuel economy
  - Range
  - Elapsed time
  - Vehicle settings
  - Engine oil life
  - Tire pressure for each tire
  - Average speed

- **Lower Displays**
  - Odometer, Outside temperature
  - Trip A, Outside temperature
  - Trip B, Outside temperature

Models with color display

- **Main Displays**
  - Main display:
    - Average/instant fuel economy
  - Range
  - Elapsed time
  - Average speed

- **Lower Displays**
  - Odometer, Outside temperature
  - Trip A, Outside temperature
  - Trip B, Outside temperature

**Vehicle Settings**

Use the MID to customize certain vehicle features when the vehicle is in Park (P). You can also use the SETTING button* (see page 48).

An example of how to change the Trip A reset timing setting is below. Use the Info and SEL/RESET buttons to make and enter selections.

1. Scroll to the Vehicle Settings menu and select it.
2. Scroll to Meter Setup and select it.
4. Scroll through the options, and select the one you want.
5. Scroll to Exit, and select it to exit the menus.

*if equipped
VEHICLE CONTROLS
Learn about the various controls necessary for operating and driving the vehicle.

Using the Remote Transmitter
Lock or unlock the doors and tailgate.

- **ENGINE HOLD button**: After pressing the Lock button once, press and hold to remotely start the engine (see page 96).
- **Unlock button**: Press once to unlock the driver’s door. Press again to unlock all doors and the tailgate.
- **Power tailgate button**: Press to unlock and open the power tailgate. Press again to close it.
- **Release button (front or back of key)**: Slide to release the built-in key for valet use.
- **LED indicators**: Check door lock or engine status (see page 96).
- **Lock button**: Press to lock the doors and tailgate. Press again for audible verification.
- **Panic button**: Press to sound the alarm for 30 seconds. Press again to cancel.
- **ENGINE HOLD button**: After pressing the Lock button once, press and hold to remotely start the engine (see page 96).
- **Unlock button**: Press once to unlock the driver’s door. Press again to unlock all doors and the tailgate.
- **Power tailgate button**: Press to unlock and open the power tailgate. Press again to close it.
- **Release button (front or back of key)**: Slide to release the built-in key for valet use.
- **LED indicators**: Check door lock or engine status (see page 96).

**NOTICE**
Leaving the keyless access remote in the vehicle can result in theft or accidental movement of the vehicle. Always take the key with you whenever you leave the vehicle unattended.

Keyless Access System
When you carry the remote transmitter (for example, in a pocket or purse) and it is outside the vehicle and within range (about 32 inches or 80 cm), you can lock or unlock the doors and tailgate without handling the transmitter.

- **Unlocking/Locking the Doors**
  To unlock: Grab either front door handle when the vehicle is off.

  **To lock**: Press the door lock button on either front door handle when the vehicle is off. If the remote transmitter is inside the vehicle, the doors will not lock.

- **Unlocking/Locking the Tailgate**
  To unlock: Press and hold the tailgate release button under the tailgate handle to unlock the tailgate and all doors. The vehicle can be on or off.

  **To lock**: Press the tailgate lock button to lock the tailgate and all doors. If the remote transmitter is inside the vehicle, the tailgate and doors will not lock.
Power Tailgate Operation
Use these methods to operate the power tailgate.

- **Power Tailgate Button (interior)**
  The vehicle must be in Park (P).
  Press and hold the power tailgate button on the dashboard to the left of the steering column to open the tailgate. Press it again at any time to close it.

- **Power Tailgate Button (exterior)**
  **Automatic operation**
  Press the tailgate release button. You will hear one beep, and the tailgate opens automatically.

  **Manual operation**
  If there is not enough clearance for the tailgate to fully open, press and hold the tailgate release button until you hear two beeps. The tailgate unlatches, and you can open it manually.

  To automatically close the tailgate once it is open, press the power tailgate button located at the bottom of the hatch. Press it again to stop the tailgate operation and reverse its direction.

**WARNING**
Closing the power tailgate while anyone is in the path of the tailgate can cause serious injury.
Make sure everyone is clear before closing the tailgate.

**NOTICE**
Do not push or pull on the power tailgate when it is being automatically opened or closed. Forcibly opening or closing the power tailgate while in operation can deform the tailgate frame.

Door Operation from Inside the Vehicle
Use several methods to lock or unlock the doors.

- **Using the Lock Tab**
  **To unlock:** Pull the lock tab rearward. When you unlock either front door using the lock tab, the specific door (driver’s or passenger’s) unlocks.
  **To lock:** Push the lock tab forward. When you lock the door using the lock tab on the driver’s door, all the other doors and tailgate lock at the same time. When you lock the door using the lock tab on the front passenger’s door, only that door locks.

- **Using the Master Door Lock Switch**
  **To unlock:** Press the unlock side of the switch to unlock all doors and the tailgate.
  **To lock:** Press the lock side of the switch to lock all doors and the tailgate.

- **Using the Front Door Inner Handle**
  Pull the front door inner handle. The door unlocks and opens in one motion.
  Do not pull a front door inner handle while the vehicle is moving.

- **Childproof Door Locks**
  The childproof door locks prevent the rear doors from being opened from the inside regardless of the position of the lock tab.
  Slide the lever in the rear door to the lock position, and close the door.
  Open the door using the outer door handle.
Power Window Operation
The power windows can be opened and closed when the vehicle is on by using the switches on the doors. The switches on the driver’s side can be used to open and close all the windows.

- **Automatic Operation**
  - To open: Push the switch down firmly.
  - To close: Pull the switch up firmly.
  The window opens or closes completely. To stop the window at any time, push or pull the switch again briefly.

- **Manual Operation**
  - To open: Push the switch down lightly.
  - To close: Pull the switch up lightly.
  Release the switch when the windows reach the desired position.

- **Power Window Lock**
  Push in the power window lock button so only the driver’s window can be operated.

⚠️ **WARNING**
Closing a power window on someone’s hands or fingers can cause serious injury.
Make sure your passengers are away from the windows before closing them.

Power Moonroof Operation
The moonroof can be opened and closed when the vehicle is on by using the switch on the ceiling.

- **Automatic Operation**
  - To open: Push the switch back firmly, then release.
  - To close: Push the switch forward firmly, then release.
  The moonroof opens or closes completely. To stop the moonroof at any time, push the switch briefly.

- **Manual Operation**
  - To open: Push and hold the switch back until the desired position is reached.
  - To close: Push and hold the switch forward until the desired position is reached.

- **Moonroof Tilt**
  - To tilt: Push the center of the switch.
  - To close: Push the switch forward firmly, then release.

⚠️ **WARNING**
Opening or closing the moonroof on someone’s hands or fingers can cause serious injury.
Make sure your passengers are away from the moonroof before closing it.

**NOTICE**
Opening the moonroof in below freezing temperature or when it is covered with snow or ice can damage the moonroof panel or motor.
Interior and Exterior Lights
Operate interior and exterior lights when the vehicle is on or off.

■ Exterior Lights
Rotate the switches on the lever to operate the exterior lights. Push the lever forward to turn on high beams. Return the lever to its original position for low beams.

OFF All exterior lights are off.

AUTO Turn on the automatic lighting feature. Headlights turn on or off depending on ambient brightness when the vehicle is on. Headlights automatically come on after the wipers are engaged for a certain time.

□ Turn on all exterior lights including headlights.

□ Turn fog lights* on or off.

■ Brightness Control
Adjust instrument panel brightness when the vehicle is on.

To brighten: Turn the knob to the right.
To dim: Turn the knob to the left.
A beep sounds when the brightness reaches minimum or maximum.

■ Interior Lights
Located on the ceiling in the front and rear.

ON position: Interior lights remain on.
Door activated position: Interior lights come on when any of the doors are opened, the driver’s door is unlocked, or the vehicle is turned off.
OFF position: Interior lights remain off.

■ Map Lights
Press the map lights in the ceiling to turn them on or off.

■ Cargo Lights
Located on the inside of the tailgate.

On position: The light comes on when you open the tailgate, and goes off when closed.
Off position: The light stays off.

One-Touch Turn Signal
Use this quick and convenient method to signal a lane change.

Lightly push the turn signal lever up or down for a three-blink sequence.
For a continuous signal, push the lever up or down until it locks into place.
Wiper Operation

The windshield wipers and washers can be used when the vehicle is on.

■ Front Wipers
Move the wiper lever up or down to the desired position.

Intermittent (INT) wipers*
When you move the lever to the INT position, the wipers operate based on the wiper delay. Rotate the adjustment ring to adjust the wiper delay.

Headlight-Wiper Integration*
When the headlights are in the AUTO position, they automatically turn on when the front wipers operate for a certain number of intervals. The headlights turn off shortly after the wipers are turned off, or if there is enough ambient light.

Automatic rain-sensing (AUTO) wipers*
When you move the lever to the AUTO position while driving in rainy weather, the wipers operate based on the amount of detected rainfall.

Put the lever in the AUTO position only when driving in rainy weather. Return the lever to the OFF position when rain stops.

Rotate the adjustment ring to adjust the rainfall sensor sensitivity.

NOTICE
Always ensure the wiper lever is in the OFF position before entering a car wash to prevent severe damage to the windshield wiper system.

■ Rear Wiper
When you shift to Reverse (R) and the front wipers are activated, the rear wiper activates even if the switch is off.

NOTICE
Do not use the wipers when the windshield is dry. The windshield will get scratched, or the rubber blades will get damaged.

In cold weather, the blades may freeze to the windshield, becoming stuck. Operating the wipers in this condition may damage the wipers. Use the defroster to warm the windshield, then turn the wipers on.

*if equipped
Adjusting the Seats
Make seat adjustments before driving to ensure the best comfort and safety.

- Adjusting the Front Seats
  Adjust the driver’s seat as far back as possible while allowing you to maintain full control of the vehicle. You should be able to sit upright and well back in the seat, adequately press the pedals without leaning forward, and grip the steering wheel comfortably. The passenger’s seat should be adjusted so that it is as far back from the front airbag in the dashboard as possible.

  The National Highway Traffic Safety Administration and Transport Canada recommend that drivers allow at least 10 inches (25 cm) between the center of the steering wheel and the chest.

**WARNING**
Sitting too close to a front airbag can result in serious injury or death if the front airbags inflate.
Always sit as far back from the front airbags as possible while maintaining control of the vehicle.

**WARNING**
Reclining the seat-back too far can result in serious injury or death in a crash. Adjust the seat-back to an upright position, and sit well back in the seat.

**WARNING**
Improperly positioning head restraints reduces their effectiveness and increases the likelihood of serious injury in a crash.
Make sure head restraints are in place and positioned properly before driving.

---

To raise the head restraint: Pull it upward.
To lower the head restraint: Pull the restraint up as far as it will go. Then press the release button, and pull the restraint up and out.
To reinstall a head restraint: Insert the legs back in place, then adjust the head restraint to an appropriate height while pressing the release button. Pull up on the restraint to make sure it is locked in position.

For a head restraint system to work properly:
- Do not hang any items on the head restraints or from the restraint legs.
- Do not place any object between an occupant and the seat-back.
- Install each restraint in its proper location.

---

*if equipped
### Adjusting the Steering Wheel

The steering wheel height and distance from your body can be adjusted so that you can comfortably grip the steering wheel in an appropriate driving posture.

1. Pull up the steering wheel adjustment lever.
2. Move the steering wheel up or down, and in or out.
3. Push down the steering wheel adjustment lever to lock the steering wheel in position.

### Warning

Adjusting the steering wheel position while driving may cause you to lose control of the vehicle and be seriously injured in a crash. Adjust the steering wheel only when the vehicle is stopped.

### Driving Position Memory System

You can store two driver’s seat and door mirror positions into memory when the vehicle is on. When you unlock and open the driver’s door with a remote transmitter, the seat and door mirrors adjust automatically to the corresponding preset positions.

1. Adjust the seat and mirrors to your preferred positions.
2. Press SET.
3. Press and hold memory button 1 or 2. You will hear two beeps when the memory is set.
4. Press one of the memory buttons to recall previously stored positions.

Lumbar positions cannot be stored.
Adjusting the Mirrors
Adjust the angle of the mirrors for the best visibility when you are sitting in the correct driving position.

- **Automatic Dimming Rearview Mirror**
  When driving after dark, the automatic dimming function reduces the glare in the rearview mirror (and power door mirrors*) from headlights behind you.
  The function cancels when the shift lever is in Reverse (R).

- **Power Door Mirrors**
  Adjust the power door mirrors using the switches on the driver’s door when the vehicle is on.

  - **L/R selector switch**: Select the left or right mirror.
  - **After adjusting the mirror, return the switch to the center position**.
  - **Mirror position adjustment switch**: Press the switch left, right, up, or down to move the mirror.
  - **Folding door mirror button***: Press to fold the door mirrors in or out.

- **Reverse Tilt Door Mirrors**
  Either side door mirror can tilt downward when you shift to Reverse (R) to improve visibility on the selected side of the vehicle when reversing.

  When in Reverse, slide the selector switch on the driver’s door to the left or right side.
  The mirror returns to its original position when you shift out of Reverse.

---

**HomeLink® Garage Opener**
Program your vehicle to operate up to three remote-controlled devices around your home—such as garage doors, lighting, or home security systems—using the buttons on the ceiling.

**Training a Button**
Park near the system you want to program, and follow the instructions in the flowchart below.

1. Position the remote transmitter 1–3 inches (3–8 cm) from the HomeLink button you want to program.
2. Press and hold the desired HomeLink button and the button on the remote transmitter.
3. Press and hold the programmed HomeLink button for about a second.
   - **Does the device (garage door opener) work?**
4. Press and hold the HomeLink button again.
5. The remote has a rolling code. Press the “learn” button on the remote-controlled device (e.g., garage door opener).
6. Within 30 seconds, press and hold the programmed HomeLink button for 2 seconds.
7. Press the programmed HomeLink button again; the remote-controlled device should operate.

*if equipped

To retrain a button or erase codes, see the Owner’s Manual on the Owner Information CD or visit owners.acura.com (U.S.) or www.myacura.ca (Canada). If you need help, call (800) 355-3515 or visit www.homelink.com.
Climate Control System

The automatic climate control system can maintain your preferred interior temperature by selecting the proper mix of heated or cooled air and fan speed.

- **AUTO button**: Press, then use the temperature control dial to set your preferred temperature.

- **ON/OFF button**: Fan speed buttons

- **Windshield defroster button**: Passenger’s temperature control dial

- **A/C button**: Vent mode button: Change the vent source.

- **Recirculation button**: Choose recirculation or fresh air.

- **Rear window defogger/heated mirror button**: SYNC button: Set the passenger’s temperature to the same as the driver’s.

- **Driver’s temperature control dial**: Passenger’s temperature control dial

On vehicles with ODMD, climate information is displayed on the screen, but cannot be selected via touch. Adjust the climate settings using the dials and buttons.

### Seat Heaters or Ventilation*

Quickly warm or ventilate the seats when the vehicle is on.

- **Front Seat Heaters**
  
  Press the switch for the desired setting. An indicator in the switch appears for the selected setting.

  - **LO button**: Press to slowly warm the seat, or to maintain continuous heating.
  
  - **HI button**: Press to quickly warm the seat. If left in HI, the heater cycles on and off.
  
  Return the switch to the center to turn the seat heaters off.

- **Front Seat Heaters and Ventilation**

  Press the seat heater or ventilation button. An indicator (red for heater, blue for ventilation) appears for the selected setting.

  - **Once**: HI setting (three indicators)
  
  - **Twice**: MID setting (two indicators)
  
  - **Three times**: LO setting (one indicator)
  
  - **Four times**: OFF setting (no indicators)

- **Rear Seat Heaters**

  You can heat the two outer rear seats. An indicator in the button appears for the selected setting.

  - **LO button**: Press to slowly warm the seat, or to maintain continuous heating.
  
  - **HI button**: Press to quickly warm the seat. If left in HI, the heater cycles on and off.
  
  Press the button again to turn off.

### WARNING

Heat-induced burns are possible when using seat heaters.

Persons with a diminished ability to sense temperature (e.g., persons with diabetes, lower-limb nerve damage, or paralysis) or with sensitive skin should not use the seat heaters.

*if equipped
**Customized Settings***

You can easily customize many features of your vehicle. The customized settings are recalled every time you unlock the driver’s door with the remote (Driver 1 or Driver 2). Settings are unique to each remote.

**How to Change a Setting**

The vehicle must be in Park (P) to select Vehicle Settings. Use the interface dial to make and enter selections.

1. Press the SETTINGS button.
2. Select an option (System, Vehicle, Camera, Audio, Phone, Info, or Navi).
3. Select a setting option, and make your preferred changes.
4. Press BACK to exit out of the menus.

---

**Setting the Clock**

Adjust the time in the clock display.

**Models without navigation**

Use the selector knob to make and enter selections.

1. Press the SETUP button.
2. Select Adjust Clock.
3. Select the item to change (12/24 hour mode, hour, or minute).
4. Make the necessary changes for each item.
5. Select Set to set the time.
6. Press SETUP to return to the main display.

**Models with navigation**

Use the interface dial to make and enter selections.

1. Press the SETTINGS button.
2. Select System Settings.
3. Select Clock.
4. Select Clock Adjustment.
5. Rotate the interface dial to change the hour value. Press the interface dial to select minutes, and rotate to change the value. Press the interface dial to exit the screen.
6. Press the BACK button to exit out of the menus.

---

*vehicles with navigation*
Learn how to operate the vehicle’s audio system.

**Basic Audio Operation**
Connect audio devices in the front console, and operate buttons and displays for the audio system.

- **USB Port**
  Connect a USB flash drive or other audio device, such as an iPod® or iPhone®.
  1. Open the USB cover.
  2. Install the iPod dock connector or the USB flash drive into the USB port.

- **Auxiliary Input Jack**
  Connect standard audio devices with a 1/8-inch (3.5 mm) stereo miniplug.
  1. Open the AUX cover.
  2. Insert the miniplug attached to the audio device into the jack. The audio system switches to AUX mode. Use the device to control the audio.

- **Accessory Power Socket**
  Located in the front and center consoles. Open the socket cover to use power when the vehicle is on.

**NOTICE**
Do not insert an automotive type cigarette lighter element. This can overheat the power socket.

- **Adjusting the Sound**
  Adjust various sound settings.

  **Models without navigation**
  Use the selector knob to make and enter selections.
  1. Press the SETUP button.
  2. Select Sound Settings.
  3. Select the setting you want, and adjust it to the desired level.
  4. Press the BACK button to exit the menu.

  **Models with navigation**
  Use the interface dial to make and enter selections.
  1. From the audio screen, press the MENU button.
  2. Select Sound.
  3. Select the setting you want, and adjust it to the desired level.
  4. Press the BACK button to exit the menu.

You can also adjust the sound using the ODMD touchscreen. Select More, select Sound, and select the + or - icons to adjust settings. Select X to exit the screen.

- **Steering Wheel Controls**
  Operate certain functions of the audio system using the steering wheel controls.

  **MODE button**
  Cycle through available audio modes.

  **VOL (▲/▼) buttons**
  Adjust audio volume.

  **CH (+/-) button**
  Change presets, tracks, albums, or folders.

  **FM/AM/XM® Radio**
  Press (+) or (-) for the next or previous station. Press and hold (+) or (-) for the next or previous strong station.

  **CD/HDD*/iPod®/USB/Bluetooth® Audio**
  Press (+) or (-) for the next or previous track. Press and hold (+) or (-) for the next or previous folder (CD/USB).

  **Pandora®**
  Press (+) for the next song. Press and hold (+) or (-) for the next or previous station.

*if equipped
Models without navigation

**Color Information Display**
Display audio information. Use the buttons to operate the system.

- **Selector knob**: Rotate to scroll through options, and press to enter a selection.
- **DISPLAY button**: Choose the audio, wallpaper, or blank display mode.
- **BACK button**: Go back to the previous display.
- **SETUP button**: Select various audio mode options, sound settings, and clock adjustment.
- **→ button**: Change screen brightness. Use the selector knob to make adjustments.

**FM/AM Radio**
Play FM or AM radio stations.

- **FM/AM button**: Select a band.
- **CATEGORY bar**: Display and select an RDS category.
- **SCAN button**: Press to hear a 10-second sample of each strong station on the selected band. Press again to turn off scan.
- **A.SEL (Auto Select) button**: Press to scan bands and store the strongest stations in each preset. Press again to turn off scan and restore your original presets.
- **SETUP button**: Choose RDS options to display station text if available.
- **Preset buttons (1-6)**: Press and hold a preset button to store the current station. Press a preset button to select a previously stored station.
- **SKIP bar**: Search the selected band for a station with a strong signal.
- **Selector knob**: Press and rotate to tune radio frequency.
- **SETUP button**: Choose RDS options to display station text if available.

**Pairing a Phone**

To use hands-free phone and streaming audio functions, you must first pair your phone to the system. This can only be done when the vehicle is stopped. Use the selector knob to make and enter selections.

1. **Pairing the First Phone**
   1. Press the PHONE button. A prompt appears. Select Yes.
   2. Make sure your phone is in discovery mode. Select OK.
   3. HFL searches for your phone. Select your phone when it appears on the list.
      If your phone does not appear:
      Select Phone Not Found, and search for HandsFreeLink from your phone. Connect when prompted.
   4. HFL gives you a four-digit code. Enter it on your phone when prompted. The phone is now paired.

2. **Pairing an Additional Phone**
   1. Press the PHONE button to go to the Phone screen. If a prompt appears asking to connect to a phone, select No.
   2. Select Phone Setup.
   3. Select Connection.
   4. Select Add a New Phone.
   5. Select an empty location for the phone.
   6. Make sure your phone is in discovery mode. Select OK.
   7. HFL searches for your phone. Select your phone when it appears on the list.
      If your phone does not appear:
      Select Phone Not Found, and search for HandsFreeLink from your phone. Connect when prompted.
   8. HFL gives you a four-digit code. Enter it on your phone when prompted. The phone is now paired.

**Making a Call**

You can make calls using several methods.

1. **Dialing a Number**
   Enter a 10-digit phone number to call. Use the selector knob to make and enter selections. This feature is inoperable while the vehicle is moving.
   1. Press the PHONE button to go to the Phone screen.
   2. Select Dial.
   3. Enter the phone number. Select the green Dial icon, or press the Pick-Up button to begin the call.

2. **Using the Phonebook**
   When your phone is paired, its entire phonebook is automatically imported to the system. Use the selector knob to make and enter selections. This feature is inoperable while the vehicle is moving.
   1. Press the PHONE button to go to the Phone screen.
   2. Select Phonebook.
   3. Scroll through the list to find the name and number you want to call, and select it to begin the call.

3. **Storing Speed Dial Entries**
   Store up to 15 numbers for quick dialing. Use the selector knob to make and enter selections.
   1. Press the PHONE button to go to the Phone screen.
   2. Select Phone Setup.
   3. Select Speed Dial.
   4. Select Add New.
   5. If desired, you can create a voice tag for the number. Follow the prompts.
Using Speed Dial
Make calls quickly using stored speed dial entries. Use the selector knob to make and enter selections.

1. Press the PHONE button to go to the Phone screen.
2. Select Speed Dial.
3. Select the entry you want to begin the call.

If an entry has a stored voice tag, you can call it at any time. Press the Talk button and follow the prompts.

Pairing a Phone

To use hands-free phone and streaming audio functions, you must first pair your phone to the system. This can only be done when the vehicle is stopped. Use the interface dial to make and enter selections.

1. Press the SETTINGS button.
2. Select Phone Settings.
3. Select Bluetooth Device List (if no phone has been paired) or Connect Phone (if pairing an additional phone).
4. Select Add Bluetooth Device.
5. Make sure your phone is in discovery mode.
6. HFL searches for your phone. Select your phone when it appears on the list.
   If your phone does not appear:
   Select Device Not Found and search for HandsFreeLink from your phone.
7. HFL gives you a pairing code. Compare it to the code that appears on your phone. Connect to HFL from your phone.
8. The system asks if you want to enable Automatic Phone Sync, which imports your phone’s call history and phonebook. Select On.
9. Press BACK to exit the menu.
Models with navigation

Making a Call
You can make calls using several methods.

Dialing a Number
Enter a 10-digit phone number to call.

Using voice commands
1. Press the Talk button.
2. Say “Dial” and the phone number. For example, “3-1-0-5-5-1-2-3-4.”
3. The system begins to dial.

Using the menu
Use the interface dial to make and enter selections. This is inoperable while the vehicle is moving.
1. Press the PHONE button.
2. Press the MENU button.
3. Select Dial.
4. In the upper display or ODMD, enter the phone number. Select the green phone icon to call.

Using the ODMD
Select items on the screen by touching them. This is inoperable while the vehicle is moving.
1. Select Shortcuts.
2. Select Phone.
3. Select Dial.
4. Enter the phone number and select the green phone icon to call.

Models with navigation

Using the Phonebook
When your phone is paired, its entire phonebook can be automatically imported to the system if you select On for Phone Synchronization.

Using voice commands
1. Press the Talk button.
2. Say “Call” and the phonebook name. For example, “Call John Smith.”
3. The system begins to dial.

Using the menu
Use the interface dial to make and enter selections.
1. Press the PHONE button.
2. Press the MENU button.
3. Select Phonebook.
4. Scroll through the list to find the name and number you want to call, and select it to call.

Storing Speed Dial Entries
Store up to 20 numbers for quick dialing.
1. Press the PHONE button.
2. Press the MENU button.
3. Select Speed Dial, then select New Entry.
4. Choose an entry method.
5. If desired, you can create a voice tag for the number. Follow the prompts.

When a voice tag is created, you can press the Talk button and say “Call” and the stored voice tag.

When speed dial entries are stored, you can add them to the Shortcuts (Phone tab) in the ODMD for quick access.
Models with navigation

Using Speed Dial and Call History
Make calls quickly using stored speed dial entries or call history numbers.

Using voice commands
1. Press the Talk button.
2. Say “Call” and the contact name. For example, “Call John Smith.”
3. The system begins to dial.

Using the phone screen
Use the interface dial to make and enter selections.
1. Press the PHONE button.
2. For Speed Dial, use the interface dial to scroll through the list to find the entry you want to call, and select it to call.
   For Call History, move the interface dial to the right and scroll through the list.

Using the ODMD
Select items on the screen by touching them.
1. Select Shortcuts.
2. Select Phone.
3. Select Speed Dial or Call History. Speed dial entries must be previously stored to the Shortcuts menu. Select Edit and follow the prompts.
4. Select the desired entry to call.

Models with navigation

SMS Text Messaging and E-Mail
Receive and send text messages and e-mails from your paired and linked phone.
Visit www.acura.com/handsfreelink (U.S.) or www.handsfreelink.ca (Canada) to check phone compatibility. Standard message rates apply. This feature is limited while the vehicle is moving.

Selecting an Account
If your phone has both text message and mail accounts, you can select only one of them at a time to be active and receive notifications.
1. Press the SETTINGS button.
2. Select Phone Settings.
3. Select Select Account.
4. Select Text Messages or an e-mail account.

Receiving and Responding to Messages
When you receive a new message, a pop-up appears in the upper display. Use the interface dial to view the message when the vehicle is stopped. You can also reply to it using fixed phrases or call the sender.
1. When the prompt appears, select Read.
2. The message is displayed, and the system reads it aloud.
3. To reply: Select Reply, and choose one of the six available responses. Select Send to send the message. You cannot create a new message. To call the sender: Select Call.
Siri™ Eyes Free
Activate Siri through your vehicle when an iPhone® is paired to the system.
Visit www.acura.com/handsfreelink (U.S.) or www.handsfreelink.ca (Canada) to check phone compatibility.

Back button: Exit Siri Eyes Free mode, or cancel a command.
Talk button: Press and hold to activate Siri Eyes Free mode. The Smartphone screen appears. Say your command after you hear the Siri tone. If you only press and release the Talk button, the standard voice recognition system is activated.

Here are some examples of Siri commands:

“Call John Smith”
“Remind me to pick up dinner”
“Read my new text message”
“Set up a meeting today at 3 p.m.”
“Find a nearby sushi restaurant”
“Play song XYZ”

Notes:
• Any requests that include visual feedback from Siri on your phone are not displayed in the vehicle.
• Certain commands rely on the iPhone’s features and existing apps.
• To hear turn-by-turn directions or songs through the vehicle, set the audio source to Bluetooth® Audio.

Siri and iPhone are trademarks of Apple, Inc.

ACURALINK®
Learn about Acura’s advanced connectivity services.

AcuraLink Messages
Receive messages on vehicle features, safety and emissions recall campaigns, maintenance reminders, and diagnostic information.
Some message features require a phone connection. Visit www.acura.com/handsfreelink (U.S.) or www.handsfreelink.ca (Canada) to check phone compatibility.

Viewing Messages
When you receive a new message, an icon appears on the upper right corner of the upper screen. Use the interface dial to make and enter selections.
1. Press INFO.
2. Select AcuraLink Messages.
3. Select a message category.
4. Select a message.
5. Select Voice to hear the entire message details read aloud.

Message Options
When you receive certain messages, you can call your dealer if your phone is paired to the system, find the nearest dealer, or schedule service appointments. A current AcuraLink subscription is required to set up this feature and modify your message preferences.

*if equipped
Subscription Features
A subscription-based service that provides convenient features, such as collision notification, emergency assistance, online security, and important messages about your vehicle.

To subscribe or get more information, contact a dealer or visit owners.acura.com (U.S.) or www.myacura.ca (Canada). Requires enrollment and privacy agreement.

Emergency Assistance
If your vehicle’s airbags deploy or if the unit detects that the vehicle is severely impacted, your vehicle automatically attempts to connect to the AcuraLink operator if there is sufficient cellular coverage. Once connected, information about your vehicle, its positioning, and its condition will be sent to the operator. You can also speak to the operator when connected.

To manually connect to the operator, open the cover on the ceiling console and press ASSIST when the vehicle is on.

Security Features
To use security features, you need your user ID and personal identification number (PIN). Some of these features are also available with the AcuraLink smartphone app. Visit owners.acura.com/apps to download the app.

- Stolen vehicle tracking: Searches and tracks down your vehicle position.
- Remote door lock/unlock: Remotely lock or unlock doors.
- Vehicle finder: Locate your vehicle in large areas, such as a parking lot.
- Security alarm notification: If your vehicle’s security system detects tampering, the provider notifies you.

Operator Assistance
Connect to the AcuraLink operator when trying to find a destination or for roadside assistance.
Press LINK to connect to an operator.

NAVIGATION*
Learn how to enter a destination and operate the navigation system.

Basic Navigation Operation
A real-time navigation system uses GPS and a map database to show your current location and help guide you to a desired destination. You can operate the system using voice commands or the system controls.

To reduce the potential for driver distraction, certain manual functions may be inoperable or grayed out while the vehicle is moving. Voice commands are always available.

Steering Wheel Controls
Use the steering wheel controls to give voice commands.

Talk button: Press to say navigation commands from the Voice Portal screen.
Back button: Press to cancel a command or operation.

Talk Button Tips
For a full list of navigation voice commands, see page 147.
- When using the Talk button, wait for the beep before saying a command.
- To bypass the system prompts, simply press the Talk button again to say your command.
- Speak in a clear, natural voice.
- Reduce all background noise.
- Adjust the dashboard and side vents away from the microphone in the ceiling.
- Close the windows and moonroof.

WARNING
Using the navigation system while driving can take your attention away from the road, causing a crash in which you could be seriously injured or killed. Only operate system controls when the conditions permit you to safely do so.

*if equipped
Navigation Display and Controls

Use the controls to enter information and make selections. Some manual functions are inoperable while driving.

**NAV button:** Display the map screen or directions when en route.

**INFO button:** Select items such as traffic incidents and AcuraLink messages.

**BACK button:** Return to the previous display.

**button:** Change upper screen brightness. Use the interface dial to make adjustments.

**Interface dial (from the map screen):** Rotate to zoom in or out of the map. Press to display the map menu. Rotate and press to select items.

**SETTINGS button:** Change Navi settings.

**Traffic flow**

**Traffic incident icon**

**Current vehicle position**

**System Guidance Volume**

Adjust the navigation system guidance volume. Use the interface dial to make and enter selections. You can also adjust the volume during guidance using the volume knob or steering wheel controls.

1. From the map screen, press the interface dial to display the map menu.
2. Select Guidance Volume.
3. Adjust the volume to your preferred level.
4. Press BACK to exit the menu.

**Voice Prompt**

Turn the voice prompt feature on or off. Use the interface dial to make and enter selections.

1. Press SETTINGS.
2. Select System Settings.
4. Select Off or On.  
   On: Provides voice prompts.  
   Off: Voice prompts are disabled.
Entering a Destination

Use several methods to enter a destination.

**Home Address**

Store your home address in the system so you can easily route to it. Use the interface dial to make and enter selections.

1. Press SETTINGS.
2. Select Navi Settings.
3. Select Edit Go Home.
4. Enter the address and select OK.

When your home address is stored, you can press the Talk button and say “Navigation” and then “Go home” at any time. You can also select Go Home from the destination menu.

**Street Address**

Enter a street address using voice commands (U.S. models only). Press the Talk button to enter the Voice Portal screen.

You can also enter the address manually when the vehicle is stopped. While on the map screen, press MENU and use the interface dial to select Address. Follow the prompts.

1. From the Voice Portal screen, say “Navigation” and then “Address.”
2. The system prompts you to say the entire address. For example, say “1-2-3-4 Main Street, Los Angeles, California.”
3. The system interprets the address by state, city, street, and address number. If necessary, you may have to clarify similar matches.
4. Say “Set as destination” to set the route.

**Place Name**

Enter a point of interest using voice commands (U.S. models only). Press the Talk button to enter the Voice Portal screen.

1. From the Voice Portal, say “Navigation” and then “Place name.”
2. Say a category. For example, “ATM/Bank.”
3. Say the name of the point of interest. For example, “ABC Bank.”
4. The system interprets the name. If necessary, you may have to clarify similar matches. If there is more than one point of interest with the name, a list of matches appears in order of closest distance. Use the interface dial to select an entry.
5. Use the interface dial to select “Set as destination” to set the route.

You can also enter the place name manually when the vehicle is stopped. While on the map screen, press the MENU button and use the interface dial to select Place Name. Enter the name one letter at a time, and follow the prompts.

**Find Nearest Place**

Enter a destination by category and distance using voice commands. Press the Talk button to enter the Voice Portal screen.

1. Say “Navigation” and then “Find nearest” and a place. For example, “Find nearest ATM.”
2. A list of the nearest places in your area is displayed by shortest distance to destination.
3. Use the interface dial to select an entry.
4. Use the interface dial to select “Set as destination” to set the route.

**ODMD Shortcuts**

You can add up to six destinations to the Shortcuts (Places tab) in the ODMD. The addresses must be previously stored in the navigation system address book.

1. Select Shortcuts.
2. Select Places.
3. Select No Entry to store a previously stored address book entry, or select a stored entry to route to it.
Routing
After a destination is set, you can alter or cancel your route.

Map Legend

During route guidance

Estimated time to destination
Calculated route
Next guidance point
Distance to destination
Destination

Turn-by-turn directions
Shows a more detailed view of the next maneuver on the multi-information display. Use the Info (▲/▼) buttons on the steering wheel to bypass the display.

Taking a Detour
You can calculate a detour route manually if you encounter a road closure or other obstacle. Use the interface dial to make and enter selections.

1. When en route, press MENU.
2. Select Detour. The system attempts to calculate a new route by avoiding the next 5 miles (8 km) while on a freeway or 1 mile (1 km) while on a surface street.

AcuraLink Real-Time Traffic™*
View traffic flow, incidents, and construction in major metro areas. You can also route around congestion or incidents when a destination is set. Use the interface dial to make and enter selections. Available in the U.S. only.

1. From the map screen, press the interface dial to enter the map menu. Select Traffic Incidents.
2. A list of incidents on your route appears. Select the incident you want to avoid.
3. Select Avoid. Repeat as necessary to select other incidents.
4. Select Recalculate the Route.

Canceling Your Route
You can cancel your route at any time.

1. When en route, press MENU.
2. Select Cancel Route. The route is cleared and the map screen returns.

*Requires an AcuraLink subscription (see page 81).
DRIVING

Learn about preparation for driving and other features.

Before Driving
Check the following items before you begin driving.

■ Exterior Checks
  • Make sure there are no obstructions on the windows, door mirrors, exterior lights, or other parts of the vehicle.
  • Remove any frost, snow, or ice.
  • Make sure the hood is securely closed.
  • Heat from the engine and exhaust can ignite flammable materials left under the hood, causing a fire. If you’ve parked your vehicle for an extended period, inspect and remove any debris that may have collected, such as dried grass and leaves that have fallen or have been carried in for use as a nest by a small animal. Also check under the hood for leftover flammable materials after you or someone else has performed maintenance on your vehicle.
  • Make sure the tires are in good condition.
  • Make sure there are no people or objects behind or around the vehicle.

■ Interior Checks
  • Store or secure all items on board properly.
  • Do not pile items higher than the seat height.
  • Do not place anything in the front seat footwells. Make sure to secure the floor mats.
  • If you have any animals on board, do not let them move freely in the vehicle.
  • Securely close and lock all doors and the tailgate.
  • Adjust your seating position, mirrors, and steering wheel properly.
  • Be sure items placed on the floor behind the front seats cannot roll under the seats.
  • Everyone in the vehicle must fasten their seat belt.

Make sure that the indicators in the instrument panel come on when you start the vehicle, and go off soon after.

■ Driving Guidelines for Your Utility Vehicle
Utility vehicles have a significantly higher rollover rate than other types of vehicles. To prevent rollovers or loss of control:
  • Take corners at slower speeds than you would with a passenger vehicle.
  • Avoid sharp turns and abrupt maneuvers whenever possible.
  • Do not modify your vehicle in any way that raises its center of gravity.
  • Never carry more than 165 lbs (75 kg) of cargo on the roof rack (Acura accessory).

In addition:
  • During the first 600 miles (1,000 km) of operation, avoid sudden acceleration or full throttle operation so as not to damage the engine or powertrain.
  • Avoid hard braking for the first 200 miles (300 km). You should also follow this when the brake pads are replaced.

WARNING
Improperly operating this vehicle on or off pavement can cause a crash or rollover in which you and your passengers can be seriously injured or killed. Follow all instructions and guidelines in this guide.

Keep your speed low, and don’t drive faster than conditions permit.

WARNING
Improper accessories or modifications can affect your vehicle’s handling, stability, and performance, and cause a crash in which you can be seriously hurt or killed. Follow all instructions in the vehicle owner’s manual regarding accessories and modifications.

■ AWD (All-Wheel Drive) with Intelligent Control System*
When the AWD system senses a loss of front wheel traction, it automatically transfers some power to the rear wheels. This allows you to utilize all available traction and may increase mobility.

You still need to exercise the same care when accelerating, steering, and braking that you would in a two-wheel drive vehicle.

If you excessively spin all four wheels and overheat the system, only the front wheels receive power. Stop until the system cools down.

■ NOTICE
Do not continuously spin the front tires of your vehicle. Continuously spinning the front tires can cause transmission or rear differential damage.

*A if equipped
Maximum Load Limit

Carrying too much cargo or improperly storing it can affect your vehicle’s handling, stability, stopping distance, and tires, and make it unsafe.

The maximum load for your vehicle is 870 lbs (395 kg). See the Tire and Loading Information label on the driver’s doorjamb.

This figure includes the total weight of all occupants, cargo, and accessories, and the tongue load if you are towing a trailer. Below are the steps for determining the correct load limit:

1. Locate the statement “The combined weight of occupants and cargo should never exceed XXX kg or XXX lbs.” on your vehicle’s placard.
2. Determine the combined weight of the driver and passengers that will be riding in your vehicle.
3. Subtract the combined weight of the driver and passengers from XXX kg or XXX lbs.
4. The resulting figure equals the available amount of cargo and luggage load capacity. For example, if the “XXX” amount equals 1,400 lbs. and there will be five 150 lb. passengers in your vehicle, the amount of available cargo and luggage load capacity is 650 lbs. (1,400 - 750 (5 x 150) = 650 lbs.)
5. Determine the combined weight of luggage and cargo being loaded on the vehicle. That weight may not safely exceed the available cargo and luggage load capacity calculated in step 4.
6. If your vehicle will be towing a trailer, load from your trailer will be transferred to your vehicle. Consult the Owner’s Manual to determine how this reduces the available cargo and luggage load capacity of your vehicle.

In addition, the total weight of the vehicle, all occupants, accessories, cargo, and trailer tongue load must not exceed the Gross Vehicle Weight Rating (GVWR) or the Gross Axle Weight Rating (GAWR). Both are on a label on the driver’s doorjamb.

Overloading or improper loading can affect handling and stability and cause a crash in which you can be hurt or killed.

Follow all load limits and other loading guidelines in this guide.

The headlight aim on your vehicle was set by the factory, and does not need to be adjusted. However, if you regularly carry heavy items in the cargo area or pull a trailer, have the aiming readjusted at your dealer or by a qualified technician.

Load limits example

Example 1

Max load 870 lbs (395 kg)
Passenger weight 150 lbs x 2 = 300 lbs (68 kg x 2 = 136 kg)
Cargo weight 570 lbs (259 kg)

Example 2

Max load 870 lbs (395 kg)
Passenger weight 150 lbs x 5 = 750 lbs (68 kg x 5 = 340 kg)
Cargo weight 120 lbs (55 kg)
Towing a Trailer

Your vehicle can tow a trailer if you carefully observe the load limits, use the proper equipment, and follow the towing guidelines. See the Owner's Manual on the Owner Information CD or visit owners.acura.com (U.S.) or www.myacura.ca (Canada) for more information.

Towing Load Limits

Total trailer weight

Maximum allowable weight of the trailer, cargo, and everything in or on it must not exceed 1,500 lbs (680 kg). Towing loads in excess of this can seriously affect vehicle handling and performance and can damage the engine and drivetrain.

Tongue load

The weight of the tongue with a fully loaded trailer on the hitch should be approximately 10% of the total trailer weight.

• Excessive tongue load reduces front tire traction and steering control. Too little tongue load can make the trailer unstable and cause it to sway.

• To achieve a proper tongue load, start by loading 60% of the load toward the front of the trailer and 40% toward the rear. Readjust the load as needed.

WARNING

Exceeding any load limit or improperly loading your vehicle and trailer can cause a crash in which you can be seriously hurt or killed. Check the loading of your vehicle and trailer carefully before starting to drive.

Pre-tow checklist

When preparing to tow, and before driving away, be sure to check the following:

• Avoid towing a trailer during your vehicle's first 600 miles (1,000 km).
• The vehicle has been properly serviced, and the suspension and the cooling system are in good operating condition.
• The trailer has been properly serviced and is in good condition.
• All weights and loads are within limits. Never exceed the gross weight ratings.
• Check if all loads are within limits at a public scale. If a public scale is not available, add the estimated weight of your cargo load to the weight of your trailer (as quoted by the manufacturer) and the tongue load.
• The hitch, safety chains, and any other attachments are secure.
• All items in or on the trailer are properly secured and cannot shift while you drive.
Remote Engine Start*
Start your vehicle’s engine using the two-way remote transmitter from extended distances before you enter the vehicle.

Make sure the vehicle is in a safe location when using remote engine start (i.e., a well ventilated area, away from flammable materials).

Starting the Engine
Press the Lock button, then press and hold the ENGINE button.
The engine runs for up to 10 minutes. To extend the time for another 10 minutes, repeat the procedure during the initial 10 minutes.
While the engine is running, the climate control system adjusts the interior temperature, the security system remains on, and lights and accessories remain off.

Stopping the Engine
Press and hold the ENGINE button.
The engine will also stop if it has been running for more than 10 minutes, or if any door is opened without using the remote transmitter or keyless access.

Starting to Drive
The keyless access system allows simple push-button start.

Before Starting the Engine
Check that the shift lever is in Park (P), then depress the brake pedal. Keep your foot firmly on the brake pedal when starting the engine.
The engine is harder to start in cold weather and in thinner air found at altitudes above 8,000 feet (2,400 m). When starting the engine in cold weather, turn off all electrical accessories such as the lights, climate control system, and rear defogger in order to reduce battery drain.

Changing the Power Mode
Accessory or On mode: Press the ENGINE START/STOP button once without pressing the brake pedal for Accessory mode. Press it again for On mode.
Starting the engine: Press and hold the brake pedal, then press the ENGINE START/STOP button. Keep your foot firmly on the brake pedal when starting the engine.
If you press the button and the shift lever is not in Park (P), the vehicle goes into Accessory mode.
Turning the vehicle off: Shift to Park (P), then press the ENGINE START/STOP button.

WARNING
Engine exhaust contains toxic carbon monoxide.
Breathing carbon monoxide can kill you or cause unconsciousness.
Never use the remote engine starter when the vehicle is parked in a garage or other area with limited ventilation.

*if equipped
Shifting

Change your vehicle's gears to begin driving.

- **Shift Lever**
  
  **Park (P):** Used for parking or starting/stopping the engine. Press the brake pedal, then press the release button to shift.
  
  **Reverse (R):** Used for reversing.
  
  **Neutral (N):** Used for idling.
  
  **Drive (D):** Used for normal driving or temporarily driving in sequential mode.
  
  **Drive (S):** Used for driving in sequential mode. Press the release button, and use the paddle shifters to change gears (see page 85).

**NOTICE**

When you change the shift lever from D to R and vice versa, come to a complete stop and keep the brake pedal depressed. Operating the shift lever before the vehicle has come to a complete standstill can damage the transmission.

Do not operate the shift lever while pressing the accelerator pedal. You could damage the transmission.

---

**Sequential Shift Mode**

Use the paddle shifters to change gears without removing your hands from the steering wheel.

| (-) Paddle shifter: Pull to shift down to a lower gear. |
| (+) Paddle shifter: Pull to shift up to a higher gear. |

**Recommended shift points**

<table>
<thead>
<tr>
<th>Shift up</th>
<th>Normal acceleration</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st to 2nd</td>
<td>15 mph (24 km/h)</td>
</tr>
<tr>
<td>2nd to 3rd</td>
<td>25 mph (40 km/h)</td>
</tr>
<tr>
<td>3rd to 4th</td>
<td>40 mph (64 km/h)</td>
</tr>
<tr>
<td>4th to 5th</td>
<td>45 mph (72 km/h)</td>
</tr>
<tr>
<td>5th to 6th</td>
<td>50 mph (80 km/h)</td>
</tr>
</tbody>
</table>

**When the shift lever is in D:** The vehicle goes into sequential shift mode momentarily, and the gear position indicator comes on. When you start traveling at a constant speed, sequential shift mode automatically switches off, and the gear position indicator goes off. You can also hold the (+) paddle shifter for two seconds to return to normal drive.

**When the shift lever is in S:** The vehicle goes into sequential shift mode, and the M (sequential shift mode) indicator and gear position indicator come on. At speeds of 6 mph (10 km/h) or less, the vehicle automatically shifts down into 1st gear. It does not automatically shift up, even if vehicle speed increases. You can pull away only in 1st or 2nd gear.

When switching out of sequential shift mode, move the shift lever from S to D. When sequential shift mode is canceled, the M indicator and gear position indicator go off.

**Second gear lock mode:** If you pull the (+) paddle shifter while stopped or driving at 6 mph (10 km/h) or less, the gear position is locked in 2nd gear. This makes it easier to pull away on slippery surfaces such as snow-covered roads. To cancel 2nd gear lock mode, pull the (-) paddle shifter or move the shift lever from S to D.
Braking
Slow down or stop your vehicle, and keep it from moving when parked.

Foot Brake
Press the brake pedal to slow down or stop your vehicle from moving.

Brake Assist System
During hard or emergency braking, the system increases braking force. The brake pedal may move slightly or make a noise; this is normal. Continue to hold the brake pedal firmly down.

Anti-Lock Brake System (ABS)
During hard or emergency braking, the system rapidly pumps the brakes to prevent wheel lockup and help you maintain steering control. The brake pedal may pulsate slightly during ABS operation; this is normal. Do not pump the brake pedal, and continue to hold it firmly down.

NOTICE
The ABS may not function correctly if you use an incorrect tire type and size.

Parking Brake
Keep the vehicle from moving when it is parked.

To apply: Press the parking brake with your foot.
To release: Press the brake pedal, then press the parking brake until it releases.

NOTICE
Release the parking brake fully before driving. The rear brakes and axle can be damaged if you drive with the parking brake applied.

Cruise Control*
Maintain a constant vehicle speed without having to keep your foot on the accelerator pedal. Use cruise control on freeways or open roads where you can travel at a constant speed with little acceleration or deceleration.

Activating and Setting the Vehicle Speed
1. Press the CRUISE button.
2. Accelerate to the desired speed (above 25 mph). Press the DECEL/SET button and take your foot off the pedal to set the speed.

Adjusting the Vehicle Speed
Press the RES/ACCEL button to increase speed or the DECEL/SET button to decrease speed.
Each time you press the button, the vehicle speed is increased or decreased by about 1 mph (1.6 km/h). If you keep the button pressed, the vehicle speed increases or decreases until you release it.

Canceling Cruise Control
Press the CANCEL button or the brake pedal.
After cruise control has been canceled, you can still resume the prior set speed by pressing RES/ACCEL while driving at a speed of at least 25 mph (40 km/h).
Press the CRUISE button to turn the system off.

WARNING
Improper use of the cruise control can lead to a crash. Use cruise control only when traveling on open highways in good weather.

*if equipped
Adaptive Cruise Control (ACC)*
Helps maintain a constant vehicle speed and a set following interval behind a vehicle detected ahead of yours.

Activating and Setting the Vehicle Speed
1. Press the MAIN button.
2. Accelerate to the desired speed above 25 mph (40 km/h). Press the DECEL/SET button and take your foot off the pedal to set the speed.

Adjusting the Vehicle Speed
Press the RES/ACCEL button to increase speed or the DECEL/SET button to decrease speed.
Each time you press the button, the vehicle speed is increased or decreased by about 1 mph (1 km/h). If you keep the button pressed, the vehicle speed increases or decreases by 5 mph (5 km/h) until you release it.

Adjusting the Vehicle Distance
Press the Distance button to change the following distance. Each time you press the button, the following distance setting cycles through short, middle, long, and extra long.

Switching to Standard Cruise Control
Press and hold the Distance button. Cruise Mode appears in the multi-information display. Press and hold the button again to switch back to ACC.

When in Operation
If a vehicle is detected ahead of you when ACC is turned on and your vehicle is traveling at or below the set speed, the system maintains, accelerates, or decelerates your vehicle’s set speed to keep your vehicle’s set following distance from the vehicle ahead.
If a vehicle detected ahead of you slows down abruptly, or if another vehicle cuts in front of you, a beep sounds and BRAKE appears on the multi-information display to alert you.

WARNING
ACC has limited braking capability.
When your vehicle speed drops below 22 mph (35 km/h), ACC will automatically cancel and no longer will apply your vehicle’s brakes.
Always be prepared to apply the brake pedal when conditions require.

Canceling ACC
You can press CANCEL or MAIN, or press the brake pedal. The ACC indicator goes off.
Certain conditions may cause ACC to cancel automatically. When this happens, the amber ACC indicator appears on the multi-information display (see page 24).
After cruise control has been canceled, you can still resume the prior set speed by pressing RES/ACCEL when your vehicle speed is over 25 mph (40 km/h).

WARNING
Improper use of ACC can lead to a crash.
Use ACC only when traveling on open highways in good weather.

*if equipped
Lane Departure Warning (LDW)*
Alerts you if the system detects a possibility of your vehicle unintentionally crossing over detected lane markings while driving between 45–90 mph (72–145 km/h).

If your vehicle is getting too close to detected left or right side lane markings without a turn signal activated, the system provides audible and visual alerts.
A Lane Departure message appears on the MID, and a beep sounds. Take appropriate action to stay within your driving lane.

Turning LDW On or Off
Press the LDW button to turn the system on or off. A green indicator light appears on the button when the system is on.

Important Safety Reminder
Like all assistance systems, LDW has limitations. Over-reliance on LDW may result in a collision. It is always your responsibility to keep the vehicle within your lane.

Lane Keeping Assist System (LKAS)*
Alerts you and provides steering input if the system detects a possibility of your vehicle unintentionally crossing over detected lane markings while driving between 45–90 mph (72–145 km/h).

If you begin to cross a detected lane marking without a turn signal activated, the system provides visual and audible alerts.
A Lane Departure message appears on the MID, and a beep sounds. The system also applies steering assistance to keep your vehicle in the center of the lane. Take appropriate action to stay within your driving lane.

Turning LKAS On or Off
1. Press MAIN. LKAS appears in the MID.
2. Press the LKAS button. Lane outlines appear in the MID. Dotted lane lines turn solid when the system operates.
3. Press MAIN or the LKAS button to turn the system off.

Important Safety Reminder
The LKAS is for your convenience only. It is not a substitute for your vehicle control. The system does not work if you take your hands off the steering wheel or fail to steer the vehicle.

*if equipped
Blind Spot Information (BSI)*

Alerts you to a detected vehicle in your left or right blind spot while driving 20 mph (32 km/h) or higher.

When a vehicle is detected in your blind spot, the blind spot indicator turns on and stays lit until the area is clear.

When your turn signal is on and a vehicle is detected, the blind spot indicator blinks and a beep sounds until the area is clear or the turn signal is off.

Changing Settings
Change the alert type, or turn the system on or off. Use the interface dial to make selections.

1. Press SETTINGS.
2. Select Vehicle Settings. The vehicle must be in Park (P).
3. Select Blind Spot Info.
4. Select an alert type, or Off.
5. Press BACK to exit the menu.

**WARNING**

Failure to visually confirm that it is safe to change lanes before doing so may result in a crash and serious injury or death. Do not rely only on the blind spot information system when changing lanes.

Always look in your mirrors, to either side of your vehicle, and behind you for other vehicles before changing lanes.

Important Safety Reminder
Like all assistance systems, BSI has limitations. Overreliance on BSI may result in a collision. The system is for your convenience only.

Collision Mitigation Braking System™ (CMBS™)*

Can assist you when there is a possibility of your vehicle colliding with a vehicle or a pedestrian detected in front of yours.

The system can alert you when a potential collision is determined, and reduce your vehicle speed to help minimize collision severity when a collision is deemed unavoidable.

The system activates when:

- The speed difference between your vehicle and a vehicle or pedestrian detected in front of you is about 3 mph (5 km/h) and over with a chance of a collision.
- Your vehicle speed is about 62 mph (100 km/h) or less and there is a chance of a collision with an oncoming detected vehicle or a pedestrian in front of you.

Alert Stages
The system has three alert stages for a possible collision. Depending on the circumstances or CMBS settings, CMBS may not go through all of the stages before initiating the last stage.

- **Stage 1:** Visual warning and audible warning
- **Stage 2:** Visual warning, audible warning, and light brake application
- **Stage 3:** Visual warning, audible warning, and strong brake application

Changing Settings
Determine the warning timing. Use the interface dial to make selections.

1. Press SETTINGS.
2. Select Vehicle Settings. The vehicle must be in Park (P).
3. Select Forward Collision Warning Distance.
4. Select Long, Normal (default), or Short
5. Press BACK to exit the menu.
Vehicle Stability Assist (VSA®), aka Electronic Stability Control (ESC) System

Helps to stabilize the vehicle during cornering if the vehicle turns more or less than what was intended. It assists in maintaining traction on slippery surfaces by regulating engine output and selectively applying the brakes.

Turning VSA On or Off

VSA is turned on every time you turn on the vehicle, even if you previously turned it off. If you turn VSA off, your vehicle has normal braking and cornering ability, but not VSA traction and stability enhancement.

Press and hold the VSA OFF button until you hear a beep to turn VSA on or off. The VSA OFF indicator appears when the system is off.

Traction control stops functioning, which may make it easier when trying to free your vehicle if it is stuck in mud or snow.

Important Safety Reminder

CMBS™ is designed to reduce the severity of an unavoidable collision. It does not prevent collision nor stop the vehicle automatically. It is still your responsibility to operate the brake pedal and steering wheel appropriately according to the driving conditions.

Parking Sensor System*

When the system senses an object when you are parking or backing up, indicators appear on the upper display and a series of beeps sound. As you get closer to the object(s), the beep rate increases.

Turning CMBS On or Off

Press and hold the CMBS OFF button. A beep sounds and a message appears in the MID. The CMBS indicator appears when the system is off.

Turning the System On or Off

Press the parking sensor button. A green indicator light appears on the button when the system is on.

*If equipped
Multi-View Rear Camera
When you shift into Reverse (R), a real-time image of the area behind your vehicle is shown in the display, along with helpful parking guidelines.

The rear camera view is restricted. You cannot see the corner ends of the bumper or what is underneath the bumper. Its unique lens also makes objects appear closer or farther than they actually are.

Visually confirm that it is safe to drive before backing up. Certain conditions (such as weather, lighting, and high temperatures) may also restrict the rear view. Do not rely on the rearview display, which does not give you all information about conditions at the rear of your vehicle.

Changing Guidelines
Change the type of guidelines shown, or turn them off. Use the interface dial to make selections.

1. Press the SETTINGS button.
2. Select Camera Settings.
3. Select Rear Camera.
4. Select one of the options.
   - Fixed Guideline: Guidelines appear when you shift into Reverse. Select On or Off.
   - Dynamic Guideline: Guidelines move as you turn the steering wheel. Select On or Off.
5. Press BACK to exit the menu.

Rear Cross Traffic Monitor*
Alerts you if a detected vehicle is approaching from a rear corner when your vehicle is in Reverse (R) at speeds of 3 mph (5 km/h) or lower, which can be helpful when backing out of parking spaces.

The system does not detect or provide alerts for a vehicle that is moving away from your vehicle, and it may not detect pedestrians, bicycles, or stationary objects.

Turning the System On or Off
Use the interface dial to make selections.

1. Press the SETTINGS button.
2. Select Camera Settings.
4. Select On or Off.
5. Press BACK to exit the menu.

CAUTION
This system cannot detect all approaching vehicles and may not detect an approaching vehicle at all.
Failure to visually confirm that it is safe to back up the vehicle before doing so may result in a collision. Do not solely rely on the system when reversing; always also use your mirrors, and look behind and to the sides of your vehicle before reversing.

*if equipped
Refueling
Use the proper fuel and refueling procedure to ensure the best performance and safety of your vehicle.

Fuel Information
Use of unleaded gasoline of 91 octane or higher is recommended.
- Acura recommends TOP TIER Detergent Gasoline where available.
- Do NOT use gasoline containing more than 15% ethanol.
- Do NOT use gasoline containing methanol.
- Do NOT use gasoline containing MMT.

NOTICE
We recommend quality gasoline containing detergent additives that help prevent fuel system and engine deposits. In addition, in order to maintain good performance, fuel economy, and emissions control, we strongly recommend the use of gasoline that does NOT contain harmful manganese-based fuel additives such as MMT, if such gasoline is available.

How to Refuel
1. The fuel fill door is located at the left rear of the vehicle. Park next to the service pump that is most accessible.
2. Turn off the engine.
3. Pull the fuel fill door release handle near the parking brake. The fuel fill door opens.
4. Turn the fuel fill cap slowly to open. Place the fuel fill cap in the holder.
5. Insert the filler nozzle fully. When the tank is full, the fuel nozzle clicks off automatically.
6. Replace the fuel fill cap. Tighten it until you hear at least one click. Close the fuel fill door.

WARNING
Gasoline is highly flammable and explosive. You can be burned or seriously injured when handling fuel.
- Stop the engine, and keep heat, sparks, and flame away.
- Handle fuel only outdoors.
- Wipe up spills immediately.
Jump Starting
Turn off the power to electric devices, such as audio and lights. Turn off the engine, then open the hood.

1. Connect the first jumper cable to your vehicle's battery (+) terminal.
2. Connect the other end of the first jumper cable to the booster battery (+) terminal. Use a 12-volt booster battery only.
3. Connect the second jumper cable to the booster battery (-) terminal.
4. Connect the other end of the second jumper cable to the engine hanger as shown. Do not connect this jumper cable to any other part.
5. If your vehicle is connected to another vehicle, start the assisting vehicle's engine and increase its rpm slightly.
6. Attempt to start your vehicle's engine. If it turns over slowly, make sure the jumper cables have good metal-to-metal contact.

**WARNING:** Battery posts, terminals, and related accessories contain lead and lead compounds. Wash your hands after handling.

---

WARNING
A battery can explode if you do not follow the correct procedure, seriously injuring anyone nearby. Keep all sparks, open flames, and smoking materials away from the battery.

---

**After the Engine Starts**
Once your vehicle's engine has started, remove the jumper cables in the following order:

1. Disconnect the jumper cable from your vehicle’s ground.
2. Disconnect the other end of the jumper cable from the assisting vehicle’s (-) terminal.
3. Disconnect the jumper cable from your vehicle’s (+) terminal.
4. Disconnect the other end of the jumper cable from the assisting vehicle’s (+) terminal.

Have your vehicle inspected by a nearby service station or a dealer.

---

Overheating
If the temperature gauge needle is at the H mark, the engine suddenly loses power, or steam or spray comes out from under the hood, your engine is overheating.

1. Immediately park the vehicle in a safe place. Turn off all accessories and turn on the hazard warning lights.
2. **If no steam or spray is present:** Keep the engine running and open the hood.
   **If steam or spray is present:** Turn off the engine and wait until it subsides. Then, open the hood.
3. Check that the cooling fan is operating and stop the engine once the temperature gauge needle comes down. If the cooling fan is not operating, immediately stop the engine.
4. Once the engine has cooled down, inspect the coolant level and check the cooling system components for leaks. If the coolant level in the reserve tank is low, add coolant until it reaches the MAX mark. If there is no coolant in the reserve tank, make sure the radiator is cool, then cover the radiator cap with a heavy cloth and open the cap. If necessary, add coolant up to the base of the filler neck, and put the cap back on.

Once the engine has cooled sufficiently, restart it and check the temperature gauge. If the temperature needle has gone down, resume driving. If it has not gone down, contact a dealer for repairs.

**WARNING**
Steam and spray from an overheated engine can seriously scald you. Do not open the hood if steam is coming out.

**WARNING**
Removing the radiator cap while the engine is hot can cause the coolant to spray out, seriously scalding you. Always let the engine and radiator cool down before removing the radiator cap.

**NOTICE**
Continuing to drive with the temperature gauge needle at the H mark may damage the engine.
Emergency Engine Stop

The ENGINE START/STOP button may be used to stop the engine due to an emergency situation even while driving. If you must stop the engine, choose one of the following operations:

- Press and hold the ENGINE START/STOP button for two seconds, OR
- Firmly press the ENGINE START/STOP button two times.

The steering wheel will not lock. The power mode changes to ACCESSORY, unless the shift lever is in Park (P), in which case the power mode changes to VEHICLE OFF. Because turning off the engine also disables the power assist the engine provides to the steering and braking systems, it will require significantly more physical effort and time to steer and slow the vehicle. Downshift gears and use both feet on the brake pedal, if necessary, to slow the vehicle and stop immediately in a safe place.

**NOTICE**

Do not press the button while driving unless it is absolutely necessary for the engine to be switched off.

Emergency Towing

Call a professional towing service if you need to tow your vehicle.

**NOTICE**

Do not press the button while driving unless it is absolutely necessary for the engine to be switched off.

Tire Pressure Monitoring System (TPMS)

Monitors the tire pressure while you are driving. If your vehicle’s tire pressure becomes significantly low, the low tire pressure indicator comes on and a message appears on the multi-information display. Press the Info button on the steering wheel to view the tire pressure monitor to see pressure readings for each tire (see page 28).

**What to Do**

Stop your vehicle in a safe place. Check the tire pressure and adjust the pressure to the specified level. The specified tire pressure is on a label on the driver’s doorjamb.

**NOTICE**

Driving on an extremely underinflated tire can cause it to overheat. An overheated tire can fail. Always inflate your tires to the specified pressure.
Tire Pressure Monitoring System (TPMS) - Required Federal Explanation

Each tire, including the spare (if provided), should be checked monthly when cold and inflated to the inflation pressure recommended by the vehicle manufacturer on the vehicle placard or tire inflation pressure label.

(If your vehicle has tires of a different size than the size indicated on the vehicle placard or tire inflation pressure label, you should determine the proper tire inflation pressure for those tires.)

As an added safety feature, your vehicle has been equipped with a tire pressure monitoring system (TPMS) that illuminates a low tire pressure telltale when one or more of your tires is significantly under-inflated.

Accordingly, when the low tire pressure telltale illuminates, you should stop and check your tires as soon as possible, and inflate them to the proper pressure.

Driving on a significantly under-inflated tire causes the tire to overheat and can lead to tire failure. Under-inflation also reduces fuel efficiency and tire tread life, and may affect the vehicle’s handling and stopping ability.

Please note that the TPMS is not a substitute for proper tire maintenance, and it is the driver’s responsibility to maintain correct tire pressure, even if under-inflation has not reached the level to trigger illumination of the TPMS low tire pressure telltale.

Your vehicle has also been equipped with a TPMS malfunction indicator to indicate when the system is not operating properly. The TPMS malfunction indicator is combined with the low tire pressure telltale. When the system detects a malfunction, the telltale will flash for approximately one minute and then remain continuously illuminated. This sequence will continue upon subsequent vehicle start-ups as long as the malfunction exists.

When the malfunction indicator is illuminated, the system may not be able to detect or signal low tire pressure as intended.

TPMS malfunctions may occur for a variety of reasons, including the installation of replacement or alternate tires or wheels on the vehicle that prevent the TPMS from functioning properly.

Always check the TPMS malfunction telltale after replacing one or more tires or wheels on your vehicle to ensure that the replacement or alternate tires and wheels allow the TPMS to continue to function properly.

Tire Repair Kit*

If a tire has a small puncture, you can use the tire repair kit to temporarily repair it. The puncture must be smaller than 3/16-inch (4 mm) and not in the tire sidewall. Go to a dealer to have the full-size tire permanently repaired or replaced.

Before Repairing the Tire

1. Park the vehicle on firm, level, non-slippery surface.
2. Make sure the vehicle is in Park (P), and apply the parking brake.
3. Turn on the hazard warning lights, and turn the vehicle off.

Getting Ready to Repair the Tire

1. Open the cargo area floor lid.
2. Take the kit out of the tool box.
3. Place the kit face up on flat ground near the punctured tire and away from traffic. Do not place the kit on its side.
4. Follow the instructions in the kit to repair the tire.

**NOTICE**

Do not use an unapproved puncture-repairing agent other than the one provided in the kit that came with your vehicle. If a different agent is used, you may permanently damage the tire pressure sensor.

*Tire Repair Kit* is equipped if equipped.
Changing a Flat Tire

If a tire goes flat while driving, grasp the steering wheel firmly, and brake gradually to reduce speed. Stop in a safe place. Replace the flat tire with the compact spare tire*. Go to a dealer as soon as possible to have the full-size tire repaired or replaced.

**Getting Ready to Change the Tire**

Park the vehicle on a firm, level, non-slippery surface. Move the shift lever to Park (P), and apply the parking brake. Turn the hazard warning lights on and turn the vehicle off.

1. Open the tailgate. Turn on the cargo lights on the inside of the tailgate, if necessary (see page 34). Open the cargo area floor lid.

2. Take the wheel nut wrench and jack handle bar out of the cargo area.

3. Unscrew the wing bolt, and remove the spacer cone. Then, remove the spare tire.

4. Take the jack out of the spare tire area.

5. Loosen each wheel nut about one turn using the wheel nut wrench.

**Setting Up the Jack**

1. Place the jack under the jacking point closest to the tire to be changed.

2. Turn the end bracket (as shown in the image) clockwise until the top of the jack contacts the jacking point. Make sure that the jacking point tab is resting in the jack notch.

3. Raise the vehicle, using the jack handle bar and the jack handle, until the tire is off the ground.

---

**WARNING**

The vehicle can easily roll off the jack, seriously injuring anyone underneath. Follow the directions for changing a tire exactly, and never get under the vehicle when it is supported only by the jack.

The following instructions must be followed to use the jack safely:

- Do not use the jack with people or luggage in the vehicle.
- Use the jack provided in your vehicle. Other jacks may not support the weight (“load”) or fit the jacking point.
- Do not use while the engine is running.
- Use only where the ground is firm and level.
- Use only at the jacking points.
- Do not get in the vehicle while using the jack.
- Do not put anything on top of or underneath the jack.
Replacing the Flat Tire

1. Remove the wheel nuts and flat tire.

2. Mount the compact spare tire. Replace the wheel nuts, and lightly tighten them.

3. Lower the vehicle and remove the jack. Tighten the wheel nuts in the order indicated in the image. Go around, tightening the nuts, two to three times in this order. Do not overtighten the wheel nuts.

If you drive with the spare tire installed, the low tire pressure/TPMS indicator appears. The indicator stays on until a regular tire is installed.

Storing the Flat Tire

1. Remove the center cap and place the flat tire face up in the spare tire well.

2. Remove the spacer cone from the wing bolt for the spare tire, and insert the wing bolt for the regular tire back on the bolt. Secure the flat tire with the wing bolt.

3. Securely store the jack and wheel nut wrench back in the tool case. Store the case in the cargo area.

**WARNING**

Loose items can fly around the interior in a crash and can seriously injure the occupants. Store the wheel, jack, and tools securely before driving.

Fuse Locations

If any electrical devices are not working, turn the vehicle off and check to see if any applicable fuse is blown. Fuse locations are shown on the fuse box cover. Locate the fuse by the fuse number and box cover number.

**Engine Compartment Fuse Box**

Located near the brake fluid reservoir. Push the tabs to open the box.

- **NOTICE**

Replacing a fuse with one that has a higher rating greatly increases the chances of damaging the electrical system.
MAINTENANCE

Learn about basic maintenance that you can perform on the vehicle yourself, as well as information about how to best maintain the vehicle.

Safety Precautions

Some of the most important safety precautions are listed below; however, we cannot warn you of every conceivable hazard that can arise in performing maintenance. Only you can decide whether or not you should perform a given task.

Maintenance Safety

- To reduce the possibility of fire or explosion, keep cigarettes, sparks, and flames away from the battery and all fuel-related parts.
- Never leave rags, towels, or other flammable objects under the hood.
- To clean parts, use a commercially available degreaser or parts cleaner, not gasoline.
- Wear eye protection and protective clothing when working with the battery or compressed air.
- Do not run the engine in confined spaces where carbon monoxide gas can accumulate.

Vehicle Safety

- The vehicle must be stationary, and parked on level ground with the parking brake set and the engine off.
- Be aware that hot parts can burn you.
- Be aware that moving parts can injure you.

**WARNING**

Improperly maintaining this vehicle or failing to correct a problem before driving can cause a crash in which you can be seriously hurt or killed.

Always follow the inspection and maintenance recommendations according to the schedules in this guide.

**WARNING**

Failure to properly follow maintenance instructions and precautions can cause you to be seriously hurt or killed.

Always follow the procedures and precautions in this guide.

Maintenance Minder™

When maintenance is due, the system message indicator comes on and the Maintenance Minder appears on the multi-information display every time you turn the vehicle on. Press the Info (▲/▼) buttons on the steering wheel to change displays.

See page 128 to check the indicated maintenance service(s).

- Independent of the Maintenance Minder information, replace the brake fluid every 3 years.
- Inspect idle speed every 160,000 miles (256,000 km).
- Adjust the valves during services A, B, 1, 2, or 3 if they are noisy.

U.S. models

Maintenance, replacement, or repair of emissions control devices and systems may be done by any automotive repair establishment or individuals using parts that are certified to EPA standards.

According to state and federal regulations, failure to perform maintenance on the maintenance main items marked with # will not void your emissions warranties. However, all maintenance services should be performed in accordance with the intervals indicated by the multi-information display.
Maintenance Minder Service Codes

These codes indicate what services are due on your vehicle.

<table>

</tr>
</tbody>
</table>
| 2    | Replace air cleaner element *2  
|      | Replace dust and pollen filter *3  
|      | Inspect drive belt  |
| 3    | Replace transmission fluid *4  |
| 4    | Replace spark plugs  
|      | Replace timing belt and inspect water pump *5  
|      | Inspect valve clearance  |
| 5    | Replace engine coolant |
| 6    | Replace rear differential fluid *6  |

*2: If you drive in dusty conditions, replace the air cleaner element every 15,000 miles (24,000 km).  
*3: If you drive primarily in urban areas that have high concentrations of soot in the air from industry and diesel-powered vehicles, replace the dust and pollen filter every 15,000 miles (24,000 km).  
*4: Driving in mountainous areas at very low vehicle speeds or trailer towing results in higher transmission and transfer temperatures. This requires transmission and transfer fluid changes more frequently than recommended by the Maintenance Minder. If you regularly drive your vehicle under these conditions, have the transmission fluid changed at 60,000 miles (100,000 km), then every 30,000 miles (48,000 km).  
*5: If you drive regularly in very high temperatures (over 110 °F/43 °C), in very low temperatures (under -20 °F/-29 °C), or tow a trailer, replace every 60,000 miles (100,000 km).  
*6: Do not open the hood when the wiper arms are raised. The hood will strike the wipers, and may damage the hood or the wipers.
Engine Oil
Park the vehicle on level ground, and wait approximately three minutes after turning the engine off before you check the oil.

■ Checking the Oil
1. Remove the dipstick (orange loop).
2. Wipe the dipstick with a clean cloth or paper towel.
3. Insert the dipstick all the way back into its hole.
4. Remove the dipstick again, and check the level. It should be between the upper and lower marks. Add oil if necessary.

■ Recommended Engine Oil
• Genuine Acura Motor Oil
• Premium-grade 0W-20 detergent oil with an API Certification Seal on the container

This seal indicates the oil is energy conserving and that it meets the American Petroleum Institute's latest requirements.

Use Genuine Acura Motor Oil or another commercial engine oil of suitable viscosity for the ambient temperature as shown.

You may also use synthetic motor oil if it is labeled with the API Certification Seal and is of the specified viscosity grade.

■ Adding Oil
1. Unscrew and remove the engine oil fill cap.
2. Add oil slowly.
3. Reinstall the engine oil fill cap, and tighten it securely.
4. Wait for three minutes and recheck the engine oil dipstick.

**NOTICE**
Do not fill the engine oil above the upper mark. Overfilling the engine oil can result in leaks and engine damage.

■ Resetting the Engine Oil Life
If you change or replace the vehicle's engine oil yourself, you must reset the engine oil life. Use the Info (▲/▼) and SEL/RESET buttons on the steering wheel to make selections in the multi-information display.

1. Scroll to Vehicle Settings, and select it.
2. Scroll to Maintenance Info, and select it. The oil life reset mode is displayed.
3. Select Reset. The maintenance items disappear, and the engine oil life display returns to 100%.

**NOTICE**
Failure to reset the engine oil life after a maintenance service results in the system showing incorrect maintenance intervals, which can lead to serious mechanical problems.
**Engine Coolant**

Park the vehicle on level ground. Check the reserve tank and the coolant level in the radiator. We recommend Acura Long Life Antifreeze/Coolant Type 2.

1. **Checking the Reserve Tank**
   - Check the amount of coolant in the reserve tank.
   - If the coolant level is below the MIN mark, add the specified coolant until it reaches the MAX mark.
   - Inspect the cooling system for leaks.

2. **Adding Coolant**
   - Make sure the engine and radiator are cool.
   - Turn the radiator cap counterclockwise and relieve any pressure in the coolant system. Do not push the cap down when turning.
   - Push down and turn the radiator cap counterclockwise to remove it.
   - The coolant level should be up to the base of the filler neck. Add coolant if it is low.
   - Put the radiator cap back on, and tighten it fully.
   - Pour coolant into the reserve tank until it reaches the MAX mark. Put the cap back on the reserve tank.

**WARNING**

Removing the radiator cap while the engine is hot can cause the coolant to spray out, seriously scalding you. Always let the engine and radiator cool down before removing the radiator cap.

**NOTICE**

If temperatures consistently below −22°F (−30°C) are expected, the coolant mixture should be changed to a higher concentration. Consult your dealer for more information.

**WARNING**

Pour the fluid slowly and carefully so you do not spill any. Clean up any spills immediately; they can damage components in the engine compartment.

**Window Washer Fluid**

Check the amount of window washer fluid using the 1/2 mark on the reservoir. If the level is low, fill the washer reservoir. Pour the washer fluid carefully. Do not overflow the reservoir.

**Canadian models**

If the washer fluid is low, a message appears on the multi-information display.

**NOTICE**

Do not use engine antifreeze or a vinegar/water solution in the windshield washer reservoir. Antifreeze can damage your vehicle’s paint. A vinegar/water solution can damage the windshield washer pump.

**Brake Fluid**

The fluid level should be between the MIN and MAX marks on the side of the reservoir. We recommend using Acura Heavy Duty Brake Fluid DOT 3.

Pour the fluid carefully.

If the fluid level is at or below the MIN mark, have a dealer inspect for leaks or worn brake pads as soon as possible.

**NOTICE**

Brake fluid marked DOT 5 is not compatible with your vehicle’s braking system and can cause extensive damage.

**Checking the Battery**

Check the battery terminals for corrosion monthly.

For jump starting, see page 114.

**WARNING**

The battery gives off explosive hydrogen gas during normal operation. A spark or flame can cause the battery to explode with enough force to kill or seriously hurt you. When conducting any battery maintenance, wear protective clothing and a face shield, or have a skilled technician do it.

**WARNING:** Battery posts, terminals, and related accessories contain lead and lead compounds. Wash your hands after handling.
Changing Wiper Blades

If the wiper blades leave streaks across the windshield, try cleaning them first with a paper towel or soft cloth and wiper fluid. If the wiper blade rubber has deteriorated, you should change the wiper blades.

**Front Wiper Blades**

1. Lift the driver side wiper arm first, then the passenger side.

2. Place a cloth on the edge of the lock tab. Push the lock tab up with a flat-tip screwdriver.

3. Slide the blade from the wiper arm.

4. Slide the wiper blade out from its holder by pulling the tabbed end out.

5. Remove the retainers from the rubber blade that has been removed, and mount to a new rubber blade. Correctly align the rubber protrusion and the retainer grooves.

6. Slide the new wiper blade onto the holder from the bottom end. The tab on the holder should fit in the indent of the wiper blade.

7. Slide the wiper blade onto the wiper arm, then push down the lock tab.

8. Lower the passenger side wiper arm first, then the driver side.

**Rear Wiper Blade**

1. Raise the wiper arm off.

2. Slide the wiper blade out from the end with the indent.

3. Remove the retainers from wiper blade and mount to a new rubber blade.

4. Slide the wiper blade onto the holder. Make sure it is engaged correctly, then install the wiper blade assembly onto the wiper arm.

**NOTICE**

Avoid dropping the wiper arm, as it may damage the windshield.
**Tire Information**

To safely operate your vehicle, your tires must be of the proper type and size, in good condition with adequate tread, and properly inflated.

**Inflation Guidelines**

- Properly inflated tires provide the best combination of handling, tread life, and comfort. Refer to the driver’s doorjamb label or the specifications (see page 143) for the specified pressure.
- Underinflated tires wear unevenly, adversely affect handling and fuel economy, and are more likely to fail from overheating.
- Overinflated tires make your vehicle ride harshly, are more prone to road hazards, and wear unevenly.
- Every day before you drive, look at each of the tires. If one looks lower than the others, check the pressure with a tire gauge.
- Measure the air pressure when tires are cold. This means the vehicle has been parked for at least 3 hours, or driven less than 1 mile (1.6 km). If necessary, add or release air until the specified pressure is reached. If checked when hot, tire pressure can be as much as 4-6 psi (30-40 kPa, 0.3-0.5 kgf/cm²) higher than checked when cold.
- At least once a month or before long trips, use a gauge to measure the pressure in all tires, including the spare. Even tires in good condition can lose 1-2 psi (10-20 kPa, 0.1-0.2 kgf/cm²) per month.

**Inspection Guidelines**

Every time you inflate the tires, check for the following:

- Any damage to tires, including bumps, bulges, cuts, splits, or cracks in the side or tread. Remove any foreign objects and inspect for air leaks. Replace tires if you see fabric or cord.
- Uneven or excessive tread wear. Have a dealer check the wheel alignment.
- Cracks or other damage around the valve stems.

**Wear Indicators**

The groove where the wear indicator is located is 1/16 inch (1.6 mm) shallower than elsewhere on the tire. If the tread has worn so low that the indicator is exposed, replace the tire. **Worn out tires have poor traction on wet roads.**

---

**WARNING**

Using tires that are excessively worn or improperly inflated can cause a crash in which you can be seriously hurt or killed. Follow all instructions in this owner’s manual regarding tire inflation and maintenance.

---

**Tire and Loading Information Label**

The label attached to the driver's doorjamb provides necessary tire and loading information.

**WARNING**

Installing improper tires on your vehicle can affect handling and stability. This can cause a crash in which you can be seriously hurt or killed. Always use the size and type of tires recommended in the owner’s manual.
Tire Service Life
The life of your tires is dependent on many factors, including driving habits, road conditions, vehicle loading, inflation pressure, maintenance history, speed, and environmental conditions (even when the tires are not in use).
In addition to regular inspections and inflation pressure maintenance, it is recommended that you have annual inspections performed once the tires reach five years old. All tires, including the spare, should be removed from service after 10 years from the date of manufacture, regardless of their condition or state of wear.

Winter Tires
If driving on snowy or frozen roads, mount all season tires marked “M+S”, snow tires, or tire chains; reduce speed; and maintain sufficient distance between vehicles when driving. For winter tires, select the size and load ranges that are the same as the original tires, and mount them to all four wheels.

Tire Chains
Install tire chains on the front tires only. Because your vehicle has limited tire clearance, we strongly recommend using the following chains:
Cable type: SCC Radial Chain TC2212MM
Mount chains as tightly as you can, and make sure that they do not touch the brake lines or suspension.

WARNING
Using the wrong chains, or not properly installing chains, can damage the brake lines and cause a crash in which you can be seriously injured or killed. Follow all instructions in this guide regarding the selection and use of tire chains.

NOTICE
Traction devices that are the wrong size or improperly installed can damage your vehicle’s brake lines, suspension, body, and wheels. Stop driving if they are hitting any part of the vehicle.

Tire Labeling
The tires that came on your vehicle have a number of markings. Those you should be aware of are described below.
Here is an example of what each marking means:
P235/60R18 102V
• P: vehicle type (passenger)
• 235: tire width in millimeters
• 60: aspect ratio (tire section height as a percentage of its width)
• R: tire construction code (radial)
• 18: rim diameter in inches
• 102: load index (code indicating maximum load tire can carry)
• V: speed symbol (code indicating maximum speed rating)

Tire Identification Number (TIN)
The tire identification number (TIN) is a group of numbers and letters that look like the example shown. TIN is located on the sidewall of the tire.

Glossary of Tire Terminology
Cold Tire Pressure – The tire air pressure when the vehicle has been parked for at least three hours or driven less than 1 mile (1.6 km).
Load Rating – The maximum load that a tire is rated to carry for a given inflation pressure.
Maximum Inflation Pressure – The maximum tire air pressure that the tire can hold.
Maximum Load Rating – The load rating for a tire at the maximum permissible inflation pressure for that tire.
Recommended Inflation Pressure – The cold tire inflation pressure recommended by the manufacturer.
Treadwear Indicators (TWI) – The projections within the principal grooves designed to give a visual indication of the degrees of wear of the tread.
DOT Tire Quality Grading

The tires on your vehicle meet all U.S. Federal Safety Requirements. All tires are also graded for treadwear, traction, and temperature performance according to Department of Transportation (DOT) standards. The following explains these gradings.

**Uniform Tire Quality Grading**

Quality grades can be found where applicable on the tire sidewall between tread shoulder and maximum section width.

For example:
- **Treadwear 200**
- **Traction AA**
- **Temperature A**

All passenger car tires must conform to Federal Safety Requirements in addition to these grades.

**Treadwear**

The treadwear grade is a comparative rating based on the wear rate of the tire when tested under controlled conditions on a specified government test course. For example, a tire graded 150 would wear one and one-half (1 1/2) times as well on the government course as a tire graded 100. The relative performance of tires depends upon the actual conditions of their use, however, and may depart significantly from the norm due to variations in driving habits, service practices, and differences in road characteristics and climate.

**Traction**

The traction grades, from highest to lowest, are AA, A, B, and C. Those grades represent the tire’s ability to stop on wet pavement as measured under controlled conditions on specified government test surfaces of asphalt and concrete. A tire marked C may have poor traction performance.

**WARNING:** The traction grade assigned to this tire is based on straight-ahead braking traction tests, and does not include acceleration, cornering, hydroplaning, or peak traction characteristics.

**Temperature**

The temperature grades are A (the highest), B, and C, representing the tire’s resistance to the generation of heat and its ability to dissipate heat when tested under controlled conditions on a specified indoor laboratory test wheel. Sustained high temperature can cause the material of the tire to degenerate and reduce tire life, and excessive temperature can lead to sudden tire failure. The grade C corresponds to a level of performance which all passenger car tires must meet under the Federal Motor Vehicle Safety Standard No. 109. Grades B and A represent higher levels of performance on the laboratory test wheel than the minimum required by law.

**WARNING:** The temperature grade for this tire is established for a tire that is properly inflated and not overloaded. Excessive speed, underinflation, or excessive loading, either separately or in combination, can cause heat buildup and possible tire failure.
Testing of Readiness Codes

Your vehicle has "Readiness Codes" as part of the onboard self-diagnostic system. Some states refer to these codes as a test to see if your vehicle’s emissions components are working properly. The codes may not be read if you go through the test just after the battery has gone dead or been disconnected.

To check if they are set, turn the vehicle on without starting the engine. The malfunction indicator lamp will come on for several seconds. If it goes off, the readiness codes are set. If it blinks five times, the readiness codes are not set.

If you are required to have your vehicle tested before the readiness codes are set, prepare the vehicle for retesting by doing the following:
1. Fill the gas tank to approximately 3/4 full.
2. Park the vehicle and leave the engine off for 6 hours or more.
3. Make sure the ambient temperature is between 40°F and 95°F (4°C and 35°C).
4. Start the engine without touching the accelerator pedal, and let it idle for 20 seconds.
5. Keep the vehicle in Park (P). Increase the engine speed to 2,000 rpm, and hold it there for about 3 minutes.
6. Let the engine idle with your foot off the accelerator for 20 seconds.
7. Select a nearby, lightly traveled major highway where you can maintain a speed of 50 to 60 mph (80 to 97 km/h) for at least 20 minutes. Drive on the highway with the vehicle in Drive. Do not use cruise control. When traffic allows, drive for 90 seconds without using the accelerator pedal. (Vehicle speed may vary slightly; this is OK.) If you cannot do this for a continuous 90 seconds because of traffic conditions, drive for at least 30 seconds, then repeat two more times (for a total of 90 seconds).
8. Drive in city/suburban traffic for at least 10 minutes. When traffic conditions allow, let the vehicle coast for several seconds without using the accelerator pedal or the brake pedal.
9. Park the vehicle and leave the engine off for 30 minutes.

The readiness codes are erased when the battery is disconnected, and set again only after several days of driving under a variety of conditions.

If a testing facility determines that the readiness codes are not set, you may be requested to return at a later date to complete the test, or see your dealer.
Frequently Asked Questions/Troubleshooting
Below are some frequently asked questions and troubleshooting items that you may have about the vehicle.

Q: How do I set the vehicle clock?
A: For vehicles without navigation, see page 49. For vehicles with navigation, the time is automatically set using GPS signals.

Q: Why doesn’t the vehicle start when I press the ENGINE START/STOP button?
A: The brake pedal must be pressed to start the engine.

Q: What is the AUTO setting on my headlight lever?
A: When in the AUTO position, the vehicle’s exterior lights will automatically turn on or off depending on the ambient lighting.

Q: Only the driver’s door unlocks when I shift to Park (P). Can all doors unlock?
A: You can change door lock or unlock settings in the multi-information display using the Vehicle Settings menu (see page 29), or using the SETTINGS button (see page 48).

Q: Why won’t the driver’s door unlock when I grab the door handle, even though the keyless access remote is within range?
A: If you pull the handle too quickly, the system may not have time to confirm the door is unlocked. Wait to hear a beep to confirm the door is unlocked. If you are wearing gloves, the system may be slow to respond.

Q: After my battery was disconnected or went dead, the audio system is asking for a code. Where do I find this?
A: In most cases, you do not need to enter a code. Turn on the vehicle and the audio system, and press and hold the power button until the system reactivates.

Q: Every time I press the Talk button, the system gives me voice prompts. Can I turn these off?*
A: Press the SETTINGS button. Use the interface dial to select System Settings, and then Voice Prompt. Select Off.

Q: Why can’t I select an item using the interface dial?*
A: To prevent driver distraction, certain items are limited or inoperable while the vehicle is moving. Use voice commands or pull over to select the items.

Q: Where can I find the vehicle identification number (VIN)?
A: Check the label on the driver’s doorjamb.

Contact Us
Acura dealer personnel are trained professionals. They should be able to answer all your questions. If you encounter a problem that your dealership does not solve to your satisfaction, please discuss it with the dealership’s service manager or general manager. If you are dissatisfied with the decision made by the dealership’s management, contact Acura Client Relations/Services.

U.S. owners:
American Honda Motor Co., Inc.
Acura Client Relations
1919 Torrance Blvd.
Mail Stop 500-2N-7E
Torrance, CA 90501-2746
Tel: (800) 382-2238
In Puerto Rico and the U.S. Virgin Islands:
Bella International
P.O. Box 190816
San Juan, PR 00919-0816
Tel: (800) 382-2238

Canadian owners:
Honda Canada, Inc.

When you call or write, please give us the following information:
• Vehicle Identification Number
• Date of purchase
• Odometer reading of your vehicle
• Your name, address, and telephone number
• A detailed description of the problem
• Name of the dealer who sold the vehicle to you

*if equipped
Acura Total Luxury Care Roadside Assistance

Your Acura TLC Roadside Assistance representative is here to help you 24 hours a day, 7 days a week by calling (800) 594-8500 (U.S.) or (800) 565-7587 (Canada). Under your 4-year/50,000-mile (80,000-km) warranty, the following benefits are available:

- Towing services—full cost of towing to the closest Acura dealer
- Roadside assistance—jump starting, fuel delivery, lockout, and flat tire
- Trip planning—detailed trip routing, emergency services, and more

Warranty Coverages

Below is a brief summary of the warranties covering your new vehicle.

New Vehicle Limited Warranty: Covers your new vehicle, except for the emissions control system and accessories, against defects in materials and workmanship.

Emissions Control Systems Defects Warranty and Emissions Performance Warranty: Covers your vehicle's emissions control systems. Time, mileage, and coverage are conditional.

Seat Belt Limited Warranty: Covers seat belts that fail to function properly.

Rust Perforation Limited Warranty: Covers all exterior body panels that rust through from the inside.

Accessory Limited Warranty: Covers Acura accessories.

Replacement Parts Limited Warranty: Covers all Acura replacement parts against defects in materials and workmanship.

Replacement Battery Limited Warranty: Provides prorated coverage for a replacement battery purchased from an Acura dealer.

Replacement Muffler Lifetime Limited Warranty: Covers a replacement muffler for the duration of the ownership.

Restrictions and exclusions apply to all these warranties. See the Owner Information CD or visit owners.acura.com (U.S.) or www.myacura.ca (Canada) for complete descriptions of each warranty, including time, mileage, and other conditional limitations.

Your vehicle's original tires are covered by their manufacturer. Tire warranty information can be found on the Owner Information CD or owners.acura.com (U.S.) or www.myacura.ca (Canada).

Voice Command Index

Learn about all available voice commands to help you operate the vehicle. To view a list of available commands in the vehicle, press the INFO button and use the interface dial to select Voice Info. Select a category to hear the commands read aloud.

Voice Portal Commands

When you press the Talk button, the Voice Portal screen appears. Say one of the options, and follow the system prompts.

- Phone call
- Music search
- Voice help
- Navigation
- Audio

Navigation Commands

When you press the Talk button and say “Navigation,” you can say one of the options below. Follow the system prompts.

- Address (U.S. only)
- Place name (U.S. only)
- Find nearest POI category
- Go home
- Previous destination
- Address book
- Place phone number

Climate Control Commands

When you press the Talk button and say “Climate control,” you can say one of the options below. Follow the system prompts.

- Climate control automatic
- Climate control on*
- Climate control off*
- Air conditioner on*
- Air conditioner off*
- Defrost on*
- Defrost off*
- Fan speed up
- Fan speed down
- Fan speed # (#: 1 to 7)
- Temperature # (#: 57 to 87°F, 18 to 32°C) degrees
- Temperature up
- Temperature down
- Temperature max heat
- Temperature max cool
- Vent
- Dash and floor
- Floor vents
- Floor and defrost

Phone Commands

When you press the Talk button and say “Phone call,” you can say one of the options below. Follow the system prompts.

- Call/dial (contact name)
- Dial by number
- Redial
- Call history

*These commands toggle the function on and off, so the command may not match your intended action.
### Vehicles

When you press the Talk button and say “Audio,” you can say one of the options below. Follow the system prompts. Volume levels cannot be controlled using voice commands.
