Headlight Aiming

The headlights were properly aimed when your vehicle was new. If you regularly carry heavy items in the trunk or pull a trailer, readjustment may be required. Adjustments should be performed by your dealer or other qualified mechanic.

Replacing a Headlight Bulb

Your vehicle has two bulbs on each side, four in total. Make sure you are replacing the bulb that is burned out. Your vehicle uses halogen headlight bulbs. When replacing a bulb, handle it by its plastic case and protect the glass from contact with your skin or hard objects. If you touch the glass, clean it with denatured alcohol and a clean cloth.

NOTE: *Halogen headlight bulbs get very hot when lit. Oil, perspiration, or a scratch on the glass can cause the bulb to overheat and shatter.*

High Beam Headlight

1. Open the hood. To change a bulb on the passenger's side, undo the two fasteners and remove the air intake cover.

2. Remove the electrical connector from the bulb by squeezing the connector to unlock the tab, then slide the connector off the bulb.

3. Remove the bulb by turning it approximately one-quarter turn counterclockwise.

4. Install the new bulb, and turn it one-quarter turn clockwise to lock it in place.

Lights

5. Push the electrical connector onto the bulb.
6. Turn on the headlights to test the new bulb.
7. Reinstall the air intake cover. Reinstall the two fasteners and secure them by pushing on the heads until they lock.

Low Beam Headlight

1. To change the passenger's side bulb, start the engine, turn the steering wheel all the way to the left, and turn off the engine. To change the driver's side bulb, turn the steering wheel to the right.
2. Use a flat-tipped screwdriver to remove the two holding clips from the inner fender.

3. Pull the inner fender cover away from the fender and bumper.
4. Remove the bulb by turning it approximately one-quarter turn counterclockwise.
5. Remove the electrical connector from the bulb by squeezing the connector to unlock the tab, then slide the connector off the bulb.

6. Install the new bulb, and turn it one-quarter turn clockwise to lock it in place.
7. Push the electrical connector onto the bulb.
8. Turn on the headlights to test the new bulb.
9. Put the inner fender cover in place. Install the two holding clips. Lock each one in place by pushing on the center.

Replacing the Front Side Marker/ Turn Signal and Parking Light Bulb

1. To change the passenger's side bulb, start the engine, turn the steering wheel all the way to the left, and turn off the engine. To change the driver's side bulb, turn the steering wheel to the right.
2. Use a flat-tipped screwdriver to remove the two holding clips from the inner fender.

3. Pull the inner fender cover away from the fender and bumper.
4. Remove the socket from the headlight assembly by turning it one-quarter turn counterclockwise.

5. To remove the burned out bulb, push it in and turn it counterclockwise until it unlocks.
6. Install the new bulb and turn it clockwise to lock it in place.
7. Insert the socket into the headlight assembly. Turn it clockwise to lock it in place.
8. Test the new bulb to make sure it works.
9. Put the inner fender cover in place. Install and lock each holding clip by pushing on the center.

Replacing Rear Turn Signal Light Bulbs

1. Open the trunk.
2. Remove the holding clips from the lining by using a flat-tipped screwdriver.

3. Remove the socket by turning it one-quarter turn counterclockwise, and pull the bulb straight out of its socket.
4. Push a new bulb straight into the socket until it bottoms, and reinstall the socket into the light assembly by turning it clockwise until it locks.
5. Test the new bulb to make sure it works.
6. Set the lining back.
