

Cruise Control

Cruise control allows you to maintain a set speed above 25 mph (40 km/h) without keeping your foot on the accelerator pedal. It is not recommended for conditions such as city driving, winding roads, slippery roads, heavy rain, or bad weather. You should have full control of the car under those conditions.

⚠ WARNING Improper use of the cruise control can lead to a crash. Use the cruise control only when traveling on open highways in good weather.

CAUTION: The cruise control, as it operates, moves the accelerator pedal. You can damage your car's accelerator mechanism by resting your foot under the pedal and blocking the movement.

To Set the Cruise Control:

Push the CRUISE CONTROL master switch to the left of the steering column. The indicator switch will light.

Accelerate to the desired cruising speed above 25 mph (40 km/h). Press and hold the SET/decel button on the steering wheel until the CRUISE CONTROL light on the instrument panel comes on.

This shows the system is now activated. The set speed may vary slightly, particularly on hills.

To Change the Set Speed:

To increase the set cruising speed:

- Press and hold the RESUME/ accel button. The car will accelerate slowly. Release the button when the desired speed is reached.
- Push on the accelerator pedal. Accelerate to the desired cruising speed and press the SET/decel button.

Cruise Control

To decrease the set cruising speed:

- Press and hold the SET/decel button. The car will decelerate. Release the button when the desired speed is reached.
- Tap the brake or clutch pedal lightly with your foot. The CRUISE CONTROL light on the instrument panel will go out. When the car slows to the desired speed, press the SET/decel button. The car will then maintain the desired speed.

Even with the cruise control turned on, you can still use the accelerator pedal to speed up for passing. After completing the pass, take your foot off the accelerator pedal. The car will return to the set cruising speed.

Resting your foot on the brake or the clutch pedal will cause the cruise control to cancel.

To Cancel the Cruise Control:

Any of these actions cause the cruise control to cancel.

- Tap the brake or clutch pedal.
- Press the SET/decel and RESUME/accel buttons at the same time.
- Press the Cruise Control Master Switch.

When you tap the brake or clutch pedal, or press the SET and RESUME buttons at the same time, the CRUISE CONTROL light on the instrument panel will go out and the car will begin to slow down. You can use the accelerator pedal in the normal way.

If you use the brake or clutch pedal to cancel cruise control, the system retains the previously-set cruising speed. To return to that speed, accelerate to above 25 mph (40 km/h) and press the RESUME/accel button until the CRUISE CONTROL light comes on. The car will accelerate to the same cruising speed as before.

If you cancel the CRUISE CONTROL by pressing the SET and RESUME buttons at the same time, the previously-set cruising speed is erased. To use the cruise control, accelerate to the desired cruising speed and press the SET/decel button.

Pressing the Cruise Control Master Switch turns the system completely off and erases the previous cruising speed from memory. To use the system again, see page [55](#).

Hood and Parking Brake

Hood

To release the hood latch, pull back on the handle located under the dash on the driver's side.

The hood latch is spring-loaded, so the hood will pop up slightly. Release the safety catch under the front center of the hood by pushing the rubber-tipped handle up. Lift the hood and prop it open with the support rod. To close, take the support rod down, place it back in its holder, lower the hood until it is approximately one foot (30 cm) from the closed position, then let it drop. Be sure the hood is securely latched before driving away.

Parking Brake

To apply the parking brake, pull up on the lever. To release it, pull up slightly, push the button, and lower the lever; when fully released, the BRAKE(US cars), or  (Canadian cars) warning light will go out.

Power Windows

The power windows can be operated when the ignition switch is in the "I" position.

The operation of the windows is controlled by the main switch located in the master control panel on the arm rest of the driver's door. When the main switch is off, only the driver's door window can be opened and closed. When the main switch is on, all door windows can be opened and closed by the driver, using the appropriate switch in the master control panel, and the passenger windows can be opened and closed by the passengers, using the switch located on each passenger door.

When opening or closing a window, push and hold either the "up" or "down" side of the switch until the window reaches the desired position, then release.

NOTE: The driver's window can be opened fully, without the driver having to hold the switch down, simply by pushing the switch past the first "stop."

PASSENGER'S WINDOW

Power Window Key-Off Operation

The power windows can still be operated for about 10 minutes after the ignition is turned from the "I I" to the "I" or "0" position as long as neither front door has been opened.

WARNING

- Be sure, before closing any windows, that all hands, arms and other obstructions are clear of the window frame and glass; severe personal injury could result.
- Always keep the main switch in the off position when children are in the car; injury may result from unintentional window operation.

Glove Box and Clock

Glove Box

Open by pulling the handle. Close with a firm push.

The glove box door can be locked by using the master key or the remote access key (US: EX, Canada: EX-R). The glove box light will go on when the glove box door is opened and the headlights or parking lights are on.

⚠ WARNING Do not drive the car with the glove box door open; it could cause injury in an accident.

Digital Clock

The time is displayed continuously when the ignition is switched to "I" or "II" position. At all other times, push in on the lid to display the time.

To adjust the time with the key in the "I" position:

1. Lower the lid.
2. Push the minute (M) button and hold it until the numbers advance to the desired minutes.
3. Push the hour (H) button and hold it until the numbers advance to the desired hour.
4. The RESET button allows you to synchronize your clock to the closest hour. If the time on the clock is before the half hour, pressing the RESET button will return the time to the previous hour. If the time is beyond the half hour, the RESET button will change the time to the next hour.

NOTE: Be careful not to push the H, M, or RESET buttons accidentally. Pushing any of them will change the clock's time setting.

Beverage Holder

Your car is equipped with a beverage holder for use while the car is stopped. Drinking while driving or driving with a beverage in the holder may be hazardous. To open the beverage holder, push on the tray. Do not pull the tray, it will damage the mechanism.

NOTE: Use only lidded cups or containers that fit snugly in the beverage holder.

⚠ WARNING

- **Spilling even a small amount while driving, especially if the liquid is hot, may distract the driver's attention from the road and could result in a serious collision.**
- **Alcohol and driving don't mix. For your safety, and the safety of others, do not drink and drive.**

Cigarette Lighter and Ashtrays

Cigarette Lighter

With the ignition in the "II" or "III" position, push the lighter in to heat it up. The lighter will automatically release when the element is hot. **DO NOT** hold the lighter in while it is heating up, it may overheat and damage the lighter and the heating element.

Front Ashtray

Open the ashtray by pulling its bottom edge toward you. To remove it, pull it out further while pushing down on the spring-loaded plate inside.

Rear Ashtray

The rear ashtray is located at the rear of the center console. It is opened by pulling out the top edge. To remove it, open the ashtray and release its bottom edge by pulling up, then out. To install, reverse the removal procedure.

To remove, pull up and out.

CAUTION: Do not use the ashtrays as trash containers; use them only for extinguished cigarettes. Putting lit cigarettes or matches in an ashtray with other combustible materials may cause a fire.
