Operating the CD Changer
EX and Touring models
Your audio system has an in-dash CD changer that holds up to six CDs, providing several hours of continuous entertainment. You operate this CD changer with the same controls used for the radio.
To load CDs or operate the CD changer, the ignition switch must be in the ACCESSORY (I) or ON (II) position.

NOTICE

Do not use CDs with adhesive labels. The label can curl up and cause the CD to jam in the unit.
On vehicles with navigation system
The CD changer is behind the navigation system screen. To use the CD changer, press the OPEN button beside the screen. The screen folds back, and the CD changer appears.

OPEN BUTTON

To return the screen to the upright position, press the OPEN button again. Do not use the folded screen as a tray. If you put a cup, for example, on the screen, the liquid inside the cup may spill on the screen when you go over a bump.

Loading CDs in the Changer
On vehicles with navigation system

LOAD BUTTON   **LOAD INDICATOR**

To load multiple CDs in one operation:

1. Press and hold the LOAD button beside the CD slot until you see "LOADING" in the display, then release the button.

Features

2. The indicators above the Disc buttons of the empty positions will blink, and the green load indicator above the CD slot comes on.

3. Insert a CD into the CD slot. Insert it only about halfway; the drive will pull it in the rest of the way. You will see "BUSY" in the display. The CD load indicator turns red and blinks as the CD is loaded.

4. When LOADING appears again in the display, insert the next CD into the CD slot.

5. Repeat this until all six positions are loaded. The system will then begin playing the first CD loaded.

If you stop loading CDs before all six positions are filled, the system will wait for 10 seconds, then stop the load operation and begin playing the last CD loaded.

To load a single CD:

1. Press and release the LOAD button.

2. The indicators above the Disc buttons of the empty positions will blink, and the green CD load indicator comes on. When you see "LOAD" in the display, insert the disc into the CD slot. Insert it only about halfway; the drive will pull it in the rest of the way.

3. The system will load the CD, and begin playing it.

If you press the LOAD button while a CD is playing, the system will stop playing that CD and start the loading sequence. It will then play the CD just loaded.

You can also load a CD into an empty position while a CD is playing by pressing the appropriate Disc button. Select an empty Disc button (the indicator above the button is off), and press the button. The system will stop playing the current CD and start the loading sequence. It will then play the CD just loaded.

On vehicles without navigation system
To load multiple CDs in one operation:

1. Press and hold the Load button until you hear a beep and see "LOAD" in the display, then release the button.

2. On the upper right side of the display, the disc number for an empty position will begin blinking and the green CD load indicator will come on.

3. Insert the CD into the CD slot. Insert it only about halfway; the drive will pull it in the rest of the way. You will see "BUSY" in the display. The CD Loaded indicator turns red and blinks as the CD is loaded.

4. When LOAd appears again in the display, insert the next CD into the CD slot.

5. Repeat this until all six positions are loaded. The system will then begin playing last CD loaded.

If you are not loading CDs into all six positions, press the LOAD button again after the last CD has loaded. The system will begin playing the last CD loaded.

If you stop loading CDs before all six positions are filled, the system will wait for ten seconds, then stop the load operation and begin playing the last CD loaded.

To load a single CD:

1. Press and release the LOAD button.

2. When the disc number for an empty position starts to blink and the green CD load indicator comes on, you will see LOAD in the display. Insert the disc into the CD slot. Insert it only about halfway, the drive will pull it in the rest of the way.

3. The system will load the CD, and begin playing it.

Features

Playing a CD, CD Changer

To Play a CD
Select the CD changer by pressing the CD button. You will see "CD" in the display. The system will begin playing the last selected disc in the CD changer. You will see the disc and track numbers displayed.

When that CD ends, the next CD in the CD changer is loaded and played. After the last CD finishes, the system returns to CD 1.

To select a different CD, press the appropriate preset button (1 — 6). If you select an empty position in the CD changer, the system will go into the loading sequence.

You can use the SKIP bar while a disc is playing to select passages and change tracks.

To move rapidly within a track, press and hold the — or + side of the SKIP bar. You will hear a beep and the system will continue to move through the track. Press the + side of the SKIP bar to move forward, or the — side to move backward. Release the bar when the system reaches the point you want.

On models with a rear entertainment system and a navigation system, you cannot listen to a disc and XM Radio at the same time. For example, when a disc is playing on the front speakers, you cannot listen to XM Radio on the rear speakers, or vice versa.

To Change Tracks
Each time you press the + side of the SKIP bar, the system skips forward to the beginning of the next track. Press and release the — side to skip backward to the beginning of the current track. Press it again to skip to the beginning of the previous track.

On vehicles with navigation system
REPEAT — To activate the repeat feature, press and release the RPT button. You will see RPT in the display as a reminder. The system continuously replays the current track. Press the RPT button again to turn it off. Pressing either side of the SKIP bar also turns off the repeat feature.

RANDOM PLAY — This feature, when activated, plays the tracks within a CD in random order, rather than in the order they are recorded on the CD. To activate random play, press the RDM button. You will see RDM in the display. The system will then select and play tracks randomly. This continues until you deactivate random play by pressing the RDM button again, or you select a different CD with a preset button.

On vehicles with navigation system
Track Scan
When you press the SCAN button or touch the TRACK SCAN icon on the upper display, the first track of the current disc plays for about 10 seconds. You will see SCAN in the upper display and in the audio display. To hear the rest of the track, press the SCAN button or touch the TRACK SCAN icon again within 10 seconds. If you don't, the system advances to the next track, plays about 10 seconds of it, and continues through the rest of the tracks the same way.

Disc Scan
When you press and hold the SCAN button until you see D-Scan in the display, or when you touch the DISC SCAN icon on the upper display, the first track of the current CD plays for about 10 seconds. You will see D-SCAN in the display and DISC SCAN in the upper display. To hear the rest of the CD, press the SCAN button or touch the DISC SCAN icon again, within 10 seconds. If you don't, the system advances to the next disc, plays about 10 seconds of it, and continues throughout the rest of the CDs the same way. When the system reaches the last disc, DISC SCAN is cancelled, and the CD plays normally.

Track Repeat
When you press and release the RPT button or touch the TRACK RPT icon on the upper display, the system continuously replays the current track. As a reminder, you will see REPEAT (TRACK REPEAT) in the display. To turn this feature off, press the RPT button, or touch the TRACK REPEAT icon again.

Disc Repeat
When you press and hold the RPT button until REPEAT is in the display, or when you touch the DISC RPT icon on the audio display, the system continuously replays the current disc. As a reminder, you will see D-RPT (DISC RPT) in the display.

Features

Playing a CD, CD Changer

Random Play
When you press the RDM button or touch the TRACK RANDOM icon on the upper display, the system plays the tracks of the current disc in random order. You will see RANDOM (TRACK RANDOM) in the display. To turn this feature off, press the RDM button (touch TRACK RANDOM) again. Operation of TRACK SCAN, DISC SCAN, TRACK REPEAT, DISC REPEAT, and TRACK RANDOM on the upper display is possible only when the audio display is in the upright position.

To Stop Playing a Disc
To take the system out of CD mode, press the AM/FM button or SAT RADIO button (U.S. models). Each time you press the AM/FM button, the system changes to the next mode (AM, FM1, or FM2). When you return to CD mode by pressing the CD button, play will continue

where it left off.

If you turn the system off while a CD is playing, either with the PWR/VOL knob or the ignition switch, play will continue at the same point when you turn it back on.

Removing CDs from the Changer
To remove the disc that is currently playing, press the eject button. You will see "EJECT" in the display. When you remove the disc from the slot, the system automatically begins the load sequence so you can load another disc in that position. If you do not load another CD, within 15 seconds, the system selects the previous mode [AM, FM1, FM2, or XM Radio (U.S. models)].

If you do not remove the CD from the slot, the system will reload the CD after 15 seconds and put the CD changer in pause mode. To begin playing the CD, press the CD button.

To remove the disc from the changer, first select it by pressing the appropriate disc button or corresponding number on the preset button. When that disc begins playing, press the eject button.

When you press the eject button while listening to the radio, or with the audio system turned off, the disc that was last selected is ejected. After that disc is ejected, pressing the eject button again will eject the next disc in numerical order. By doing this six times, you can remove all the discs from the changer.

You can also eject discs when the ignition switch is on or off:

To eject one disc, press and release the eject button.

To eject all discs, press and hold the eject button until the indicators above the disc buttons blink.

General Information
- When using CD-R discs, use only high quality CDs labeled for audio use.

- When recording a CD-R, the recording must be closed for it to be used.

- CD-RW discs will not work in this unit.

- Play only standard round CDs. Odd-shaped CDs may jam in the drive or cause other problems.

- Handle your CDs properly to prevent damage and skipping.

Protecting CDs
When a CD is not being played, store it in its case to protect it from dust and other contamination. To prevent warpage, keep CDs out of direct sunlight and extreme heat.

To clean a CD, use a clean soft cloth. Wipe across the CD from the center to the outside edge.

A new CD may be rough on the inner and outer edges. The small plastic pieces causing this roughness can flake off and fall on the re-cording surface of the CD, causing skipping or other problems. Remove these pieces by rubbing the inner and outer edges with the side of a pencil or pen.

Never try to insert foreign objects in the CD player or the CD changer.

Handle a CD by its edges; never touch either surface. Do not place stabilizer rings or labels on the CD. These, along with contamination from fingerprints, liquids, and felt-tip pens, can cause the CD to not play properly, or possibly jam in the drive.
