

Controls Near the Steering Wheel

* : To use the horn, press the center pad of the steering wheel.

1. MIST
2. OFF
3. INT – Intermittent
4. LO – Low speed
5. HI – High speed
6. Windshield Washers

Push the right lever up or down to select a position.

MIST – The wipers run at high speed until you release the lever.

OFF – The wipers are not activated.

INT – The length of the wiper interval is varied automatically according to the vehicle's speed. Vary the delay by turning the INT TIME ring. If you turn it to the shortest delay, the wipers will change to low speed operation when the vehicle speed exceeds 12 mph (20 km/h).

LO – The wipers run at low speed.

HI – The wipers run at high speed.

Windshield Washers – Pull the wiper control lever toward you and hold it. The washers spray until you release the lever. The wipers run at low speed, then complete one more sweep after you release the lever.

Turn Signal and Headlights

1. Turn Signal
2. Off
3. Parking and instrument panel
4. Headlights on
5. Fog lights off (U.S. models)
6. Fog lights on (U.S. models)
7. High beams
8. Flash high beams

Turn Signal — Push down on the left lever to signal a left turn and up to signal a right turn. To signal a lane change, push lightly on the lever and hold it. The lever will return to center when you release it or complete a turn.

Headlights — The rotating switch on the left lever controls the lights. Turning this switch to the “ ” position turns on the parking lights, taillights, instrument panel lights, side-marker lights, and rear license plate lights. Turning the switch to the “ ” position turns on the headlights. If you leave the lights on with the key removed from the ignition switch, you will hear a reminder tone when you open the driver’s door.

High Beams — To switch from low beams to high beams, push the left lever forward until you hear a click. The blue high beam indicator will come on (see page 63). Pull it back to return to low beams. To flash the high beams, pull the lever back lightly, then release it. The high beams will stay on as long as you hold the lever back.

Daytime Running Lights

Canadian models only

With the headlight switch off, the daytime running lights come on when you turn the ignition switch to ON (II) and release the parking brake. They remain on until you turn the ignition off, even if you set the parking brake.

Fog Lights

U.S. models only

Turn the fog lights on and off by turning the switch next to the headlight switch.

You can use the fog lights only when the headlights are on low beam.

Instrument Panel Brightness

Adjust the brightness of the instrument panel by pressing the - or + side of the adjustment button. Press + to increase the brightness and - to decrease it. You can adjust the brightness with the headlight switch on or off.

The level of brightness is shown on the multi-information display while you adjust it. It goes out 5 seconds after you finish adjusting.

To reduce glare at night, the instrument panel illumination dims when you turn the light switch to  or . Pressing the MAX button will bring it to the maximum level.

Automatic Lighting Off, Hazard Warning Button

Automatic Lighting Off Feature

The automatic lighting off feature turns off the headlights, all other exterior lights, and the instrument panel lights within 15 seconds of removing the key from the ignition switch and closing the driver's door.

You can change this 15 second timer to 0, 30, or 60 seconds (see page 77).

The automatic lighting off feature activates if you leave the headlight switch in the “ ” or “ ” position, remove the key, open, then close the driver's door.

If you remove the key from the ignition switch with the headlight switch on, but do not open the door and get out, the lights will turn off after 10 minutes.

The lights will turn on again when you unlock or open the driver's door. If you unlock the door, but do not open it within 15 seconds, the lights will go off. With the driver's door open, you will hear a lights-on reminder chime.

Hazard Warning Button

Push the button between the center vents to turn on the hazard warning lights (four-way flashers). This causes all four outside turn signals and both indicators in the instrument panel to flash. Use the hazard warning lights if you need to park in a dangerous area near heavy traffic, or if your vehicle is disabled.

The rear window defogger clears fog, frost, and thin ice from the window. Push the defogger button to turn it on and off. The indicator in the button comes on to show the defogger is on. If you do not turn it off, the defogger will shut itself off after about 15 minutes. It also shuts off when you turn off the ignition. You have to turn it on again when you restart the vehicle.

Make sure the rear window is clear and you have good visibility before starting to drive.

The defogger and antenna wires on the inside of the rear window can be accidentally damaged. When cleaning the glass, always wipe side to side.
