

Disc Player Error Messages

If you see an error message in the display while playing a CD, find the cause in the chart to the right. If you cannot clear the error message, take the vehicle to your dealer.

LX models

Error Message	Cause	Solution
CD DISC	FOCUS Error	Press the EJECT button and pull out the CD. Check if it is inserted correctly in the CD player. Make sure the CD is not scratched or damaged.
CD ERR	Mechanical Error, or a DVD has been loaded in the CD player	Press the EJECT button and pull out the CD. Check the CD for damage or deformation. If the CD cannot be pulled out, or the error message does not disappear after the CD is ejected, see your dealer.
CD HOT	High Temperature	Will disappear when the temperature returns to normal.

EX and EX-L models

Error Message	Cause	Solution
CD DISC ERROR	FOCUS Error	Press the EJECT button and pull out the CD. Check if it is inserted correctly in the CD player. Make sure the CD is not scratched or damaged.
CD MECH ERROR	Mechanical Error, or a DVD has been loaded in the CD player	Press the EJECT button and pull out the CD. Check the CD for damage or deformation. If the CD cannot be pulled out, or the error message does not disappear after the CD is ejected, see your dealer.
CD HEAT ERROR	High Temperature	Will disappear when the temperature returns to normal.

Disc Changer Error Messages

If you see an error message in the display while playing a CD, find the cause in the chart to the right. If you cannot clear the error message, take the vehicle to your dealer.

Optional on LX models

Error Message	Cause	Solution
CD DISC	FOCUS Error	Press the magazine EJECT button and pull it out. Check for an error message, and insert the magazine again. If the message does not disappear or the magazine cannot be pulled out, see your dealer.
	No CD in the CD magazine	Insert a CD.
CD ERR	Mechanical Error	Press the magazine EJECT button and pull it out. Check for an error message and insert the magazine again. If the message does not disappear or the magazine cannot be pulled out, see your dealer.
CD HOT	High Temperature	This message should disappear when the temperature returns to normal.
CD EJECT	No CD magazine in the CD changer.	Insert the CD magazine.

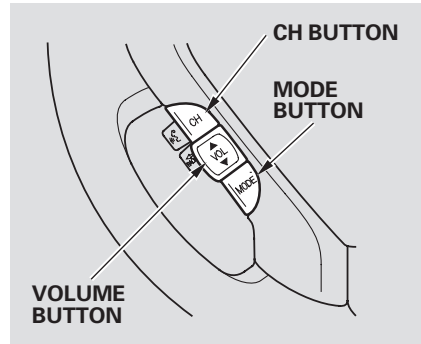

Remote Audio Controls

Three controls for the audio system are mounted in the steering wheel hub. These let you control basic functions without removing your hand from the wheel.

The middle button adjusts the volume. Press the top or bottom of the button and hold it until the desired volume is reached, then release it.

The CH button has three functions, depending on whether you are listening to the radio, or playing a CD.

The MODE button changes the audio mode between FM1, FM2, AM, XM, CD, and DVD/AUX (if a disc is inserted).

If you are playing a CD, use the CH button to skip to the beginning of the next track. You will see the CD and track number in the display.

If you are listening to the radio, use the CH button to go to the next preset station. You will see the number of the preset button in the display. To change bands, press the AM/FM button.

On EX and EX-L models

Your vehicle's audio system will disable itself if it is disconnected from electrical power for any reason. To make it work again, you must enter a specific five-digit code in the preset buttons. Because there are hundreds of number combinations possible from five-digits, making the system work without knowing the exact code is nearly impossible.

You should have received a card that lists your audio system code number and serial number. It is best to store this card in a safe place at home. In addition, you should write the audio system's serial number in this owner's manual.

If you lose the card, you must obtain the code number from a dealer. To do this, you will need the system's serial number.

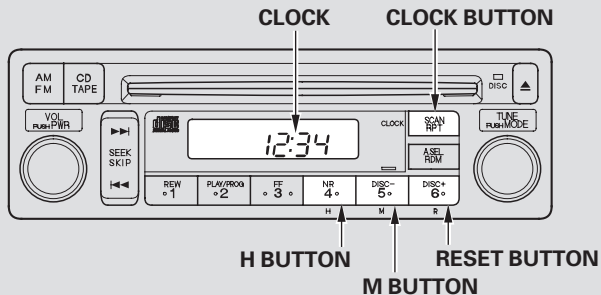

If your vehicle's battery is disconnected or goes dead, or the radio fuse is removed, the audio system will disable itself. If this happens, you will see "ENTER CODE" in the frequency display the next time you turn on the system. Use the preset buttons (icons on vehicles with navigation system) to enter the code. The code is on the radio code card included in your owner's manual kit. When it is entered correctly, the radio will start playing.

If you make a mistake entering the code, do not start over; complete the sequence, then enter the correct code. You have ten tries to enter the correct code. If you are unsuccessful in ten attempts, you must then leave the system on for 1 hour before trying again.

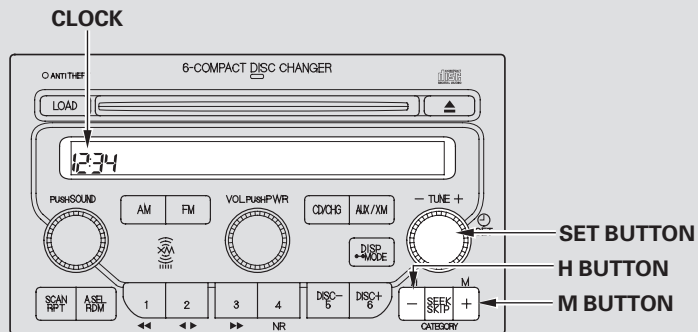

You will have to store your favorite stations in the preset buttons after the system begins working. Your original settings were lost when the power was disconnected.

Setting the Clock

LX models

EX and EX-L models

If your vehicle's battery is disconnected or goes dead, you will need to set the clock.

LX models

Press and hold the CLOCK (SCAN/RPT) button. Change the hours by pressing the H (preset 4) button until the numbers advance to the desired time. Change the minutes by pressing the M (preset 5) button until the numbers advance to the desired time. When you are finished, release the CLOCK button.

You can quickly set the time to the nearest hour. If the displayed time is before the half hour, pressing and holding the clock button, then pressing the RESET (preset 6) button sets the clock back to the previous hour. If the displayed time is after the half hour, the clock sets forward to the beginning of the next hour.

For example: 1:06 will reset to 1:00
1:52 will reset to 2:00

EX and EX-L models

The display shows the time when the ignition is in the ACCESSORY (I) or the ON (II) position.

Press and hold the SET (TUNE) button until the numbers flash.

Change the hours by pressing the H (–) button until the numbers advance to the desired time. Change the minutes by pressing the M (+) button until the numbers advance to the desired time. When you are finished, press the SET button again.

On models with Navigation System

Refer to the Navigation system manual for how to adjust the time.
