

## Additional High-Strength-Steel Welding Wire Approved

American Honda has now approved the following high-strength-steel welding wire:

- Titan Technology EQ-5029X96
- Washington Alloy Eagle-Arc 980X

This now gives you three approved options for use in Honda vehicles.

Product Name	Supplier	Contact Info
Bohler Union X96	Pro Spot	<a href="https://prospot.com">https://prospot.com</a>
	Honda Snap-on	<a href="https://honda.snapon.com">https://honda.snapon.com</a>
Titan Technology EQ-5029X96	Equip Automotive	<a href="http://www.equipmyshop.com">www.equipmyshop.com</a> or call <b>(866) 362-4400</b>
Washington Alloy Eagle-Arc 980X	Available at most welding supply locations	N/A

### NOTE

Bosch DS980J has been discontinued, but can still be used.

All three options have a wire size of **0.8 mm (0.030 inch)** in diameter and are used for welding joints in high-strength-steel of **590 MPa** and higher. You can also use them for welding lower grade steel but are not necessary to provide the required strength.
